Lancaster Farming

Serving The Central and Southeastern Pennsylvania Areas - Also Maryland, New Jersey and Delaware

VOL. ~~28 No. 52~~ 24 No 1 | Lancaster Farming, Saturday, November 4, 1978 | $6.00 Per Year

Special weather forecasts coming to southcentral Pa.

WASHINGTON, D.C. - The National Weather Service will begin round-the-clock broadcasting of weather information in the south-central Pennsylvania region in early December.

The broadcast service will utilize the Blue Mountain tower of WITF-TV located near Harrisburg. According to the National Weather Service, the broadcast radius will be approximately 40 miles.

The service will also be a way to obtain advance notice of possible flash flooding or tornadoes and other severe weather conditions necessitating citizen preparedness.

Ciivil defense personnel and our firemen will find it of major assistance in aiding them to know ahead of time

Prices down this week on market hogs

By KENDACE BORRY

LITITZ — Hog prices started generally down this week, with the auction at New Holland on October 30 finding the barrows and gilts $2.50 to $2.75 lower than the prices reported at that auction a week ago.

The Lancaster Stockyards' Monday market too found hog prices generally lower than those reported last week, but the prices rose again at the Wednesday auction.

At New Holland, with 1688 hogs reported, U.S. No. 1 and 2 hogs weighing 195 to 250 pounds brought $51.60 to $52.50; with a few U.S. No. 1 hogs, weighing 205 to 245 pounds going for $52.25 tp $53.25.

Last Monday at the New Holland Sales Stables, U.S. No. 1 and 2 hogs weighing 200 to 245 pounds were bringing $54.25-55.00, with a few U.S. 200 to 240 pounds selling for $55.10-56.00.

On Monday at the Lancaster Hog Market, barrows and gilts were reported $1.50 to $2.00 lower than the

50th Anniversary celebration continues

Pennsylvania FFA'ers journey to nat'l. convention

HARRISBURG — When the National FFA Convention gets underway in Kansas City next week, Pennsylvania will be well represented. Some of the individuals, chapters, and teams who'll be making the trip are featured in this week's edition of **Lancaster Farming.**

Among those who will go to Kansas City are the American Farmer Degree recipients. The American Farmer Degree is the highest distinction FFA members can hope to attain. This year, 22 young Pennsylvanians will receive that honor, with 17 of them coming from **Lancaster Farming**'s immediate coverage area.

One of the schools in the area - Kutztown High School - is having three of its FFA members honored with the prestigious degree. They are Kevin Hertzog, Jeffrey Miller and Dale Siegfried. Their recognition as American Farmers marks the first time ever that three young men were honored from the same Pennsylvania school in one year.

One of the other more successful chapters in the American Farmer Degree category is Solanco High School, Quarryville. Eleven members of their chapter have received that coveted award in the past 10 years.

The Keystone State will also be represented by 20 FFA teams, with four of those teams coming from Lancaster County's Manor

Lancaster poultrymen to protect their interests

By DIETER KRIEG

STRASBURG — An estimated 440 members and guests of the Lancaster County Poultry Association heard a plea for continued support of the association and involvement in local governmental affairs from Lancaster County Agent Jay Irwin on Thursday night. The occasion was the annual dinner meeting, held here at the Historic Strasburg Restaurant.

Citing the recent case in southern Lancaster County where a young poultrymen was taken to court by neighbors for wanting to construct a broiler house, Irwin explained that such happenings could take place to anyone, anywhere. To prevent such occurrences, he urged that each farmer understand the zoning regulations, and to become involved before someone else "dictates" to them.

Irwin, who was subpoenaed by the Lancaster

4-H'ers honored at Lanc. Co. dairy banquet

By SALLY BAIR
Staff Writer

SMOKETOWN - Connie Balmer, a veteran of seven years of 4-H work, received the top project award at the annual Lancaster County 4-H Dairy Banquet held Thursday night at Good and Plenty Restaurant, Smoketown. Connie, 16, is the daughter of Mr. and Mrs. Jesse G. Balmer, Lititz, and is a member of the Guernsey 4-H Dairy Club.

Connie's project book was selected over the best representatives in each of the five dairy breeds. In making the presentation, 4-H Leader Milton Brubaker emphasized that the project award represents "what the child can do for himself, not the type of animal he has to show." He said scores are based on health, feeding, financial and production records as well as the

PACMA Fowl

PACMA-FACTS

The following market is supplied by PACMA-FACTS, a direct marketing organization affiliated with the Pennsylvania Farmers' Association. Participating poultrymen are members of PACMA, which employs a fowl marketing agent, The Farmers' Agricultural Cooperative Trading Society (FACT) - to sell members' fowl. PACMA works directly with the PFA poultrymen in the program.

Farm point prices prevailing for fowl to be marketed by members during the week of October 30 were 1½ plant, 9½ farm.

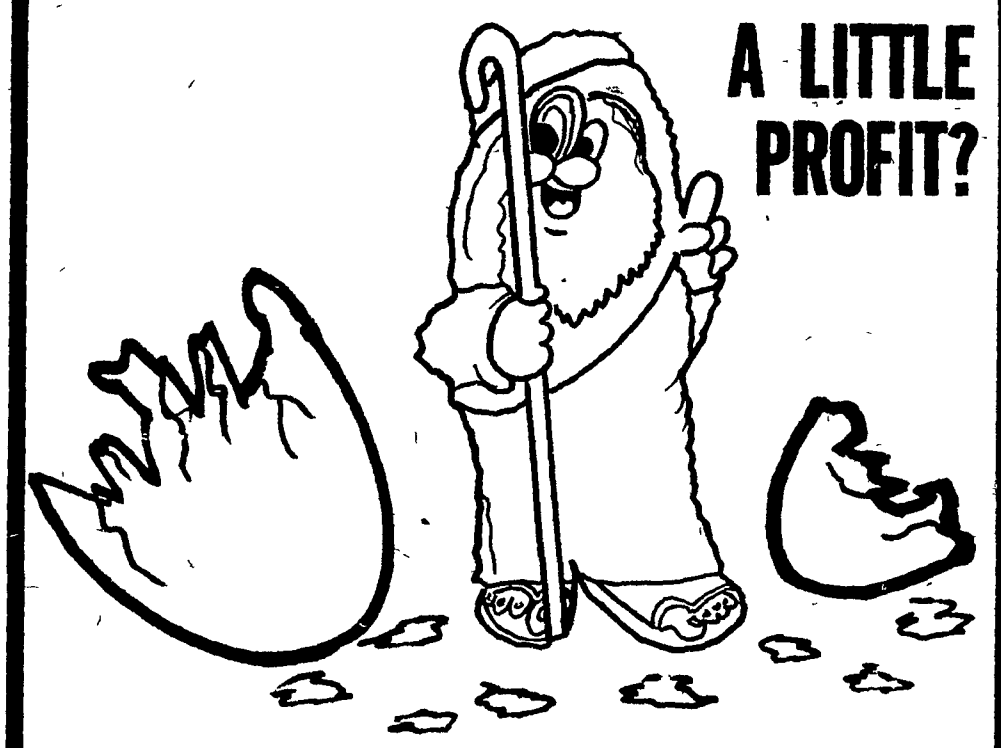
CAN WE HATCH YOU A LITTLE PROFIT?



Look at it this way —
The profit potential of your laying flock starts when the pullets are hatched.
Order DEKALB chicks from Moyer's Chicks and you're off to a profitable beginning.

Moyer's CHICKS, INC.
DEKALB BROWN & WHITE EGG LAYERS
Quakertown, PA 18951
(215) 536-3155
HUBBARD WHITE MT. BROILERS

From chick to cage, we formulate feeds and feeding programs with your profit in mind.

Do you have an open mind?

Are you ready to devote an hour or two of your time *planning* for a more profitable future?

If your answer to both questions is yes, you owe it to yourself to read what we have to say.

Unlike many other feed companies, we develop *custom* feeding programs for each individual operation.

It all starts with a Pennfield man reviewing your operation with you. Your goals. Your records. The health and overall condition of your birds. Whether you grow chicks or buy started pullets. The type of equipment you use. The production potential of your flock. Your management practices. And other factors that have an effect on your profit potential.

With the aid of computers, we then design a feeding program specifically tailored to *your* birds needs—a program that can improve your profits by reducing expenses, increasing production, or both.

For example, when we recommended producers switch from a competitive 18% protein feed to an optimum-nutrient density Pennfield feed, there was no loss in production—and this one recommendation has saved as much as $12,000 a year depending on flock size.

There is no cost—or obligation—for this unique service. But you must take the first step by writing or phoning us. Do it today.

Pennfield Feeds, 711 Rohrerstown Rd., Lancaster, PA 17604. Local calls: Lancaster 299-2561, Red Lion 244-4511. In 717 and 215 areas dial toll free 800-732-0467.

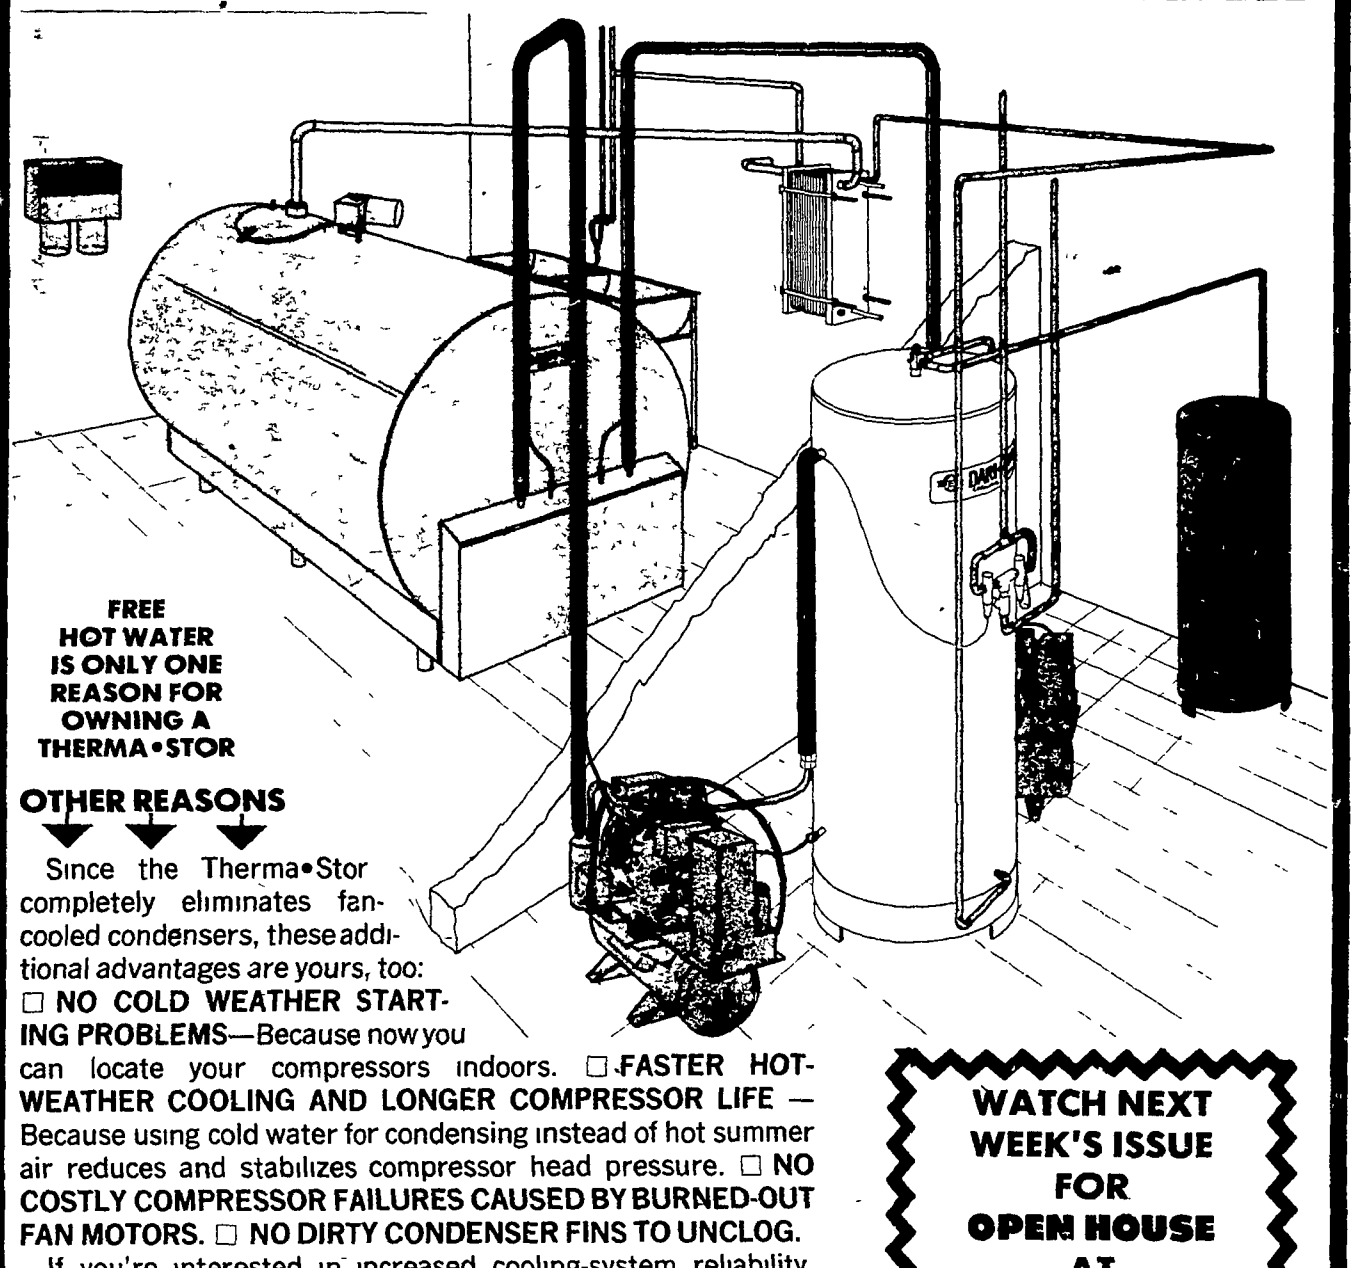
DUAL-TEMP

THERMA•STOR by DARI•KOOL

PRICE INCREASES AFFECT US ALL . . .
DON'T LET THEM CATCH YOU!!!
ORDER YOUR THERMA•STOR BEFORE NOVEMBER 17th.



FREE HOT WATER IS ONLY ONE REASON FOR OWNING A THERMA•STOR

OTHER REASONS

Since the Therma•Stor completely eliminates fan-cooled condensers, these additional advantages are yours, too: ☐ NO COLD WEATHER STARTING PROBLEMS—Because now you can locate your compressors indoors. ☐ FASTER HOT-WEATHER COOLING AND LONGER COMPRESSOR LIFE — Because using cold water for condensing instead of hot summer air reduces and stabilizes compressor head pressure. ☐ NO COSTLY COMPRESSOR FAILURES CAUSED BY BURNED-OUT FAN MOTORS. ☐ NO DIRTY CONDENSER FINS TO UNCLOG.

If you're interested in increased cooling-system reliability, better performance, less maintenance and repair—and FREE HOT WATER—you can get it all by owning a Therma•Stor And it all adds up to lower expenses and higher profits.

EDITORIAL COMMENTS By DIETER KRIEG, EDITOR

Farmers' interests deserve more attention

Some good news has been coming out of several meetings, newspapers, broadcasts, and information bureaus in recent weeks. They're worthy of note and even praise.

Topping the list is the increased concern and involvement by Pennsylvania farmers on the issue of agricultural zoning and land use. A meeting on those issues was held at the Lancaster Farm and Home Center a week ago and a number of good ideas were shared. Lots of good advice and food for thought was also made available. Sharing their experiences and ideas were four zoning board members and two area planners.

The future of this country's farmland should be of concern to everyone who owns land. Farmland is our most precious resource. Indiscriminately paving it over with asphalt is already an expensive mistake, the consequences of which will grow worse each year as less land is available for food production and more people await their meals.

Farmers should have a definite say about the future of their lands. As has been stated so often by many concerned individuals, the only way farmers can hope to have some say in these matters is to become involved. In fact, many times getting involved is only the second step. The first step is to take the initiative to have reasonable standards implemented in one's community.

While some sort of land-use plan will undoubtedly go into effect in most any area of the country someday, the key is to have such plans include the farmers' interests. Without the contributions of the farming community, even the most well-intended plans are likely to short-change farmers.

Although the farmer has always prided himself as an independent and perhaps even isolated businessman, the world is changing at such a rapid pace that he can't afford to just ignore what's being fought and crowed about at city hall or the township shed. Few farmers can still enjoy the isolation they had years ago.

Last week's page 1 story in **Lancaster Farming** documented some of the possible consequences and hindrances that can take form when the farming community is not adequately represented at planning meetings. The farmer in Lancaster County who came close to receiving a court order against his broiler house can consider himself fortunate. The judge's decision came out in his favor.

Others have been less fortunate, and still others are still awaiting the outcome of their trials in court.

It's a shame that farmers have to go to court in order to go about their business. Nevertheless, and no matter how much we dislike it, it has become a fact of life.

Although we can argue that "the farmer was there first and if the transplanted city-slicker doesn't like his new neighborhood, that's just too bad," it's also a valid statement that the farmers should show some degree of consideration and courtesy towards their neighbors - be they farmers or non-farmers.

Most farmers are conscientious enough to show courtesy. But some are not. Educating those few will have to be a part of plans we devise to have effective and fair land-use ordinances.

Another news development in recent weeks which deserves praise is the Pennsylvania Farmers Association's and American Farm Bureau's call for investigations into matters which concern questionable use of taxpayers' money. Such instances have occurred in Pennsylvania.

As an example of the kinds of activities which are of concern, may we call your attention to the story on page **21**, titled AFBF takes Labor Dept. to court.

THE BIBLE SPEAKS

International Uniform Sunday School Lessons

BY LAWRENCE W ALTHOUSE

TAMING THE WILD TONGUE

Lesson for November 5, 1978

Background Scripture:
Exodus 21:16;
Matthew 5:11, 12; 23:16-22;
James 3:6-14
Devotional Reading:
John 8:42-47.

There is an ancient prayer that asks:

From the cowardice the shrinks from the new truth,
From the laziness that is content with half-truths.
From the arrogance that thinks it knows all truth,
O God of Truth, deliver us.

In the Judaic - Christian tradition the Deity has always been regarded as a God of Truth. This attribute was something not found in many of the gods that peoples worshipped in the ancient world. Some of these gods were cunning and deceitful, tricking and cheating their devotees as well as their fellow-gods.

False Witness

Thus it is not at all surprising that one of the Ten Commandments should manifest a concern for truth: "You shall not bear false witness against your neighbor" (Exodus 20:16). In this original form, bearing "false witness' was a prohibition against giving false testimony in a lawsuit involving a neighbor. But in time, it was recognized that God's intention behind this commandment was not limited to a court of law. Thus, Joshua charged the people of Israel: "Now therefore fear the Lord, and serve him in sincerity and faithfulness" (Joshua 24:14). When the Psalmist considered who would sojourn in the tent of the Lord, he concluded: "He who walks blamelessly, and does what is right, and speaks truth from his heart; who does not slander with his tongue..." (Psalms 15:2,3). And one of the ringing proclamations of the Prophet Zechariah commanded: "Speak the truth to one another, render in your gates judgements that are true and make for peace, do not devise evil in your hearts against one another, and love no false oath, for all these things I hate, says the Lord" (Zechariah 8:16,17).

A Simple "Yes" Or "No"

In the New Testament we see this concern broadened. Jesus tells his disciples, "...you heard that it was said to the men of old, "you shall not swear falsely..." But I say to you, Do not swear at all ... Let what you say be simply 'Yes' or 'No' (Matthew 5:33,37)). Jesus recognized that oaths would not be necessary if people could be counted on to tell the truth without them. He was asking for a standard of truth that went far beyond telling the truth under oath.

James was deeply concerned about the destructive power of the tongue. He characterized power of the tongue. He characterized it as a poisonous, incendiary, untamed beast. His epistle leads us to suspect that he knew some Christians who had unconverted tongues. With one breath they praised God and with the other they maligned their neighbors. "Does a spring pour forth from the same opening fresh water and brackish?" (James 3:11). One cannot be a Christian and a maligner of others. If the tongue remains untamed, the discipleship is a sham and pretense.

NOW IS THE TIME

TO BEWARE OF "TAME" WILD ANIMALS

Wild animals change their ways when they develop rabies. Shy animals may become bold and aggressive when in a rabid state. Foxes, skunks, and raccoons seen during daylight hours should be regarded as dangerous. Farmers should destroy these animals when seen around livestock, or farm buildings, during daylight hours. Be extremely careful when handling these animals. If you are bitten, see your physician at once. Bats are another mammal that could be rabid. Rabies is an incurable disease; don't take chances. Domestic dogs and cats should be vaccinated against rabies.

TO CONSIDER TREE WINDBREAKS

Winter winds are on the way and heat bills will be mounting. Buildings that are protected with trees, or some other type of windbreak, will require less heat. Under present conditions it is suggested that everyone make a special effort to conserve energy and reduce fuel bills. Several rows of evergreen trees planted upwind from buildings will be of great help. This is not a common practice here in the east; however, in the midwest and prairie states most farmsteads have this protection. Owners are requested to evaluate this investment this winter when the weather really gets bad. Next spring the plantings can be made.

TO CHECK GUTTERS AND DOWNSPOUTS

If gutters and downspouts are filled with twigs and leaves, they will not do a very good job of carrying the water away from a building. Since many barn and house rooves are under or near to trees, it is quite likely they may not be free to conduct water this winter. We suggest an inspection in the near future, and the removal of all trash. Extra water that gets into a building, or goes down along the foundation, is not the way to prolong the life of the structure. Timely gutter inspection will protect the huge investment.

TO BE PREPARED

If a fire breaks out in your home, or any other building, are you prepared to evacuate your family, your livestock, or other major possessions? You might give some thought to this question and discuss it with your family and employees. Are you prepared to fight the blaze until help comes? This means that fire extinguishers should be handy, should be in good condition, and every member of the family know how to operate them. Fire prevention is the place to start; but, if a fire gets started, advance planning might reduce the loss and save lives. Take the time today to discuss both fire prevention and fire fighting plans.

(Village of "Leather Corner Post")
DIVISION OF JAINDL'S

Figure it for yourself.

When you shortchange their nutrition, you shortchange yourself.

Looking for ways to cut on down on out-of-pocket feed costs without cutting down on milk production?

Cutting production costs will backfire if you end up shortchanging your herd's nutrition in the process.

But you can cut those costs safely by feeding homegrown grains and grain silage fortified with the right Vigortone Dairy Pre-Mix. These potent pre-mixes contain the proper levels of vitamins, calcium, phosphorus, and other minerals needed to balance your farm's feedstuffs.

Vigortone Dairy Pre-Mixes can be mixed in or metered on any palatable grain or roughage. This lets you change ration content to fit the supplies you have on hand without risking herd performance.

Better herd nutrition means a bigger milk check. Minimum out-of-pocket feed costs mean more in your pocket.

Your figures will prove it.

Dry cow nutrition pays future profits.

Shortchanging your dry cow's nutrition can be risky too. Most problems dairymen experience in getting cows back in the string can be traced to careless treatment during the dry period.

Keep them in top condition until their next lactation. To help you do it, Vigortone has developed unique dairy pre-mixes specially concentrated for dry cow rations.

Now is the time to compare.

See your Vigortone dealer soon. He's ready to compare the performance of Vigortone's cost-saving dairy feeding programs with any other you name.

Farmers FERTILIZER — AS GOOD AS THE BEST AND BETTER THAN THE REST

IMPORTANT ANNOUNCEMENT

IN ORDER TO CONTINUE TO GIVE OUR CUSTOMERS PREMIUM AGRICULTURAL PRODUCTS & SERVICE IN THE NEW HOLLAND, BLUE BALL, TERRE HILL, MORGANTOWN AND CHURCHTOWN AREAS —

WE, AT FARMERS' FERTILIZER ARE PROUD TO ANNOUNCE THE ACQUISITION OF

LESTER M. WEAVER'S

LIMESTONE, FERTILIZER, PESTICIDE, AND CUSTOM APPLICATION BUSINESS
LOCATED ALONG ROUTE 23, 1 MILE EAST OF CHURCHTOWN, PA.

We are equally proud to announce that Lester M. Weaver and Ivan Martin will continue on as management at the Churchtown Office and Warehouse.

Please be patient with us during this transition period, and if for any reason you are unable to contact Lester or Ivan at the Churchtown Office, please call collect at our Elizabethtown Office: (717) 367-1211.

During the month of November one of our salesman and Lester will meet with each one of you and discuss your soil fertility program for the 1979 Spring season.

May we at Farmers' Fertilizer continue to serve you with premium agricultural products and service, as Lester M. Weaver has done for you previously!

REMEMBER - At Farmers' Fertilizer - You Get More Than Products And Service - You Get A REPUTATION!

HEIFERS — BULLS

Livestock market and auction news

St. Louis Cattle

November 2, 1978
National Stockyards

Receipts this week 5,300: Week ago 5,600: Year ago 8,200. Compared last weeks close, slaughter steers steady to .50 lower. Slaughter Heifers steady. Cows firm to 1.00 higher. Bulls steady. Slaughter supply near 50 per cent slaughter steers, about 30 per cent heifers and 20 per cent cows.

Both slaughter steers and heifers registered price declines Monday following a sluggish and lower wholesale dressed beef trade late last week. However, the lower trend was reversed Tuesday in face of continued reduced marketings locally, and a portion or all of Monday declines were subsequently offset by price upturns.

SLAUGHTER STEERS: Mixed Choice and Prime 2-4 1050-1250 lbs. 53.75-54.50, load Tuesday 54.75. Choice 2-4 975-1250 lbs. 52.50-54.25, mostly 53.00-54.25 after Monday. Mixed Good and Choice 2-4 900-1200 lbs. 51.50-53.50, mostly 52.000-53.00. Good 2-3 900-1175 lbs. 49.00-52.00. Few lots Standard and Good 2-3 1100-1275 lb. holsteins 48.50-49.50.

SLAUGHTER HEIFERS: Mixed Choice and Prime 2-4 875-1050 lbs. 52.00-53.00, mostly 52.50-53.00 after Monday. Choice 2-4 800-1050 lbs. 50.50-52.50. Mixed Good and Choice 2-3 700-975 lbs. 49.00-51.00. Good 2-3 700-925 lbs. 45.50-49.50.

COWS: Utility and commercial 2-4 37.00-40.50. Boning utility 1-2 40.00-41.50, few 42.00. Cutter 1-2 35.00-39.50, later mostly 36.50-39.50. Canner and low cutter 1-2 late 33.00-36.50.

BULLS: Yield grade 1-2 1000-1600 lbs. 43.00-48.00, few Yield Grade 1 1450-1700 lbs. 49.00-49.50.

FEEDERS: Including around 1,800 at Thursday's auction. Feeder steers and heifers steady; instances 1.00-2.00 higher on Choice thin fleshed steers weighing over 500 lbs. Demand good. Overall quality not as attractive as past two weeks. Supply mostly Choice and Mixed Good and Choice 400-700 lb. steers and 400-600 lb. heifers.

FEEDER STEERS: Choice 300-500 lb. 66.00-71.25; 500-600 lbs. 65.00-71.25; 600-675 lbs. 60.00-66.75; few lots 700-775 lbs. 58.75-62.75. Mixed Good and Choice 300-500 lbs. 61.75-67.50. Few lots Good 700-750 lbs. 53.00-53.25. Scattered lots Standard and Good 500-725 lb. holsteins 50.00-55.50.

FEEDER HEIFERS: Choice 325-500 lbs. 57.00-61.50; 500-600 lbs. 55.00-61.00. Mixed Good and Choice 300-550 lbs. 52.00-56.50; few lots 700-800 lbs. 47.00-50.25.

Couple lots Good and Choice stock cows 40.75-43.00.

Omaha Cattle

November 2, 1978

Compared with previous week's close: Closing prices on slaughter steers were .50-.75 lower and heifers were mostly .25-.50 lower, some late sales .75-1.00 off. Cows were firm and bulls steady to .50 higher.

Four day receipts 13,900 as compared 11,800 previous week and 15,000 a year ago. for the second successive week, the fed cattle trade was engulfed in a general air of bearishness in reflection of a depressed carcass trade. Prices firmed on a modest Monday run, but even so, some buying interests were reluctant to follow any price upturn and were not aggressive beyond minimum numbers for immediate requirements. In midweek trading, all interests were cautious.

Ratio between current live prices and lowered carcass realizations. Carcass movement was generally slow despite the moderate rate of daily slaughter. The overall finish of the steer and heifer supply was fairly attractive with a liberal percentage Choice and a moderate volume Choice and Prime. Slaughter steers made up approximately 40 pct. and heifers 31 pct. Cows comprised 10 pct. and feeders 16 pct.

STEERS: Early, several loads Choice and Prime 3-4 1075-1339 lbs. 54.65-55.00. At midweek, seven loads and part load Choice and Prime 3-4 1100-1261 lbs. 53.85-54.00. Choice 2-4 1000-1325 lbs. 52.50-53.75. Mixed Good and Choice 2-3 950-1275 lbs. 51.50-52.50. Good 2-3 47.00-52.00. Few standard and Good 46.00-47.00.

AVERAGE of LS-214, detailed quotations, for Choice 900-1100 lb. Steers this week 53.40; Choice 1100-1300 lbs. 53.40. Average weight steers first three days 1167 lbs. as compared 1128 lbs. previous week. Average weight heifers first three days 1006 lbs. as compared 988 lbs. previous week.

HEIFERS: On Tuesday, load Choice and Prime 3-4 1048 lbs. 53.50, moderate volume same grade 3-4 894-1102 lbs. 53.00-53.25. At midweek, four loads Choice and Prime 3-4 972-1046 lbs. 52.50-53.60. Choice 2-4 875-1050 lbs. closed 50.50-52.25. Mixed Good and Choice 2-3 850-1050 lbs. 50.00-51.00. Good 2-3 47.00-49.00.

COWS: Utility and commercial 2-4 38.50-41.00. Cutter 37.00-39.00. Canner and low-cutter 35.00-37.00.

BULLS: 1-2 1400-2000 lbs. 45.00-50.00, individual 1 51.00-52.50.

Special Market

Special Feeder Yearling Steer Sale

LEE...A DAIRYMAN'S DELIGHT

29H2873 Dunwood Bootmaker LEE-Twin VG-87 TQ

USDA, 7-78 Rpt. 53%			
25D., 17H., ave.	18,730M	3.7%	686BF
PD +$110	+1,164M	−.02%	+40BF
H-FA., 9-78			
30 class. dtrs.	+1,29PDT	67% Rpt.	

LEE is a Bootmaker son out of a fine daughter of Forest Lee Centurian Rocket. LEE is the first bull to be harvested from the Golden Genes program. LEE was bred by Jacob K. Stoltzfus, Oxford, PA.

LEE is in an exclusive group of bulls in the Holstein breed; very few get to be plus both +$100 and +1.00 PDT. LEE is, with acceptable test and a fine pedigree.

LEE is siring the good "framiness" of Centurian and the fancy udders of Bootmaker. Daughters are above average in size, with outstanding depth and spring of rib, adequate strength with wide, clean rear ends. The udders are securely attached with beautiful shape and proper teat size and placement.

LEE is now available from your AMERICAN BREEDERS SERVICE REPRESENTATIVE.

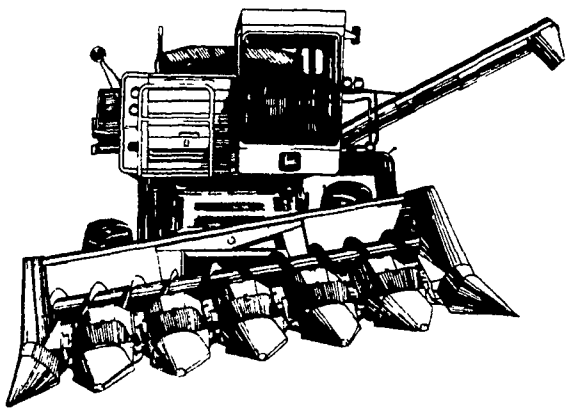
Maximize your crop savings on slopes to 18 percent with a John Deere SideHill Combine



On-the-go, automatic separator leveling from feeder house through cleaning shoe is yours with a SideHill 6600 Combine. As the separator levels on slopes to 18 percent, the header pivots to parallel the ground. Keeping the separator level maximizes your crop savings because no material drifts to the downhill side as with a conventional combine. And to master hilly fields, you get a 128 hp 404 cubic inch diesel engine. The cylinder is 44 inches wide.

Matched headers include 4- and 6-row corn heads and row-crop heads. Platforms with rigid cutterbar in sizes from 13 to 22 feet ... with flexible cutterbar in sizes from 13 to 22 feet.

Examine Meats

When shopping for meat, examine your choices carefully. Most supermarkets offer one or more meat specials weekly. But a meat purchase becomes a bargain only if the lower priced cuts are the same grade and quality as the usual offerings.

Produce market data available

JESSUP, Md. - Produce growers and dealers in the Maryland, West Virginia and southern Pennsylvania areas can now obtain instant market news data by calling (301) 799-7278.

The recorded information is being made available by the U.S. Department of Agriculture's (USDA) federal-state market news office in Jessup, Md.

According to Dick Hallinger, officer-in-charge of the USDA's Agricultural Marketing Service office, the reports will be updated twice each weekday. F.O.B. information from major national as well as nearby growing areas is available at 7 a.m., whereas a report on wholesale trading at the Jessup terminal market is put on the line at 1 p.m.

Additional market information can be obtained by calling the office's regular number, which is (301) 799-4840. Printed reports are also available from this office free of charge.

LINCOMIX® (lincomycin)
THE HEAVYWEIGHT

The feed additive for the treatment and control of bloody scours (swine dysentery) **from birth to market.**

A number of feed additives for bloody scours are on the market: But until today, few could offer such high performance and so few feeding restrictions as Lincomix.

On-farm trials have demonstrated the efficacy of Lincomix. By controlling bloody scours, Lincomix has proven its superior performance in maintaining rate of gain and feed efficiency while reducing death losses.

And Lincomix can be fed in any ration, from starter to finishing — just withdraw six days prior to slaughter. It's available in both complete feeds and supplements for on-farm mixing.

Lincomix—THE HEAVYWEIGHT feed additive for the treatment and control of bloody scours.

Talk to us today about getting Lincomix in your hog rations!

Look for lincomycin on the feed tag.

4-H'ers honored

(Continued from Page 1)

project story written by each 4-H'er.

Before the announcement of the top winner was made, Assistant 4-H Agent Meyers read Connie's story which was written in the form of a poem about the trials, tribulations and rewards of preparing a dairy cow for showing. The award for high project score in all breeds was sponsored by John E. Eshleman, a division of Carnation, and was presented by Irving Witter. Carol Balmer, Connie's sister, won the top project honor last year.

Girls completely dominated the project awards this year. High scores in other breeds included Karen Schmuck, Peach Bottom R2, Ayrshire; Sandra Schmuck, Peach Bottom R2, Brown Swiss; Joyce Stoltzfus, Gap R1, Holstein; and Gail Bukowski, Mount Joy R1, Jersey. The awards in each breed were sponsored by Pennfield Corporation and were given by Robert Gregory.

Karen Schmuck also received recognition for having Grand Champion Ayrshire at the district 4-H Show.

Gary Akers, 4-H leader, presented trophies to Lancaster County's dairy judging team which placed first in state competition at 4-H State Days. Members of the team were Doug Hershberger, Quarryville R4; John Frey, Willow Street; Neal Crouse, Stevens R1; and Dennis Kulp, Manheim R4. Hershberger placed second in the state contest and Frey placed third. The two top team members traveled as part of a Pennsylvania state team to the national 4-H judging contest at Madison, Wisconsin, and helped bring the team to a second place finish, the highest any Pennsylvania team has placed in recent years. In the national contest Frey placed seventh and Hershberger placed 13th.

On behalf of the 4-H'ers and with a special note of appreciation from the dairy judging team, John Frey and Kevin Eshelman presented former Extension County Agent N. Alan Bair with a watch. Akers said, "We will miss him - he did a great job." Bair is now Director of Member Services for Atlantic Breeders Cooperative.

In other awards, presentations were made to county round-up winners including those who won junior showmanship: Ayrshire, Anita Brommer, Conestoga R2; Brown Swiss, Lucinda Trimble, Peach Bottom R2; Holstein, Deb Hershberger, Quarryville R4; and Jersey, Tom Arrowsmith, Peach Bottom R2. The Grand Champion Junior Showman was Jay Garber, Willow Street R1.

In senior showmanship,

John Frey (center) presents former Extension County Agent N. Alan Bair with a watch on behalf of the 4-H dairy club members and the judging team. Kevin Eshelman (right) helped make the presentation.

Robert Gregory presented trophies to the five top project scorers in the 4-H dairy program. From left they are: Connie Balmer, Guernsey winner who also was recognized as the overall high score; Gail Bukowski, Jersey winner; Joyce Stoltzfus, Holstein winne winner; and Ka Gregory repres sponsored the

trophies wer Schmuck, P Ayrshire; Willow Stre Swiss; Neal R1, Holste Bukowski, Jersey. Gr

trophies were given to Karen Schmuck, Peach Bottom R2, Ayrshire; Judy Witmer, Willow Street R1, Brown Swiss; Neal Course, Stevens R1, Holstein; and Gail Bukowski, Mount Joy R1, Jersey. Grand Champion senior showman trophy went to Connie Balmer, Lititz.

Breed champions at round-up were also recognized. Junior champions were: Ayrshire, Sandra Schmuck, Peach Bottom R2; Brown Swiss, Lucinda Trimble, Peach Bottom R2; Guernsey, Jay Garber, Willow Street R1; Holstein, Arlen Keener, Elizabethtown R1; and Jersey, Tom Arrowsmith, Peach Bottom R2.

Grand Champions were: Ayrshire, Karen Schmuck, Peach Bottom R2; Brown Swiss, Sandra Schmuck, Peach Bottom R2; Guernsey, Connie Balmer, Lititz; Holstein, Steve Kauffman, Elizabethtown R1; and Jersey, Matt Arrowsmith, Peach Bottom R2.

Speaking to the 4-H dairy members, Lancaster County's Dairy Princess recalled her nine years in 4-H and said she was thankful for all her 4-H experiences, including friends, parents and leaders who were supportive of the program. She added, "We should all be thankful for the dairy cow which is important to all of us for our daily income, for food and for her product - milk. We should be proud of our part in providing this important nutrient to people." Joyce encouraged younger members to continue their hard work and to "stick with" their projects.

Kevin Eshelman, president of the Ayrshire, Jersey and Brown Swiss Club served as master of ceremonies for the evening. Dinner music was provided by Glenn Hough and entertainment was provided by the "New Jerusalem Carpenters Company," a singing group from Lititz.

Nearly 210 members and parents attended the annual event.

Supporters of the 4-H dairy program include: Agway; Atlantic Breeders Coop.; James Barnett; Carnation/Genetics; John W. Eshelman & Sons; Farmers' National Bank; Good's Feed Mill; Grumelli's Farm Service; Hoober's Feed Mill; Interstate; Jim's Surge; Kreider & Diller Auctioneers; Lancaster Bone Fertilizer; L.H. Rohrer & Sons, Inc.; Earl Umble of Young's, Inc.; Wenger Implement; Wenger's Feed Mill; and Wolgemuth Bros.

AFBF takes Labor Dept. to court

PARK RIDGE, Ill. - Pleading the "rights of taxpayers to know where their money goes" the American Farm Bureau Federation has gone to court to require the Department of Labor to reveal the full contents of two federal grants totalling $805,000 awarded last July to Cesar Chavez's United Farm Workers (UFW).

"These are public documents dealing with public monies," insisted American Farm Bureau president Allan Grant, "and yet when our attorneys sought to examine them the Department of Labor provided partial photocopies that were, in part, illegible; and ommited whole sections dealing with alleged goals of UFW apprenticeship training.

"One can only ask what the Department of Labor chooses to hide from the people?" Grant said, "— President Carter has promised us an open administration, yet we must go to court in hopes of getting routine information that is already a proper part of the public record."

He noted that Farm Bureau had challenged the nature of the grants - under the Department of Labor's Comprehensive Employment and Training (CETA) program - which awarded the funds to UFW to assist in such union-related functions as building a micro-wave relay system, maintaining UFW headquarters grounds and buildings, repairing UFW cars and trucks, and working on UFW publications.

The suit to require disclosure of all pertinent documents to the grant was filed under the Freedom of Information Act in U.S. District Court in Washington. Named as defendants are Labor Secretary Ray Marshall, and William J. Kavcinsky, Disclosure Officer in the Department of Labor's Office of National Programs.

Weiler named finalist for National FFA award

EPHRATA - John Weiler, Stevens R1, has been named the Eastern Region winner of the FFA Agricultural Sales and/or Service Proficiency Award. He is one of four FFA members in the nation to receive this award. One of the four will be named the national winner in Agricultural Sales and/or Service at the Thursday morning session, November 9, of the FFA's Golden Anniversary Celebration at the 1978 National FFA Convention in Kansas City, Mo.

John, 19, is an artificial insemination technician with the Atlantic Breeders Cooperative. He transferred to Ephrata High School so he could be involved with vocational agriculture and FFA in the ninth grade. "The school I had been attending did not offer vo-ag; my projects, interests and activities centered around dairy cattle and in the FFA I had the opportunity to feed my interests."

"Through a program operated by the vocational agriculture department, John attended school in the morning and in the afternoon he worked for Atlantic Breeders, gained much experience, and following graduation became a full-time technician," according to his vocational agriculture instructor Lewis Ayers. John enjoys his work and plans to make it his career.

As a member of the Cloister FFA Chapter, John has served as treasurer and president. He participated on the Dairy Cattle Judging Team, placing sixth high individual in the National FFA Dairy Judging Contest.

His other activities include soft ball, the State Young Farmer's Association, State and National Holstein Association, and Director of Lancaster County Junior Holstein Club.

The Agricultural Sales and/or Service Proficiency Award is one of 22 Agricultural Proficiency Awards presented annually by the Future Farmers of America Foundation. Applicants for the award must show activities and experience providing a background for occupations requiring technical knowledge in marketing farm produce or in providing the consumable supplies and services used in production agriculture.

Chapters may recognize a member for the Agricultural Sales and/or Service Proficiency Award by presenting a medal and a certificate. Chapter winners may compete at the state level where the winner is presented a check for $100 from the National FFA Foundation, Inc. State winners then compete for recognition in each of the four FFA administrative regions. Each regional winner earns a check for $250 and a plaque plus a travel award to the National FFA Convention in Kansas City, Mo. Here the student's application is judged against winners from three other regions. The top FFA member in the nation in Agricultural Sales and/or Service is recognized at the National FFA Convention with a plaque and a check for $500.

As sponsors of the Agricultural Sales and/or Service Awards, Allis-Chalmers Corporation provides funds for awards at the local, state, and national levels as well as travel awards to the National FFA Convention for regional winners.

Breaking corn yield barriers or, how high is up

WASHINGTON, D.C. – How they must have whistled when the national average corn yield shot up to 35.4 bushels per acre! That was in 1942, and it set a record. Eyebrows went up again in 1948 when farmers weighed in with a record-shattering 43 bushels per acre.

Not in their wildest dreams would U.S. farmers believe that just 30 years later they'd harvest an average of 100.7 bushels of corn per acre. But that's exactly what they expect to do, according to the crop reporting board of the U.S. Department of Agriculture. The board released figures this month which gave that production estimate. While the figures are only estimates that could change, there's not likely to be much difference this late in the season between the estimate and the final harvest.

Most of the increase is due to hybrid corn, which became available in quantity to U.S. farmers in the 1930's following successful experiments in corn crossbreeding. Corn yields didn't change much from 1886 through the 1930's, running around 24 bushels per acre. When the hybrids hit the furrows, yields began setting records.

The 1948 record held until 1956 when U.S. farmers grew an average of 47.4 bushels per acre. Since that year, records have been rather commonplace for U.S. corn farmers as they've climbed through yield levels of 80.1 in 1967, and 97.1 in 1972.

What is the yield limit per acre for corn? No one, of course, can be sure. "Genetically, we don't see a ceiling," said Paul H. Harvey, coordinator for corn and sorghum research at the U.S. Department of Agriculture. "Corn is a variable crop. There's plenty to work with. Other factors such as water and temperature will limit corn yields before genetics do.

"The national breeding programs for hybrid corn have given us a one per cent increase each year over the past about 50 years. We expect that increase to continue for some time," he said.

"Fertilizer and equipment have been factors in increasing the yield, too. With today's equipment, a farmer can plant his entire crop in a week's time. So a rainy period doesn't create the same problems today as it did when horses pulled the plows and it took two or three weeks to put the crop in."

The high yield per acre means that planting and growing conditions were good over a large portion of our 67.7 million acre corn plot. Farmers cut back more than two million acres from last year, incidentally. We'll still have bad years. That 100.7 is an average figure. One state (California) reported a high of 120 bushels per acre and another (Mississippi) reported only 43 per acre.

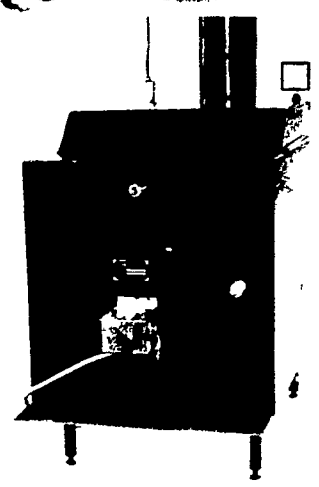
Doubling and tripling our corn yield is important, of course. It not only creates jobs – in fertilizer, farm equipment, transportation, farming and in the hybrid seed industry itself – but the sale of corn overseas puts money in America's pocket another way. Corn will grab a big chunk of the $26.5 billion dollar export record sale this country expects to make this year. The total corn crop is expected to be about 6.82 billion bushels – 7 per cent above last year's record.

Harvey noted that earlier in his career when farmers were still averaging 30 or so bushels per acre he started a 100-bushel corn club. It had five members – farmers whose yields reached the magic figure.

Would he be optimistic enough in these days of already high yields to start a club for, say, 300 bushel members? "Sure. After all," he said, "several farmers already get 300 bushels and just last year we learned of a Michigan farmer who produced 352 bushels of corn an acre."

AT LAST!

A HIGH EFFICIENCY WOOD FIRED CENTRAL HEATING SYSTEM THAT IS COMPLETELY AUTOMATED NO BABYSITTER NEEDED



The Automatic 1250 built with that extra muscle to heat very large homes, green houses or large shops and farm buildings. 200,000 BTU.

Chimney, fireplace, and firewood hints told

FLEMINGTON, N.J. — There's a nip in the air these mornings and before long, evenings will be getting cooler, the house chilly.

If one is inclined to plan ahead, he should have a couple of things to consider: Inspecting and cleaning his chimney, and stocking in his supply of wood.

Whether one burns wood in a fireplace or a wood stove, the chimney must be carefully checked. One should inspect for cracks and other damage that may have occurred, as well as inspect for soot and creosote.

Any cracks or damaged tiles should be repaired.

One can clean his own chimney if he can safely get to the chimney top. Using several tire chains tied together, one should raise and lower them briskly and frequently to scrape the sides of the tiles, break through the build-up of creosote, and dislodge nests of birds and other wildlife.

Wood stoves, specifically the modern, efficient, re-circulating types, are slow burners. Often claimed to burn for long periods, they can last as much as 12 or more hours before adding more fuel.

But, the danger in these stoves is in the build-up of creosote in the chimneys and connecting pipes.

One may decide to secure the services of a "chimney sweep." Fireplace and chimney cleaning services are available and should be considered if one has any doubts about the system. A sweep comes with more than a long-handled broom. They will be equipped with power vacuum cleaners and other tools that thoroughly clean out the system.

Also, one might check with a mason on the soundness of the chimney.

Another important consideration is in the quality of the firewood a person chooses.

The heat that is derived from the combustion of the wood depends upon the concentration of the woody material, resin, ash and water. The first three features vary depending upon the tree species and its growth rate while the latter depends on the species, season in which the tree was cut, and the seasoning procedures used.

In general, the heaviest woods, when seasoned, have the greatest heating value.

The greatest heat equivalents of wood are associated with apple, American beech, hickory, black locust and white oak.

The next group of woods categorized by their heat equivalents would include white ash, white and yellow birch, black cherry, sugar maple, black walnut, and red oak.

Those species considered to be moderate heat equivalents: black ash, red maple, silver maple, American sycamore, and the Eastern larch.

The poorest in heating quality are aspen, basswood, butternut, balsam fir, hemlock, red and white pines, red spruce and black willow.

Wood should be seasoned approximately eight to 12 months This will appreciably reduce the creosote build-up in the stove's exhaust system.

One would also remind wood buyers that the only legal measurement for fireplace wood in New Jersey and Pennsylvania is the cord. And, that's the standard cord, not the face cord.

A standard cord comprises a stack 8 feet long, 4 feet high, and 4 feet deep. Total volume would be 128 cubic feet.

The face, or short cord, would be 8 feet long, 4 feet high and a foot to 2 feet in depth, depending on the length of cut.

There are many other considerations in purchasing firewood. The Extension Service has an exceptionally good book, "Burning Wood." Published by the Northeast Regional Agricultural Engineering Service, it is available through our office at a very nominal price.

The publication includes chapters on wood as a fuel, fireplaces, stoves, (types and efficiency), furnaces, installation, and an interesting section on cutting fuel wood with a chain saw.

Inter-State claims financial strength, but cautions dairymen against over-production

AIRVILLE — Members of Inter-State Milk Producers Cooperative who met here recently for their annual membership meeting were told by their director, Roy Weaner of Gettysburg, and Inter-State's treasurer, Robert M. Dever, that their cooperative remains strong and is prepared to meet the future needs of the dairy industry.

But there were also a few words of caution directed at producers who have been taking advantage of the record-high milk prices.

Both Weaner and Dever noted that the marketing of surplus milk is expensive. Last year, for example, Inter-State spent $700,000 to move surplus milk out of the area, resulting in the lowest cooperative profits in four years. Dever reported that the cooperative made $571,000 during 1977.

Weaner, who predicted that Class I 3.5 per cent milk will be priced at $12 in December, asked the assembled dairymen not to overdo it with their production. "Production so far has been long and prices are good and feed is cheap ... but don't overdo it," he emphasized. "There is no use producing milk for a market we don't have," he added.

According to Dever, it costs as much as $3 per hundredweight to market excess milk. Inter-State has in the past covered those expenses through a reduction of prices paid to dairymen for surplus milk. "We like to keep these costs current, rather than build up these costs," he explained.

Declaring that Inter-State has $18 million worth of assets, Dever noted that the Philadelphia-based milk marketing cooperative is financially strong. Both he and Weaner asked the membership for continued support.

Dever also spoke on the Cooperative's involvement with Q C, Inc. and Holly Milk Cooperative. While the latter is still undergoing trials, he emphasized that costs of the plant are still at $8.2 million, as originally planned. Rumors to the contrary are unwarranted, he said.

Robert Dever

Roy Weaner

Q C, Inc., Inter-State's wholly-owned quality control laboratory, has been a fantastic success, according to Dever. The firm is paying its own way and offering financial returns which exceed Inter-State managers' expectations.

On a fianl note, the member-dairymen of Inter-State were invited to the Cooperative's annual meeting and banquet, to be held at the Host Farm, Lancaster, on November 16. Tickets should be secured by November 7.

Weaner closed his remarks by encouraging farmers to support their general farm organizations and the Young Cooperator program. "They're building leaders for tomorrow, and believe me it does pay off ... it gives us a more secure future," he declared.

Ken Thompson to receive honorary FFA degree

By DIETER KRIEG

OXFORD — Kenneth Thompson, a 25-year veteran of vocational agriculture teaching at Oxford Area High School, will join a select group next week when he is presented with the Honorary American Farmer Degree. It will be bestowed on him at the National FFA Convention in Kansas City.

The American Farmer Degree is the highest recognition given to FFA'ers and those who support the organization. The Chester Countian is one of just 85 vocational agriculture instructors from all over the United States, and one of four from Pennsylvania, who will be recognized for the honor.

According to Thompson, a good instructor "must not only know his students, but see to it that they are busy with their FFA projects at home or have other responsibilities that are constructive.

"And I'm a firm believer in the cooperative work release program, especially for senior students, where they learn and work on the job while still under the supervision of the vo-ag instructor. A student must realize that while on this program he or she must maintain good grades with his or her other subjects", Thompson said.

Thompson was nominated for the Honorary American Farmer Degree by the Pennsylvania FFA Association and the nomination was approved by the National FFA board of directrors which met in Alexandria, Va. last month.

Ken Thompson

During Thompson's 25-year tenure at Oxford High School, he has had two students who earned the American Farmer Degree and 46 who were presented with the Keystone Degree.

According to statements by spokesmen at the National FFA Center in Alexandria, Va., the American Farmer Degree is given annually to at least 50 of the 12,000 teachers of vocational agriculture in the nation. The Degree is awarded on the basis of points scored by a teacher for his accomplishments as a vocational agriculture instructor, FFA advisor, and as a participant in professional vocational agriculture teachers' associations.

Teachers are awarded points for each student they supervised in earning state or national FFA awards. They also receive points for serving as officers and committee members of the National Vocational Agriculture Teachers Association and for their participation in national meetings of the FFA and other professional associations.

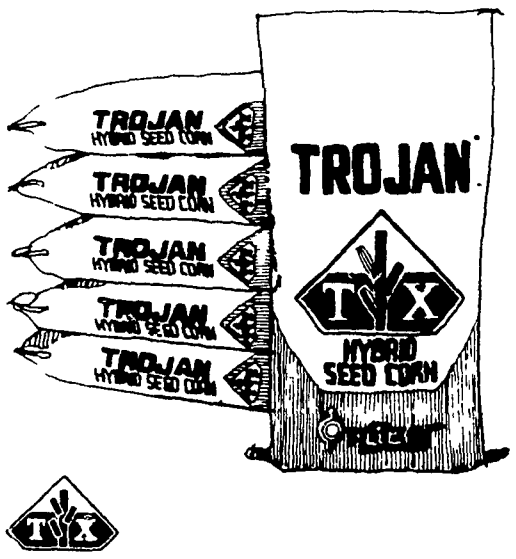
Thompson, who began his career as a teacher in 1954, used to farm in the Green Valley, near Unionville. He is a graduate of Penn State University, having majored in agricultural education, with strong emphasis on dairy and livestock courses.

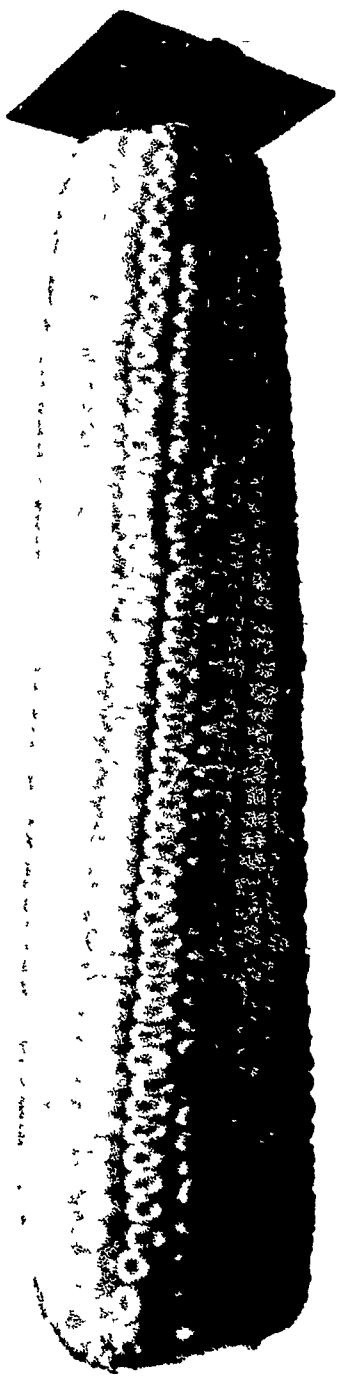
NOW MORE THAN EVER, THE SMART CORN MONEY'S ON TROJAN HYBRIDS.

What's it take to be a winner in today's fast-paced corn hybrid business?

It takes the skill, strength and know-how of Pfizer Genetics, the yield and profit leader in state after state, field after field.

Pfizer Genetics has 21 (count 'em: twenty-one) PhDs working full time developing and perfecting the hybrids to put you out in front in the years ahead.





WINNERS LIKE OUR NEW 100-DAY TROJAN T1008, 100-DAY TROJAN T1108 AND

TXS113

ARE THE TALK OF THE CORN BELT.

Any farmer who grows TXS113 just has to tell his neighbors about it.

TXS113 combines high yields of heavy grain with terrific stalk strength, fast growth, outstanding tolerance to disease and drought...and beautiful bright green color.

These top-yielding Trojan varieties are available at your nearby Pfizer Genetics dealer.

Pennsylvania FFA'ers

(Continued from Page 1)

Chapter in Millersville. The Solanco Chapter, Quarryville; and Cloister Chapter, Ephrata will each send two teams. Other schools which have teams represented are Manheim Central, Red Lion, State College, Oley Valley, Clearfield, Mifflinburg, Derry Area, Lakeview, Avella Area, Walter Biddle Saul, and West Greene.

Some of the highest honors will be received by two Pennsylvania FFA chapters. The Cloister Chapter from Ephrata and the Northern Lebanon Chapter at Fredericksburg will both receive Gold Emblem Awards for excellence.

Among the highlights of the convention will be a likely visit from President Carter and an address by noted news commentator Paul Harvey. Many of the details on these and other activities are printed in separate articles, inside.

Proficiency award winners will also be recognized during the convention, which rates as America's largest youth gathering.

Among the young men who is up for top honors in the regional proficiency awards program are John Weiler of the Cloister Chapter, Donna Lansberry of the Cedar Crest Chapter, and Ronald Juftes of the Green Thumb Chapter. Each have won their respective categories in the eastern region of the United States.

This being the 51st annual convention of the National FFA, the organization is still celebrating its 50th year. The Golden Anniversary atmosphere, which began more than a year ago, will continue, according to convention organizers.

Following is a complete list of the Pennsylvania American Farmer Degree candidates:

Wayne Bankert, Red Lion R3, Red Lion Area High School; Samuel Benninghoff, Columbia Junction R2, Union Area High School; Jeffrey Breese, Claysville R1, McGuffey High School; Dennis Brubaker, Lebanon R7, Cedar Crest High School; Robert Clowney, Gettysburg R9, Gettysburg area High School; Harold Cornell, Jr., Clearville R2, Everett Area High School.

David Gerhart, New Providence R1, Solanco High School; Brenton Harkness, Gillett R1; Troy High School; Harry Harrison, Wrightsville R1, Red Lion Senior High School; Kevin Hertzog, Oley R1, Kutztown Area High School; Lloyd Hoover, Leola, Garden Spot High School; Melvin Houck, Elverson R1, Twin Valley High School; Dwight Houser, Lampeter, Lampeter-Strasburg High School; E. Clair Martin, New Holland R1, Garden Spot High School.

Jeffrey Miller, Kutztown R3, Kutztown Area High School; Randall Ranck, Quarryville R2, Solanco High School; Jay Kevin Rohrer, Manheim R7, Manheim Central High School; Dale Siegfried, Mertztown R2, Kutztown Area High School.

Alan Sterner, Hanover, South Western High School; Robert Stoltzfus, Elverson R2, Twin Valley High School; James Wester, Knox R2, Keystone High School; and Steven Wilson, New Freedom R2, Kennard-Dale High School.

Lancaster poultrymen

(Continued from Page 1)

County Court in order to testify in the above-mentioned case, said he heard some statements at the hearing which "weren't very nice." He challenged the poultrymen to set the record straight.

Irwin also repeatedly thanked the gathering of poultrymen for the support they gave to the young farmer who experienced the ordeal in court. He was Robert Weaver of New Providence R1. The judge ruled in his favor, as was reported in last week's edition of Lancaster Farming.

Irwin challenged the poultrymen to be on zoning boards in their respective communities to help keep unreasonable ordinances out of the books. He also urged farmers to attend meetings.

"We must stick together and support each other," Irwin continued. He is a member of the Cooperative Extension Service and a recognized authority in poultry farming. His office is at the Farm and Home Center, Lancaster.

Other words of advice Irwin had for the group concerned laryngotracheitis (LT), which, according to him, inflicted more than 700,000 chickens in Lancaster County last Fall, Winter, and Spring. He urged poultry farmers to be cautious with their management procedures, noting that the onset of cooler weather also marks the advent of the LT disease season. Outbreaks of edipemic proportions were reported in Lancaster County last year.

In other proceedings at the dinner meeting, the Lancaster County 4-H poultry judging team was singled out for special recognition and was given award placques for having placed first in the state last Summer.

Members of the team were Anita and Scott Augsburger, both of Reinholds R1; Paul Aument of Peach Bottom, and Cathy Groff of Conestoga.

The dinner meeting was also an occasion to review events and accomplishments of the past year. Irwin cited the work of various committees, as follows:

The educational committee has worked with pest control, health security, forced molting, and shell quality programs, among others. Irwin advises poultrymen to attend these educational meetings.

A promotional committee handed out more than 13,000 pieces of poultry literature to interested people during the Farm Week at Park City last month. In addition, the committee works with home economists and teachers.

Closely allied to the promotional committee is the queen committee, which is involved in the selection process. The reigning Lancaster County Poultry Queen, Kathy Martin, is "doing an excellent job," said Irwin, adding that she was missing out on her senior class trip in order to be at the annual banquet meeting.

Noting that no organization can survive without a strong membership, Irwin advised the assembled group that the $10 dues for the Lancaster County Poultry Association is well spent. The membership committee is in charge of keeping membership up and healthy.

Jay Irwin

A tour committee is also a part of the organization. This year, an invitation was extended to members to go to a Lawrence Welk concert at Valley Forge.

Publicity committee work involves contacting the news media and sending out in-house newsletters.

Getting to the banquet committee, Irwin motioned around the packed banquet room and said: "This is the kind of support you need for your association."

Concluding his remarks, Irwin declared that it is the total efforts of individuals, committees, and the Association as a whole which keeps Lancaster County's poultry industry in a leading position. The county agent praised the efforts of individuals who organized promotional programs.

During a business session, the Association elected four new directors: Robert Garland, Larry Herr, John Hershey, and Dale Rohrer.

WHAT'S NEW

LICK FEEDER

Snyder Industries is offering a new line of crosslinked polyolefin liquid feeders.

The Snyder feeders are rugged yet lightweight. They're made with a special polyolefin material that won't rust or corrode which means long life and low maintenance, says the manufacturer. The crosslinked construction resists punctures and cracks even under extremes of temperature and weather. An ultra-violet inhibitor helps protect tank and contents from the damaging rays of the sun. And the tanks are translucent so the liquid level can be determined easily, the manufacturer says.

Snyder liquid feeders are available in 110 and 285 gallon capacities. Standard features include removable top, molded-in tiedowns, tight fitting filler cap and two lick wheels. Additional lick wheels are available as an option.

Snyder Industries, Lincoln, Nebraska, also manufactures a complete line of polyolefin storage and "nurse" tanks for agricultural use.

Grange meets

VIRGINVILLE - Special honor was given to Mr. and Mrs. Jeffrey Weitzel at a recent Virginville Grange meeting, for being chosen the state Young Married Couple. The couple thanked the Grange for their help.

The Grange will be going to Walps restaurant on November 18, tickets are $1.00, including breakfast and participation in the radio program at 10:15.

The group's art contest was judged with several winners named. First prize winners in the various divisions included: Sandy Miller and Daniel Kurtz.

CHAIN SAWS

Lloyd Hoover deals with the market hogs

By KENDACE BORRY

LANCASTER — Lloyd Hoover, Lancaster, a winner of the 1978 Agribusiness American Farmer award, is a young man who combines working with his knowledge from his farming background

He serves as market agent in the hog division for Walter Dunlap and Sons, at the Lancaster Stockyards, Lancaster.

His job includes many facets, including being in charge of marketing the hogs and feeder pigs that go through the stockyard for Dunlap, a duty that averages 2000 hogs and 1000 feeder pigs each and every week. He also sorts and grades the hogs that are brought in for the market sales.

He noted that he also does order buying, and works to see that the farmers get the top dollar for their hogs. Sometimes he gets out to visit on the different farms, working with the farmers, buying and advising the men of the market trends.

Now living on the farm that he grew up on with his parents, Mr. and Mrs. Elmer M. Hoover, Lloyd explains that he always has liked hogs.

A member of the Grassland Chapter of the FFA, he received his first hog as a chain gilt given through the FFA chapter. This animal, he related, was the basis for his stock.

Today, besides working at the stockyards for about 45 hours every week, he farms about 55 acres on the side, an occupation that he calls his hobby.

Corn and hogs are his principal products on the farm, and he stated that he has a farrow to finish operation.

An active member of FFA, he received the Keystone Farmer Degree in 1975. Also in 1975, he was the County Star Farmer, the vice president of the state parliamentary team, the receiver of the county Bankers' award, and the winner of the state swine proficiency award.

He showed the grand champion hog at the Ephrata Fair in 1974, and was also named the state FFA poultryman of the year.

In 1976, he was chosen as the FFA state livestock man of the year, and also served as the state FFA vice president.

According to the quiet-spoken FFA'er, farming has always been his main interest, and he believes that there is a future for a man in agriculture if he puts himself down to working for it. That is why, at age 21, he is out working on the 55 acres near Lancaster when not involved with the duties involved with his hog marketing job.

Part of Lloyd Hoover's job includes going around to fairs and purchasing hogs. Here he is seen, after buying the reserve champion hog at the Manheim Fair, having purchased the animal for Walter Dunlap and Sons, Lancaster. The hog was owned by two brothers, Steve and Rick Strauss, seen on either side of Lloyd.

MEAT BIRDS OR EGGS...

No matter which is your livelihood, Agway people are ready to help you in every phase of your operation.

Here's how:

Feeding for profit
Shell Firm Feeds and the Daily Nutrient Intake Program are two major Agway contributions to more profitable poultry enterprises Agway feed researchers and flock nutritionists are continually seeking even better feeds and feeding programs

Egg marketing
Agway marketing experts can help you locate profitable markets for your products

Building design and construction
Agway poultry facilities are designed and built to provide efficient use of space and labor and to accommodate modern automated equipment

Facility leasing
There's no need to tie up your capital in order to expand or modernize. Under certain conditions, there are significant advantages in leasing facilities and equipment through Telmark

Financial help
Qualified poultrymen can obtain credit from Agway to assist in raising broilers or layers

Research and development
Feeds and feeding programs new ideas in housing and egg handling new techniques in flock health maintenance . Agway continually searches for better ways to lower costs and increase profits

Business Management
While not yet available in all communities, Agway farm consultants are supplying advice to farmers, helping them set up record-keeping systems and preparing tax returns

Your Agway Poultry Enterprise Serviceperson
Your access to the team that keeps your operation running smoothly and profitably

For more information on any aspect of poultry management, contact your local Agway Store or Representative.

LIFE on the farm

By Dieter Krieg, Editor

All rights reserved by Dieter Krieg

It's 5 30 a m — the beginning of another day, even though the night does not appear to have gone

Silence and a light frost cover the countryside. The stars are sparkling in a cloudless sky, and there's only a faint hint towards the east that a sunrise will occur in another hour

I walk into the barn, take off my jacket, flick on the lights, and begin the day's activities The push of a button starts the silo-unloader, which throws down silage for the morning feeding. Most of the cows are lazily beginning to get up as they anticipate their forkful of silage and portion of grain Some, like Cindy and Bosco, who are forever hungry, voice their anxiety without hesitation

While the silage accumulates at the base of the silo, just in front of the cows, I take a broom to sweep the feed alley, and then a scraper to clean the litter alley By the time that's done, there's enough silage down to begin feeding The whole barn soon smells of corn silage as the material is spread out in front of 40 cows It's a pleasant odor

A grain ration is fed according to each individual cow's production level, body condition, closeness to calving, and age. A few, like Cindy and Bosco, get an extra pinch to keep them friendly The truth is they're both too friendly — they're spoiled and my favorite pets

Nearly 20 minutes have gone by since I walked into the barn, and another 10 will pass before the milking starts I have already walked a couple of miles — back and forth, back and forth — in a barn which is 160 feet long There are plenty more miles to come this barn is not equipped with pipeline milkers

Strainers are set on top of the bulk tank, an udder wash is prepared, the milking machines are carried to the far end of the barn, and I'm ready to milk The noise of the vacuum pump drowns out most of the sounds from the radio, which has been on since I walked into the barn

The pulsing of pulsators — the "heart" of a milking machine — soon fills the air The cows are up and eating, their neck chains occasionally jingle, and periodically there is the hollow sound of two empty buckets being set on the floor after having been emptied in the milk house Sometimes I get greeted with a nice sloppy tail in the face, which makes me wish I had cleaned the barn before milking What a way to wake up if a fellow is still sleepy!

The milking procedure goes on for an hour and a half: wash udders, put the milking machine on the cow, periodically check on the machine's progress to avoid overmilking and resulting udder injury, take the machine off, dump the milk into a carrying pail, and take it to the milk house where it will be cooled and agitated in a bulk tank

That's how the day starts on a dairy farm — when things go smoothly As with any business, it's not all bad if things work out right and the income meets expenses

WHAT'S NEW

Alka-Culture

YOUNG'S, Inc., has formulated a rumen buffer containing nearly all the ingredients known to combat acidosis and help in maintaining high butterfat test in dairy animals.

ALKA-CULTURE works to increase total dry matter consumption. It prevents total dry matter consumption. It prevents digestive system stress by maintaining proper rumen ph.

The Live Yeast Culture releases more nutrients from the ration as its enzymes increase digestive efficiency, stated Young's Inc.

The added Potassium in ALKA-CULTURE is especially important when brewers grains are used. Best results can be expected when ALKA-CULTURE is used in a ration containing less than 10 lbs. dry hay, stated Young's Inc.

For more information write to Young's Inc., Roaring Spring, Pa. 16673. (814-224-5111).

BOAC award winners announced

KANSAS CITY, Mo. - Outstanding community action efforts by chapters of the Future Farmers of America (FFA) will be recognized when the Building Our American Communities (BOAC) Awards are presented at the 1978 National FFA Convention next week.

BOAC Awards will be presented to 150 of America's 8148 chapters during the Thursday morning session of the FFA's Golden Anniversary Celebration at the 1978 National Convention to be held in Kansas City, Mo., November 7-10. The BOAC program is sponsored by Killy Endowment, Inc., Indianapolis, Ind. as a special project of the National FFA Foundation, and honors chapter efforts to make their communities better places to live and work.

Twenty-eight chapters with the most comprehensive community action programs will be presented National Gold Emblem Awards, the top award in the BOAC program. One hundred and twenty-two other FFA chapters will receive National Silver and Bronze Awards for their efforts in community development. During the Convention one of the twenty-eight National Gold Emblem chapters will be selected to receive the National Citation for the best community improvement program in the nation.

The Pennsylvania FFA Chapters which will receive BOAC awards are the Manor Chapter, Millersville; Northern Lebanon, Fredericksburg; and Clearfield, all of which will receive the bronze emblem.

In New Jersey, the Camden Tech Chapter and Hunterdon Hills Chapters will be singled out for recognition. Both will be presented the bronze emblem at Kansas City.

Fruit tree pesticide survey set

HARRISBURG - To assess the economic importance of pesticides now commonly used by fruit producers, a nationwide Fruit Tree Pesticide Use Survey is planned.

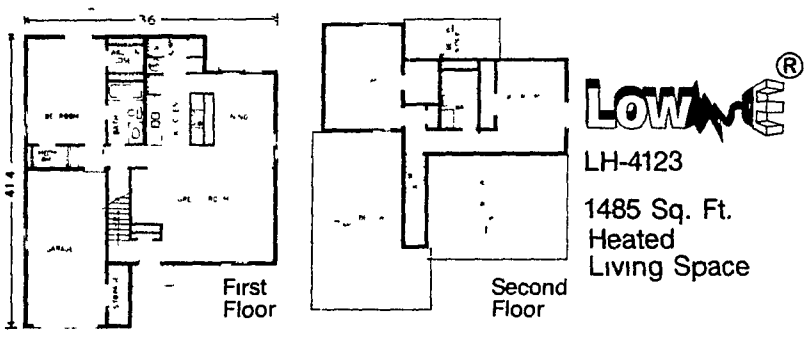
In Pennsylvania a random sample of 365 fruit growers will be contacted as part of the national survey. Interviews will be conducted by Crop Reporting Service enumerators under the direction of Mr. Wally Evans, Statistician in Charge of the Pennsylvania office. Individual producer responses will be kept strictly confidential.

Pesticide usage and registration is continually being monitored by local, state and federal authorities. Although strict regulatory controls have been placed on the use of many pesticides and with others up for review, detailed and reliable information on the actual quantity of pesticides used in the production of fruit crops is not available.

The survey information will be most valuable in establishing benefits to fruit growers from the usage of specific pesticides needed to maintain adequate supplies of tree fruits.

What's Your Pleasure?

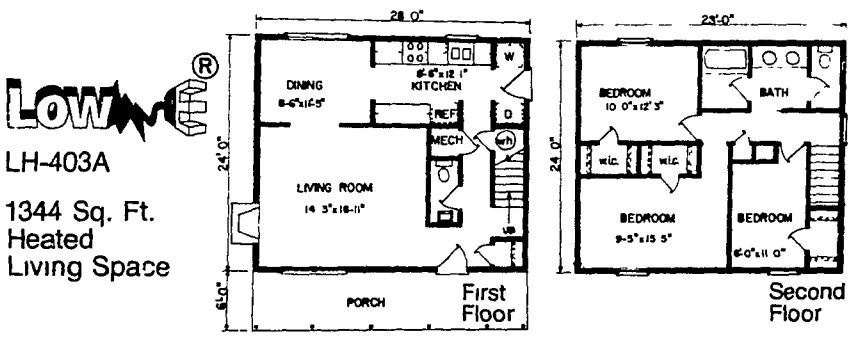
Modern styling or traditional good looks? Either can be yours with a Low-E® Homestead® building material package from Lowe's!



The ultra-contemporary "Spirit of '76" features modern styling and real energy efficiency with heat pump.

The first floor has the popular "great room" kitchen and dining area a bedroom and full bath large walk-in closet The second floor offers two more good-sized bedrooms another full bath and more walk-in closet space Heat pump

$17,980 Spirit of '76



The "Country Charm" offers just that with its traditional good looks and modern energy efficiency.

The first floor offers a spacious living room with brick fireplace dining room kitchen with laundry area and half bath The second floor has three bedrooms full sectional bathroom and two roomy walk-in closets Heat pump

$17,965 Country Charm

The Low-E® Homesteads® are complete packages of all materials necessary to build these homes from the foundation up.

Not a pre-fab not a shell house Each energy-efficient Homstead® is a complete materials package to build the home of the future—today—on your lot from the foundation plate up Construction labor costs not included You furnish the land, labor, and foundation We provide everything else from the inside out And that includes not only the blueprints and building materials, but also paint, carpet, light fixtures, etc The materials furnished will meet or exceed the minimum property standards of FHA Any changes required to meet local or state building codes may alter the price accordingly The materials are delivered to the home site as work progresses, so there's a minimum of waiting or wasted materials

The Low-E® Homestead® has been specially designed from the ground up to be the most energy-efficient you can buy!

Our Low-E® homes can reduce energy use by up to 65% over conventional homes! How? Well, what we've done is combine all the existing energy-saving techniques with some innovative building methods You get extra insulation double-paned windows extensive caulking a super energy-saving heat pump light-colored heat reflecting roof and many other energy-saving components that can save you thousands of dollars over the years With the price of energy and owning a home steadily rising, you really owe it to yourself to look into the Lowe-E® Homestead®

The Low-E® Homestead® can cost no more to build than a minimum property standard home having similar features.

Does that sound too good to be true? Well, believe it! We've utilized some innovative building techniques to really trim labor costs And our homes require fewer board feet of lumber, which reduces construction costs even more Even better than that—studies have shown that a Low-E® home is as structurally sound as a conventionally built one

Top selling pig was a Yorkshire bred gilt, Lot 20 RTB & Greenback 151-3 of half-Irish breeding. She sold for $3,900 to James and Norma Ursel, Medina, N.Y.

Fall swine sale held

BEAVERTOWN – October 6, 1978. Brooks End and Par Kay Farm Beavertown, Pa. held their annual Fall swine sale.

The top selling pig was a Yorkshire bred gilt, Lot 20 RTB7 Greenback 151-3 of half-Irish Breeding. She sold for $3,900 to James & Norma Ursel, Medina, NY. Mitch Rogers, Mayville, NY was the contending bidder.

The 27 Yorkshire bred gilts average $808; 41 Landrace bred gilts average $588; 32 Yorkshire Boars average $643; 18 Landrace boars average $424; 14 Landrace open gilts average; $313; 106 Commerical open gilts average $227. The 238 head totaled $102,590. for an average of $431 per head. The 132 purebred boars and gilts average $595.

Yorkshire Boars Lot 74 and Lot 98 was sold for $1600. Lot 74 was purchased by Bill Waugh Libertyville, Iowa. Lot 98 was purchased by Mitch Rogers Mayville, N.Y. The top selling Landrace Bred Gilt was Lot 42 purchased by Mitch Rogers for $950. The top selling Landrace Boar was Lot 119 purchased by Rene L. Drawdy Brunswick, Ga. for $875. The top selling Landrace open gilt was Lot 116 purchased by Rene L. Drawdy for $470. The pigs sold into 13 different states. The next sale offering will be held on January 12, 1979.

Special weather

(Continued from Page 1)

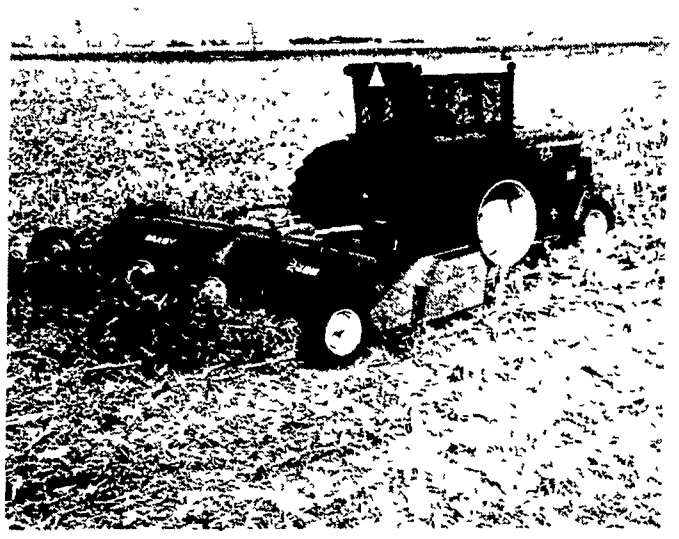
when an imminent disaster situation may be developing says Congressman Robert Walker from Lancaster County, Pa.

When this broadcast service becomes operational, it will culminate two years of effort by Walker through the House Committee on Science and Technology to provide southcentral Pennsylvania with a weather information and warning system.

According to the National Weather Service, the climatic and atmospheric reporting, available 24 hours a day, will be broadcast on a high VHF frequency of 162.55 megahertz (MHz) with 250 watts of power.

While this frequency is too high for most existing AM-FM equipment, VHF receivers are commercially available at a relatively low cost and most new radio receivers offer this type frequency reception as a purchase option.

WHAT'S NEW



20 FEET STALK SHREDDER

APPLETON, Wis. - The new Brady 2400 stalk shredder is designed to shred more acres faster with less power than other shredders, according to Brady engineers.

The Brady 2400 is 20 feet wide, one of the biggest shredders on the market, and will cover eight 30-inch rows or six 40-inch rows with room to spare. The tear-drop hood design makes pulling easier and reduces knife maintanance; and the knife and drive efficiencies and the tear-drop design combine to provide top performance with up to 20 per cent less power than most other shredders, say Brady engineers.

The new shredder is designed for tractors up to 200 PTO HP.

Free swinging cup or side slicer knives are standard equipment, made of super alloy steel. All super alloy flail knives on Brady shredders are guaranteed against breakage for the life of the flail knife.

The shredder's rear lift design keeps the drive line straight to reduce drive shaft strain, giving more efficient power transmission to the gearbox.

Adjustable row spacing, end transport and a tongue jack are standard equipment, as are premium V-belts that are easily adjusted with a spring tightener. Options include a ratchet jack for height adjustment, a center divider kit, and 15-inch wheels for standard end transport.

Brady equipment is manufactured by Koehring Farm Equipment Division, headquartered at Appleton, Wisconsin. The division also manufactures Fox forage harvesting and handling equipment.

QUICK-TACH LOADERS

MINNEAPOLIS, Minn. - Three quick attaching-detaching loaders designed for tractors from 35 to 160 horsepower have been introduced by Schwartz Mfg. Co., Lester Prairie, Minnesota.

Three loaders are designed to fit most current and prior model tractors, with or without cabs. Model 1700 QT fits tractors from 35 to 75 horsepower; lifts up to 1850 lbs. with a 3325-lb. breakaway. The 1800 QT mounts on tractors in the 65 to 100 horsepower range and lifts up to 2915 lbs., breakaway of up to 5435 lbs. The Model 1900 QT mounts on 75 to 160-horsepower tractors. It lifts 4175 lbs., with a breakaway capacity of 5570 lbs.

Each of the Schwartz QT Loaders is designed with a wrap-around subframe that attaches to the tractor at front and mid-mounting points. Three inches tapered loader boom arms incorporate a designed "slim-line" crossmember for exceptional visibility and strength.

A wide range of buckets and attachments is available to fit most material handling jobs.

Schwartz Manufacturing Co., a division of Chromalloy Farm & Industrial Equipment Co., also manufactures six other models of tractor loaders. Other equipment in the company's product line includes manure spreaders, bunk feeders, mixer feeders, forage wagons, running gear, wide-front ends, underbody truck hoists, ramp hoists, and semi-trailers.

FARM SECURITY SYSTEM

ADRIAN, Mich. - Now there is a security system designed especially for the environment of the farm. The Lane Security System protects the farm house and out buildings against break-in, fire, theft and power failure or will monitor confinement buildings for temperature extremes, air flow or water pressure. The Lane Security System is a 100 per cent solid state system with no moving parts to wear out. The system also monitors entrances to the farm for approaching vehicles.

It pinpoints trouble spots instantly with an alarm or a light inside, outside, or activates a phone dialer. Using less power than a flashlight, the Lane Security System installs in a new or existing building and comes with a one year guarantee.

For further information, one can write Lane Security Systems, Box 952, Adrian, Michigan 49221 or call 517/263-8474 collect.

Cash Saver

According to the U S Department of Agriculture, four out of five American families use coupons to help cut food costs Food manufacturers are expected to issue almost 70 million coupons this year — 55 per cent of those will appear in newspapers

Crops watched closely by 'eyes' in space

WASHINGTON, D.C. - The impact of weather upon major food crops throughout the world can be monitored, and future crop yields estimated with high accuracy, as the result of a four-year, cooperative experiment conducted by three government agencies, a team of scientists from the National Oceanic and Atmospheric Administration (NOAA) has reported.

The scientists, from NOAA's Environmental Data and Information Service, made their report last week at an international symposium evaluating progress of the Large Area Crop Inventory Experiment (LACIE) held at the Lyndon B. Johnson Space Center in Houston, Tex. LACIE is being conducted jointly by NOAA, NASA, and the U.S. Department of Agriculture.

The experiment was an attempt to produce estimates of total wheat production by country from information obtained through the Landsat satellite and a global meter ological network. Satellite imagery permits estimation of the proportion of cropland in a country devoted to growing wheat, while the weather data is used to estimate crop growth state, vigor, and potential yield.

Jerry D. Hill, a senior member of NOAA's LACIE team, reported the team has developed special computer models to estimate wheat yield, using monthly precipitation and temperature data to assess crop yield potential.

Modelling accuracy, he said, is illustrated by the 1977 wheat yield and production estimates for the Soviet Union. LACIE scientists estimated total wheat production would be about 91.4 million metric tons, close to the USSR reports of 92 million metric tons released at the end-of the year.

According to Hill, yield estimation capability developed by NOAA scientists for the LACIE project demonstrates another application of weather data to the solution of a variety of critical national problems. The NOAA team already has applied its modelling capability experimentally to the problem of allocation of natural gas during the heating season.

Co-authors of the paper presented by Hill at the LACIE seminar were Dr. Norton D. Strommen, Chief of the EDIS Climatic Impact Assessment Division, and Malcolm Reid, Chief of the Climatic Assessment Branch.

Schuylkill Co. DHIA reported

TAMAQUA – The herd of William R. Daubert, Pine Grove R3, had the highest milkfat in Schuylkill County for the month of September, 1978, according to information released by Penn State and J. Allan Shoener, county agent.

With 69 cows on test, he averaged 2.00 pounds of milkfat per day and 54.3 pounds of mild per cow per day.

Second for the month was Miller & Rex, Inc. Andreas R1, who, with 34.5 cows on test, averaged 50.1 pounds of milk per cow per day and 1.94 pounds of milkfat per day.

Third was Emmett W. Rhein, Pine Grove R3; fourth was Heisler Brothers, Tamaqua R1; and fifth was Carl and Dale Heisler, Tamaqua R1.

Seventy cows finished lactation records with 600 pounds of milkfat for September. The records are based on 305 days or less, two times actual production.

Highest was Miller and Rex, Inc., with their cow Lucy, who had 23,552 pounds of milk and 902 pounds of milkfat. Second was Emmet W. Rhein's Love, with 12,476 pounds of milk and 838 pounds of milkfat. Heisler Brothers' Dixie was third. She had 19,744 pounds of milk and 811 pounds of milkfat.

Land-use meeting set

BIGLERVILLE — Adams Countians will have the opportunity next week to air their views and listen to others' opinioins regarding agricultural zoning and land-use planning. The meeting which will focus on these subjects is a public affairs activity that is scheduled to get underway at 7:30 p.m., November 8, in the Penn State Fruit Research Laboratory, Biglerville.

Cooperative Extension Service planning specialist Stanley Lembech and resource development agent, John Munson, will be joined by Ralph McGregor, York County farmer and planning commission member to describe measures for preserving land in agriculture as operating in nearby states and counties. Problems and possibilities for the different measures will be discussed.

Membership urged

YORK – Farmers in the York County area are invited to join the York County Farmers Association, uniting with 2.8 million members nationwide.

Those interested in more information about the group, can contact F. H. Hutschenreuter, Box 75, Route 2, Airville. Pa. 17302.

Why Insulate

when you can

"TAMSULATE"

IT'S NOT A PRODUCT---IT'S A SERVICE

Tamsulation is a new, different approach to the insulating business. A service of Tam Systems Corporation, Tamsulating is the very best insulating product on the market ... sold, applied, and serviced by the Tam Corporation crews ... known for dependable workmanship.

THE PRE-ENGINEERED STEEL BUILDING THAT'S USED FOR STORAGE ON YOUR FARM SHOULD BE

TAMSULATED!

• BECAUSE

Condensation, caused by heating and cooling of the steel shell clings to the unprotected areas around purlins and girts. Even ordinary insulation has no insulating value here.

YOUR BUILDING WILL RUST!

• BECAUSE

Heat loss is reduced when the unique formation of Tamsulation material is applied. Tamsulating effectively seals. It actually becomes an integral part of the structure. Consequently it is superior in resisting heat loss.

• BECAUSE

Economically speaking: Tamsulating's spray-on method is competitively priced. Then, too, Tam System's speed and accuracy assures no job delays. In many instances, your materials, supplies and equipment can stay while the job is being done.

• BECAUSE

Fire and sound resistance are top priority factors, we are proud to note that Tamsulation material is non-combustible. It is also highly sound absorbable. While noise may or may not be a determining factor in your decision to insulate, the UL Flame Spread rating of 5 with No Smoke Developed is reason enough to investigate Tamsulation.

OUR PRODUCT IS ThermoCon

Tam systems has chosen Thermo Con for its "tamsulating" material because of its sealing, fireproof characteristics. And, because Thermo Con's application methods cut time and cost.

TAM Systems Corp.

Dennis Brubaker: American Farmer Degree winner

Pencil is a farmer's most important equipment

By DIETER KRIEG

LEBANON — The pencil is the most important piece of equipment a farmer can own, and also the least expensive, says Dennis Brubaker, 20, who will receive the American Farmer Degree in Kansas City this coming week. According to Brubaker, a full-time agribusiness employee and part-time farmer, too many farmers don't regard the pencil as an important management tool. "They let the salesmen do the figuring, and a salesman will figure it his way, not yours," the young man observed.

Brubaker, one of five children born to Mr. and Mrs. J. Carl Brubaker, Lebanon R7, lives with his parents on their 100-acre, 60-cow dairy farm. He works full-time as a feed mixer at Mark Hershey's mill, and is also involved with some of the chores on the farm, including his own pig-fattening operation.

Receiving the American Farmer Degree - the highest award bestowed on members of the FFA - rates as one of the highlights of Brubaker's membership in the association. Noting that he would have liked to have earned the coveted degree in the area of agricultural production, he concedes that such an expectation would have been unrealistic since he is only a part-time farmer. He figures his work and responsibilities at the mill played a larger role in his having earned the distinctive degree. It is bestowed upon only a select few of the FFA's membership, which stands at more than 500,000, nationally. A prerequisite for the award is that the candidate must have received his state degree. Brubaker received his - the Keystone Degree - in 1974, during his junior year at Cedar Crest High School.

A 1975 graduate of the school's vocational agriculture program, Brubaker served his FFA Chapter as secretary, vice president, and president. He was also active in individual and team contests.

One of Brubaker's most significant achievements came in late 1975 when he won first place in a tractor driving contest involving contestants from 13 states. That took place in Springfield, Mass. In addition, the young man has excelled in public speaking and soil judging and has earned a mechanics award building a truck body, including sides.

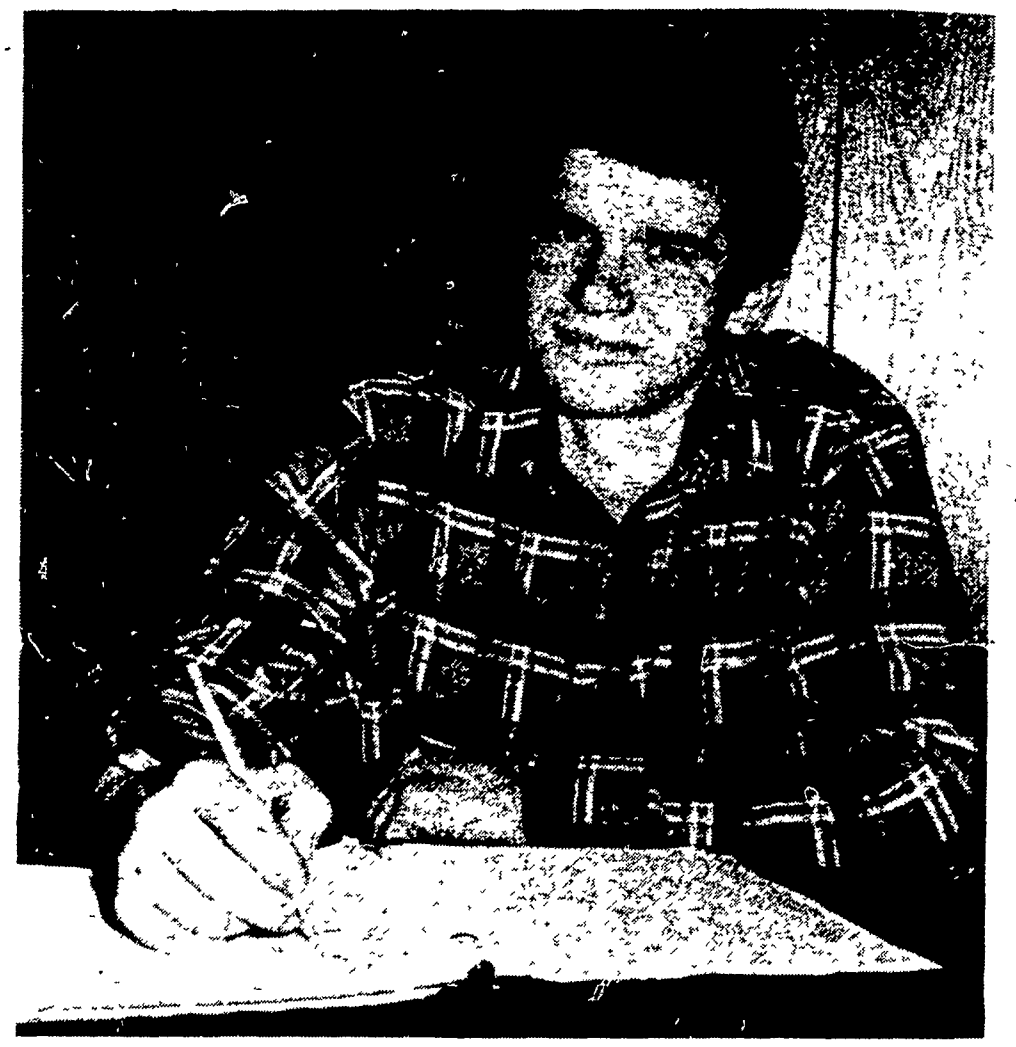
The FFA, says Brubaker, has been a source of encouragement for him, especially when it comes to developing leadership abilities.

Believing that the FFA can do much for those who care enough to make the most of it, the young Lebanon County farmer stresses that FFA'ers and 4-H'ers alike should "keep their feet on the ground." He advises that members should work towards goals and success with their lives, not just awards.

Brubaker spends much of his time and efforts at the mill, where his responsibilities include feed mixing, noting ingredient inventories, and dispatching trucks. He has been employed there since shortly after his graduation from high school. As a part-time farmer, Brubaker feeds out 1500 pigs per year. He has been doing that for a little over a year. He had previously worked with breeding stock, having had as many as 30 sows.

A member of the Midway Church of the Brethren, where he is president of the choir and a former president of the youth group, Dennis Brubaker is the second of five children. An older brother, Kirby, 22, is an accountant. Ronald, 18, works with his father on the home farm. Jere, 17, is a senior at Cedar Crest High School and part-time mechanic at a nearby Ford dealership. Sharon, 13, is in the 8th grade.

Although he is uncertain as to what his future holds, the 20-year old American Farmer Degree winner has some firm opinions about agriculture. Strongly favoring the concept of privately-owned, independent family farming operations, he opinionizes that large agribusiness interests are eroding that type of farming. He would also like to see less government involvement and interference with agriculture. He believes that if a farmer kees a sharp pencil at hand, and uses it, his opportunities for profits and private enterprise will be increased.



American Farmer Degree recipient Dennis Brubaker of Lebanon says the pencil is the most important and cheapest piece of equipment a farmer can have. Brubaker is a part-time farmer, feeding out 1500 pipgs per year, while also holding a full-time job at a Lebanon County feed mill.

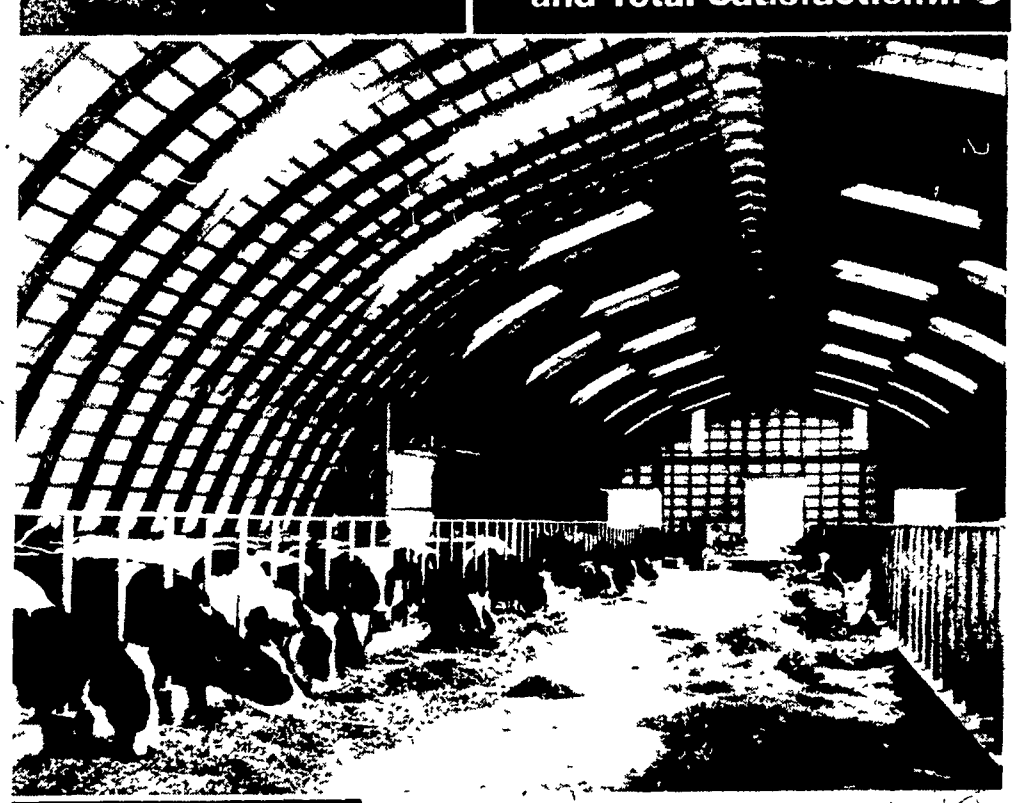
Laminated Rafters:
The First Choice for Economical Space True Flexibility and Total Satisfaction...



Build your next building using dependable wood LAMINATED RAFTERS AND ROOF TRUSSES—and save time on your job by fast and easy erection

COMPLETE MATERIALS FOR ALL FARM BUILDINGS

WE STOCK FABRAL STEEL AND ALUMINUM ROOFING

PROMPT DELIVERIES ON SITE CRANE SERVICE

Call for Information On Your Requirements

Today, wherever modernization with Free Stall Housing provides a very satisfactory day-to-day operation, Rigidply Laminated Rafters are the preferred choice. They provide much more space for the money plus fast, economical erection. Proper ventilation is provided without fans, preventing condensation and helping reduce odors. Sunlight and ventilation combine to provide a desirable working environment, heat and light for winter months and a healthy place for animals.

Regulatory agencies accused of stalling agrichemical research

TUCSON, Ariz. – The long-range ability of American agriculture to produce food and fiber at economically acceptable costs is threatened by government regulatory trends impacting on crop chemical research, according to Dr. Warren K. Lowen, director of agrichemicals research for the Du Pont Company.

Incentives for industry to do new product research have already been affected by a regulatory pattern of registration delays and uncertainties, Lowen told a meeting of the American Phytopathological Society here on Tuesday.

He cited delays in obtaining registration from the Environmental Protection Agency (EPA) as a threat to new product research. The trend is toward longer reviews once required data have been obtained and submitted. Lowen gave the example of two Du Pont fungicides. In 1956 one was granted a tolerance for apples in six months. The second was granted a tolerance for apples after a two-and a-half-year delay from initial application to EPA in 1970. More recently, even longer periods are not uncommon.

Of even greater concern are the current uncertainties regarding continued product registration once it has been obtained, the Du Pont researcher said. "There are many competitive uncertainties in the marketplace which affect the continued, long-range commercial future of a newly registered product. The threat of producing deregistration in its early commercial years further jeopardizes stockholders' willingness to invest money in the original search for new agrichemical products."

In addition, the costs involved with a successful registration are significant, he continued. In the 15-year period from 1956 to 1970, costs to develop registration data on two DuPont fungicides increased nearly 370 per cent. And an additional 50 per cent increase will be involved with registration under EPA's new guidelines. "In the end, these costs must be absorbed by the consumer so that investors can maintain a reasonable return on their initial cash outlay," he said.

Lowen said he did not recommend a return to the standards of 1956, "but I do wonder whether the consumer is really getting his money's worth when he absorbs increased costs over the 1970 standards."

Regulatory trends are boosting costs of crop chemicals for the farmer, Dr. Lowen reported. These include higher costs for registration data, increased plant construction costs to meet clean air, water and other manufacturing regualtions, and increased production costs involved in more stringent waste disposal regulations.

"These increased costs impact on the selling price of new products as they reach the user," Dr. Lowen said. "And they impact on the incentive for the agrichemical industry to continue research aimed at discovery and development of new plant protectant chemicals."

Dr. Lowen said that termination of research on new agrichemicals would have a negative impact on the quality and abundance of America's food supply and on the jobs provided by the agrichemical industry. "I hope we do not cut off these new products at their source by over-zealous regulation of an already highly regulated business," he conluded.

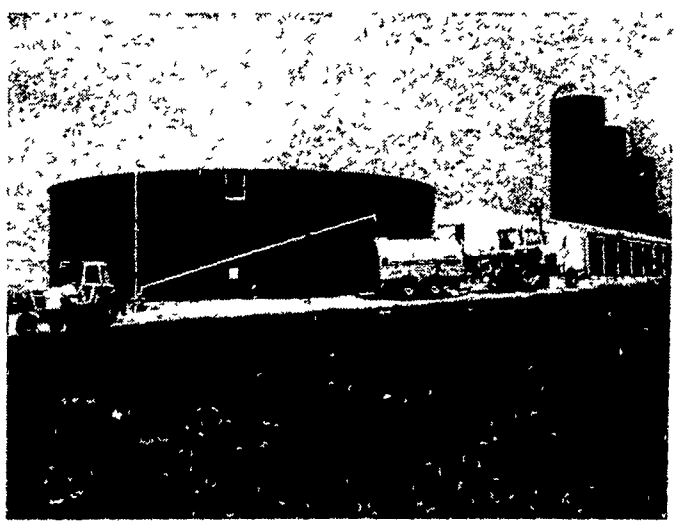
WHAT'S NEW



SLURRYSTORE LINE

ARLINGTON HEIGHTS, Ill. - A line of Slurrystore liquid manure handling systems, including two new 81-ft. diameter models, is now available from A.O. Smith Harvestore Products, Inc., it was announced at the company's headquarters here.

The new product line includes 11 different Slurrystore models, ranging from 25 to 81 ft. in diameter and with capacities from 50,000 up to 903,856 gals.

Nine feet tall structures have been discontinued, and a new series of 23 feet high structures is now available in addition to 14 and 19 feet units. Some of the shorter models can be raised to taller sizes, if the customer selects this option, enabling livestock farmers to increase manure handling capacity along with the growth of their enterprises.

Slurrystore structures are now available in four different "families," including 25 ft., 42 ft., 62 ft., and 81 ft. diameter units. Model numbers designate nominal diameter and height in feet.

The 25 ft. series includes the model 2514, with 52,915 gal. capacity; the 2519, holding 69,984 gals.; and the 2523, with capacity for 87,054 gals. of liquid manure.

Among the 42 ft. Slurrystore structures are the 4214, with capacity of 146,986 gals.; the 4219, holding 194,401 gals.; and the 241,816 model 4223.

The 62 ft. family of Slurrystore units contains the 316,000 gal. capacity 6214; the 6219, with capacity for 418,179 gals.; and the 520,174 gal. model 6223.

The two 82 ft. Slurrystore models are the 8119, with 726,629 gal. capacity; and the 8223 Slurrystore unit, which can hold 903,856 gals. of liquid manure.

All the new structures feature glass-fused-to-steel construction, double-bolted vertical seams, and increased structural support. The new Slurrystore models are also equipped with a standard ladder and platform assembly that makes it easy to check slurry levels or observe agitation of liquid manure in the structure.

BUSH HOG'S new soil hog

Bush Hog's new Soil Hog is a coulter chisel that does two jobs in the same pass. Built to operate in heavy stubble as a primary tillage tool, its purpose is to help fight wind and water erosion by incorporation about 75 per cent of crop residue and breaking up hardpan.

The trail-type coulter chisel has a heavy-duty, weled frame and comes with a standard hydraulic cylinder. Both gang height and running depth are adjustable. The 22" diameter blades have inch spacing for pulverizing action. The 32 inch high-strength shanks are available either rigid or spring-loaded. Available in 8 feet 9 inches, 11 feet 3 inches and 13 feet 9 inches widths in weights from 4100 to 5900 pounds.

For more information, write to Bush Hog, Dept. NR, Selma, Ala. 36701.

Prices down

(Continued from Page 1)

previous Wednesday's auction.

Prices quoted were U.S. No. 1 and 2, 200 to 240 pounds, $52.25 to 53.10; with a few lots of selected U.S. No. 1-2, 210 to 235 pounds, $53.85 to 55.00. U.S. No. 1 to 3 weighing 220 to 260 pounds brought 51.50 to 52.25.

There were 896 hogs reported at Monday's market.

Hog prices the previous week at Lancaster's Monday market were No. 1, 200 to 240 pounds 56.00 to 56.75; No. 1 to 2, 200 to 245 pounds, $54.75 to 55.85; and No. 2 to 3, 200 to 255 pounds, 53.85 to 54.50.

The Wednesday auction at Lancaster Stockyards found barrows and gilts $1.00 to 1.50 higher. There were 981 hogs reported.

On November 1, the U.S. No. 1 and 2 hogs, weighing 210 to 245 pounds brought $54.25 to 54.60, with a few late lots bringing $54.75 to 55.00. A few selected U.S. No. 1 hogs weighing 205 to 235 pounds brought $55.00 to 55.50; and U.S. No. 1 to 3 hogs weighing 200 to 260 pounds sold for 53.00 to 54.10.

Across the nation, the Thursday November 1 hog markets reported hogs slow to moderate.

In the Indianapolis hog market, with 1300 head reported, barrows and gilts were slow, opening 75 cents to $1.00 lower, and a full decline seen on weights over 240 pounds.

St. Louis hogs reported 6000 head, with the barrows and gilts moderate, 75 cents to $1.00 lower.

Slow was the word reported at the Peoria Hog market also, with 3000 head noted, barrows and gilts slow, opening 50 to 75 cents lower.

In the Pa. Auction Summary, there were 6440 hogs reported this week with the barrow and gilts 50 cents to $1.50 lower. Prices quoted included U.S. No. 1 and 2 hogs, 200 to 240 pounds $52.00 to 54.60; No. 1 to 3 hogs, 190 to 260 pounds, $51.00 to 53.50; and a few No. 2 and 3 hogs, weighing 240 to 280 pounds, $49.00 to 52.00.

Taken to the market in Pennsylvania last week there were 6674 hogs compared to the 7133 reported a year ago, according to the aucion summary of 14 auction reports.

Marketing specialist Richard McDonald, working for the Pa. Dept. of Agriculture, stated that the market was uneven this week, and varied from day-to-day, with the futures market reflecting the up and down trends also. The prices of hogs he thought were mainly depending on the numbers of hogs available from day to day, depending on the supply and demand.

For a more complete market picture, check the market pages in this section of **Lancaster Farming**.

Hog price fluctuated from day to day this week, but were generally down throughout the state of Pennsylvania. The biggest drop is price seemed to come at the beginning of the week.

Pa. milk production up

HARRISBURG - Milk production in Pennsylvania during the first nine months of 1978 totaled 5.963 billion pounds or 2.773 billion quarts, according to a special quarterly dairy report released by the Pennsylvania Crop Rotating Service.

This is one per cent more than the corresponding period a year ago and five per cent more than in 1976. Average production per cow in the third quarter of 1978 was 954 pounds or 444 quarts, up slightly more than two per cent from the same period a year ago. The number of cows averaged 700,000 head during the quarter, down 3,000 head from a year ago.

Wholesale milk prices reported by dairymen during the first eight months of 1978 averaged five per cent higher than in 1977. The August, 1978 average blend price of $10.75 per hungredweight or 23.1 cents a quart as reported by commercial dairymen is up 40 cents a cwt. or eight-tenths of a cent per quart from the previous month and 72 cents a cwt. or 1.5 cents a quart above August, 1977.

Production costs for Pennsylvania dairymen for the year ending September 30, 1978 averaged $10.42 per 100 pounds of milk 22.4 cents a quart. This is 11 cents a cwt. or three-tenths of a cent per quart more than June 30, 1978 and 77 cents a cwt. or 1.7 cents a quart more than September, 1977.

Production items contributing most to the increase are building and fencing materials, replacement milk cows and machinery.

TV, radio commercials feature new milk theme

ROSEMONT, Ill. - "Gas Jockey" is one of three American Dairy Association 30-second TV commercials featuring its new "Milk's The One" theme. It is being aired in markets of participating member organizations on a rotating basis with "Arcade" and "Basketball".

ADA's new TV commercials emphasize milk drinking attitudes. Each spot announcement focuses on a leader-type teenager whose decisions set the pace for followers. That independent individual is pictured choosing milk in a free-choice situation where too often other beverages are usually selected.

Filmed in New York, "Gas Jockey" features a gas station attendant who is joined by friends for a "carry-out" food break. He grabs a carton of milk from the station's cooler and says:

"I don't have to think about what to drink 'cause milk's the one for me."

This theme line runs through the three announcements in the pool: "Arcade" shows a girl with friends stopping for a snack after playing pinball machine, "Basketball" stars a teenager and his pals who bounce a basketball down the street enroute to a fast food shop.

A movie buff coaxes the refreshment counter girl to squirt some extra butter on his popcorn. A young man at an expensive restaurant tries to fill his date with rolls and butter so she won't order a high-priced meal. A struggling poet uses the word "butter" to replace better because "butter is better."

These humorous approaches are featured in American Dairy Association's new radio commercials "Movie House," "Fancy Restaurant" and "The Poet." The three 30-second spot-announcements, designed to develop listener awareness of butter through humor, will be aired nationally on the CBS and ABC radio networks.

The scene above is from "Gas Jockey" shows actor Tony Battell and Davis looking on as Le Court enjoys some milk straight from the carton. The commercial, which highlights ADA's new "Milk's The One" theme, is one of the first in ADA's series focusing on individuals freely choosing milk in informal, way-from-home eating situations with friends.

The new radio commercials highlight the comedic talents of Wayne Juhlen and Penny Lane. This famous team has appeared on many popular TV shows and currently has a comedy program on Chicago radio.

ADA of Minnesota and ADA of South Dakota will purchase air time for the network radio commerical. These member organizations will also share costs for piggybacking the butter spots with milk commercials in other unit areas.

ADS is the advertising and marketing services arm of United Dairy Industry Association, an organization dedicated to increasing sales of U.S. produced dairy products through its total promotion program. Also in the program are the product and process research and development projects of Dairy Research Inc. and nutrition research and education programs of National Dairy Council.

Farm Calendar

(Continued from Page 10)

- Philadelphia, today and tomorrow.

Fund raising luncheon for the National Commission on Egg Nutrition, 12:30 p.m. at the Benjamin Franklin Hotel, Philadelphia.

Lebanon County Conservation District board of directors meeting, 8 p.m. in Room 207 of the Lebanon County Municipal Building, Lebanon.

Dover Young Farmers hay and forage show, entries open at 7 p.m., Dover High School.

Adams County public-affairs meeting on agricultural districting and other land-use concepts to protect agriculture. 7:30 p.m. in the Penn State Fruit Research Lab, Biglerville.

Thursday, Nov. 9

Chester County DHIA banquet, East Brandywine Fire Hall, 7 p.m.

Lancaster Association of Commerce and Industry sponsors annual Agriculture Banquet, 7 p.m. at Good'n Plenty Restaurant, Smoketown.

PEIA regional conference continues in Philadelphia. (See Wednesday's listings).

Production Credit and Federal Land Bank of York annual meeting and banquet, Embers Restaurant, Carlisle, registration at 6:15, dinner at 7 p.m.

Deer control fencing demonstration meeting, from 8 a.m. to mid-afternoon. Slide programs at 11 a.m. at 2 p.m. Philip Roth's Apple Valley Orchard, Fairfield.

Adams County Woodlot Management and Firewood meetings and demonstration at the woodlot adjacent to New Oxford High School, west side, 10 a.m. and 1:30 p.m.

Ag-Service Agronomy School, Embers Restaurant, Carlisle, 9 a.m.

Friday, Nov. 10

Pennsylvania Egg Marketing Association meeting, 7 p.m. at the Treadway Resort Inn, Lancaster. Christine Bushway and Bill Rent, of AEB and NEMA, respectively, will be among the featured guests to talk about increasing egg consumption.

Saturday, Nov. 11

Ephrata Area Young Farmers - Blue Mountain Young Farmers Square Dance, 7:45 p.m. Blue Mountain High School.

Buck Tractor Pullers' banquet, Quarryville Community Fair Building, Quarryville, 6:45 p.m.

Vegetable growers plan meeting

NEWARK, Del. - Plans are now well underway for the first statewide annual meeting of the newly formed Vegetable Growers' Association of Delaware, Inc., according to Delaware Extension Horticulturist Dr. Michael D. Orzolek.

The two-day event, which will be sponsored in conjunction with the Delaware Cooperative Extension Service, will feature exhibits, speakers, and information of importance to Delaware's vegetable growers. It is scheduled to take place at the Sheraton Inn in Dover, January 29 and 30, 1979.

Vegetable growers, extension specialists, researchers, and other knowledgeable members of the vegetable-growing industries are coming from a number of states and Canada to address the gathering. Dr. Jack Dennison will be featured entertainment at the annual banquet. Dennison, assistant dean of the College of Food and Natural Resources, University of Massachusetts, is author of a book entitled "Memoirs of a Maine Country Boy."

Anyone interested in attending the banquet, conference, and/or exhibiting a produce or service related to the vegetable industry should contact Orzolek at the University of Delaware Georgetown Substation.

Primitive Rodents

One of the most primitive of rodents is the Fewellel or Mountain Beaver It's restricted to the Pacific coast of the United States and is considered a good swimmer The Sewellel lives near streams in damp, wooded country and feeds chiefly on vegetable matter

THE FRONTIER

A DOG-GONE GOOD STOVE!

Carolyn Willitts, local Artist from Eden, and Her Friend Baron Agree!

Last year, about the same time they got Baron, Carolyn and her husband Dick bought a FRONTIER WOOD STOVE and installed it themselves. Both have added hours of warmth and enjoyment to their home.

WHAT'S NEW

COMPACT DIESEL TRACTOR

NEW YORK, N.Y. - The west model in the Satoh e of tractors was in- oduced to distributors at e Satoh Tractor stributors Fall Convention Denver, Colorado. The toh Buck is an 18.5 hp esel tractor designed for a de range of applications. is available in both 2-wheel d 4-wheel drive.

The Buck utilizes a three-cylinder, water-cooled Mitsubishi diesel engine with a large 51.81 cubic inch displacement. The dual range eight-speed selective sliding gear transmission and locking differential insure optimum performance at speeds from .68mph to 8.60mph. Power Take Off is at 544, 802, or 1314rpm at 2600 engine rpm.

The Satoh live hydraulic system and the three-point linkage give lift capacities of 1100 lbs. for category 1 implements. This system provides full control for lift, hold, down, flow and lock.

Extra-large tires give Buck traction, and the low-to-the-ground chassis delivers its stability. Buck's comfortable driver work station helps reduce operation fatigue.

A safety switch is provided to prevent unforseen accidents when starting the engine and the internal expansion drum-type brakes are interlocking and adjustable for maneuverability in tight turns and for increased stopping power. There is also a parking brake.

Buck has a horizontal exhaust with silencer.

The 2-wheel drive model (S470) weighs 1157 pounds with a ground clearance of 11.2 inches and the 4-wheel drive model (S470D) weighs 1268 pounds and has a 9.3-inch ground clearance. Both are available with either AG or Estate tires.

Some of the other standard features are the foot throttle, thermostat, over-running clutch, head lamps, plus many more.

Satoh tractors are made in Japan by Satoh Agricultural Machine Mfg. Co., Ltd., Tokyo. They are imported by Sumitomo Corporation of America, with headquarters in New York City, and are handled by a network of 16 distributors with over 700 dealers throughout the U.S.A.

HOG RECORDER AND PROGRAMMER

Designed and developed by a sow herd manager, the Easton Hog Carousel Recorder and Programmer provides a system for organizing herd information. Metal racks in the center well of the Carousel hold up to 1050 individual sow record cards. The outer perimeter of the Carousel consists of movable day/month rings and a "flag" ring.

The flag ring is programmed by placing color-coded program flags at manager-selected positions in the 144-day cycle. It is then moved one increment each day. As a particular program flag (health, nutritional, breeding, etc.) lines up with a group of sow cards, those sows will receive that part of the program specified on the flag.

The sow and boar cards are printed on extra-heavy stock and are provided in 5 different colors for color-coding groups of sows, boars or breeds. Color-coded program flags are both pre-printed plastic blank for special instructions. A marking pen, file rack for open sow cards, boar cards and color-coded marking clips are also included with the Carousel.

The Easton Hog Carousel is available from Easton Products, Inc., R.R.3, Blooming Prairie, Minn. 55917, (507/583-6610.)

NEW MUELLER FRE-HEATER

A new, model of the Mueller Fre-Heater has just been released by the Paul Mueller Company, Springfield, Mo. The new Fre-Heater features a gleaming white outer jacket with epoxy-coated lining to resist corrosion. Inside, the "heart" of the heat exchanger is made of stainless steel Mueller Temp-Plate heat transfer surface. High grade stainless steel alloys and special chemical treatment of interior components add to the built-in corrosion resistance of the new Fre-Heater.

Heat, wasted by air-cooled milk coolors, is recovered by the Fre-Heater to heat water to 140 degrees. A booster heater can then be used to raise water temperature to the level required for sanitizing equipment. An optional mixing valve, adjustable for the temperature desired, provides tempered water for "prepping" cows and similar applications. The Fre-Heater heats one gallon of water 60°F. to approximately 140°F. for each gallon of milk cooled.

The Model "B" Fre-Heater comes complete with a self-contained 2, 3, or 4 horsepower compressor, ready for installation. The Model "C" Fre-Heater comes without compressor for connection to existing air-cooled refrigeration units.

Model "B" and "C" Fre-Heaters may be installed in place of air cooled condensers. However, if refrigeration requirements exceed hot water demand, either Fre-Heater model may be used in conjunction with an air-cooled condenser. This eliminates the potential necessity of draining excess hot water should Fre-Heater hot water production exceed demand or storage capacity.

Mueller Fre-Heaters purpose is to save energy by recovering waste heat from milk cooling instead of heating water in a separate operation, another purpose is to make milk cooling more efficient.

An illustrated Mueller Fre-Heater brochure describes the design, operation and capabilities of these units.

Deer fences to be shown

FAIRFIELD — A deer control fencing demonstration and meeting will be held at Philip Roth's orchard, ner here, on November 9. (Rain date is Nov. 10).

The demonstration is to be conducted by Henry Swayze, a Vermont livestock farmer who has imported some of his ideas from New Zealand. He will use high tensile strength wire attached to springs to construct a permanent electric fence. Interested parties are invited to attend anytime after 8 a.m. A slide presentation on construction techniques and materials will be shown at 11 a.m. and again at 2 p.m.

Ice Cream

Ice cream evolved from flavored ices which were popular among the nobility during the fourth century B C In the 13th century A.D , Marco Polo returned to Europe from China with recipes for water and milk ices

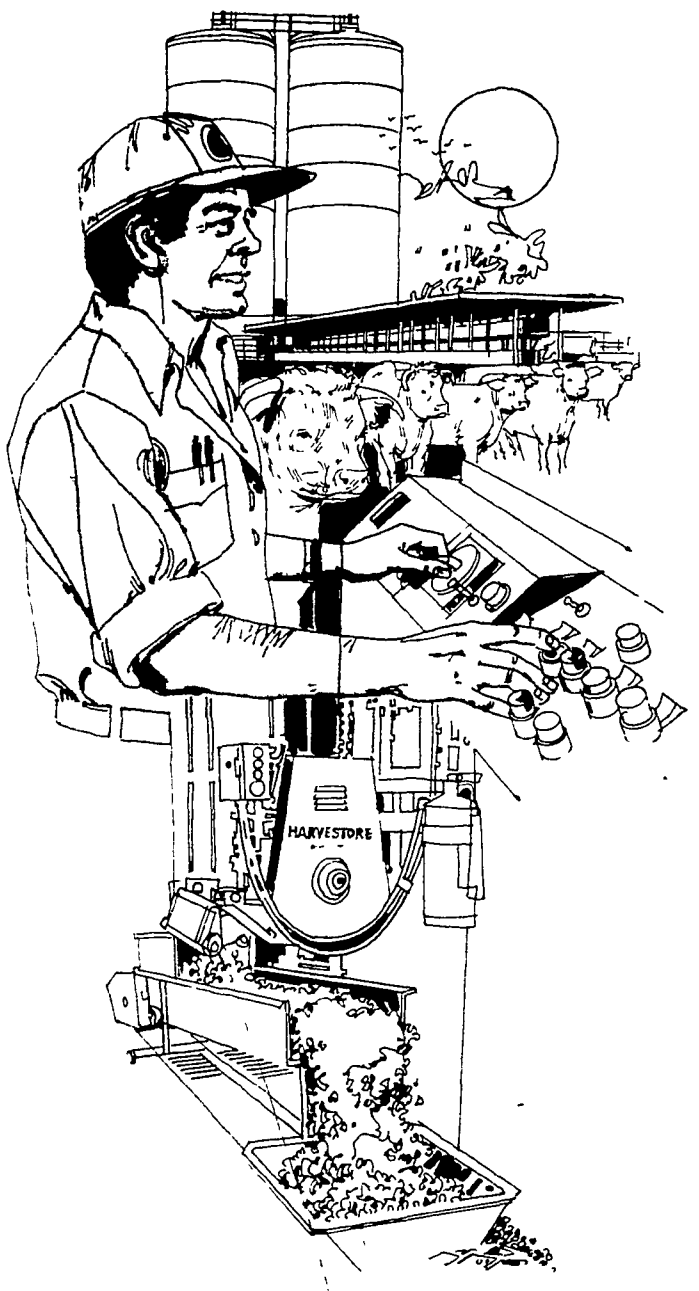
HARVESTORE AUTOMATION EQUIPMENT

The 'systems' approach to profitable livestock production



"Harvestore farming: efficiency is the whole idea." That's more than just a catchy phrase — because the Harvestore products shown here can become elements in a complete system to help make any livestock farm more efficient, more profitable. A Harvestore system can let you carry more animals per acre . . . give you more production per animal . . . reduce labor requirements . . . and help you cut costs. Your Harvestore dealer can help you design a system that's just right for your farm.

Harvestore farming: efficiency is the whole idea.

Paul Harvey to keynote FFA convention

ALEXANDRAI, Va. - Paul Harvey, America's most honored news commentator heads the list of keynote speakers scheduled to address the Golden Anniversary Convention of the Future Farmers of America in Kansas City, November 7 to 10. Harvey will address the Thursday morning convention session.

Kyle Rote, Jr., of Houston, Texas, a recipient of the North American Soccer League's "Rookie of the Year" will address the convention Wednesday afternoon. For many years a star of the Dallas Tornadoes, his athletic prowess has been well demonstrated since 1974 when he entered the nationally televised "Superstars" competition and placed first over a field of world-famous athletes, including Pete Rose, John Havlicek and O.J. Simpson. He repeated as champion in 1976 and 1977.

Jerry Clower, a "salesman of the really good life" will be the featured speaker at the Friday morning convention session. Clower is a humorist with albums which tickle the nation's funnybone. He's been a guest on top shows in television and radio, including his recent appearance on the TV special to present the Country Music Awards.

Dr. Ernest Boyer, United States Commissioner of Education will give remarks at the Thursday afternoon session. Boyer was appointed to his position by the President of the United States in 1977, resigning his position as Chancellor of the State University of New York to head up the U.S. Office of Education. As top official of education in the United States, Boyer is responsible for fulfilling the mandates of Congress as they relate to vocational education in the U.S. and for carrying out Public Law 81-740 as it relates to the Future Farmers of America.

Convention speakers will be welcomed to Kansas City and introduced to the convention audience by a delegation of FFA members headed by 20-year-old National FFA President J. Ken Johnson of Macogdoches, Texas.

Royal Visitors

King George VI and Queen Elizabeth were the first King and Queen of England to visit the United States. The royal pair stayed five days during June 1939 while visiting Washington, D.C, New York City and Niagra Falls, N Y

Remember How?

AGRI-KING
KEY TO PROFIT

This is the last in a series of six articles. All previous articles in the series ("Why AGRI-KING Builds Rations From the Ground Up", What is a Balanced Ration", "Is Testing Necessary", "AGRI-KING'S Objective - Should it Be Yours?" and "Dry Cows - Why Bother?") are available on request. Call 717-394-3047 — or 626-1164.

THEY TELL ME AGRI—KING PRODUCTS ARE TOO HIGH PRICED.

They might appear to be too high to people who don't realize the high potency of the vitamins, trace minerals, enzymes and flavorings that are in the AGRI-KING products. These products are not made only to sell. They are made to supply the animals with the micro nutrients they need to produce their inherited production and also maintain their health. They furnish high levels of vitamins, trace minerals and enzymes - not just a few of them but the whole spectrum of all vitamins, all trace minerals and enzymes.

These products might also appear to be a little high to someone who doesn't know all the service that goes with them. A farmer has the privilege of having an AGRI-KING serviceman work with him in solving his problems and figuring out how to use his home grown feeds to their best advantage. The farmer also has the privilege of talking toll free to AGRI-KING'S nutritional department.

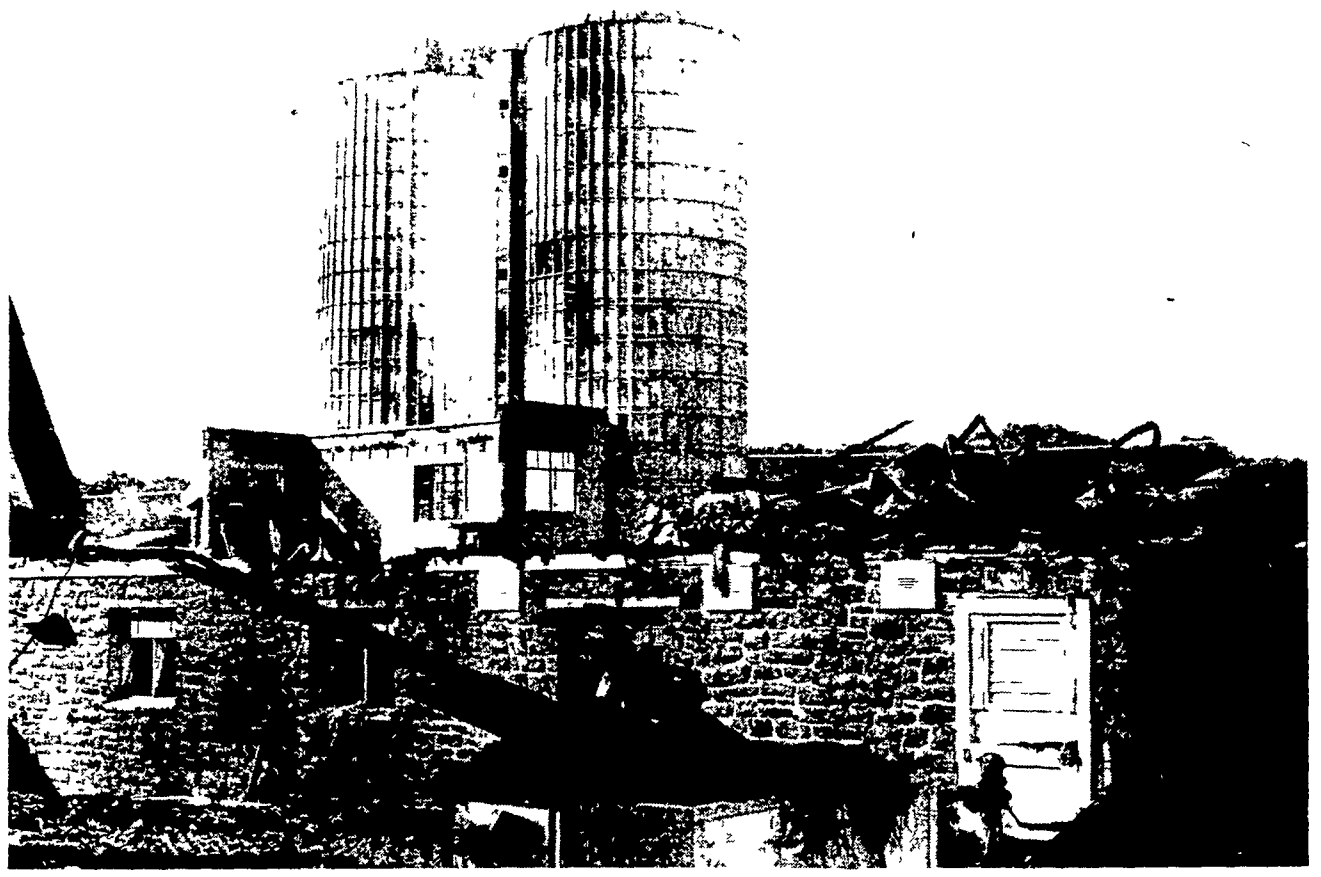
They might also seem too expensive to someone who doesn't realize the money that is wasted in overfeeding or under feeding protein, calcium, phosphorus, vitamins and trace minerals. Each one of these is very important, but not one is more important than the others, and they must be put together in the right amounts and ratios.

The products might also seem too expensive to someone who doesn't realize that profit over feed cost is more important than the cost of a ton of feed. If a ton of feed costs a little more but is in balance with your roughages, your profit over feed cost will be higher than it would be if you buy a real cheap feed that does not match your roughages. You must remember also that the more expensive per ton is not always the most expensive per cow per day. For example it you have a $100 per ton feed and need to feed 20 pounds of it a day, it will cost you $1.00 per cow per day for her grain ration. But on the other hand if you have a ton of feed that costs $400. per ton and you need to feed only 2 pounds a day, this will cost you only 40 cents per cow per day for her grain ration.

They might also seem too expensive to someone who doesn't realize how expensive it is to doctor sick cows and replace 25-40 percent of the milking herd each year.

REMEMBER THIS — The most important figure is what does it cost to produce a pound of milk, not what is the cost of a truckload of feed, a ton of supplement, or a bag of vitamins and minerals.

★★★



Although the upper areas of the York County landmark barn at Avalong Farms, were totally consumed, firemen saved the adjoining silos.

Fire destroys barn at Avalong Farms

By JOYCE BUPP
Staff Correspondent

YORK - A York County landmark was destroyed Saturday evening when fire swept through the main barn at Avalong Farms, a well-known dairy operation and restaurant just east of York on Whiteford Road.

Avalong employees had nearly finished the evening milking when the flames were first spotted about 6:30 p.m. in the upper barn storage area. About 120 firemen and 18 pieces of equipment representing a half-dozen fire-fighting operations responded, tying up traffic on nearby Route 30 for several hours.

Herds of Guernseys and Holsteins, totaling 72 head, were safely evacuated from the pipeline stall barn, located under the burning frame structure. Although a shortage of available water supplies hampered the fire-fighting efforts, firemen were able to save the already-smoking roof of an adjacent smaller stall barn and two large cement stave silos.

A milk bottling plant attached to the barn was severely damaged, although a farm spokesman thought that some of the processing equipment might be salvaged. Several pieces of machinery, including a manure spreader, skid-steer loader and post drilling and setting equipment were destroyed. Eight tons of dairy feed, delivered just hours before the flames broke out, also went up in smoke.

Herdsman Larry Amspacher praised the help of county dairymen who turned out at dawn Sunday to help move the ousted cattle into temporary milking facilities in the smaller barn. He added that by 9 a.m. electrical service had been restored to the unburned structure and daily milking was underway.

Amspacher also had warm words for feed suppliers Spangler and Sprenkle, Inc., who returned to their West York mill late Saturday night to mix and deliver two tons of feed before midnight.

Clyde Long, one of the owners of the family-held corporation, maintained hope that dairy processing could be back underway in just a matter of days.

Holstein association's Rumler to speak at Lancaster dinner

LANCASTER — The annual Agriculture Banquet, sponsored by the Lancaster Association of Commerce and Industry, will be held Thursday, Nov. 9, at the Good'n Plenty Restaurant, Smoketown. Robert Rumler, executive chairman of the Holstein-Friesian Association of America, will be the featured dinner speaker The time for the dinner is 7 p.m.

Tickets costs $7 and are available from Atlantic Breeders and the Cooperative Extension Service

Rumler will talk about the critical role which U S agriculture plays in international trade, and the key position of American farmers in the international marketplace. He'll be pointing out the supportive role which farm products and agricultural commodities play in the balance of payments, which in turn greatly affects the value of the American dollar

Another highlight of the annual banquet will be the presentation of Century Farm Certificates to Lancaster County farmers who have applied for the distinctive honor. The certificates are given to those whose farms have been in their families for 100 or more consecutive years.

The Good'n Plenty Restaurant in Smoketown is located on Route 896, just south of the light at the intersection of Routes 896 and 340

Winter survival guide offered

HARRISBURG - A new United States Department of Energy (DOE) publication entitled "Winter Survival, A Consumers Guide to Winter Preparedness" is available free for the asking from the Governor's Energy Council Toll-Free Conservation Hotline.

The 18-page guide offers helpful hints to, "help you prepare for winter and help you handle most emergencies that even the worst weather can bring," according to the authors.

"Winter can be an enjoyable and beautiful season of the year, but we must be aware of its hazards. Having a comfortable and safe winter is a matter of advance planning," the booklet concludes.

The Department of Energy publication was prepared in cooperation with the Administration on Aging of the United States Department of Health, Education and Welfare, American Red Cross, Community Services Administration, The Defense Civil Preparedness Agency of the Department of Defense, Extension Service of the Department of Agriculture, the National Outdoor Leadership School and the National Weather Service.

"This new publication is being offered through the Energy Council Conservation Hotline as a public service to enable Pennsylvanians to be better-prepared for the types of emergencies we've seen during the past two winters," according to Ron Gargasz, Conservation Director for the Governor's Energy Council.

Single copies of the "Winter Survival" booklet can be obtained by calling the Conservation Hotline at 1-800-882-8400, or by writing to: Governor's Energy Council, Public Information Office, State Street Building, Sixth Floor, Harrisburg, Pa. 17101.

The world's most accurate time-measuring device—the U.S. Naval Research Laboratory's system of twin atomic-hydrogen masers—is off one second every 1,700,000 years.

Why Lancaster County Farmers Support Thornburgh/Scranton

Dick Thornburgh listens and cares. His stand on issues of importance to farmers reflect their answers to hundreds of questionnaires sent out by the Farmers for Thornburgh Committee.

As Governor, Dick Thornburgh has pledged to:

1. Improve markets and prices for Pennsylvania farm products.
2. Implement practical procedures to preserve agricultural land and family farms.
3. Provide research needed for producing and marketing farm products.
4. Improve and maintain needed transportation facilities, especially rural roads, bridges and highways.
5. Support the Milk Marketing Board and provide assurances to dairy farmers for payment for their milk.
6. Make state agencies responsive to agriculture and individual farmers.

A PROVEN RECORD OF INTEGRITY, EFFECTIVENESS AND COMPASSION

DICK THORNBURGH WILL BE THE KIND OF GOVERNOR PENNSYLVANIA NEEDS.

Paid for by William S. Endslow, Harold Z. Musser, John E. Barley,

Grange Master wants federal budget tightened

BUTLER - John W. Scott, Master of the National Grange, last week called on Pennsylvania Grangers t. take the lead in seeking a Constitutional amendment that would put federal government spending on a pay-as-we-go basis.

"Let's work together to defeat inflation and excess government spending and save the greatest country in the world," Scott told more than 500 Grangers - young and old - at the Youth Banquet that featured Wednesday's activities at the 106th annual Pennsylvania State Grange convention.

Scott warned against the danger of continued deficit spending, pointing out that the national debt now is in excess of three-quarters of a trillion dollars," and by the time it is paid will cost the American people one and one-half trillion dollars."

Turning his attention to the young Grangers in the audience, he reminded them that "we are living in a young people's world. By 1980 the nation's work force will be made up mostly of people 35 years of age and under."

But, he added, we are putting a staggering

John Scott

financial burden on their shoulders. "We must get rid of the pork barrel programs that are costing us hundreds of millions of dollars." He cited Social Security as one of the programs that has spiralled out of bounds and the recently enacted legislation that will increase the cost to employees and employers alike.

"By 1985," he said, "it is estimated that a person with an annual income of $42,500 will have to pay about $3,500 a year in Social Security taxes alone.

"Young people of today will have to foot the bill because the Social Security program has been liberalized far beyond the original intent of the plan. It was created to help those who would need help in their old age, not to become a government mandated pension plan," Scott told the group.

Referring to President Jimmy Carter's anti-inflation message earlier in the week, Scott said "it has some ideas that will work, but only if they are backed by the cooperation of everybody."

Scott, a former resident of Butler County who served as State Grange Master before becoming the head of the National Grange organization, and members of his staff have attended a number of conferences recently with President Carter at the White House.

On several occasions he had an opportunity to discuss the nation's energy problems with the President and his aides.

The recently enacted package of energy bills, he said, will gradually deregulate natural gas and

NOAH WENGER

YOUR STATE REPRESENTATIVE

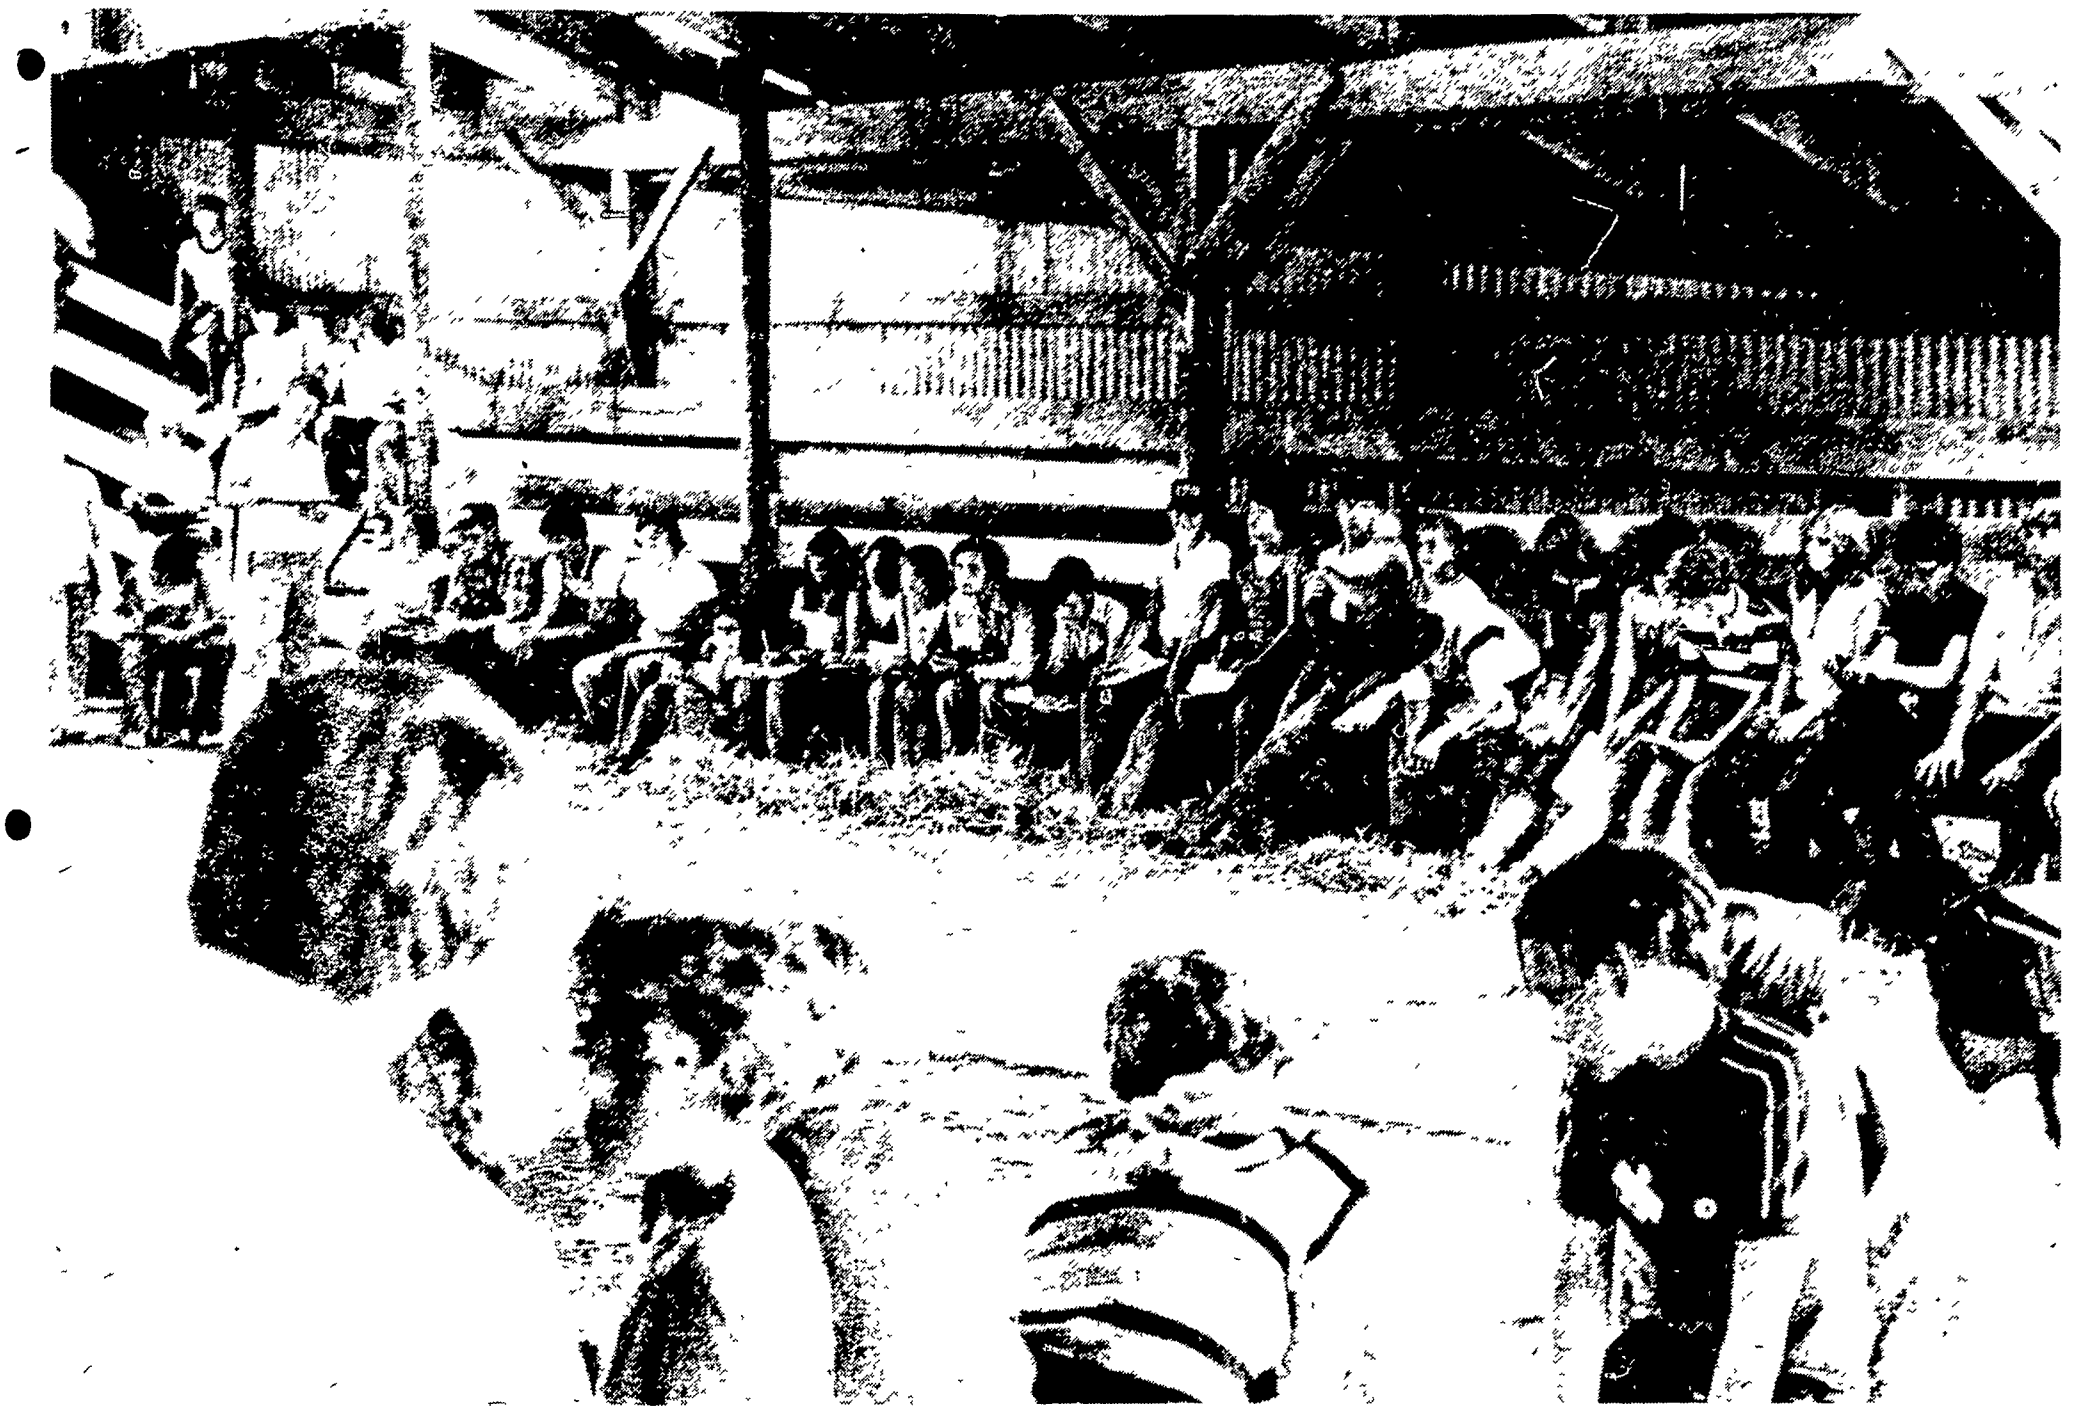
"As a life-long Lancaster County resident, businessman and farmer, I feel I have an understanding of what the people in our area want from state government. As a legislator, I have tried to see they get it.

"During my first term, my door has always been open to anyone who has a problem or just wants to express an opinion on a current issue. That's how it will be during my second term, too. My job is to work for you."

Noah Wenger

Please vote for Noah Wenger
Republican Representative, General Assembly
November 7th. Thank You.

Terry Kauffman, Chrm Reid Wissler, Treas
Paid for by Wenger for General Assembly Committee



Rural youth organizations, such as 4-H and FFA give agriculture's young people a chance to learn, practice skills and enjoy the fellowship of people their own age.

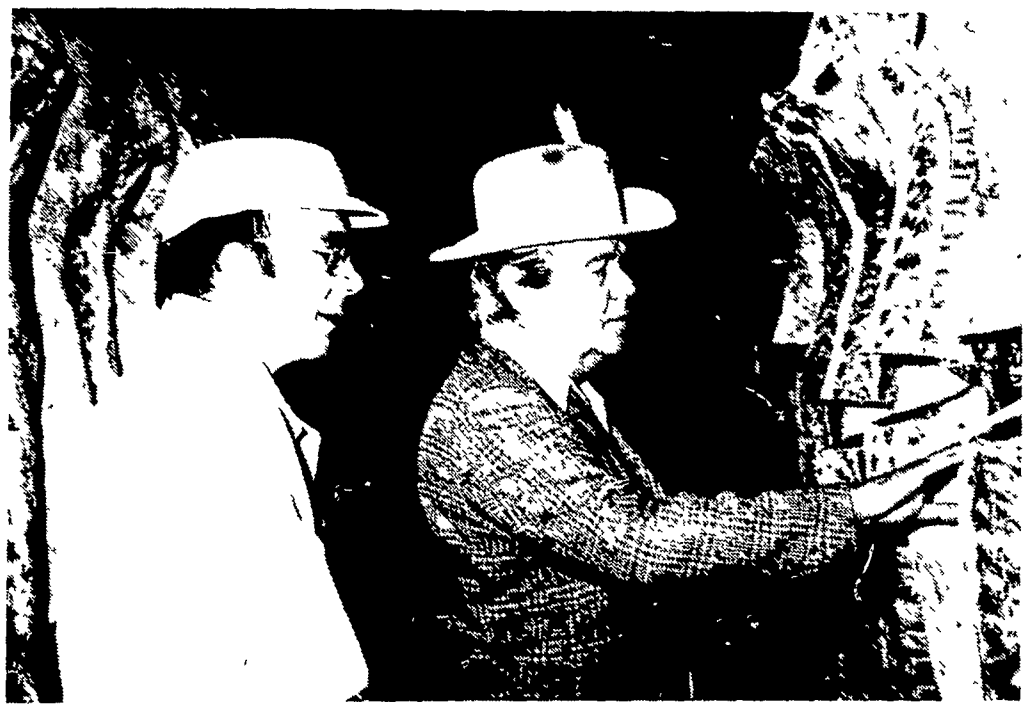
Certified Angus Beef program launched in Ohio



Checking over the first carcasses to be evaluated for the American Angus Association Certified Angus Beef Program are Louis "Mick" Colvin, (left) director of the program and William Decker of Val Decker Packing Co., Piqua, Ohio, where the cattle were slaughtered.

A program designed to provide consumers with high quality, tasty, tender beef, every time they shop was launched in Columbus, Ohio, October 18 by the American Angus Association and Renzetti's IGA Food Markets.

The Certified Angus Beef, went on sale for the first time nationally in the two Renzetti's IGA Food Markets and the first day it accounted for over 50° of the two stores' regular beef sales, according to manager Bob Renzetti. "We are very happy with the early results," said Renzetti. "Our meat manager now thinks that we can devote two meat cases to Certified Angus Beef instead of the one case as originally planned."

The national program was launched at the Renzetti store on Dublin-Granville Road in Columbus, by Ohio Governor James H. Rhodes, who issued a proclamation for the opening day event. The official proclamation cited the American Angus Association for taking the leadership in developing a program to supply consumers with high quality beef. The ceremonies were also attended by the president of the American Angus Association, Gilman Stewart, Greensburg, Ind.; Dr. C.K. Allen, executive secretary of the Association; Fred Johnson, Summitville, Ohio, chairman of the Association's Beef Certification Committee; and Mick Colvin, director of the program for the American Angus Association. A gift of Certified Angus Beef was awarded to the first purchaser of the day. She was Mrs. Ella Whitt, of Otway, Ohio. Angus beef kabobs were served to the press and guests and to all the shoppers in the store.

"The Certified Angus Beef (CAB) program is designed simply to bring meat packers and retailers together in order to provide consumers with high quality beef and to eventually provide Angus breeders with a more profitable outlet for their product," said Mick Colvin, director of the CAB program. "The American Angus Association sets up the certification standards and supervises and administers the program to insure that all the quality standards are met In Phase II of the program we will identify cattle sired by registered Angus bulls at the farm or ranch and then follow them through the feedlot and packing plant, to the consumer."

The cattle for the initial program in Columbus are being slaughtered at the Val Decker Packing Co , Piqua, Ohio. Only about one-third of the Angus cattle that have been slaughtered to date quality for the Certified Angus Beef stamp, according to William Decker, plant manager.

The American Angus Association does not take ownership of the cattle or the beef. The Angus cattle are obtained by the packer, and the carcasses or boxes of primal cuts are sold directly to the participating retail outlet. The packer receives a small premium from the retailer to compensate for the extra time and effort involved in selecting, identifying and handling the Angus carcasses, and to pay for the administration of the program.

Participating packers and retailers sign an agreement with the American Angus Association, that spells out how the program is to operate. Both packer and retailer are subject to unannounced inspections by a CAB representative to insure that all the provisions of the program are being followed.

The American Angus Association, in addition to administering the program, furnishes carcass rolls, stamps and logo cuts to the packer for identifying carcasses and also for printing on boxes. The Association provides retailers with point of purchase display material, plus booklets and folders on

beef cooking and the proper care and preparation of Certified Angus beef. In addition the Association helps with the initial publicity and promotion when a retail outlet begins featuring Certified Angus beef.

The next move, according to Mick Colvin, will be to expand the program both in Ohio and throughout the United States. This requires matching up retailers with packing companies to supply them. As volume increases, the Certified Angus Beef program will move into Phase II, where premiums will be paid to the producers of commercial Angus cattle that are sired by registered Angus bulls, said Colvin.

Adams Co. Holstein Assn. holds meeting

Officers and directors of the Adams County Holstein Association met at their annual meeting on October 19 at the McSherrystown Firehall. Seated left to right are Vice-President John Hess, Gettysburg R5; Secretary Scott Whiteford, New Oxford, R4; and President Marvin Brown, Littlestown R3. Shown in the top row are left to right: Robert Clowney, Gettysburg; Robert E. Gilt, state director, Littlestown R2; Leroy Basehoar, Littlestown R1; Paul Waybright, Gettysburg R9; and Adam Lobaugh Aspers R1.

Grange Master wants

(Continued from Page 46)

provide a more equitable price base for interstate deliveries.

The portion of the bill dealing with coal will require many energy producing plants to switch from gas and oil fuels to coal to conserve natural resources. Research also will be increased in the field of coal gasification, he added.

Priorities established under the energy bills will be: First, homes, hospitals, fire companies and emergency organizations; second, food production and processing, and, third, manufacturing.

Agriculture, he told the group, is the only segment of the American economy that has increased its productivity in recent years. "But," he adds, "increased processing costs, increased transportation costs, and increased packaging costs have greatly increased the consumer cost of food."

In concluding his talk, Scott reminded his audience of the gloating of the Soviet leader, Lenin, who stated that 'we will never have to fire a shot to defeat democracy in the United States. America will spend itself into communism.'

And Scott again warned his audience of the necessity to control government spending and reduce the national deficit as the key action in the battle against inflation. He urged Grangers to act immediately to seek controls that will be necessary to return the American economy to a firm foundation.

Douglas A. Bonsall, youth director of the State Grange, was master of ceremonies at the Banquet.

The Beatty H. Dimit Memorial Award for the winning team in an annual ritual competition was presented to the Lawrence County team. The presentation was made by Beatty H. Dimit, Jr., son of a former State Grange master in whose honor the award was established. It was accepted by the team captain, Dale Weisz.

Entertainment was presented by "The Master's Road Crew," a group of young Grangers.

Family farmers, and their cooperatives, are your best assurance of an abundant supply of reasonably priced food.

Farm families work long hard hours to put food on your table There s a good chance that without farmer cooperatives those farmers wouldn t produce as much food as they do And without farmer cooperatives there s a good chance you d be spending more money for less to eat

America s agricultural abundance results from full throttle production A farmer who has the skill the land and the equipment to produce 200 bushels of corn on an acre of ground will try to produce 200 bushels Or 210 He will not aim for 150 bushels in an attempt to produce a shortage and drive up the price

It would be sheer folly for a single farmer or even hundreds or thousands to try that tactic More than almost any other segment of the economy farmers are captives of the marketplace Unlike the makers of cars and appliances farmers don t determine the prices for their products Unlike the suppliers of services like doctors and plumbers they don t decide how much they ll get for an hour of work Farmers take what the marketplace gives them Some years it s enough Many years it isn t

Through their cooperatives farmers are better able to profit in the good years better able to stand the pressures of the bad years Supply co ops help farmers get the supplies and services they need to produce at full capacity Marketing co ops help farmers find and develop markets for their products

Farmer cooperatives provide an extra measure of stability in a business which can be risky even in the best of times They are a key part in a very complex food production system in which like a well oiled machine many different parts must work together to make the whole run smoothly

With their co ops help farmers keep the throttle of that machine wide open

Farmer Cooperatives. They're doing the country a lot of good.

This message was brought to you by over three million family farmers through their cooperative associations and organizations

State offers vehicles by auction

HARRISBURG - Secretary of General Services Ronald G. Lench today announced the State will auction off its vehicles at the Commonwealth Garage in Harrisburg, located at 22nd and Forster Streets on November 17, 1978.

Lench said that the 235 units to be sold may be purchased by dealers, the general public, and employes of the Commonwealth, or their relatives. Employes of the Department of General Services and other State departments specifically prohibiting participation, however, are not eligible to purchase the used automobiles.

Bidders must register with auction officials at the Garage beginning at 8:30 a.m. on the day of the sale. The sale begins at 10 a.m. Successful buyers must deposit $50 cash for each vehicle bought, and pay the balance within five working days of sale date. Vehicles must be removed within the same period.

"Since the State offers no guarantees or warranties," Lench said, "interested buyers should make a thorough inspection of the vehicles before the day of the sale. The cars and trucks are available at the Commonwealth Garage, during normal working hours, for this purpose."

A complete listing of all vehicles in the Harrisburg sale is available from the Bureau of Vehicle Management, Department of General Services, 2221 Forster Street, Harrisburg, PA. 17125. (717-783-3132).

Hay show to be held Nov. 8

DOVER - The Dover Young Farmers will hold their annual Hay and Forage Show on Wednesday, November 8, in the cafeteria of the Dover High School. Broadening the scope of entries in the annual show, the Young Farmers have extended an invitation to all York County farmers to participate in the competition.

Registration of entries will be done from 7 to 8:15 p.m., with judging by county agent John Smith scheduled to begin at the close of the entry period. Ribbons will be awarded to the first five placings in all categories. To help cover expenses incurred in setting up the show, there will be a 50-cent fee for each class entered.

Hay classes will include: first and second cuttings of all clover; first cutting of timothy and clover mixed; first and second cuttings of other mixed hay (excluding timothy clover); first, second, third, fourth cuttings of mixed alfalfa; first, second, third and fourth cuttings of all alfalfa; corn silage (all corn or corn-sorghum); haylage (all alfalfa or grass silage); high moisture corn; eared corn; and miscellaneous grasses.

Entries in hay classes should consist of an eight-inch-thick bale section. In the eared corn division, entrants are requested to bring ten ears of the corn, with the best one selected for competition at registration. Entries in the silage and haylage classes should be approximately two quarts of the feed material.

For additional information on the Dover Young Farmer forage competition, interested participants may contact Bill Fleet, young farmer instructor, at 717-292-3671, Extension 242.

WANTED:
tractor dealers to make and sell profit!
Case Franchises Available In The Reading & Everett, Pa Areas.

When you're selling farm machinery, your customers rightfully demand products that will turn them a profit And being a businessman, you in turn expect a profit from your services

You both profit with a Case tractor franchise As a Tractor Specialist, you will sell 14 sizes of farm tractors and a line of heavy duty tillage tools Period You needn't scatter your selling power over the full range of farm machinery Your service shop is expert on one commodity farm power Your parts inventory is cleaner and more financially manageable Your used equipment lot consists largely of faster moving used tractors

Light construction power too in the Case utility tractor franchise is available in your territory Call or write us We'll be glad to outline the full potential of a Case franchise in your area

The hybrid that everyone tries to beat.

3184

Here's a true single cross hybrid that stands above anything grown in this maturity zone, even under drought or stress conditions. 3184 performs best when used as a full-season hybrid and planted at moderate populations of 22-24,000. Adapted to most any soil type and farming practice, 3184 looks like the "universal" hybrid for this area. It yields. It stands. It shells out. If income per acre means something to you, plant 3184 on half your acres next year.

Two that have a chance:

3335

Every year, Pioneer research and on-farm tests prove this hybrid is right for the Eastern Corn Belt. Excellent roots and stalks, plus high "stay green" scores are what you need to grow more corn under the stress of heat, drought and high populations. At harvest, this hybrid shells out load-after-load of hard-textured, high-test weight grain — with a high yield to harvest moisture ratio.

3311

This relatively new, full-season hybrid is fast establishing itself. 3311 silks early and has a long filling period. This characteristic lets it take full advantage of high fertility and well-managed ground to really lay on the corn. Very good harvestability is found with its long kernels shelling off easily even at high moisture. Try 3311 in 1979.

Welsh Mountain Clinic answers the needs of the community

By SALLY BAIR
Staff Writer

The Welsh Mountains stretch in scenic beauty from New Holland to Intercourse, and are inhabited by an independent group of people with an interesting, colorful history. These people live happily in relative isolation, but their physical isolation precluded their having good medical care, at least until very recently.

The Welsh Mountain Medical Center is a shining example of people in a community banding together to meet a community need. Because of local interest, and because of a very pressing need for ongoing medical care, the Welsh Mountain Center became a reality and is a very vital part of the community.

According to Mrs. Lucille Thoman, nurse-practioner and administrator for the clinic, "The people in the community spearheaded the drive from the beginning. They were not getting ongoing medical care and they pressed for services to be made available."

In 1969 a group of health workers with the Lancaster County Christian Medical Society and the Visiting Nurses Association founded the clinic and housed it in a one-room schoolhouse. From that modest beginning, it has grown to include a very impressive four-unit modular building, and another building which houses the earlier clinic and is now headquarters for dental clinic.

Today, members of Lancaster County's 31 Farm Women Societies are contributing $2,250 to the dental clinic. The money will be used for purchase of equipment, some of which is already in use. In 1973, the Societies also took the Center as their county project and donated $1830 to the general Center.

The Center is now a non-profit corporation, whose affairs are managed by a Board of Directors. Mrs. Thoman proudly said, "There are community people on the Board who tell us what the community needs." She said this local involvement is very important in determining the real needs of the community instead of having programs suggested by outsiders.

The range of services provided by the clinic is wide and designed to meet the most critical needs. The Dental Clinic is the newest service and opened its doors in July. It has had a full appointment schedule ever since. One full time dentist, Dr. Ira Wolfe, does the dental work with the aid of Ruth Hunt, a dental assistant. A future goal is to have a dental hygenist.

They point proudly to a 90 per cent "show" rate in appointments, which is considered extremely good in a dental office. Mrs. Thoman pointed out that dentistry was one of the largest needs of the Welsh Mountain community because "few dentists in Lancaster will accept medical assistance as part of the payment of fees."

Seen above is the Welsh Mountain dental clinic to which the 31 Lancaster County Farm Women Societies gave $2,250. The clinic has been open since July.

The center operates on a "fee for service" basis. About 40 per cent of the total patient users are either on medical assistance or medicare. The other 60 per cent are charged based on their ability to pay, according to a schedule which takes into account their family size and the total family income. Jan Escott, 4-H nutrition agent with the Penn State Extension Service, explains, "People who work but are still poor can pay in proportion to what they make." Escott serves on the Board of Directors for the Center.

Mrs. Thoman added, "We exist to serve people who especially can't get care elsewhere. The income for the clinic comes from patient fees, donations from organizations like Farm Women and churches and from government grants." They happily accept patients who can afford to pay the full fee, and there are an increasing number of these patients. Mrs. Thoman said they rely heavily on voluntary contributions to help maintain their independence from government. "We couldn't do our work without the contributions."

HOMESTEAD NOTES

Their long term aim, she explained, is to gradually see a lessening of government support and increased income from patients. At this point they are receiving more money from the government than from other sources, but this reflects the fact that four fulltime employees - two doctors, one dentist and a nurse-practioner - are fully paid by the federal government. In their cash flow, government funds are less than half the total. The National Health Service Corps provides assistance to the Center.

Mrs. Thoman made it clear, however, that private and government sources will continue to be necessary to maintain their goal of serving those who have nowhere else to go.

Medical care is top rate at the Center, and it is fully equipped to handle all kinds of emergencies until ambulances can arrive to transport the patients to an area hospital. The Center has an admitting arrangement with St. Joseph's Hospital in Lancaster, which allows clinic doctors to follow up care in the hospital. That means that any patient admitted from the Center will be visited by a clinic Doctor at least once a day. Mrs. Thoman follows up with a visit to hospital patients at least once a week.

The Welsh Mountain Medical Clinic has modern laboratory equipment which allows many routine tests to be run at the clinic. Here Lucille Thoman, a nurse-practioner, checks the results of a test.

"We operate on the principle of preventive health care, and we give pamphlets to reinforce what we say. We know that people retain only one third of what you say, so we feel it helps to send information along home," Mrs. Thoman states.

The pediactric area of the Center is a good place to start with preventive medicine, and Mrs. Thoman explained their recall system to remind mothers of young children to bring the children in for regular check-ups. First they are sent a card, and if they don't respond to the card, they are called and an outreach worker can visit. Mrs. Thoman noted, "Most people are willing to have the necessary immunizations, except for some whose religious beliefs do not allow it. If the patients don't come in, we feel it is our problem, because we didn't educate them properly. It is a constant process of education to teach mothers the importance of immunizations. We have several levels of books for mothers, some of which just use pictures to show the needs."

The Center is also preparing information sheets regarding what to expect for infants at each monthly stage of development.

While proper nutrition is sometimes a problem, Mrs. Thoman stated, "Nutrition is a problem with the whole population - even the affluent. The reasons for poor nutrition vary with socio-economic levels."

To help with nutrition education, there is a Women, Infant and Children nutrition program administered by the Community Action program which works closely with women who have been identified as being at "nutritional risk." This risk is determined by the number of children, their closeness in age and several other factors. For those meeting the stated qualifications, money is available in the form of a check made out to a grocery store for specific items.

Mrs. Thoman noted, "It is known that iron and Vitamin C are the most lacking in the American diet, and so the money can be used for such things as iron-enriched formula, orange juice and other nutritionally sound food items."

At the Center there are two fulltime nurses, one "nearly full time" nurse, and three volunteer registered nurses. There is also a fulltime business manager and "a lot of people who do volunteer work on the outside of the

Junior Cooking Edition

Light and fluffy, richly delicious, fine and coarse textured, are all descriptions of the cake recipes sent in by our junior readers.

Receipes should be sent in so that we receive them by the Tuesday before each theme.

November 11, breads and rolls will be featured in the Junior Cooking Edition.

November 18 will feature dessert breads.

November 25 features nuts, nuts and more nut recipes.

The first week of December we will feature lollipop and hard candy recipes.

The second week in December will be "filled" with doughnut recipes.

Send your recipes to **Lancaster Farming,** Junior Cooking Edition, Box 366, Lititz, Pa. 17543. Remember to include your name, address and age. Only complete recipes will be published. A small gift will be sent to those junior readers who have their recipes published. Our way of saying thanks, from **Lancaster Farming.**

PENNSYLVANIA DUTCH HUSTLE CAKE

⅓ cup milk
¼ cup granulated sugar
½ teaspoon salt
¼ cup butter or margarine
¼ cup lukewarm water
1 package dry yeast
1 egg beaten
1⅓ cup sifted flour
1½ cup apple slices
2 tablespoons brown sugar
¼ teaspoon nutmeg
¼ teaspoon cinnamon

Scald milk. Stir in sugar, salt and half of butter. Cool to lukewarm. In a mixing bowl disolve yeast in warm water. Stir yeast into lukewarm scalded milk mixture. Add egg and flour. Beat until smooth. Spread dough evenly in greased 9 by 9 inch pan. Arrange apple slices on top. Sprinkle with mixture of sugar, cinnamon and nutmeg. Dot with the remaining butter. Cover. Let rise in warm place, draft free, for forty minutes or until doubled in bulk. Bake at 400°F. for 25 minutes.

Fay Marvin
Age 3
Ephrata R3, Pa.

ANGEL CAKE SUPREME

1 cup cake flour
1¼ cups confectioners' sugar
1½ cups (12) egg whites
1½ teaspoons cream of tarter
¼ teaspoon salt
1½ teaspoon vanilla
¼ teaspoon almond extract
1 cup granulated sugar

Sift flour with confectioners' sugar three times Beat egg whites with cream of tarter, salt, vanilla, and almond extract until stiff enough to hold up in soft peaks, but still moist and glossy Beat in the granulated sugar, 2 tablespoons at a time Continue to beat until the meringue holds stiff peaks Sift about ¼ of flour mixture over the whites Fold in lightly with a down-up-and-over motion, while turning the bowl. Fold in the remaining flour by fourths. Bake in an ungreased 10 inch tube pan at 375°F. for about 30 minutes. Invert pan and cool cake thoroughly.

Mary Elizabeth Laughman
Age 9
Chambersburg R3, Pa.

CHEESE CAKE

18 graham crackers
½ stick margarine
1 large box orange gelatin
1 cup boiling water
1 - 8 ounce package cream cheese
1 cup granulated sugar
1½ cup chilled condensed milk

Crush graham crackers and mix with margarine. Put this mixture in a pan. Combine gelatin, with boiling water until dissolved. Cool until it starts to thicken. Cream cream cheese with sugar and add to gelatin mixture. Beat condensed milk until stiff and add to gelatin. Pour into graham cracker lined pan. Chill and serve.

Rachel Fisher
Age 14
Ronks, Pa.

STRAWBERRY SHORTCUT CAKE

2 cups strawberries
1 - 3 ounce package strawberry gelatin
2¼ cups flour
1½ cup granulated sugar
½ cup shortening
3 teaspoons baking powder
½ teaspoon salt
1 cup milk
3 eggs
1 teaspoon vanilla
1 cup minature marmallows

Combine sugared strawberries and gelatin. Let stand. Mix flour, sugar, shortening, baking powder, salt, milk and eggs. Beat very well. Sprinkle marshmallows into the bottom of a greased pan. Pour dough over marshmallows. Spoon strawberry gelatin mixture on top of dough. Bake at 350°F. for 45 minutes or until golden brown. Also good with other fruits.

Katie B. Zook
Age 7
Lititz, Pa.

HELENS ALMOST SPONGE CAKE

1 package white or yellow cake mix
4 egg yolks
1 package instant lemon pudding
⅓ cup oil
1 cup water

Beat egg whites until they form peaks Mix other ingredients well Fold in egg whites. Bake at 350°F about 40 minutes

Earl Shirk
Leola R1, Pa.

SPICE CHIFFON CAKE

2 cups flour
1½ cups granulated sugar
3 teaspoons baking powder
1 teaspoon salt
1 teaspoon cinnamon
½ teaspoon nutmeg
½ teaspoon allspice
½ teaspoon cloves
½ cup salad oil
5 egg yolks
¾ cup water
2 teaspoons vanilla
7-8 egg whites
½ teaspoon cream of tarter

Sift together all dry ingredients except cream of tarter. (First eight ingredients). Add oil, egg yolks, water and vanilla. Mix well. Beat egg whites with cream of tarter. Fold into batter and pour into a tube pan. Bake at 350°F. for 55 minutes, then a 350°F. until done. To cool cake, invert it for one hour, or until cold. Loosen with spatula or slender knife.

Fay Martin
Age 13
Ephrata R3, Pa.

CHEESE CAKE

1 cup granulated sugar
2 beaten egg yolks
1 cup milk
1 teaspoon lemon juice
1 teaspoon vanilla
1 package clear gelatin
1 pound cream cheese

Cook sugar, egg yolks and milk for three minutes. Add lemon juice, gelatin and vanilla Soften cream cheese. Add the cooked mixture to the cream cheese. Beat egg whites until stiff. Whip 1 cup cream Mix everything together and put in a graham crust lined pan Let cake chill and set for a few hours before serving

Cathy Bawell
Age 11
Leola R1, Pa.

CORN PONE CAKE

¾ cup corn meal
¾ cup flour
½ cup granulated sugar
1½ teaspoon baking powder
¾ cup milk
¼ cup butter
1 egg

Mix all ingredients together. Pour into a buttered 9 inch cake pan. Bake at 350°F. for 25 to 30 minutes. Eat hot with milk. Serves four. This is also very delicious when served with blueberries or strawberries.

Nevin Wenger
Age 13
Manheim, Pa.

ANGEL FOOD DESSERT CAKE

1 package strawberry Danish dessert
1 pint strawberries, drained
1 white angel food cake, baked
1 package whipped cream
2 cups confectioners' sugar
1 package 8 ounces cream cheese

Using strawberry juice, prepare the Danish dessert. Cool and add strawberries. Mix one package of whipping cream as directed. Mix confectioners' sugar with cream cheese. Tear cake into pieces and place on bottom of serving dish Alternate layers of dessert and cream cheese mixture. Makes a very attractive dessert You may substitute any kind of canned pie filling instead

New Holland

COFFEE CAKE

2 cups brown sugar
½ cup oil
2 eggs
2 cups sifted flour
¾ cup cocoa
dash of salt
1 cup sour milk
1 teaspoon baking soda
vanilla
1 tablespoon coffee
1 cup hot water

Add all dry ingredients. Slowly mix in oil eggs milk and vanilla. Mix coffee and hot water. Add to batter. Bake at 350°F. until done.

Mary Petersheim
Age 13
Christiana, Pa.

PUMPKIN CAKE

3 cups granulated sugar
4 eggs
1 cup shortening
4 cups flour
1 teaspoon salt
4 teaspoons baking soda
4 cups pumpkin

Pumpkin should be fairly stiff with no juice. Combine all ingredients. Bake at 350°F. for at least one hour.

Esther Petersheim
Age 12
Christiana, Pa.

SWEET GERMAN CHOCOLATE CAKE

1 package (4 ounces) German sweet chocolate
½ cup boiling water
1 cup butter or margarine
2 cups granulated sugar
1 teaspoon vanilla
2½ cups sifted cake flour
1 teaspoon baking soda
½ teaspoon salt
4 egg whites
4 egg yolks
1 cup buttermilk

Melt chocolate in boiling water. Cool. Cream butter and sugar until fluffy. Add to chocolate. Add yolks, one at a time, beating well after each. Blend in vanilla, sift flour, soda, and salt., Add alternately to chocolate with buttermilk. Beat well after each addition. Whip egg whites until stiff. Fold into batter. Pour into three 8 or 9 inch layer pans that are lined on the bottom with paper. Bake at 350°F. for 30 to 40 minutes. Cool. Frost tops with coconut pecan frosting which follows.

Marianne Fisher
Age 8
Narvon, Pa.

COCONUT PECAN FROSTING

1 cup evaporated milk
1 cup granulated sugar
3 egg yolks slightly beaten
½ cup butter
1 teaspoon vanilla
1⅓ cup flake coconut
1 cup chopped pecans

Combine milk, sugar, yolks, butter and vanilla.

Grange resolutions focus on money, estate planning and government

BUTLER -- Approximately 1800 delegates and visitors came to Butler during the week of October 23-26 to attend the 106th annual convention of the Pennsylvania State Grange in Butler.

During the convention the delegates considered 142 resolutions concerning both internal and external policy. Approximately 40 of these resolutions will be forwarded to National Grange for consideration at the National Grange Convention in Denver, Colo. Nov. 13-20.

The approved resolutions covered a broad range of subjects including:

Measures to increase the funding of the Agricultural Conservation Practices Program on the national level and to increase the maximum allowance on the local level.

Opposition to compulsory unionism for both private industry and public employees.

Allowing farms to be exempted from inheritance taxes if they are passed on from one generation to another.

Several resolutions dealing with water allocation and the state water-quality plan.

Opposing the movement to give the District of Columbia two Senators in the U.S. Congress, but supporting any legislation giving it representatives according to present apportionment procedures.

Support of an amendment to the State Constitution that proposes to curb inflationary government spending patterns.

A call for the U.S. government to act responsibly to curb inflation.

Support of a computerized farm machinery identification system devised by the Pennsylvania Department of Agriculture to curb the current outbreak of thefts.

Opposition to the disclosure of the private financial matters of public officials and their immediate families.

Formation of a milk producers security fund that would pay a farmer for his product should the dealer default on payment. The proposed fund should be producer-financed and members of milk cooperatives would be excluded.

Also included among the resolutions were a number dealing with Grange activities and programs on a nationwide scale.

Thomasville 4-H Club meets

BAIR – The Thomasville 4-H Club held their October meeting in the form of a Halloween party at the 4-H Center near Bair with 100 members, leaders and families present.

Winners of the most orginal costumes were Michelle Lehigh, Sue Buffington, Christine Wolf, Marsha Mummert and Rodney Wire. Winners of the ugliest were James Roth, Gary Burgard, Todd Sheffer, Brad Roser and Mrs. Helen Horn. Winners of the prettiest were Debby Wolf, Terri Lehigh, Michelle Lau, Kelly Rentzel and Mrs. Russell Wire. Funniest were Mike Welsh, Doreen Smallwood, Cortney Cable, Vicky Seibert and Tammy Parr. The prize for the judges' choice was given to Dan Keeney. Judges for the contest were Mrs. Harris Horn and Mr. and Mrs. Robert Stover.

The Stoverstown 4-H Club provided a Spook House.

The next meeting will be club Achievement Night in December.

FFA band, chorus features musical talent

ALEXANDRIA, Va. -- Musically talented FFA members from across the nation will help liven the festivities at this year's Golden Anniversary National Convention November 7-10 in Kansas City, Mo. Three Pennsylvanians will be in the band. As members of the 112-piece National FFA Band they represent every State FFA Association. Band Director Roger Heath expects a polished performance again this year even though band members have never played together as a unit prior to the two days of practice that precede the three day National FFA Convention in the Municipal Auditorium.

In Kansas City the bandsmen are known as the "FFA Mail Order Band" because they are recruited by application forms mailed to the director from FFA members all across the nation.

The band, sponsored by the Carnation Company of Los Angeles, Calif. assembles in Kansas City two days before the Convention opens to practice the marches, show tunes, movie themes and popular music that will entertain FFA members and guests. Under the direction of Heath, the band has gained a reputation for hard practice and fast moving, polished performances.

Pennsylvanians who are participating in the band performances include: Don and Doug Moon of Mercer, and Bonnie Horning of Schnecksville. Miss Horning is a twirler while the Moon brothers play the trumpet. The trumpet is also the instrument for Maria Machalla of Freehold, N.J., another band member.

Adding variety and spirit to the National FFA Convention program are goals of the National FFA Chorus made up of 123 talented Future Farmers from across the nation. The young musicians will meet and begin singing together for the first time two days before the start of the FFA's Golden Anniversary Celebration. Two Pennsylvania boys, Leon Moll of Bowers and Ken Wanner of Narvon are a part of the singing group.

Throughout the three-day convention program, the FFA Chorus will provide musical entertainment for the more than 20,000 FFA members and guests expected to attend the event. Young men and women participating in the Chorus this year were selected from more than 375 applicants from 42 States.

Participants are recommended for the National FFA Chorus by their State FFA Association and their high school vocational agriculture instructor and choir director. They are selected on the basis of these recommendations and on their previous experience and achievements, according to chorus director, Marvin Myers, retired member of the Purdue University Musical Organization at West Lafayette, Ind. Myers has directed the FFA Chorus for the past 11 years, and was presented the FFA Honorary American Farmer Degree in recognition of his dedicated service to the FFA.

Marylanders who are participating in the FFA Chorus are Steve Brady of Gaithersburg, Gerry Cornett of Parkton, Robert Levering Jr. of Taneytown, and Diane Perdue of White Hall.

New Jersey will be represented - by Mark Marsters of Lebanon and Delaware by Karen Reed of Townsend.

Safety hints given on preparing turkey

WASHINGTON, D.C. - "Roast turkey - the favorite Thanksgiving entree - is a perishable food" reminds nutritionist Evelyn Spindler of the U.S. Department of Agriculture. "Practice these four important points so you can enjoy your Thanksgiving dinner safely."

Always thaw frozen turkey in the refrigerator. Or - if you must thaw it more quickly - put it in a waterproof plastic bag, seal it tightly and defrost it in cold water. Never thaw commercially frozen stuffed poultry before baking. Put it directly into the oven.

Cook turkey thoroughly to an internal temperature of 180-190° F. Never partially cook it for final cooking later. Bacteria can survive in partially cooked poultry.

Cook stuffing completely. It's safest to cook it separately from the turkey because stuffing inside a warm turkey is a breeding place for bacteria. If you're preparing stuffing for a large group, cook it separately and insert a meat thermometer into the stuffing until the temperature reaches at least 165°F. Never stuff a turkey the night before cooking it.

Refrigerate leftover turkey immediately. Remove the meat from the bones to make it easier to store. If you cut it into small pieces, even cubes, the turkey will freeze fast and defrost fast for future use.

"In addition to Thanksgiving Day's turkey and stuffing, people should always guard against food poisoning," said Spindler.

"You can avoid foodborne illness by keeping perishable foods such as cream pies, cooked meats, seafoods and dishes made with eggs, fish, meat and poultry below 40°F. Don't let food stand at room temperature.

"Bacteria grow best in lukewarm foods. Don't give them a chance. Make sure seafood, poultry and cooked meats are kept hot, above 140°F," she said.

Food borne illness can cause diarrhea, vomiting, stomach cramps, and other unpleasant symptoms which can last for several hours or even days. Food that is improperly handled, prepared or served is usually the cause.

"Don't let food problems mar your holiday. Keep food safe to eat by preparing and serving meals safely," said Spindler.

Hunting calendar

FFA'er advises: 'work as hard as you can'

By DIETER KRIEG

MANHEIM — One of Lancaster County's most accomplished young farmers will be honored next week with the highest distinction of the Future Farmers of America - The American Farmer Degree. The award, which is given to only one member in 700, will be presented to Kevin Rohrer, the 21-year old son of Mr and Mrs. Jay Rohrer, Manheim R7. He is one of 22 FFA'ers in Pennsylvania who will receive the coveted degree this year.

Despite a list of achievements which could have been happily shared by a score of less ambitious FFA'ers, Rohrer is saying that he wishes he would have done more when he had the chance. At 21, he is in his last year of membership as a Future Farmer of America. He is advising younger members and future aspirants to always shoot for the top, and when goals have been reached, set new ones.

Rohrer's achievements would indicate that he has always tried his best, even though he wishes he had done even more. Active in both the FFA and 4-H, he was the nation's top 4-H livestock judge in 1976, showed the grand champion steer at the 1977 Manheim Fair, exhibited his own stock to championship honors at the Lancaster County FFA Hog Roundup last year, and now owns a 70-sow farrowing operation.

Reminiscing while paging through a scrap book which chronicles his years in 4-H and FFA work, Rohrer advises younger members. "When you're in 4-H or FFA, work as hard as you can. Set high goals for yourself and shoot for them. Be involved as much as you can."

With 4-H projects having stopped when he turned 19, and FFA involvement on the eve of its conclusion, Rohrer is concentrating fully on his future as a successful farmer. It's a career he decided on years ago, and he has ben preparing himelf for it for equally as long.

After graduating from Manheim Central High School in 1975, he and his father figured that if he expected to fit into the home farming operation, he would have to have his own income-generating business. The younger Rohrer decided on hogs and put what he learned in 4-H and FFA to good use.

Money borrowed from the Production Credit Association (PCA) provided the needed capital to get started. He had a farrowing house built and stocked it with 40 sows. A year later he added a gestation house and increased the herd to 75 sows. "It's mostly a feeder pig operation," the young farmer explained. "I sell the shoats when they weigh between 40 and 50 pounds, but keeping a few for replacement stock."

Record-keeping is a definite part of the enterprise, and one which figures considerably when American Farmer Degree recipients are selected. Rohrer keeps records on the number of pigs farrowed, percentages weaned, breeding, as well as financial information. He does it all himself. "I learned record-keeping from my vocational agriculture instructors Jess Erway and Glenn Weber," he explained.

While hogs have usually been his major project, and today are his only business, Rohrer has had experience and success with beef cattle, sheep, corn and tobacco. He has kept a steer ever since he was nine years old and last year showed the grand champion at the Manheim Fair. A Hereford Simmental cross, the animal was the best steer he ever had, says Rohrer. Market hogs are another one of his interests, and although he is presently not involved in that category of pig farming, he would like to have a complete farrow-to-finishing operation someday.

Presently, Rohrer is selling 750 to 1000 shoats per year from 70 to 75 sows.

With hopes that Lancaster County farmland will be preserved and reasonably priced, Rohrer is thinking

(Turn to Page 114)

Kevin Rohrer, surrounded by some of the residents of his gestation house, will receive the American Farmer Degree in Kansas City next week for extraordinary accomplishments with his young farming career. Rohrer went into the hog business three years ago after graduating from Manheim Central High School. He is the son of Mr. Mrs. Jay Rohrer.

Clinic

(Continued from Page 82)

property, like cleaning and painting," Mrs. Thoman noted.

The Clinic dispenses its own drugs because of their isolated site, and Mrs. Thoman said they take special care to be sure patients understand what they are getting, and precautions they need to know about their daily living habits while on the medication. "Our patients know what they take and how to take it," she stated.

There is an outreach nurse who is available for home visits for counseling and other medically related information. She can study the home situation and tailor diets and other patient needs to fit their situation. There is also free transportation available for those who do not have or cannot afford transportation to medical facilities.

The Clinic Lab is equipped to run a wide variety of tests, including pregnancy, blood sugar, urinalysis and others. Tests not run on the site are sent to Philadelphia every afternoon and the results are back the following morning. Facilities are also available for vision and hearing tests.

In addition to long office hours, including three evenings and Saturday mornings, a member of the medical staff is on call 24 hours a day. When a registered nurse is on call, a doctor is on second call for cases which she cannot handle. Mrs. Thoman said, "When people trust you with their medical care we feel they have a right to expect care when they need it. Very few people abuse it."

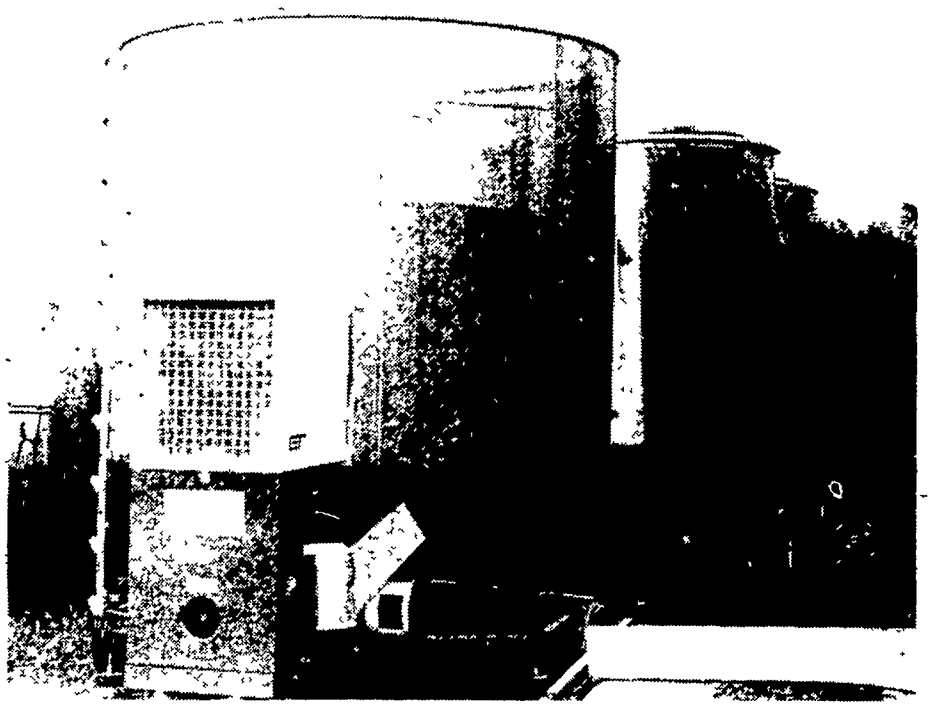
As for the future of the clinic, Mrs. Thoman stated, "We feel as if we are meeting the needs of people who have no choice in medical care. Now we are actively looking for others who can make a choice. We feel we have much to offer the entire community."

A visit to the very modern facilities in the lovely woods of the Welsh Mountains confirms that the Welsh Mountain Medical Clinic does have a lot to offer the community. And the dedication and professionalism of the staff has done a lot to assure excellent medical care for the surrounding community.

LIKE TO OWN A DRYER BUT FEEL THE COST IS TOO HIGH?
THEN GT TOX-O-WIK IS THE DRYER FOR YOU!

TAKE ADVANTAGE OF OUR YEAR-END CLEARANCE!

★ We have a Model 370 GT on our lot ready to go Today!
★ Model 570's still available.
★ One used 350 Morton.



FEATURES:

1. Easier to operate.
2. Completely self-contained.
3. No augers or holding bins needed.
4. Will dry 46% moisture down.
5. Grain cleaner within the dryer.

The GT Dryer is constructed to give you the most efficient grain drying on the market today.

We will delivery anywhere.

Ladies Have You Heard?

By Doris Thomas

Lancaster Home Economist

LOOK FOR HIDDEN COSTS IN HOME OWNERSHIP

"For $225.00 a month you could become a homeowner!" Have you ever heard this phrase?

It's one often advocated by those interested in selling housing. It is only partially true.

The money you are spending for rent could be invested into purchasing housing but there are additional expenses associated with homeownership that are ignored when this logic is used.

First of all, money is needed for the down payment and closing costs when you purchase a home. In addition, there may be considerable moving-in expenses, such as the purchase of appliances, carpeting and draperies, which are sometimes provided in a rental situation.

Finally, in most rental situations you know what the monthly rent will be for 12 months. It is fixed. With owned housing, it is not so easy to predict because there can be fluctuations.

As a homeowner, you will have to pay your own property tax, maintenance and repairs, property insurance and, possibly, water, sewer and trash collections. These can add a great deal to your monthly housing expenses.

Homeownership has tax advantages and is a forced savings, but it does cost more on a monthly basis than renting due to hidden costs. When you are comparing renting with buying a house, it is important you don't compare just the monthly rent with the monthly mortgage payment.

WHEN POWER FAILS: FOOD PREPARATION

When power fails, you have no heat, no refrigeration, and limited water. In addition, health risks from contaminated or spoiled food increase.

There are ways to conserve fuel, water, and observe health precautions during a power outage.

If you have limited heat for cooking, choose foods which cook quickly. Prepare casseroles and one-dish meals or serve no-cook foods.

Try alternative cooking methods. Many foods can be skewered, grilled or wrapped in foil and cooked in the fireplace. Candle warmers and other devices such as fondue pots may be used if no other heat sources are available.

Never use fuel-burning camp stoves or charcoal burners inside your home, even in a fireplace. Fumes from these stoves can be deadly.

Do not cook frozen foods because they require considerably more cooking time and heat than canned goods. It is also best to leave the freezer door closed to keep food from thawing.

Observe health precautions by boiling all water used in food preparation for at least 10 minutes. If you are without refrigeration, open only enough food for one meal. Some foods can be kept a short time with refrigeration, such as cooked vegetables, meat and meat dishes. Do not keep these dishes for more than three or four hours at moderate temperatures.

Stay away from foods that spoil easily, such as ground meats, creamed foods, custards, meat pies, and any food containing mayonnaise. They are potential sources of botulism poisoning.

Canned and powdered milk can be substituted for fresh milk. Canned milk will keep safely for a few hours after the can is opened. Water should be boiled or disinfected before it is mixed with powdered milk.

Prepare and eat foods in their original containers, if possible. This cuts down on dishwashing if water supplies are limited.

Farm Women Calendar

Today, November 4

Lancaster Co. Farm Women Society Convention at the Farm and Home Center, Lancaster.

Tuesday, November 7

Lancaster Co. Society 1 meeting.

Berks Co. Society 6 to serve refreshments at stand in Oley.

Jeffrey Miller's future is with dairy cows

Jeffrey Miller, a member of the Kutztown FFA, has been named one of the recipients of the 1978 American Farmer awards.

By KENDACE BORRY

KUTZTOWN — Jeffrey C. Miller, Kutztown R3, is involved in dairy cows. The 21 year old winner of the 1978 American Farmer Degree helps his father farm a 1450 acre dairy and cropland farm that has 390 Holstein cows and 175 heifers.

And Jeff loves showing cows and going to cow sales. All his life, he stated, he wanted to be a dairy farmer.

He likes being in the show ring, and strives to be at the top of the class. It gives him a sense of pride and accomplishment, he told, and makes the hard work involved pay off.

This past year was his best for showing. At the Allentown Fair, he showed five animals in the FFA division and each placed first in its class. He also had the FFA Junior and Reserve Junior Champion, the FFA Senior and Reserve Senior Champion, as well as the grand champion over all the FFA animals. In the open classes, his Junior and Senior Champion were firsts in those classes.

He has his future planned, expecting to build his stock slowly towards the best, and continue to climb, moving towards better quality each year.

In the FFA program, he was the State Star Farmer in 1975, and the national regional crop proficiency winner in 1975 as well as the national regional dairy proficiency winner in 1976. In 1974 and 1976 he won the Penn State record keeping award. And in 1974 and 1975, he won the Interstate Milk Producers award. At the Reading Fair in 1975, he was picked the outstanding FFA boy. He was also involved in public speaking cintests and has won several awards on different levels.

Besides being active in the Kutztown FFA Chapter,he is a member of the Kutztown Young Farmers, the Berks County Junior Holstein Club, the Virginville Grange, and the Hamburg Jaycees. He is a former 4-H member.

His senior year in high school he won the Dekalb award. His list of honors and accomplishemtns could go on and on for he has competed in local contests, judgings, and showings, with many prizes and awards to his credit.

He said it all started for him when he was in the eighth grade and he came to the Young FArmer meetings with his father. From there, he enrolled in the vo-ag courses, joined FFA, and started on his way to his farming career.

He thinks being involved in FFA is a good way to meet people, and he stated that he has gained leadership experience through hie participation in the activities. He hopes to be able to use this leadership skill in being active in groups in the future.

Looking to the future, he hopes to get a partnership set up with his father, very much liking the dairy end of the farm operation. Or he thinks about possibly starting on his own, and renting his own farm.

But presently he keeps busy, his work this year including the planting of 600 acres of corn by himself, of which about half is now harvested.

He will continue to make the most of the opportunities presented to him and will look to dairy farming for his future.

Archers named Md.'s first SPF swine producer

DARLINGTON, Md. - John P. Archer and Sons, Darlington, Md. recently became accredited as secondary Specific Pathogen Free Swine Producers. This is the first swine herd in Maryland to qualify for this designation.

This SPF Swine health program was started several years ago in the midwest hog belt. The theory embodied in production of SPF pigs is to eliminate and prevent certain growth retarding diseases. This is accomplished by surgically removing pigs from the sow - rearing them in isolation to a suitable age and then placing them on farms for normal growth and reproduction. The offspring of these hogs can be used to repopulate other farms.

Archers have been in the swine business since 1968. John tried dairy farming in the fifties but after about ten years decided that this was not for him.

John, an individual of high standards, passed this trait on to his sons - which they demonstrated by their many blue ribbon accomplishments with their 4-H sheep and swine projects during the sixties. It was during this period of time that the Archers were learning and developing their goal and standards as swine breeders and producers.

Archers started with eight Hamp-York cross bred gilts obtained from two different nearby breeders who had a few excess gilts. John now states that "this was one of his big mistakes - as he should have started with select animals, however, no one told him this at the time."

The boys 4-H projects were instrumental in up-grading their stock. John recalls the time when his son, Stephen, and a neighbor 4-H member talked him into driving to Missouri for a pair of Duroc bred gilts which the boys used as 4-H projects. These gilts proved to be foundation animals in their herd and for several years this influence could be seen.

In 1973, Archers' feed representative advised that he observed evidence of Rhinitis in a group of 100 feeder pigs that he helped the Archers place with a feeder in an adjoining county. John states that it was down hill from there on. Herd health problems increased while feed and production efficiency decreased.

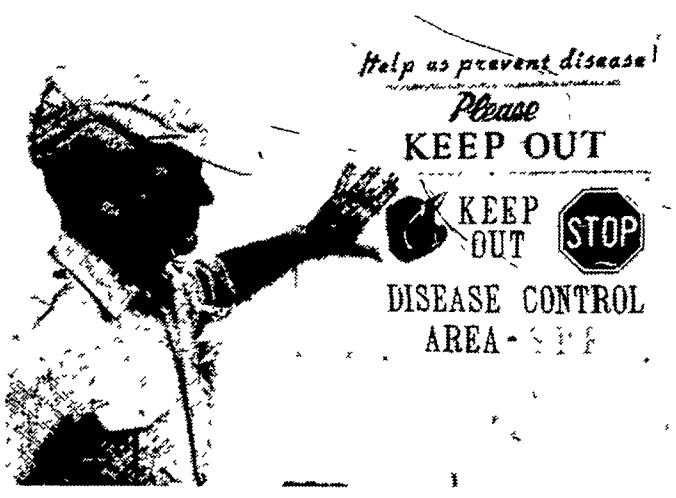
John and his wife were combining work and pleasure by attending the 1975 National Feeder Pig Show, Wess Plains, Missouri. While there they attended some of the informational seminars. It was at one of these sessions that he first became enthused about Specific Pathogen Free Pigs. Further inquiry and study brought the Archers to a point about a year later where they were ready to make the move and in their case that meant travel to Ohio in search of SPF Breeding Stock. Initially they were looking for cross bred ready to farrow gilts. However, bred gilts were not available so they contracted to purchase 35 head of 4 month old certified gilts from a certified SPF Ohio Producer. At the time of purchase the boys influenced their father to get necessary certification papers so they could become SPF Certified Producers at a later date.

Thirty Yorkshire gilts and a boar along with five Duroc gilts and a boar were scheduled for delivery in October. During the Spring the farm was depopulated and for 90 days the farm was void of all hogs. A substantial clean-up campaign was conducted in and around the hog facilities. Upon arrival the gilts were placed in clean surroundings where they were to finish growing and be bred. Archers were so enthused with the large, vigorous, healthy pigs that they returned to Ohio the following Spring and purchased eleven more gilts. The quality of the initial pigs received from Ohio and their performance in Maryland convinced the Archers that this SPF Health Program did in fact contribute substantially to improving production efficiency.

They contacted the National SPF Office in Conrad, Iowa for instructions on how to become a certified producer. They found that certain requirements are specified regarding six major swine ailments - (Mycoplasma Pneumonia VPP, Atrophic Rhinitis, Brucellosis, Lepto, Enteric infections-swine dysentary, and External Parasites - lice and mange). In order to maintain animals clear of these ailments quarterly inspections of the facilities are conducted by a veterinarian, blood testing is done and slaughter examinations are made of specific parts.

Archers are convinced that this is the way to produce quality pigs. A recent group of eleven sows weaned an average of 11.3 pigs per litter. They feel that to get this kind of success you must first start with quality breeding stock and maintain a quality health program such as SPF offers.

They are so sure of the value of this program that they say if something should go wrong and they should lose their certification that they would depopulate and do it all over again.



John Archer checks one of the signs posted on his SPF swine disease control area. The Archers are very satisfied with their operation since its start and have been named Maryland's first SPF swine producer.

Archers feel they have now arrived in the swine industry. They are doing a quality production job and are in a position to share this with their neighboring swine producers. They are primarily feeder pig producers with most of their pigs going to nearby producers. Some of the more promising gilts are being held for breeding purposes.

The John Archer family, Darlington, Md., will be happy to talk with anyone interested in learning more about the SPF Program.

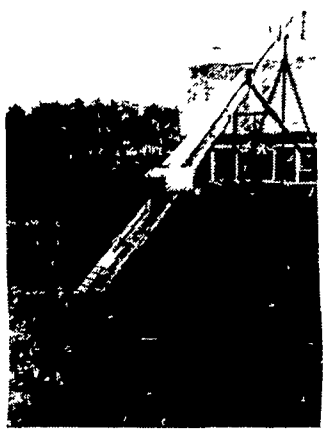
WHAT'S NEW



NEW AUGER

A two-year warranty and heavier materials and components are the principal features of the new auger introduced this year by Allied Farm Equipment.

The units are from 35 feet to 61 feet in length with tube dimensions of 6 inches, 7 inches, and 8 inches. Allied has produced augers for over 20 years and the new machine is the fourth major development in the line.

The two-year warranty on the complete auger is believed to be a first in the industry. This is in addition to Allied's regular five-year warranty on the gearbox, which has also been technically improved

One of the auger's features is full safety guarding, built to ASAE standards on the driveline and gearbox for protection against moving parts. Guarding is hinged at key points for easy access without removing the guards. Materials are now made of DuPont polyethylene for toughness, durability and weather-resistance, Allied says.

Improvements have also been made in the undercarriage structures by using stronger frame tubing - 2½ inches on the six and seven inch augers, and 3½ inches on the eight inch units. Undercarriage mast is bigger and has been revised for better operation.

Information on the new Allied auger can be obtained from the company's authorized dealers, or from headquarters at 35 E. Wacker Drive, Chicago, Illinois, 60601; or 50 Panet Road in Winnipeg, Manitoba R2J 0R9.

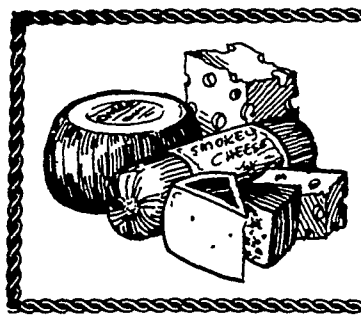
HOW YOU CAN VOTE REPUBLICAN AND STILL VOTE FOR ED ARNOLD THE PEOPLE'S CANDIDATE FOR THE STATE SENATE.

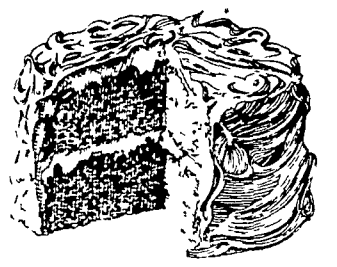
Using the voting machine: After you have pulled the lever marked Republican, go to the section marked state senator. Push the lever over the name of the Republican candidate back to its original position. Then pull down the lever over the name of EDWARD L. ARNOLD.

Using the paper ballot: Mark an X in the party box and an X behind the name of EDWARD L. ARNOLD.

Paid for by the Bi-Partisan Committee to Elect Ed Arnold to the State Senate,
Jackie Taylor, Manager Alex Croce, Jr , treasurer



Home on the Range



Stuffing recipes to fill every holiday need

This week, stuffing is the subject of the Home on the Range, and a variety of ways to make the filling can be found. Look over the different selections and make your choice to stuff that bird for the Thanksgiving and Christmas holidays.

Next week, garnish and relish recipes will be found in the recipe column, with bread recipes to follow the week after.

The last week of November will be centered around holiday fruitcakes, Christmas cookies will start the month of December rolling, with holiday candies following the second week of that month.

The last week before Christmas will simply be called "Christmas Goodies", and will be open to any and all treasured Christmas recipes that readers would like to share.

So, with us already entering the holiday season, it is important to send your recipes in now, so that they are included in the Home on the Range column. The more recipes that are sent in, the better the holiday recipes will be.

Send your recipes to Home on the Range, **Lancaster Farming**, Box 366, Lititz, Pa. 17543.

A roasted bird just isn't the same without stuffing inside, and included in today's Home on the Range are many recipes to add to your holiday dinners.

MUSHROOM STUFFING

5 celery stalks and leaves, chopped
3 large onions, chopped
½ pound mushrooms, sliced
2 one-pound loaves of bread
4 tablespoons shortening
3 eggs
salt and pepper to taste

Chop celery and leaves with the onions. Melt shortening in large skillet; add celery and onions and saute until onions are golden brown. Add mushrooms and saute one minute longer. Take a few slices of bread at a time and dip it into a bowl of water, then squeeze it out with your hands. Add it to the ingredients in the skillet, continue to cook until the bread browns lightly. Remove from the burner and let cool. Then add eggs, salt and pepper and mix well. You may add a little milk if you like a moist stuffing. This will stuff a 15 to 20 pound turkey.

Mrs. Eva S. Rubinosky
Upper Gwynedd, Pa.

POTATO FILLING

enough soft bread cubes to fill
a large mixing bowl
one medium onion
3 or 4 stalks of celery, chopped
1 tablespoon parsley
½ pound melted butter
½ cup milk, or enough to moisten bread
2 beaten eggs
1½ cup mashed potatoes
salt and pepper to taste

Fill a large mixing bowl with soft bread cubes, add a medium onion and three or four stalks of celery, chopped. Then add one tablespoon of parsley, ½ pound of melted butter, about 1½ cups mashed potatoes, salt and pepper to taste. Mix well.

Use an ice cream scoop to form balls. Place side by side in a buttered baking dish. pour a little melted butter over them. Bake uncovered for 20 or 30 minutes at 350 Degrees F. Serve.

Mrs. Ivan K. Horst
Ephrata, Pa.

GARDEN VEGETABLE STUFFING

2 cups fine dry bread crumbs
1 cup finely grated raw carrots
1 cup finely chopped onion, sauteed in butter
½ cup chopped parsley
1 egg
1½ tablespoon lemon juice
1 clove garlic, minced
2 teaspoons salt
¼ teaspoon marjoram
¼ teaspoon pepper

Combine fine dry bread crumbs, one cup finely grated raw carrots, one cup finely chopped onion, sauteed in butter, ½ cup chopped parsley, one egg, 1½ tablespoon lemon juice, one clove garlic, minced, two teaspoons salt, ¼ teaspoon marjoram and ¼ teaspoon pepper. Mix well and pack lightly in the cavity of a four to five pound chicken.

Mrs. Ruth E. Ruoss
Blain, Pa.

OLD FASHIONED POTATO FILLING

4 quarts potatoes
½ loaf of bread
4 eggs
2 tablespoons flour
¾ teaspoon salt
1 large onion
2 tablespoons parsley
salt to add to cooked potatoes

Slice onion and fry in a little butter. Mash potatoes when cooked. Add onion, parsely, flour, eggs, bread and then mix together. Thin with milk and add some butter. A little granulated sugar may be added. Place in a casserole and bake at 350 Degrees F until brown.

Mrs. Charles Biehl
Mertztown, Pa.

BAKED BREAD DRESSING

¾ cup milk
3 eggs
1 cup chicken or turkey broth
1 chopped onion (optional)
¼ cup chopped celery and celery leaves
1½ teaspoon salt or less
¼ teaspoon pepper
1 tablespoon butter
2 quarts day old bread crumbs

Beat eggs in large bowl Add milk, broth, onion, celery, salt and pepper. Add bread crumbs and mix lightly. Put into a greased baking dish 8 x 8 x 2 inches. Bake in moderate oven, 350 Degrees F. for 35 to 40 minutes or until puffy and golden brown. This recipe will make six servings.

Mrs. Carl S. Bacon
Felton, Pa.

BAKED HAM STUFFING

⅓ cup vinegar
2 eggs
1 medium onion, chopped
1 cup bread crumbs
2 tablespoons celery seed
dash of sage, if desired
1 tablespoon dry mustard or prepared mustard
½ cup granulated sugar
red pepper to taste
black pepper to taste

Have the butcher remove the bone from half a ham and stuff the hole with the above. To make, mix the above ingredients all together. After stuffing ham and tying it together with cord, bake in the usual method. It can also be baked in a greased loaf pan separately. If baked separately, bake at about 300 Degrees F. until firm but not hard. Let cool and slice and serve in platter with ham.

CORN FILLING

3 cups celery, chopped
2 cups boiling water
½ cup onion, chopped
¾ cup butter
2 quarts day old bread crumbs
2 teaspoons salt
¼ teaspoon pepper
3 cans whole kernel corn (12 ounce size)

Cook celery in boiling water, covered, for 20 minutes or until tender, then drain. Saute onions in butter, add to celery, then add to rest of ingredients. Mix. Stuff in the cavity of a turkey.

RICE STUFFING

¼ cup butter
¾ cup onions, chopped
1½ cup celery, chopped
1½ cup cooked rice
1 teaspoon salt
teaspoon pepper

Melt butter in skillet. Add onions, celery, saute for three minutes. Add rest of the ingredients, then mix. Stuffs a four pound chicken.

FFA leadership training session held

HUMMELSTOWN – On October 26, the Dauphin County FFA Chapters held their annual leadership training session. The Lower Dauphin FFA Chapter served as host for the conference.

The program was opened by Jon Johnson, Lower Dauphin FFA president, who welcomed the sixty FFA members assembled to receive leadership development training.

Gerry Greiner, past State FFA president and currently Dean of Students at Elizabethtown College delivered an address on the value of leadership development. Greiner stressed that leaders should be worthy of the leadership entrusted to them.

Dan Witmer, state FFA vice-president, brought greetings from the State Association. Witmer spoke on the meaning of the FFA motto "Learning To Do, Doing To Learn, Earning To Live, Living To Serve".

Following the addresses, the chapter members broke into four interest sessions. One session conducted by State Vice-Presidents, Dan Witmer and Delores Schraum stressed the responsibilities of chapter presidents and vice-presidents. A public relations techniques session for chapter reporters was conducted by Miss Nanette Willis, a Lower Dauphin High School English instructor.

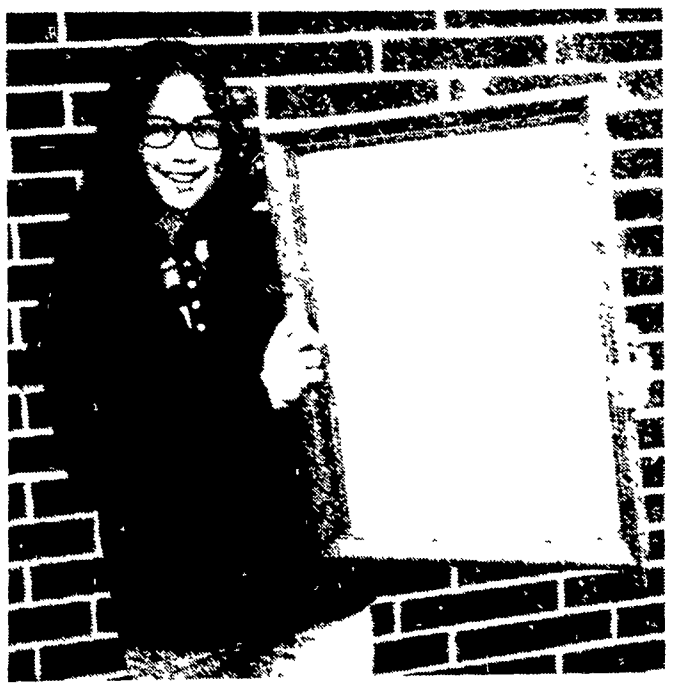
Miss Mary Jane Strite, a Lower Dauphin business instructor, spoke with the chapter secretaries in attendance, and a session for treasurers was conducted by Jay Book, who is in charge of Lower Dauphin High School business affairs.

Students who were not chapter officers were permitted to attend the session of their choice.

Following dinner, Delores Schraum delivered greetings from the State FFA Association in which she serves as South Central Regional vice-president. Miss Schraum spoke on the value of women in agribusiness today.

A freshman representative from each of three chapters then competed in a recitation of the FFA Creed, which is a five paragraph statement of the overall purpose and beliefs of the FFA. Zantha Weaver, the daughter of Mr. and Mrs. Marvin Weaver of Hershey R1 and a member of the Lower Dauphin FFA Chapter, won the Creed recitation contest.

As a conclusion to the training conference, a "Spelling Bee" of FFA facts was conducted for the freshmen participants.



Zantha Weaver, a freshman FFA chapter member at Lower Dauphin High School holds a framed copy of the FFA Creed which she memorized and recited at an FFA Leadership Training Conference. Zantha is the daughter of Mr. and Mrs. Marvin Weaver, of Hershey R1.

Home on the Range

(Continued from Page 90)

APPLE RAISIN FILLING

¾ cup onion, chopped
1½ cup celery, chopped
1 cup butter
7 cups bread cubes
2½ teaspoons salt
¾ teaspoon pepper
3 cups apples, chopped
¾ cup raisins

Cook onion and celery in the butter until the onion is tender. Stir in one-third of the bread crumbs, then pour mixture into a large bowl. Add the remaining ingredients and mix. Stuff bird and cook in the usual way.

OYSTER STUFFING

¾ cup onion
1¼ cup chopped celery
1 cup margarine
2 cans oysters, (8 ounce size)
8 cups bread cubes
2¼ teaspoons salt
½ teaspoon pepper

Cook the onion and the celery in the margarine until the onion is tender. Mix the other ingredients in a large bowl, including the oysters, which should be drained and chopped. Pour onions and celery into bowl with other ingredients and stir together. Use to stuff as you would your regular stuffing, and cook fowl as you normally would.

Freezing Cherries

When freezing fresh, sweet cherries, select moisture-proof containers with lids that are clean. Work with a small amount of cherries at a time to allow for quick handling and prompt freezing. Wash cherries in ice water and drain. Pack according to preferred method and freeze immediately.

FARMING IS A DIRTY BUSINESS.

You can't farm clean. Equipment, livestock areas and buildings all get dirty. And cleaning them is one of the most unpleasant jobs you have.

A Warwick Power Washer from Whale-O Wash will make short work of a whole farm full of cleaning.

Rent a professional grade power washer from Whale-O Wash for as little as $65 a day and do a months worth of cleaning in a single afternoon.

Gas or electric powered. 1000 to 2250 psi high pressure wash. Steam, disinfectant, solvent or detergent. It's the easiest, most effective power washer on the market.

RENT A WARWICK POWER WASHER TODAY!

Farm Women Societies

Berks Co. Society 1

A Halloween party highlighted the October meeting of the Berks County Farm Women Society 1, held in the home of Mrs. Esther Berndt, Oley R1.

The sixteen attending members were informed of a bingo party to be held at Berks Heim on November 16 starting at 7 p.m.

Officers for the 1979 – 1980 term were elected. President Mrs. Linda Levan; Vice President Mrs. Esther Berndt; Recording Secretary Mrs. Ellen Snyder; Treasurer Mrs. Joan Haas; and Corresponding Secretary, Mrs. Erma Stoltzfus.

The next meeting will be on November 8 at the home of Mrs. Lena Eyrick, Oley R1 starting at 8 p.m.

Lancaster Co. Society 15

Mary Boyce, Quarryville, hosted the October meeting of Lancaster County Farm Women Society 15. Co-hostess were Elma Maule, Nancy Boyce, Martha Herr and Dorothy Johnson. Six visitors were present.

President Dorothy Johnson conducted the meeting. Three new members were introduced and received as members. They were Donna Fergason, Edna Daughtery and Betty Yorkey.

A supper sale will be held at the November meeting. Kathryn Wagner told of her trip to New England. New officers for 1979 were elected. They are: President, Kathryn Wagner; Vice-President, Jeane Barnes. Two members were elected representative delegates to the State Farm Women convention, Harrisburg, in January. They are Bertha Harnish and Alma Clendenin.

The program featured a talk on safety by Policeman Harry Temple.

The November meeting will be held at the home of Vera Herr, Quarryville. Hostess are Jean Ressel, Kathryn Wagner, Effie Wagner, Mary Bnetly and Bertha Harnick. Jean Rissel will show slides.

Lancaster Co. Society 31

"Decorations for your Christmas Packages" was a talk given by Gloria Althouse at the October meeting of the Lancaster County Farm Women Society 31. Harriet Spayd hosted the Society in her home with Eleanor Kreider serving as co-hostess.

Donations were given to the new Bookmobile and to the mental health. Committees were selected for 1979.

The next meeting will be held at the home of Mrs. Janet Badger on November 20 at 7:30 p.m.

York Co. Society 27

Mrs. James Garber was elected the new president of the York County Farm Women Society 27 at their September meeting hosted by Mary Shenk.

Mrs. Luke Brubaker was elected secretary. A donation was approved towards the 4-H horticultural judging team. The Society concluded their meeting with a lively game of bingo.

On October 24 the Society met at Stauffers to take a class in pine cone petal owls. May Fellenbaum and Lucy Frey served as co-hostesses.

York Co. Society 31

Mrs. Loyle Moyer hosted the October meeting of York County Farm Women Society 31. Carolyn Neal presided.

Mrs. Marion Ryder of Northern School was the guest speaker. She presented a health talk.

Seven members are planning to go to the County convention.

The next meeting will be at the home of Bonnie Witner. Chief Castle will present a safety program.

York Co. Society 35

Linda Bricker hosted York County Farm Women Society 35 at her home for their October meeting. Members responded to roll call with a decorated Halloween pumpkin. The pumpkins were judged and the three prize winners were Joan Beck, Becky Warner and Vicki Rohrbaugh.

Final arrangements were made for the Bazaar stand the Society will have at the York Mall on November 3 and 4.

The Society elected officers for the coming year. They are: Vicki Rohrbaugh, president; Carolyn Sweitzer, vice-president; Joan Beck, secretary; Diane Workman, assistant secretary; Mary Ann Brenneman, treasurer; Lois Rohrbaugh, assistant treasurer; and Janet Bricker, chaplin.

The next meeting will be held on November 9, 7:30 p.m., at the home of Gloria Holtzapple.

National FFA Safety Award winners chosen

KANSAS CITY, Mo. - Three Pennsylvania and one Maryland FFA Chapter have won awards for outstanding achievement in the National FFA Chapter Safety Award Program. The awards will be presented Wednesday, November 8, at the FFA's Golden Anniversary Celebration at the 1978 National Convention in Kansas City, Mo.

The top 25 FFA chapters will be presented "Gold Emblem" safety awards, the highest award in the program. Recipients of the "Silver Emblem" from Pennsylvania will be the Northern Lebanon Chapter, Fredricksburg. Chapters receiving the "Bronze Emblem" from Pennsylvania include: Headwaters Chapter, Ulysses, and the Little Dutchman Chapter from Annville. Maryland recipients are Catoctin Chapter from Thurmont, and the Hereford Chapter of Parkton.

The chapters recognized this year participated in a wide range of safety activities including: farm and home safety surveys, auto and farm equipment safety inspections, promotion and sale of slow moving vehicle signs, safe corn harvest campaigns, establishment of rural fire districts, programs to illustrate safety procedures in the use of farm chemicals and many other farm and home safety projects.

The FFA Chapter Safety Award is one of three awards recognizing chapter participation in activities of national significance. It is designed to increase awareness of safety practices through classroom instruction and educational activities. Each year accidents on the farm and in the home exact a tragic toll of death, destruction, and mutilation among rural and urban families. The FFA Safety Program is designed to make students aware of the causes of accidents and how they can be prevented.

All FFA chapters are eligible to participate in the National FFA Safety Program. Applications for the chapter safety award are submitted to the State FFA Association which must rank the chapters. Ten percent of the chapters submitting applications ranked as Superior Chapters at the state level are eligible for national competition. At the national level chapters are rated gold, silver, or bronze, and are presented a gold, silver or bronze spur designating their rank. The spur is to be placed on a plaque presented the first year the chapter earned recognition. The plaque is designed for spurs to be attached over a period of several years.

The contest was sponsored jointly by the Farm and Industrial Equipment Institute (FIEI) of Chicago, Ill., and the Dow Chemical U.S.A. of Midland, Mich., through the National FFA Foundation, Inc.

Judging of the safety award applications in national competition was conducted in Alexandria, Va., under the supervision of the National FFA organization.

THE GENERAL ASSEMBLY OF PENNSYLVANIA

SENATE BILL

No. 522 Session of 1977

INTRODUCED BY LYNCH MANBECK JUBELIRER SCANLON HOLL AND SMITH, MARCH 21, 1977

Farmers call it the "Land Grab Act."

Incumbent Senator Clarence Manbeck cosponsored this bill. It makes it easier for the Department of Transportation to take land from the farmers.

Senator Manbeck's ties to PennDOT blinded him to the best interests of farmers.

Vote for Ed Arnold, a working farmer who understands farm problems.

Paid for by the Bi Partisan Committee to Elect Ed Arnold to the State Senate, Alex Croce, Jr treasurer, Jackie Taylor, manager

Chester County DHIA Monthly Report

John and Jacob Stoltzfus are both owners of top producing cows, according to the latest monthly lactation report from the Chester County DHIA. John captured the top milk and butterfat production crowns with his "Star," a 7-year old Holstein which pumped out 28,585 pounds of milk with a 3.7 per cent test and 1068 pounds of butterfat. Jacob's "Tracey" took runner-up honors in the butterfat race with lactation totals of 26,773 pounds of milk, a 3.9 per cent test and 1033 pounds of butterfat. "Tracey" is a 5-year old Holstein. Coming up second in the milk producing category was Number 78, a 6-Year old Holstein in the Harvey Waltz herd. She produced 28,409 pounds of milk testing 3.5 per cent butterfat and yielding 982 pounds of butterfat.

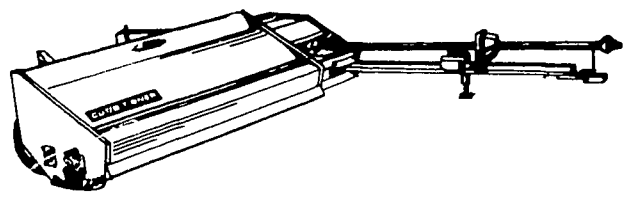
UNI FLAIL-MATE

Avco New Idea hay tools are dependable, versatile and economical... and that means big benefits to you in terms of time and money. Quality construction means top performance even in rough field conditions. A few machines doing many different jobs means a big savings to you in equipment costs and changeover time.

NEW! UNI FLAIL-MATE, the industry's first forage harvester attachment capable of performing as a Cut/Ditioner, windrow pickup and direct cut head in hay, cornstalks and other crop residues.

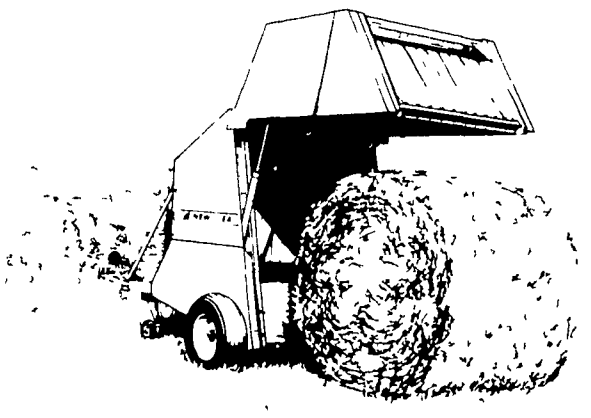
AVCO NEW IDEA HAY TOOLS



CUT/DITIONER

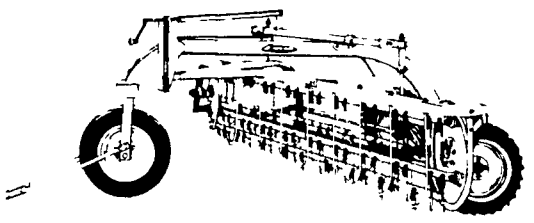
CUT/DITIONER, for premium quality hay in light or heavy stands, for making hay, haylage and conditioning cornstalks for big or little bales or stacks.

DEPENDABLE... VERSATILE... ECONOMICAL



ROUND BALER

NEW! ROUND BALER, designed to meet the needs of humid or dry areas in hay, straw, grass, cornstalks and other crop residues. The outside has a firm outer wrap for weather protection and shape retention in storage.



BELT DRIVE RAKE

BELT DRIVE RAKE, smooth, quiet, dependable. Builds uniform, fluffy windrows and minimum leaf damage.

USE THESE VERSATILE HAY TOOL MACHINES TO CUT, RAKE & BALE YOUR CORN STALKS.

Caldwell shows champion steer

By JOYCE BUPP
Staff Correspondent

THOMASVILLE — A purebred Angus topped the steer show, winning the grand champion ribbon for owner Tim Caldwell during the York-Adams 4-H baby beef roundup, held October 25 at the York Livestock Auction.

The 13 year old Windsor R1 youngster then led his steer, "Fireball," into the auction ring to kick off the beef sale and watched the animal's breeders, Mr. and Mrs. Edward Rishel, York, buy him back for $1.36 per pound. Contending bidder on the champion was Jay's Supermarkets of York.

Although this is Tim's fourth year with a steer project, he admitted that parting with his pet each year is not an easy task. But there was some comfort to him in knowing that back home in the barn a Charolais heifer and her bull calf, also 4-H animals, waited for his return.

The son of Mr. and Mrs. Peter Caldwell, Tim attends the eighth grade at York Christian School.

Brenda Walter, daughter of Mr. and Mrs. Donald Walter, Airville R2, captured the reserve championship with her 1150 pound Maine-Anjou-Hereford crossbred.

The pink rosette win was a repeat for the 17 year old Red Lion High School student, who earned the same spot in 1974. During 1977 competition, Brenda's sister, Annette, exhibited the reserve winner.

People's Bank of Glen Rock paid $1.10 per pound for Brenda's reserve winner.

Adams County championship went to Kevin Kiehl of Fairfield, with Kim Reichart exhibiting the runner-up. Cumberland County National Bank purchased the Adams champion, with Yost Meats of Littlestown putting the final bid on the reserve winner.

Sales of the 51 head entered in the show brought $37,026.53 to the 4-H'ers participating. Average of the sale, excluding the champion price, was $68.26 per hundredweight.

Highest price in the sale was bid by Russel Delp Construction of Seven Valleys, who paid $2.50 per pound to Chris Shive for her first-place medium-weight Angus winner. Other buyers who purchased top-selling animals included Jay's Supermarkets, Spangler and Sprenkle, Inc., Agway, Harry Wright and Snyder and Gross.

Class winners included: Hereford, Chris Klinedinst, Wrightsville, champion and Wilbur Delp, first-place lightweight; Angus, Ed Klinedinst, reserve champion, Christ Shive, first mediumweight, and Walt Smith, first lightweight; Crossbreds, Julie Myers, reserve champion, Kenny Sunday, first heavyweight, Cathy Bricker, first mediumweight, and Jimmy Eisenhour, first lightweight.

Rosalynn Carter honored by AAW

Mrs. Rosalynn Carter accepted honorary membership in American Agri-Women (AAW), a national coalition of farm and ranch women's organizations in 32 states. The presentation was made on October 17 by (left to right): Mrs. John Adams of Buffalo, Okla., AAW National Coordinator; Mrs. Sharon Knight, AAW Assistant National Coordinator; and Mrs. Laura Heuser, one of the founders of the AAW.

Seidenstrickler shows champion lamb

By JOYCE BUPP
Staff Correspondent

THOMASVILLE - After taking honors at the York Interstate Fair, Shane Seidenstrickler named his 4-H project market lamb "Champ."

The wooly, 95-pound crossbred wether lived up to his title last week when he was selected the winner of the 20th annual York-Adams lamb round-up.

"Champ" was first on the auction block during the sale that followed at the Thomasville Livestock Auction. The spirited bidding halted at the $2.95 per pound mark, with the gavel going down in favor of John Shearer's Fertilizer company, York R6.

This was 12 year old Shane's first time to earn the lamb round-up purple ribbon spot. He's the son of Mr. and Mrs. Phillip Seidenstrickler, 201 N. Emigs Mill Road, York, and an eighth grader at West York High School. A member for two years of the county lamb club and the Thomasville Community Club, Shane has been working with sheep during both project seasons.

Runner-up in the lamb competition was 14 year old Tom Flory, son of Mr. and Mrs. Donald Flory, Red Lion R4. A seasoned veteran of lamb exhibiting, Tom is a seven-year 4-H member in the lamb and Ore Valley Clubs and attends the eighth grade at Red Lion High School.

Ray Mummert, Brodbecks purchased the reserve champion, paying Flory $1.25 per pound for the 90 pound animal.

Other buyers of top-selling animals included Atty., Wentworth Vedder, York R10, and W W. Snavely Meats of Lemoyne.

A total of 73 lambs were entered in the show and sale, bringing the owners an average of $72.47 per hundredweight, excluding the champion price.

Breed winners were as follows: Suffolk, Jim Jefferis, champion and Linda Ebaugh, reserve; Hampshire, Don Flory, champion and Laurie Dobrosky, reserve; Cheviot, Shane Seidenstrickler, champion and Dwayne Gracey, reserve; Shropshire, Lisa Dobrosky, champion and Mark Ebaugh, reserve; Southdown, Lisa Dobrosky, champion and reserve; Corriedale, Dwayne Gracey, champion and reserve.

Shane Seidenstrickler earned an impressive $2.95 per pound for his York-Adams 4-H champion market lamb, purchased by Evan Kline for the John Shearer Fertilizer firm.

Six home economists honored

COLLEGE PARK, Md - Six Extension home economists from throughout Maryland received recognition at last month's forty-fourth annual meeting of the National Association of Extension Home Economists.

Mrs. Jane B. Crouse of Chestertown was this year's Maryland winner of the Distinguished Service Award from the NAEHE. She has been a professional member of the Cooperative Extension Service staff in Kent County for 22 years. Prior to that, she served two years as a 4-H youth agent in Harford County. Mrs. Crouse has developed many programs, and co-authored a resource guide for senior citizens.

Mrs. Crouse has just finished a two-year term as alternate director for the Eastern Region of the National Association of Extension Home Economists, and served on several committees within the states association.

Other Maryland honorees include: Mrs. Dolores L. Dixon of Cambridge who was appointed to the recruitment committee of the NAEHE; Mrs. Betty Wolfe Collins of Salisbury, NAEHE annual meeting exhibits committee; Mrs. Sharon B. Grobaker of Manchester was appointed to the annual meeting committee; Mrs. Kathryn K. Jenkins of Middletown was appointed to the hospitality committee; and Mrs. Martha M. Myers of Upper Marlboro was also named to the hospitality committee.

The event was held October 16-20 at the Omaha Hilton hotel in Omaha, Neb. More than 1400 persons were in attendance. They came from Puerto Rico and most of the 50 states in the U.S.A.

Farming has always appealed to this FFA'er

By KENDACE BORRY

KUTZTOWN — To Dale G. Siegfried, Mertztown R2, one of the most important things that he has learned through the FFA program was the value of honesty. He claims that he believes that farmers are the most honest businessmen in the world today.

The 21 year old member of the Kutztown FFA Chapter has been named as a winner of the 1978 American Farmer Degree.

The son of Mr. and Mrs. Paul Siegfried, Kutztown, he is in partnership with his older brother, Paul, Jr. There the two of them are involved in what he calls "mostly a crop farm, with hogs and steers raised also". The crops include corn, wheat, hay, barley, and potatoes, while both Yorkshire breeding stock and fattening hogs are raised along with some marklet steers.

He was born on the farm that he is involved in running now and he took the vo-ag courses offered in high school.

He stated that when he was in high school, he wanted to do three things in his life–be a mechanic, farm, and be a truck driver. Now as a farmer, he explained, he can really do all three.

Farming is number one in his book, though, because he just likes being outdoors and enjoys the jobs that are involved with farming.

As a member of the Kutztown FFA, he served as vice president and sentinel as well as county delegate. In 1976, he was named the star Farmer of Pennsylvania, and later named the Eastern Coast Star Farmer, an area that covers 15 states.

He is also a member of the Yorkshire Club, the Pa. Holstein-Friesian Club, the Kutztown Grange, the All-Terrain Vehicle Club, the 4-H Eastern Berks Dairy Club, the Kutztown Area Young Farmers, the Kutztown Jaycees, and the Berks-Lehigh Pork Producers.

He likes what he is doing, he stated, and told that he had learned a lot from the FFA program, including the value and opportunities available to help the community.

Speaking of farming, he said, "Farming is a gamble. Sometimes yhou hit it, sometimes you don't. I've learned to listen to both the advice of businessmen and farmers."

The youngest member of his family, he has been named the oustanding FFA boy at the Reading Fair in 1977, and was second in the running for the outstanding Young Farmer award presented by the Pa. Jaycees, an award he won on the local level from the Kutztown Jaycees.

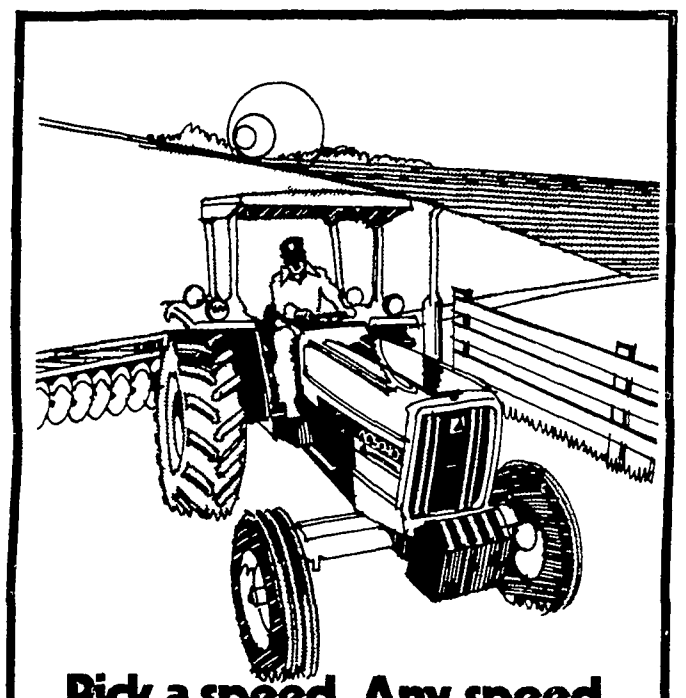
Besides his farm duties, he is also involved in doing custom wet lime spreading and custom seed cleaning and treating.

"I guess I'm always busy," he noted. "I do enjoy meeting people."

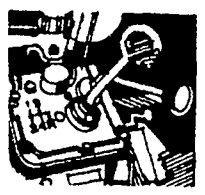
Looking to the future, Dale shares a dream with many young farmers today.

"I guess I'd really like to get started on my own someday", he explained. "Even though I'm happy where I am, maybe some time in the future I'll have my own farm."

Dale Siegfried, Mertztown R2, a Kutztown FFA'er and winner of the 1978 American Farmer award, stated that he believes that farmers are some of the most honest businessmen today.



Pick a speed. Any speed.



You've really got a choice with the Allis-Chalmers 5040. As many as 12 all the way from 0.4 mph to 16.1 mph with the optional 12-speed constant mesh transmission. And synchronized on-the-move shifts for 3rd/4th, 7th/8th and 11th/12th.

Even the standard 8-speed box gives you forward speeds from 1.5 to 16.1 mph synchronized in 3rd/4th and 7th/8th. With either transmission all but the top two gears are where you work below 10 mph.

There's a lot more to the 5040. Like an easy-working 3-cylinder diesel that puts out 40 PTO hp * and thrives on little maintenance. Stop in and let us tell you the whole story. About the 5040 and the way we stand behind it.

*Manufacturer's maximum observed PTO horsepower at rated engine speed

He grew up in town and now loves the farm

Kevin Hertzog, a winner of the 1978 American Farmer award, and a member of the Kutztown FFA, knew from the time he was just a child that he wanted to be a farmer.

By KENDACE BORRY

KUTZTOWN — Kevin L. Hertzog, Oley R1, a 21 year old member of the Kutztown FFA Chapter, is proof that you don't have to be born on a farm to get into farming today. The winner of the 1978 FFA American Farmer award has been farming on his own since he was 19, and yet he grew up as a town boy.

The son of the late Ernest and Mrs. Jean Hertzog, he has been a member of his FFA chapter since ninth grade, and he said he guessed he started to work on a dairy farm when he was about 15.

Today he runs his own dairy farm, 125 acres which he rents. He owns 45 cows, Registered Holsteins, and stated that the main operation of the farm centers around the cows.

"I always wanted to be a dairy farmer, and I tried to become one," he stated. "And I guess that I believe that if you really want to do it, you can. You just have to work harder. And if you try harder, you can do it."

Kevin has been active in his FFA group, serving as vice president and reporter in the past as well as on many committees.

He has competed and won awards for his chapter, competing in land judging and participating in fairs. In the past, he was been named the star-agribusinessman of the Kutztown chapter.

Besides being involved in FFA, he is also a member of the Pioneer Grange, Topton, and was a 4-H member in the dairy and horse clubs.

He is a member of the Pennsylvania Farmers Association, the Berks County Holstein Association, the Kutztown Area Young Farmers Association, and serves on the Pennsylvania Farmers Association Dairy Committee.

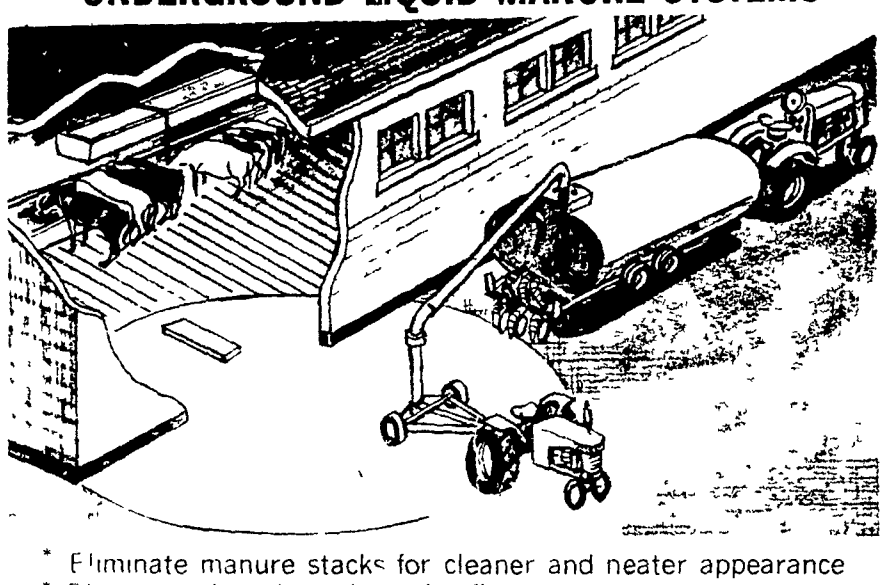
He stated that FFA has taught him the importance of keeping good records and how to accurately do so. He also noted that he learned how and when to keep on trying, and the importance of listening to good advice.

When asked why he leaned towards the direction of dairy cows as his style of farming, Kevin thought for a moment, and then told how his grandfather had cows and he had always liked them. And even though he grew up in town, he stated that he always knew that he wanted to farm, and that dairy just appealed to him over all the other possibilities available.

And so today, he and his recent bride, have their dairy farm.

But Kevin isn't content with just that. He looks to the future and hopes someday to buy his own farm and continue to expand his herd.

UNDERGROUND LIQUID MANURE SYSTEMS



* Eliminate manure stacks for cleaner and neater appearance
* Eliminates breeding places for flies and insects
* Eliminates odor with underground manure storage

Senator Manbeck... has a lot going for us.

State Senator Clarence F Manbeck has a lot going for the people of the 48th district His experience on Senate committees over the years, like appropriations, labor and industry, military affairs, state government, and transportation, to mention just a few, have made him wise and knowledgeable This experience has earned him the respect and cooperation of his fellow legislators, many of whom share his views on the problems facing the people today and support them Senator Manbeck is in accord with the needs and desires of the people to curb property taxes

A plan of his to turn back many roads and highways to local municipalities who could maintain them more efficiently is receiving wide spread support Senator Manbeck wants to keep the red tape out of the Bureau of Aging so the elderly can have their needs met without difficulty and delay Senator Manbeck was a member of the Ethics Committee that resulted in indictments and convictions of undesirable legislators

Cloister FFA Chapter to receive award

EPHRATA - The highlight of the 1978 FFA National Convention, for the Cloister FFA Chapter, will be receiving of the "Gold Emblem National Award for Chapter Excellence. The Cloister Chapter is one of only two chapters in Pennsylvania to receive the Gold Emblem for chapter activities.

John Weiler, a 1977 graduate of Ephrata High School, has been named the North Atlantic Regional winner in Agricultural Sales and Service. He will be one of four FFA members competing for the National Award.

The Cloister FFA will be leaving the high school for Kansas City, Mo. on Saturday, November 4. They will tour the Air Force Museum at Dayton, Ohio and spend the night near Richmond, Ind.

Sunday, November 5, the chapter plans on attending church near Indianapolis, Ind., and tour the Indianapolis Museum and Motor Speedway. Then they will tour Lincoln's Park and home, Springfield, Ill.

Monday, November 6 finds the chapter visiting Stro-Wold Duroc Farm, Bowling Green, Mo., Mark Twain's home and cave, Hannibal, Mo. and a tour of the Linton Charolais Ranch, Chillicoffie, Mo.

Tuesday, November 7, they will tour the Harry Truman Library Museum, Independence, Mo., Register at the National FFA convention, Kansas City, Mo., attend the agriculture career show, and the FFA vespers program.

Wednesday, November 8, they will be attending the opening sessions of the convention, tour points of interest and listen to the National FFA Public Speaking Contest.

Thursday, November 9, they will be attending the National FFA Foundation Award ceremony (John Weiler-National Award candidate), receive Gold Emblem Chapter Award, attend American Farmer Degree Ceremony and the Stars Over America Pagent.

The Ephrata High School Cloister FFA Chapter members that will represent Pennsylvania in various contests at the National FFA Convention, Kansas City, Mo. are (bottom row left to right) Curtis Snavely, Marvin Fox, Fred Burkett, Scott Augsburger, and John Zimmerman. Attending as Cloister FFA representatives are (top row left to right) Joyce Gerhart, Lyn Beiler, Tim Gockley, Tim Rice, Tony Eberly, Mark Weiler, and Judy Zimmerman.

Friday, November 11 will be the announcement of National Contest Winners, FFA Day at the American Royal, and special entertainment in the evening.

Saturday, November 11 the group will leave Kansas City, and visit the Jefferson Memorial Arch at St. Louis, Mo., "Gateway to the West".

Sunday, November 12, the chapter will return to Ephrata High School.

The following members will be representing Pennsylvania in various judging contests at Kansas City, Mo. They will be leaving on November 7 by plane. Mr. Orr will serve as coach of the team.

In the milks products contest: Fred Burkett, Jr., Stevens R1; Scott Augsburger, Reinholds R1; and Marvin Fox, Lititz R1. Agriculture mechanics contestant is Curtis Snavely of Lititz R1. The dairy cattle showmanship contestant is John Zimmerman, Ephrata R1.

Attending as a Cloister FFA representative will be: Lyn Beiler, Akron; Joyce Gerhart, Reinholds R1; Tim Glockley, Reinholds R1; Tim Rice, Ephrata; Mark Weiler, Stevens R1; Judy Zimmerman, Ephrata R1; Tony Eberly, Denver R2

Ida's Notebook

Ida Risser

On a recent Sunday afternoon, my husband and I took a drive to enjoy the foliage and to see the Daniel Boone Homestead. You know it is said that the Tourist Bureau's job in the Fall is to convince the people that the leaves 150 miles from home are more beautiful than those in their own backyards.

We were amazed at the size of the Boone home and family farm. It is a sanctuary of the Pa. Game Commission and deer, raccoon, pheasants, quail and rabbits can be seen. It also contains a lake and stone dam. The water runs a sawmill with a vertical saw.

I expected to see a log cabin. Well, we did see a restored one but the real attraction was a large brownstone house built before 1750. In a kettle hung on a trammel, we could see and smell the sausage and apples being cooked. There were pewter plates and many crocks displayed. The parlor contained a tall clock made near Reading, a tape loom and a beautiful desk, chairs and table. In terms of the 18th century the Boones were a prosperous family.

However, when Daniel was 16 in 1750, the family left all this and went to find better land in N. Carolina. Another reason for leaving was to escape the censure of the local Friends Meeting as they were Quakers who came to America before 1713 His father was a weaver and a blacksmith as well as a farmer

Daniel Boone is identified with the "winning of the West," yet the original colonies were themselves pioneer areas. At this time, Berks County was at the edge of the wilderness and Daniel learned to hunt and trap and shoot accurately the Pa. rifle given him on his tenth birthday. These skills served him well in Kentucky and Missouri in later years. Many early Pa. families faced the same dangers and hardships to settle virgin lands as did those who later moved farther to the west.

Provide Protein

Most American diets are surprisingly low in protein Experts recommend 60 grams of protein a day for adults and between 75 and 100 for teenagers

Melvin Houck wins FFA degree

ELVERSON - Melvin Houck, Elverson R1, with a long list of agribusiness jobs and achievements, has earned the 1978 American Farmer Degree in the area of Agribusiness.

Melvin, a 1975 graduate of Twin Valley High School, served as chaplain and sentinel of his Twin Valley FFA Chapter. During his FFA career, Melvin was awarded with the Soil and Water Conservation Foundation Medal. He also participated in the State FFA Chorus, livestock judging, and summer convention.

The 22 year old started his agribusiness career by harvesting potatoes for one summer. While in high school he worked at Weavers Orchard for two years. He then went to Lois Stoltzfus and worked with the dairy farmer for one year. Melvins next work experience was with a poultry operation,

Melvin Houck

Victor Weaver, of New Holland. He is presently working for New Holland Concrete, New Holland, where he drives a redi-mix truck.

"I have earned the highest degree in FFA of which I never dreamed of" Melvin said. "When I started out in the ninth grade, I never imagined myself as getting it." When I got the State Farmer Degree I just had one more to go. It didn't seem so far away then, it seemed obtainable."

Melvin, the son of Frank and Ruth Houck, is a member of the Goodwill United Methodist Church. He is a past president of the youth group there. His hobbies include dirt bike motor crossing, reading, and fishing.

Melvins future plans include being married in February. He plans on living in Blue Ball in a trailer he financed through his agribusiness endeavors.

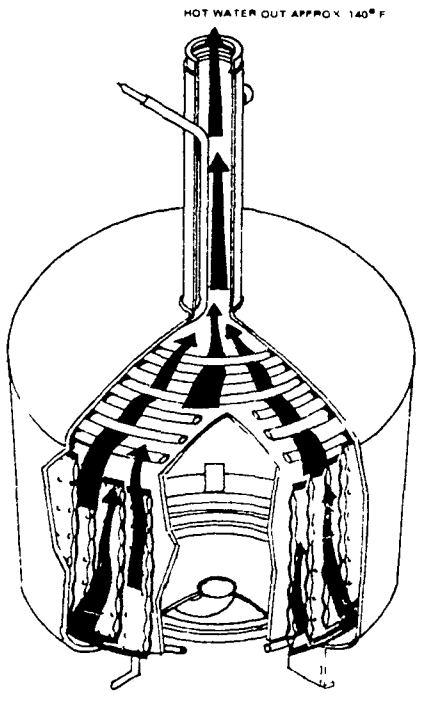
MUELLER FRE-HEATER

The HEART of the Fre Heater* he unique all stainless steel heat exchanger!



ALL STAINLESS STEEL CONSTRUCTION!
Mueller Fre Heater heat exchangers are constructed entirely of type 304 stainless steel The heat exchanger in both models utilize Mueller Temp-Plate a patented heat transfer surface that's in use in more than 60 000 Mueller Milk Coolers around the world

CHOOSE FROM SEVERAL SIZES AND MODELS!
Mueller Fre Heaters are available in 2 3 and 4 H P sizes for either HiPerForm or conventional refrigeration systems

A 2 or 3 H P installation normally requires one 120 U S gallon water storage tank 4 H P installations may require two 120 gallon water storage tanks

Mueller Fre Heaters Model B and Model C can be used with either Mueller Milk Coolers or with milk coolers made by other manufacturers

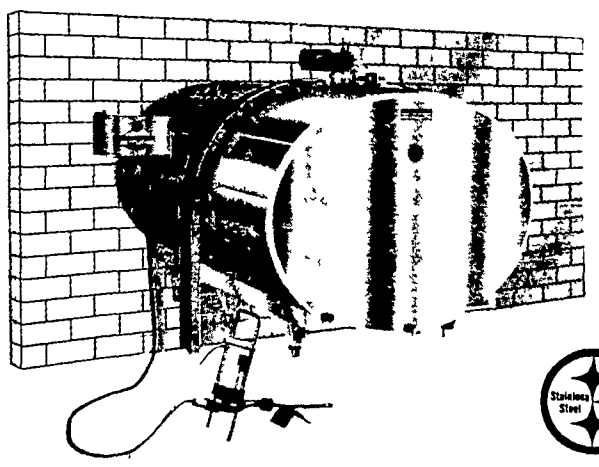
FREE HOT WATER!
There are many variables that determine how much hot water can be generated however a rule of thumb is that a Fre-heater operating on 60 degrees F wr water will produce a volume of 140 degree F water similar to the amount of milk produced during a milking In other words if 100 gallons of milk per milking is produced approximately 100 gallons of hot water (140 degrees F) will be generated during each milking Experience has shown that on most dairy farms enough hot water is produced to satisfy all hot water requirements

The Mueller Fre-Heater comes to you from the maker of world famous Mueller Milk Coolers!

MUELLER Milk Coolers'

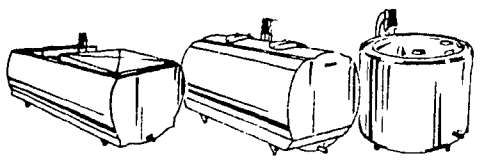
Available Soon.... Used 2,000 Gal. Mueller MODEL O-H COOLER

MUELLER Bulk Milk Coolers



SAFEGUARD YOUR LIQUID INCOME WITH A MUELLER

Space saving Mueller Bulkhead Coolers are installed through a milk house wall so you can buy a cooler to accommodate the production needs of your growing herd, regardless of the size of your milk house Mueller Temp-Plate® Heat Transfer Surface provides efficient, dependable cooling Large radius corners and smooth welds team with durable stainless steel construction for complete and easy cleaning All Mueller cooler models readily accept Mueller-Matic® Automatic Washing System



Now let herd size determine your cooler capacity not milk house space limitations Depend on MUELLER

FFA members win wildlife contest

ELVERSON - Four members of the Twin Valley Chapter FFA entered the Berks-Lancaster County FFA Wildlife Management Contest at the Middle Creek Wildlife Management Area recently. As a team they placed first, over all other teams. Individually they placed as follows: Henry Ramsay -second; Keith Kurtz -third; Martin Miller - fourth; and Brett Strough - sixth.

This contest required participants to identify such things as various wildlife foods, including seeds of plants, insects, and tree species. Tracks of common Pennsylvania birds and animals were identified. A written test on wildlife management was also given. Contestants had to identify the calls of 10 birds. One portion of the contest involved the identification of wildlife signs, including animal fur, hair, feathers, scat, gnawings, and rubbings. A habitat evaluation portion of the contest involved determining which species of wildlife were best suited to a particular habitat, and how a wildlife habitat could be improved.

The contest is designed to increase the students awareness of his environment as it relates in wildlife. It is directly related to classroom instruction in wildlife management and forestry.

Forest fire crew hosts open house

Members of The Lancaster Forest Fire Crew will celebrate their Anniversary with a three - phased event on Saturday, November 11.

The first activity of the day will be a Public Open House at The Fort Holbrook Fire Base, home station of the unit, from two to five p.m. Visitors to the Station during the Open House, will find a small shop, public picnic area, mini-museum, communications and research offices and library, the fire chiefs residence furnished in antiques, many pre-dating civil war, and the motor pool which is being reduced in size and scope due to financial difficulties. A nearby fire trail will be shown as recommended for woodland owners for pre-need fire protection and emergency access, and permits short family hikes.

The second event of the day will be a banquet program at the Civic Center in Washington Boro, with a Family Style Roast Beef Dinner served by the ladies auxiliary of The Goodwill Fire Company of Washington Boro. The banquet will include the annual awards program, and announcing the Young Person of The Year and the Family of the Year as well as the units Outstanding Service Award. Master of Ceremonies for the Banquet Program will be Stephen J. Cummings, of Highville, who is founder and fire chief of the organization. The Banquet Program is limited to advance reservations.

The third phase of the day-long activities will be a birthday party for forest fire crew members and their guests, in the Ward Room at The Fort Holbrook Fire Base, later in the evening. Chairman of the birthday party event is Jere J. Gibson of Millersville.

General Chairman for the Anniversary Activities is Brent Thomas of Manheim, who is Assistant Fire Chief of the resource protection organization.

Easy Measuring

Butter margarine and lard in quarter pound sticks are easy to measure One stick-one-quarter pound — equals one-halt cup or eight tablespoons

On being a farm wife

—And other hazards

By JOYCE BUPP

A "welcome rug" rests inside our front door. Its name is "Benedict Arnold," because it turned traitor on me.

Once striped in assorted bright colors, the fading and tattered relic greets the muddied, wet feet of farmers, children, visitors and the occasional cat that sneaks into the house.

During blustery Winter nights, I shove the rug against the crack below the door to fend off feet-chilling drafts. Rich uses it for pretend fields when planting imaginary farms with his toy machinery.

That rug had always been considered a faithful household friend and helper.

I picked it up one afternoon last week to shake and straighten it. From beneath its cushiony softness slithered a snake.

A SNAKE!

From my lips escaped a squeal that would've done justice to a sow calling her litter. And as I dove into the closet for a broom, all ten inches of the surprise visitor side-winded toward the front door.

Shoving the door open, I watched the giant reptile wiggle onto the cement porch and take refuge under a broken cinder block that happened to be there.

Hoping this character was just the harmless milk snake I though it was - and not a dangerous copperhead which it very much resembles - I left Patty keeping an eye on the little friend and scouted up a bucket.

We maneuvered Mr. Snake (or was it Mrs. - we forgot to look) into the bucket and carried him to the field. To our delight, and obviously to his relief as well, he promptly disappeared.

As we turned to leave the field, I fell into a groundhog hole.

Do you suppose they make "unwelcome rugs," just in case our guest was the frontrunner for a family reunion?

Three Pa. 4-H'ers named Northeastern winners

UNIVERSITY PARK - Three Pennsylvania 4-H'ers, who last month were named state winners in the 1978 4-H National Awards Program, have been selected as northeastern United States sectional winners.

According to Carroll L. Howes, associate 4-H youth division leader at Penn State, Amy Walters, 16, Rockwood R2; Thomas Perry, 16, Stroudsburg; and David Sammons, 17, New Castle; will each receive an expense paid trip to the National 4-H Congress in Chicago, November 26 to 29. There they will compete for awards on the national level.

David Sammons

Thomas Perry

The daughter of Mrs. Ruby Walters, Amy is a junior at the Rockwood Area High School. She has been a 4-H member for eight years.

A member of the Laurel Hill 4-H Club, she served as president, treasurer, game leader, and news reporter. She also assisted with club activities and events as a teen leader.

She completed projects in bicycle, clothing, foods, photography, dog care, gardening, teen leadership, home management, pesticides, and automotive care and maintenance.

Locally, Amy took part in the 4-H dress revue, fair, foods revue, demonstration day, and camp.

She also participated in the Regional 4-H Demonstration Day, Regional and State 4-H Dress Revue, Pennsylvania 4-H Leadership Congress, State 4-H Achievement Days, 4-H Exchange Program, and Farm Show.

She won the Somerset County 4-H Clothing Award last year.

The son of Mr. and Mrs. J. Calvin Sammons, David is a senior at the Shenango Area Junior Senior High School. He has been a 4-H member for 10 years.

A member of three Lawrence County 4-H Clubs, David served as president and vice president. He also assisted with club activities and events as a teen leader.

The state veterinary science contest winner completed projects in two units of veterinary science, swine breeding and feeding, sheep breeding and feeding, and teen leadership.

Locally, he took part in officers training, roundup, 4-H development committee, and achievement night.

He also participated in the Regional 4-H Teen Leaders Retreat, District 4-H Camp, State 4-H Capital Days, Pennsylvania Association of Farmer Cooperatives Summer Youth Institute, American Institute of Cooperation, Pennsylvania 4-H Leadership Congress, State 4-H Achievement Days, and Citizenship Short Course.

He is listed in "Who's Who Among American High School Students."

The son of Mr. and Mrs. Lowell Perry, he is a junior at the Stroudsburg Area High School. He has been a 4-H member for seven years.

A member of the Sodbusters 4-H Club and Wildlife Watchers 4-H Club, he served as president, vice president, secretary, treasurer, and teen leader.

The state gardening contest winner completed projects in three units of vegetable gardening, flower gardening, wildlife conservation, rocketry, and bicycling.

Locally, he took part in county craft day, achievement banquet, county events day, demonstration day, local government day, and roundup.

Thomas also participated in Regional 4-H Teen Leaders Retreat, Regional 4-H Demonstration Day, State 4-H Achievement Days, Pennsylvania 4-H Leadership Congress, State 4-H Capital Days, Farm Show, and National Junior Horticultural Association Convention.

He was recipient of the Jenson Citizenship Award, Rotary Leadership Award, Outstanding 4-H Boy Award, Horticultural Award, and "I Dare You" Award.

Lybia warm for trade; Quadafi calls Americans terrorists

PARK RIDGE, Ill. - Despite the Arab's generally negative attitude toward the recent Camp David talks, an American farm leader has returned from a week-long conference in Tripoli, Libya, convinced there is a real opportunity to improve trade relations between Libya and the United States.

Allan Grant, president of the American Farm Bureau Federation, represented U.S. agriculture as one of 100 Americans invited to participate in the first Arab-American Dialogue. About 200 Arabs from most of the Arab nations attended.

Grant said he sensed a "great deal of animosity" among the Arabs over the Israeli-Egyptian talks at Camp David.

"While they are vigorously opposed to the Camp David talks," Grant said, "the Libyans want to build a relationship with the U.S. to increase trade and get increased technological information."

He reported that the Libyan leader, Muammar Quadafi offended many of the Americans in a speech in which he labeled Americans as "terrorists" because the U S. has air strips throughout the world, maintains the Mediterranean fleet and produces and "controls" a large part of the surplus food of the world.

As one of two American panelists in an economic discussion, Grant prefaced his remarks with: "We have furnished over 80 per cent of the food aid to the world for a great number of years and continue to do so. We do not feel that is a terrorist activity."

As evidence that Libya wants increased trade with the U.S. Grant was told that the Arab nation would open a trade with the U S. Grant was told that the Arab nation would open a trade office in Washington, D. C. in the near future.

When Power Fails depend on PINCOR Electric Plants

16 KW 25 KW 50 KW

- Rated for continuous duty - 12 KW to 50 KW
- Tractor driven and automatic engine driven
- High motor starting capacities
- Slow speed - 1800 RPM operation

Don't you remember? You filled our tank just last year!

The secret of this family's low oil consumption is neither long underwear nor frequent trips to the Bahamas. It is their HS Tarm combination boiler. This boiler for central hot water systems allows them to burn wood and oil. When fueled with wood it heats their house and provides oceans of hot tap water as well. Should the wood fire go unfended the oil burner will continue to supply all their heating and hot water needs.

Imported from Denmark the HS Tarm boiler displays traditional Danish quality in design construction and performance. It is available in three sizes and comes with American made and approved controls and equipment. See less of your oil delivery man.

Agway renames top officers

SYRACUSE, N.Y. – The three top officers of Agway Inc. were reelected October 27, following the farmer cooperative's 14th annual meeting in Syracuse, N.Y.

They are: George Steele, chairman of the board and president; Warren Braley, vice chairman of the board; and Ronald N. Goddard, executive vice president and chief executive officer.

Steele, a Pocopson, Pa. dairyman, has served as board chairman since 1971. Before the founding of Agway, when he became one of its directors, he served for 14 years as a director and for two years as vice president of Pennsylvania Farm Bureau Cooperative Association, one of Agway's predecessor organizations. He is a trustee of the American Institute of Cooperation.

A member of the Agway board since 1965, Braley was first elected vice chairman in 1977. Also a dairyman, he operates a 1,000 acre farm at Chatham, N.Y. with his son Jeff. A graduate of Dartmouth College, Braley is a director of the New York State Agricultural Society, Yankee Milk, Inc, Conrel Inc., and is president of the Columbia County Extension Service.

Goddard has been with Agway since 1937. He held a number of key management positions in the cooperative's retail, planning, and marketing operations before being named assistant general manager in 1968 and general manager in 1969. He lives in Fayetteville, N.Y.

Agway Inc., a farm supply and food marketing cooperative owned by 122,000 member-stockholders, serves agriculture in 12 northeastern states. Its headquarters are in Syracuse, N.Y. The organization reported sales volume of more than $1.2 billion in its 1977-78 business year.

George Sterle

R. N. Goddard

Apply now for State cabins

HARRISBURG - The Bureau of State Parks, Department of Environmental Resources, is now accepting cabin applications for the Spring rental season which begins with the second Friday in April and ends on the first Saturday following Memorial Day.

The bureau provides 146 family vacation cabins and while out-of-state residents may apply, preference is given Pennsylvania residents in reserving cabins for the Spring rental season.

These rustic cabins were built by the Civilian Conservation Corps and are of wood and stone construction. Many have indoor fireplaces and all are equipped with minimal furnishings which include single beds, mattresses, table, chairs and a modern stove and refrigerator. Extra cots are not available.

Successful applicants must provide their own bedding, cookware, tableware, buckets, and an axe and hand saw for splitting and cutting wood.

The cabin applications, which list the State Parks where cabins are located, are self explanatory and may be obtained from the Office of Public Information, Department of Environmental Resources, P.O. Box 1467, Harrisburg, PA 17120.

The deadline for receiving applications is December 15, 1978.

Auto Service Tips

The cooling system is one of the main safeguards of the automobile engine Major damage can result if the system fails Check hoses belts and thermostat at periodic intervals Test hoses when engine is cold Mushiness means hose should be replaced

If a belt breaks check other belts too They may be in a weakened condition

A stickjng thermostat can cause too hot or too cold engine operations Thermostat may not be operating properly if engine overheats or there is too little heat from the heater

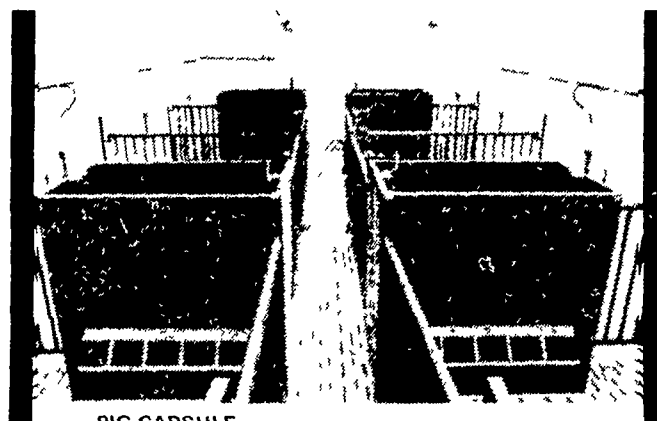
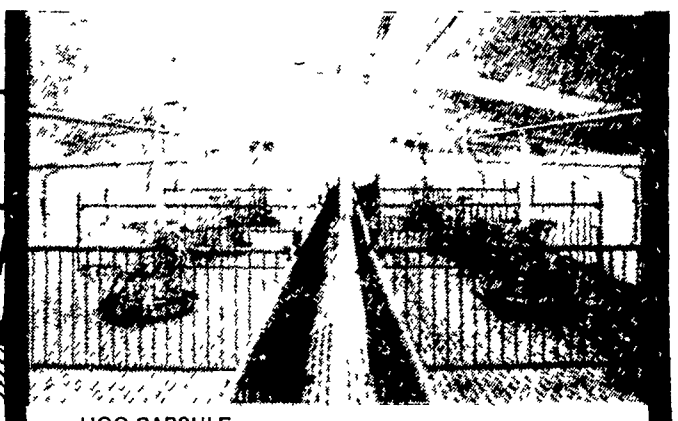
Make plans for a swine confinement building that is right for your operation.

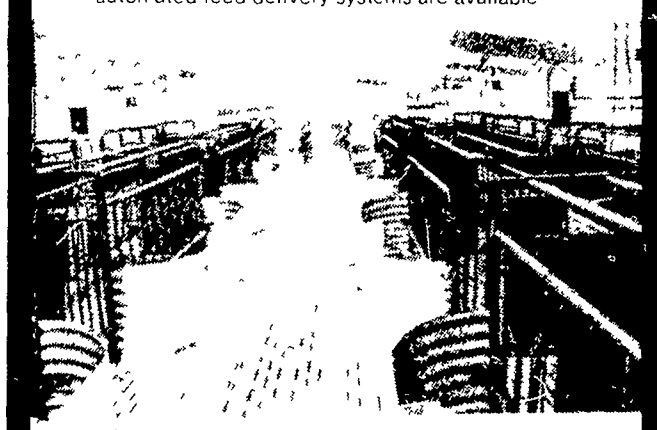
What an AG Best Capsule will do for you
• Provide uniform air distribution No drafts • Provide 2 environments within one environment for sows and pigs • Reduce feed wastage and cost • Reduce your labor and time • Reduce stress to a minimum • Provide comfort for the operator • Provide heavy insulation for less energy use • Provide all the tools needed for good management
There are many Pig Capsule models for farrowing, growing and finishing So plan on a building that is made right to do the right job for you



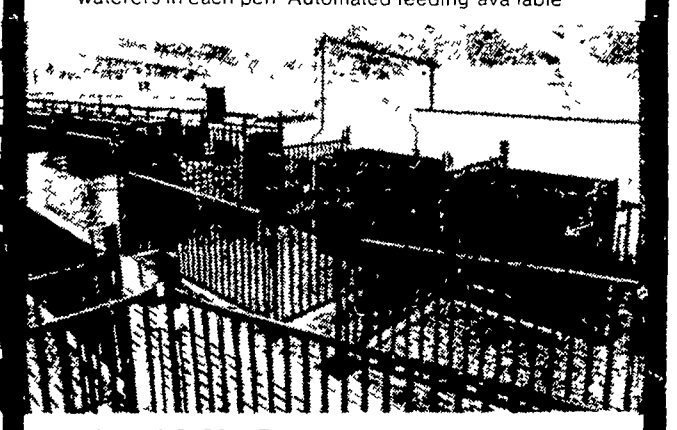
PIG CAPSULE
A controlled environment that can save more pigs There are models with 8 to 20 pens equipped with partitions feeders nipple waterers and slatted floors Nursery pens and growing pens and automated feed delivery systems are available



HOG CAPSULE
Clean dry and comfortable hogs can gain faster on minimum feed have less disease and are more profitable 8 or 10 pen models have vertical steel tube partitions a rotary feeder and 2 nipple waterers in each pen Automated feeding ava lable

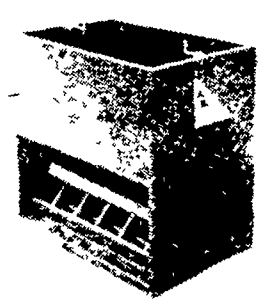


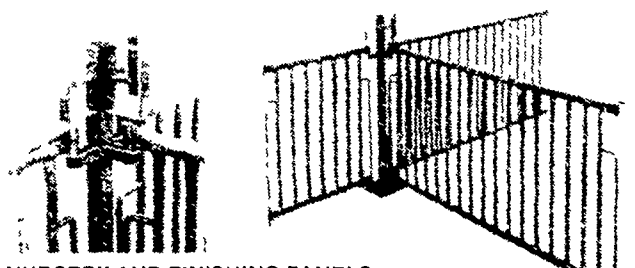
SOW CAPSULE
A healthy environment that helps wean more pigs per litter and cuts down on the labor needed to do the job There are models with 4 to 24 farrowing stalls that have built-in feeders watering cups and easily adjustable side panels



SOW-PIG CAPSULE
A good farrowing system for medium or small operations A farrowing building is combined with pig nursery pens You have choices of models from 4 farrowing stalls with 2 nursery pens to 16 stalls and 8 pens

The Ag Best nursery feeder has an expanded throat that helps eliminate packing and bridging An easy top adjustment regulates feed flow A step-back feeder design keeps manure from dropping in the trough Five partitioned feeding spaces on each side Capacity is 11 bushels Construction is 14-gauge welded steel





NURSERY AND FINISHING PANELS
Built in one piece No loose removable parts are needed Panels open from either end and swing both ways Posts have a unique latch with pull and twist action for instant release or positive catch (patent pending)

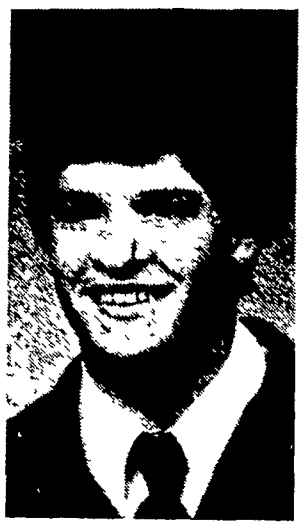
Randy Ranck chosen for American Farmer Degree

QUARRYVILLE – Randy Ranck has been nominated to receive the American Farmer Degree, which is the highest degree to be presented by the National FFA Association. The nomination was approved at a recent meeting of the National FFA Board of Directors in Alexandria, Va.

One of the over 800 members of FFA to be nominated for the American Farmer Degree, Ranck will travel to Kansas City, Mo. to receive the degree in a special ceremony that will be held on November 9, pending a final vote of approval of the 122 student delegates representing over half a million FFA members.



Randy Ranck

At the convention, each American Farmer Degree recipient will be presented a gold key and a certificate by the National FFA organization.

The American Farmer Degree is only presented to approximately one member in 700 of the over 500,000 member organization. It is only presented by the National FFA Organization to members who have demonstrated exceptional agricultural and leadership achievements.

Randall L. Ranck, Quarryville, is the son of Lester and Mary Ranck and a member of the Solanco FFA Chapter.

Randy has been an active member of the FFA for six years serving in 1976-77 as the state president of the Pennsylvania Association. Prior to that he served as treasurer of Lancaster County and chapter vice president and secretary.

He participated in many activities connected with his supervised occupational experience program in agriculture production. This included raising and showing beef cattle, hogs, and various field crops.

Randy was involved in the Solanco chapter's public speaking, parliamentary procedure, land, and livestock judging teams.

As a student he participated in Farmer Cooperative educational institutes which lead him to Texas A and M University for the American Institute of Cooperatives during 1977. He then was selected as State Co-chairman of Summer Institute for the Pennsylvania Association of Farmer Cooperatives for 1978.

Randy is an active member of the Mechanic Grove Mennonite church. He is presently working with his father on the 130 acre farm in Southern Lancaster County.

WHAT'S NEW

BUSH HOG AGREPAIR KIT

Bush Hog's new Agrepair Kit contains eight products that enable farmers to make quick field repairs on fuel tanks, leaking gaskets, pneumatic and hydraulic fittings, hoses, galvanized steel, loose bolts and other problems that stop or slow work.

A typical repair with the Bush Hog Agrepair Kit is a leaking fuel tank that can cause farmers to shut down planting, harvesting and other operations for hours or days while the tank is removed, drained, filled with water, welded, dried out and remounted. Using the kit, farmers will be able to repair the tanks from the outside in 20 minutes without draining in most cases. The repair is permanent.

Other components of the Agrepair Kit are: special adhesive in a no-mix applicator that penetrates dirt and grease to lock and seal threads and repair stripped threads plus bond all types of materials; gasket sealer for a flexible seal on paper gaskets; liquid Teflon® tape to seal pneumatic and hydraulic lines; building patch to seal leaks in galvanized steel, wood, fiberglas and masonary; hose repair kit for rubber hoses; spray solvent for save removal of grease, oil and dirt; and liquid rust remover to clean tools and prepare steel surfaces for painting The kit comes in a heavy corregated satchel that conveniently stores under truck or tractor seat. Bush Hog Agrepair Kit includes a free Bush Hog belt buckle.

For more information, contact Bush Hog, Dept. NR, Specialty Chemical Labs., P.O Box 438, 152 Simsbury Road, Avon, Conn. 06001.

PORTABLE GRAIN BIN

Meyer-Morton Company, Morton, Illinois, recently introduced a new portable grain holding bin to be used in conjunction with a grain dryer. It can be used for holding wet or dry grain, whichever the case may be; and can be towed from one site to another by a tractor or pickup truck.

The Meyer-Morton portable bin has a modular design of 16 gauge galvanized steel. This allows for two additional sections to be added to the base unit giving a total capacity of 500 bushels of grain. The unit can be unloaded from either the side or the center.

According to the manufacturer, little field assembly is necessary as the unit sets on its own base, requiring no additional blocking except to level on soft ground conditions. An optional roof is available for use in inclement weather. For further information contact: Meyer-Morton Company, Morton, Illinois 61550, Phone 309/267-7159.

Lambs, wool facing stiff competition

DENVER, Colo. - Domestically produced lamb and wool are facing stiff competition from imports as well as other domestically produced meats and fibers. American producers are inviting this increased competition through any continuing decline in domestic production and the resulting higher prices. This was the message from Barbara Schlei, administrator of the USDA's Agricultural Marketing Service. Administrator Schlei addressed ASPC delegates and directors at their 25th annual meeting held in Denver, Colo. on October 18.

Schlei pointed out that an increase in the ewe lamb inventory and decrease in the sheep and lamb slaughter would indicate that producers may have begun the "long-awaited rebuilding process."

Tom Vaughn, director of meat procurement for The Kroger Company, echoed Schlei's call for increased lamb supplies. The Kroger Company is the third largest retail food chain in the U.S. with over 1200 stores.

In 1976 the Kroger management began a total lamb merchandising program, that called for determination of quality specifications, training of retail meat cutters, development of in-store lamb displays and determination of promotional direction.

As a result of the strict guidelines set-up for these areas, The Kroger Company increased lamb tonnage used by 132 per cent over the last three years.

Vaughn indicated that there is a vast and potentially growing market for lamb. He said that his chain provides positive proof that lamb retailers can sell whatever the producers are able to provide.

The Kroger Company has made a substantial financial committment to their lamb program and are willing, Vaughn said, to continue that investment, if producers will work to provide the necessary supply. "I urge you," said Vaughn, "to produce more lamb so that we have more lamb to sell."

A gradual, planned increase in wool supplies is needed to meet the current demands that have resulted from the tremendous resurgence in demand for 100 per cent wool fabrics. That was the message to U.S. producers from Walter Lichtenson, vice president of product development and marketing for Stillwater Sales, Inc.

Lichtenson challenged producers to correct the fleece polypropylene contamination problem. It results in greatly increased costs and reluctance by mills to use wool from areas with records of past contamination problems. He also implored producers to exercise their power to stabilize the wool market and multiply efforts to regain predator control measures.

A sheep industry situation report panel was convened to discuss the state of the American sheep industry. In composit, these gentlemen agreed that the industry must increase production of lamb and wool even though there are some growth impediments.

Panel members pointed to difficulty in obtaining replacement ewes as a major stumbling block in increasing production. Other factors were labor and predator problems and government interference and resistance to growth in fear of adversly affecting the current favorable price levels.

The panel members also presented a strong belief in the future of the sheep industry and its impending strong position in the American marketplace.

Couldn't Be Done

Some can take solace in the fact that 30 years ago people couldn't sit in their living rooms and watch 30-year-old movies

NEW MF 540 COMBINE

If you're a medium to large acreage operator who has both corn and soybeans to harvest, then here's the combine for you. It's the new-sized MF 540 Combine built to work hard . . . and look good, too.

It's powered by a rugged 318 cu. in. (5.27 l) 4-cylinder Perkins diesel engine that's known the world over for maximum operating performance and field-proven reliability.

And, to keep that engine running cool, there's an exclusive Cyclone-type Radiator Air Intake System developed by Massey-Ferguson engineers. It has no moving parts to cause vibration, no bearings to wear out. The end result is improved engine cooling and reduced costs.

A new electro-hydraulic system for header lift is quiet and responsive. It lets you make quick, accurate adjustments in table cutting height with a convenient thumb switch on the ground speed control lever.

If you're looking for the best in field performance, reliability, harvesting efficiency and personal comfort — take a look at the all-new MF 540 Combine. It's the latest addition to a long tradition of outstanding Massey-Ferguson combines.

Personalized MF financing, parts, and service available.

'Crockett's Victory Garden' to feature Longwood Gardens

KENNETT SQUARE – Garden lovers across America will have a unique opportunity to visit world-famous Longwood Gardens in the comfort of their own home. The popular television series "Crockett's Victory Garden" will air two special half-hour segments on Longwood during the first and third weeks in November. Check local Public Broadcasting Service listings for dates and times.

"These trips are very popular with our audience said Crockett. "Many people have stopped me here at Longwood, people from Michigan, Montana, Oklahoma, wanting to know when the program will be on, because they don't want to miss it."

Joining Crockett to explore Longwood will be Peter Seabrook, the English horticulturist who is seen by six million British viewers each week on the BBC. "By showing our joint ventures on both American and British television," Crockett explained, "we can help to expand communications between nations and people, expressing the good will and love that flowers bring."

Longwood Gardens, located some 30 miles southwest of Philadelphia near Kennett Square, Pa., is one of the country's outstanding horticultural showplaces. Its four acres of heated, indoor gardens and 300 acres of outdoor gardens attract over 600,000 visitors annually. The property was developed by the late Pierre S. du Pont, corporate leader of the Du Pont and General Motors companies.

Featured on the two programs are a walk through the conservatories, with special attention to orchids, ferns, and waterlilies. Outdoors, a daytime display of Longwood's spectacular fountains will be shown.

Jim Crockett is especially enthusiastic about the educational appeal of such areas as the Container House and the Balcony Gardens, both of which will be highlighted. "Longwood is one of the greatest teaching gardens I've ever encountered," he notes, "where the average home gardener is shown what he can do without a fortune.

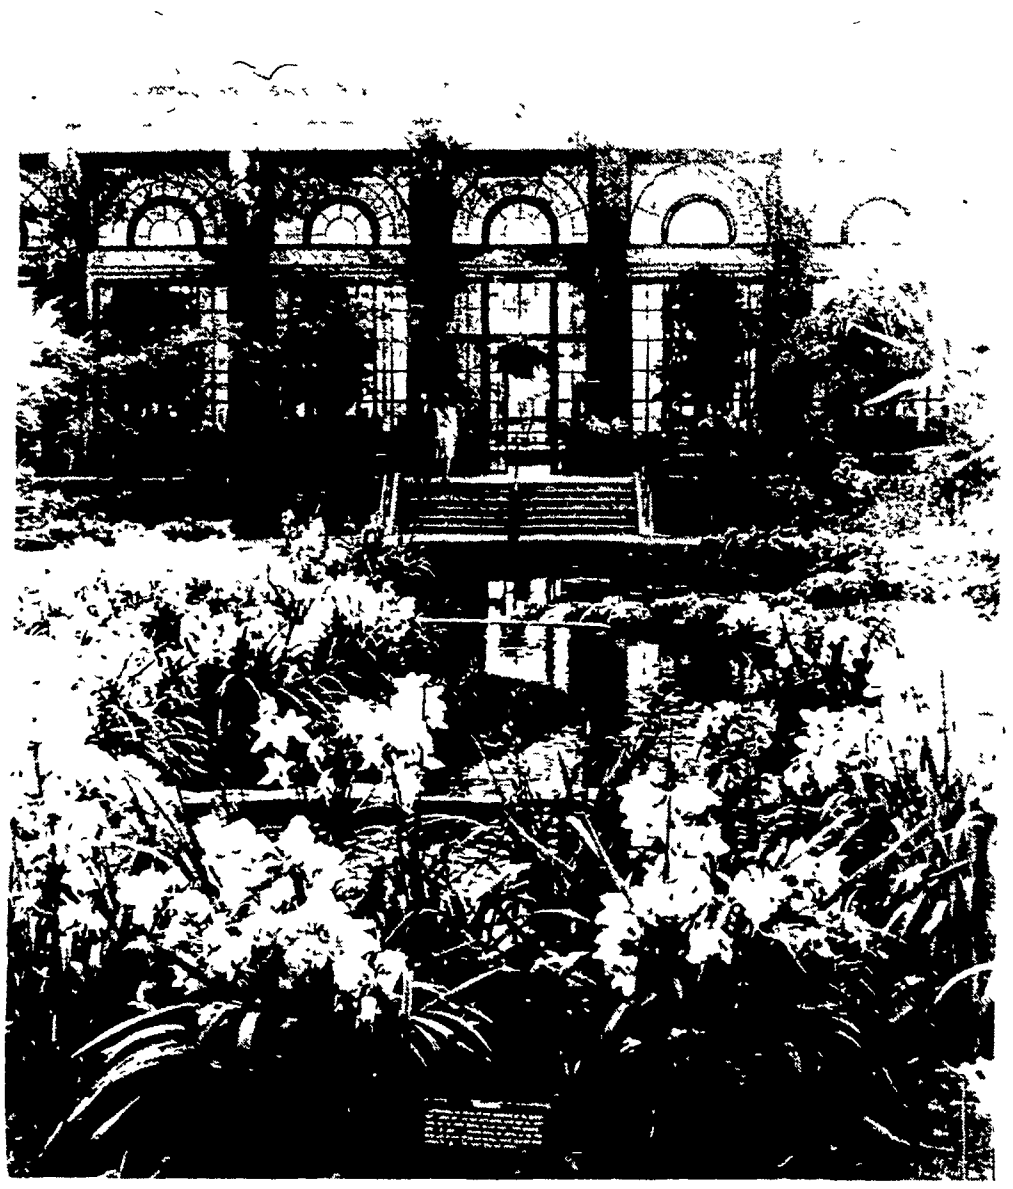
"These gardens are filled with educational features, proven by visitors with notebooks as well as cameras. Even those who come just for the spectacle go home with a whole pocketful of ideas.

"It's a joy for me to come to Longwood and see these plants growing right here, all my particular favorites, as well as plants I've not seen growing indoors for years. Some require special care, some mature slowly, and others are not well enough known. For instance, Longwood has the first buddleias I've seen in a greenhouse in 40 years. Some people have them outdoors - but here they're on display indoors!

"My philosophy is diversity. The more the public is offered, the more intrigued they will become with gardening. And as they view the rich diversity of Longwood, their eyes will be opened."

Crockett's approach to gardening is based on practicality and honesty. "There are countless ways to garden successfully," he notes. "I hope to show one way that works for the greatest number of people." He, too, has his gardening failures, but he doesn't try to hide them. "If my tomatoes have

(Turn to Page 109)



Longwood Gardens in Kennett Square will be presented to television viewers as part of "Crockett's Victory Garden". Two half-hour segments will be aired during the first and third weeks of November.

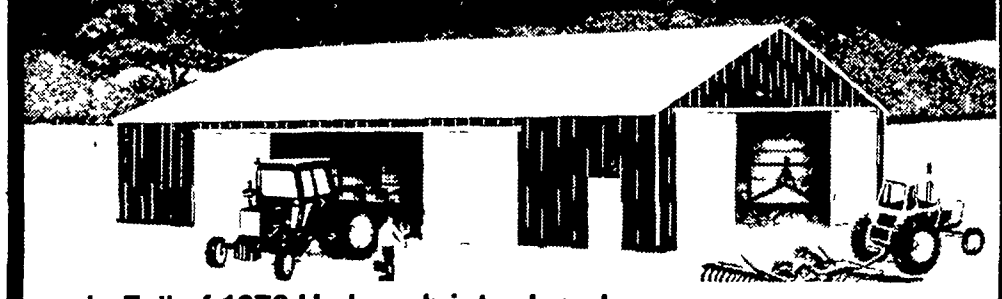
Farm Storage Buildings



In Fall of 1976 Umbaugh introduced a new line of standard machinery storage buildings. The innovations in design, materials and construction methods have made these the best machinery storage buildings available.

These buildings have no frills. When a farmer buys an Umbaugh building, his money is invested in durable materials and sound engineering practices.

Farmers who shop around usually buy from Umbaugh. We invite comparisons of price and quality.

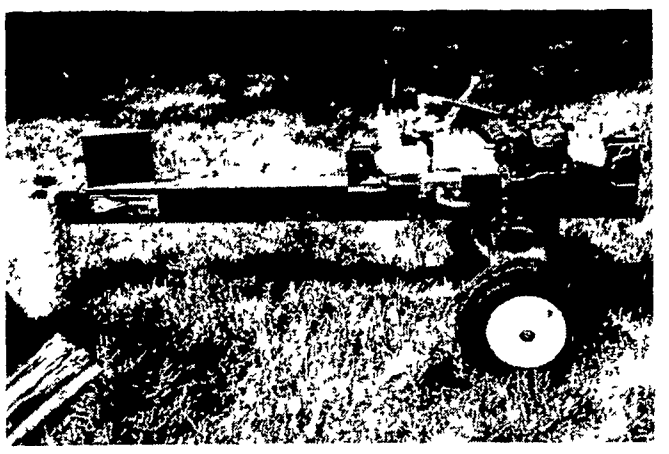
WHAT'S NEW



LOG SPLITTER

Murray Machinery, in the heart of Wisconsin's "wood country" reports a four-model lineup of splitters ready for home, commercial/rental, and rural use. The units are named Mighty Murc (after Murray's "MURCO" corporate identification), and will be marketed nationwide thru Tilton Equipment Company's four regional offices.

The Model 200AG farm unit is a 3-point hook-up splitter utilizing the tractor's hydraulic system for power to the ram. One man can easily hook-up the splitter making it totally portable with the tractor and hydraulically raised or lowered for convenient work height. The splitting wedge, as well as Mighty Murcs, is designed to keep the logs from "riding up" as the ram pushes them into the wedge. The ram "bed" is an extra heavy 5" welded steel box frame that reduces binding and sag under splitter pressures. This model also incorporates the Auto-Return ram.

The three over-the-road Mighty Murc models all have 1-7/8 inch ball hitch for towing, large capacity oil reservoirs for cooler hydraulic operation, five inch welded box frame member for the splitter's ram, "bed," 5 H.P. Briggs & Stratton engine, heavy-duty two-stage pump developing up to 12 tons of ram force, and "Auto-Return" ram operation.

The three models - 350EC, 550DX, and 850RC - will offer price selection based on customer needs and feature refinements such as fenders, wheel size, running lights, oil reservoir capacity, and more.

For more information, contact Murray Machinery, Inc., Box 1167, Wausau, Wis. 54401.

Spider Webs

According to the National Geographic Society, the female golden silk spider weighs 100 times more than the male The female also spins webs up to a yard wide which are so strong they can be used as fish nets

Longwood Gardens

warts," he says, "everyone in the United States will know."

"People who love flowers have very little hate in their hearts. All your cares melt away in a garden. It's a place of peace, of rejuvenation, of meditation.

"Everything I've seen at Longwood ties in with the 'natural life'. The planet is not ours to plunder. We should leave the earth in better condition than when we found it. The dedication of the staff at Longwood Gardens epitomizes this by showing an immense understanding of what life is all about."

Some tentative airing dates for the shows are:

Philadelphia, channel 12: November 4 and November 18 at 12:30 p.m.; New Jersey, Channels 23, 50, 52, 58: December 24 and January 7 at 3:30 p.m.; Maryland, Channel 31 (Hagerstown) November 5 and 15 at 2 p.m.

AGWAY

Worms Are Stealing Your Milk

Break the worm cycle with

BAYMIX FROM AGWAY

More than ninety percent of all dairy cows are worm-infested It's true Researchers have found worms in nine out of ten dairy cows inspected With these odds, chances are your herd has worms (internal parasites)

Worms can cost you money by reducing...

- milk production potential
- feed efficiency
- growth of replacement animals

BAYMIX is the "Dollars and Sense" wormer. Here's why:

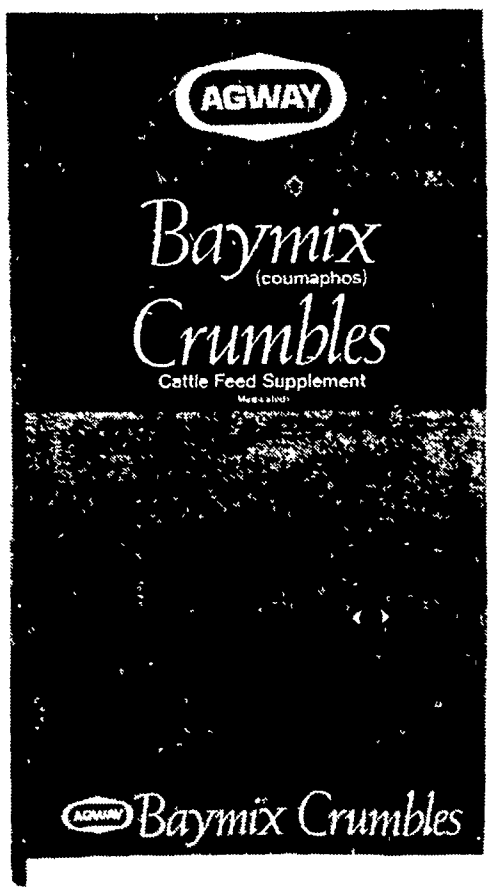
• There is no milk withdrawal with Baymix so you can worm the whole herd at one time milking cows, dry cows, calves and replacements • Only by worming the whole herd at one time can you effectively break the worm cycle and reduce internal parasitisms on the whole farm • Easy and convenient to feed No handling or restraints to stress animals Just topdress on feed for six days

Let Agway check your herd for worms...

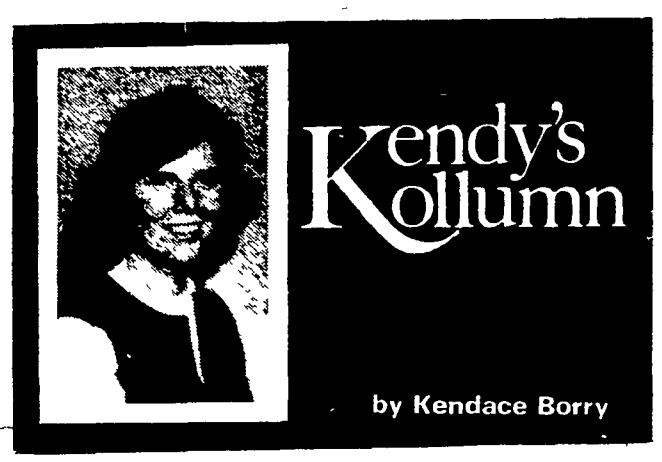
• using a fecal test kit, Agway can tell if worms are present in your herd If worms are present, a Baymix worming program can be started now The recommended Baymix program to reduce parasite levels on the whole farm is a worming in the Fall and again in the Spring

Start using Baymix and stop worms from stealing your milk

Make an appointment for a herd fecal survey today. Contact your local Agway store.



AGWAY



My father was one of those men that worried about leaving one ear of corn in the cornfield I think he would lay awake at night wondering if he had done everything possible to assure that the corn settling in the corncrib for the Winter was the highest supply possible

Now this may not sound like much of a big thing, but there was the year that the cornfield was just too wet to get the darnblasted cornpicker into the field.

The result was that my father devised his wonderful plan called "the family that picks corn together, stays together". It went over like a lead balloon, but nobody had the courage to do more than mutter quietly under their breath

Now instead of quiet evenings around the farm, we kids would have to rush home after school, quick do all the barn work, gobble down supper, and report behind the barn

There Father would be, usually waiting, and making dire threats about what would happen if so much corn didn't get picked before dark In the wagon hitched to the tractor we would scramble, and off it would be to the corn patch

We were each assigned two rows to do, with the wagon parked along side of the corn Being the smallest. (my younger sister was usually exempt from the work), I was assigned the two rows closest to the wagon But that also meant that I had to move the tractor up the rows every now and then, and pick up the corn that had missed the wagon, not to mention watch for the wild pitches and dive bomb throws my brother and father would let fly every now and then to make sure I was awake.

And on we would work until the welcome dark would release us from the weary tasks.

I never knew that the old corn rows could be so long, and so filled with corn And you had to be careful not too miss any ears for Father had a sharp eye that could pick out an overlooked ear at 20 paces

Saturday became a real day to dread because long before you even thought about crawling out of bed, you heard the old putt-putt of the tractor starting up, along with Father's famous "rise and shine" whistle. By the time he had the rig hitched up, he expected his children to report for duty, and we were there. One didn't lounge around when Daddy called

Back out to the cornfield we'd trek, with the boredom relieved by the radio taken along. And if he was in an exceptionally good mood, (in other words, if you seemed to be working quite diligently), you could sometimes persuade Father to tell war stories, or "when I was young" stories, or "do you remember" stories Really, we'd listen to anything to pass the time And when the conservation was flowing fast and smooth, time didn't seem to take near so long

Finally, the evening came when the last row was finished and the whole field had been conquered by our band of three marauding corn pickers. What a beautiful sight.

Father must have thought we did okay, because we were all treated to an ice cream sundae at the local dairy in celebration.

And life was simpler then, because Daddy could sleep--the corn was in the crib.

Gerhart to be awarded American Farmer Degree

NEW PROVIDENCE – David Gerhart of New Providence has been nominated to receive the American Farmer Degree, highest degree presented by the National FFA Organization. David was nominated for the degree by the Pennsylvania FFA Association. The nomination was approved at a recent meeting of the National FFA Board of Directors in Alexandria, Virginia. One of 807 FFA members nominated for the American Farmer Degree David will receive the degree in a special ceremony on Thursday, November 9, pending a final vote of approval of 122 student delegates representing over half a million FFA members.

Travel awards will be presented to American Farmer Degree recipients to offset their travel expenses to the National FFA Convention in Kansas City. The cash awards are sponsored through the National FFA Foundation by J I Case Co. of Racine, Wisconsin; Pioneer Hi-Bred International, Inc., of Des Moines, Iowa; The Federal Land Bank Systems of the United States; Amoco Oil Co., of Chicago, Illionois, and The Chevrolet Motor Division, General Motors Corporation, of Detroit, Michigan. At the convention each American Farmer Degree recipient will be presented a gold key and certificate by the National FFA Organization.

The American Farmer Degree is much sought after because it is presented to approximately one member in 700 of the 507,108 member organization. It is presented only by the National FFA Organization to members who have demonstrated exceptional agricultural and leadership achievements.

David is the son of Mr. and Mrs. Lester Gerhart of New Providence and is currently farming in partnership with his father.

He earned the American Farmer Degree on the basis of his supervised farming program.

David's farming program began when he was a freshman in vo-ag with two dairy calves and one acre of corn. His efforts throughout high school and after graduation enabled him to enter into a partnership with his father on their dairy farm.

David was active in FFA activities at Solanco including various committee work and FFA contests.

David Gerhart

David's high school vocational agriculture instructor's and FFA advisor's are Ronald Althoff, Arba Henry, and Mark Gould.

To qualify for the American Farmer Degree, FFA members must have advanced through a system of degrees unique to the FFA organization. FFA members begin as Greenhands and after one year of membership may be advanced by the local chapter to the degree of "Chapter Farmer". The third degree, that of "State's Farmer," is presented by the State FFA Association to two per cent of the States FFA membership in any one year. Only students who have earned the State Farmer Degree are eligible for the American Farmer Degree.

The National FFA Convention is an annual event of the Future Farmers of America and is carried out in cooperation with the U.S. Office of Education, of the Department of Health, Education, and Welfare. This year over 20,000 FFA members, vocational agriculture teachers, parents, and guests are expected to take part in the National FFA Convention.

In addition to the American Farmer Degree, many other FFA awards are presented during the convention. Contests are held in dairy, livestock, poultry, meats, milk quality and dairy foods, agricultural mechanics, horticulture, farm business management, and public speaking. Several guest speakers of national prominence address the convention audience and entertainment is interspersed with the business. The convention is the largest annual youth convention in the nation.

WHAT'S NEW

PRE-MIXER

A new compact version of the large commercial-type horizontal pre-mixer has been developed by Easton Products, Inc. for on-farm use and for mixing of micro-ingredients by veterinarians.

The Easton Feed Pre-Mixer uses a patented horizontal paddle arrangement designed to mix faster and prevent separation of heavier from lighter materials. The maxing paddles are strategically positioned to lift and mix. Easily-replaceable nylon brushes behind the paddle blades prevent materials from settling in bottom of mixing chamber and insure a near total cleanout of all ingredients.

The Easton Feed Pre-Mixer will mix small or large amounts equally well. It mixes vitamins, antibiotics, and concentrates...it will even mix bran.

Slide-gate opening at bottom of mixing chamber is pressure-locked when closed to prevent leakage of the very finest ingredients. Gate may be set for slow trickle or full flow by locking control lever in any position. Graduated scale allows operator to reset lever in the same position for future mixings.

Auger hopper is hinged to drop for easy clean-out between different mixtures of antibiotics.

The Easton Pre-Mixer is availabie in two models: models 250 and 500, which mix 250 lbs and 500 lbs. respectively. The model 250 is available with optional wheels and handles for easy portability.

For additional information contact Easton Products, Inc., Blooming Prairie, Minnesota 55917.

FFA career show to be held

KANSAS CITY, Mo. – An expanded National Agricultural Career Show will be featured this year in conjunction with the FFA's Golden Anniversary Celebration at the 1978 National Convention in Kansas City, Missouri, November 7 to 10. For the first time the show will be held in the H. Roe Bartle Exhibition Hall with new guidelines that allow exhibits by commercial agribusiness firms.

"We want to expand the educational nature of the show and display an even wider variety of career opportunities," explains National FFA Executive Secretary Coleman Harris, pointing out that more than 20,000 FFA members, parents, and business leaders, and 2,500 Vocational Agriculture instructors will be attending this year's convention.

A Hall of States will also be featured in the nearly two acres of exhibit space at the new H. Roe Bartle Exhibition Hall. Portraying the FFA as a vital part of the vocational agriculture curriculum, the state exhibits will depict 50 years of development of the FFA organization. More than 40 exhibits are designed to illustrate the convention theme, "FFA At 50, A Golden Past – A Brighter Future."

Beginning Tuesday, November 7, the Career Show and Hall of States exhibits will open at 1 p.m. and close at 5 p.m. The exhibits will be open from 8 a.m. to 6 p.m. on Wednesday and Thursday.

According to George E. Verzagt, the Career Show Coordinator, "The Career Show is a very popular eduational feature at the convention and an excellent opportunity for FFA members to learn more about the many career opportunities in agriculture today." Entertainment will be provided for visitors to the Career Show by groups from the FFA Talent Show who will be performing 15 to 20 minutes every hour.

Markline chosen FFA finalist

KANSAS City, Mo. - Karen Markline, White Hall, Md. has been selected as a finalist in the National FFA Public Speaking Contest, November 8, in Kansas City, Mo.

Karen's speech, "The Great American Farmer", earned her a medal at the local chapter and a $100 prize at the State level. The four regional finalists divided a $350 travel fund, which was appropriated on the basis of distance they must travel from home states to Kansas City, Mo.

Each contestant will speak six to eight minutes on an agricultural subject of his or her own selection. The speaker will then be subject to five minutes of questioning by the judges. Scoring is done on the basis of speech delivery, manuscript, and answers to questions.

The winner of the national contest receives $300. Other awards are $275 for second, $250 for third, and $225 for fourth place All awards and travel are provided by the National FEA Foundation, Inc.

WHAT'S NEW

METERING SYSTEM FOR FREE STALL MILKING PARLORS

A new metering system for in-line measuring of herd or string milk production provides a direct accounting tool that can help boost a dairyman's profits, according to the manufacturer.

Because the Metering System measures all flowage through the line, it actually measures the cleaning process as well. If gallonage recorded on the meter falls below the users standard water consumption, he knows his cleaning process is not complete Thus, by completing the process, costly contamination problems can be avoided

The Free Stall Milking Parlor metering system consists of a T-100 Diesel Turbine meter and a SM2-107-10 Totalizer. This system provides continuous flow metering and is cleaned in place with other milking equipment

For more information contact Mr Clarence Dreier, Accurate Metering Systems, Inc , 1731 Carmen Drive, Elk Grove Village, Ill 60007, or phone 312/640-0670

Clair Martin American Farmer Degree

By DIETER KRIEG

BLUE BALL — E. Clair Martin 21, is in his last year of membership in the Future Farmers of America. And as he steps out, he will take with him the highest degree bestowed by that organization. That award - The American Farmer Degree - is given to only a select few members. One of the prerequisites is that candidates must have earned the highest state award, which is given to only 2.5 per cent of any state's membership. Martin earned his state award - The Keystone Degree - in 1975.

The son of Mr. and Mrs. [illegible]mer Martin, New Holland Rt, the American Farmer Degree recipient says he enrolled in the vocational agriculture program at Garden Spot High School because he grew up around agriculture and enjoyed it. He did not actually grow up on a farm, however. The closest he came to that was several years of work on area farms, including dairy, steer, and hog operations.

For the past 4½ years Martin has been employed as a meat cutter by Yoder's Meats, Inc. of East Earl. According to Martin, it is primarily through his experiences with the butchering firm that he realized his goal of earning the coveted American Farmer Degree. While employed by Yoder's Meats, his place of work is the meat department at the Shady Maple Farm Market, east of Blue Ball.

Other factors which figured into the selection were his church and community activities, FFA activities and project work. He is a member of the Welsh Mountain Mennonite Church, was an officer on the Grassland Chapter's parliamentary procedures team which took first place in state competition, and has traveled to Kansas City, Mo. and Springfield, Mass. to represent his Chapter. The young man will make his second trip to Kansas City on Tuesday to receive his American Farmer Degree.

"FFA has meant a lot to me," Martin said while reflecting on his years of membership which are now coming to a close. "It has taught me leadership and public speaking skills as well as the basics of farming which I couldn't have gotten anywhere else."

Clair Martin, a meat cutter for a Lancaster County butchering firm, is one of 22 Pennsylvania FFA members who will receive the American Farmer Degree in Kansas City next week.

Robert Stolzfus wins American Farmer degree

By JOAN LIESAU

ELVERSON - "It is a 50-50 farm partnership that my brother Frank and I formed January 1, 1976" said Robert Stoltzfus, Elverson R1. Robert is a 1978 recipient of the American Farmer Degree, in the area of Agri-farming.

Twentyone year old Robert and his brother are raising about 2000 hogs per year, 50 beef cattle, and working 300 tillable acres. They plant 200 acres in corn, 80 in small grains and 20 acres in hay. "We double crop corn and soybeans and no-till in the barley fields" Robert said.

The brothers dry their own corn at their Meadowoode Farm. Robert does about 1000 acres of custom combining per year using a 1977 Masey Ferguson 750. The partners will combine, haul and dry their custom work.

Robert Stoltzfus

"We buy feeder pigs and feeder steers and fatten them "Robert said, "but now we are starting to farrow our own" "

Robert graduated from Twin Valley High School in 1975. He was a member of the FFA chapter there. He was sentinal, vice-president, and president of his local chapter, treasurer of the Berks County FFA and in 1975-76, he served as state reporter Robert has also been the recipient of the School Directors Award, Soil and Water Management, Crop, and Livestock Foundation medals.

"Frank was older than me and the things he got, I thought I could" Robert said. "But it wasn't that easy. I got state reporter, and the American Farmer Degree wasn't that much further. I had one ag teacher and will give him a lot of credit. Mr. Fredericks really pushed" Robert said.

Robert has shown baby beef and hogs. In 1977 he won grand and reserve champions with his hogs at the Berks County Leesport show and sale. It might be noted that Robert lives in Chester County but attended a Berks County school.

Robert has competed and won in the FFA tractor driving contest held at Kutztown Fair, he also won the regional contest but forfeited the state competition so that he could compete for the office of state reporter. He also participated on the County livestock judging team for three years.

Robert has participated in the National Eastern Region Leadership Conference held in Washington, D.C. He also attended mid-winter and summer FFA state conventions for four years.

To publish FFA activities Robert was occasionally seen and heard on WGAL T.V. channel 8 and WCOJ radio.

The son of Frank and Ruth Houck, Robert is a member of the Goodwill United Methodist Church. He is a member of the Church choir and a past president of the Church youth group. He is also a member of the Pennsylvania Farmers Association.

Robert said "I hope to continue farming - until." If his past record is any kind of indication, this young farmer has an excellent start for a promising farming career.

Estate planning saves worry

HARRISBURG – Estate planning may sound like something only the rich need worry about. But unless you're penniless, estate planning is important to you. Older persons, especially, need to relize this.

Estate planning can do two things for you. It can help you keep your assets intact for your heirs. And it can help you determine how your estate is divided and managed. Without planning, you give up your say in how the assets you've accumulated are distributed; and you may wind up paying more to Uncle Sam than you leave to your spouse or children.

So...you need to plan. But where do you start?

Make a will. Estate planners recommend it, with good reason. If you die "interstate" – without a will – your estate will be distributed according to State law, possibly in ways you would not have intended. With a will, you can provide for expert financial management, and you can determine who will receive your property.

Some things to think about when making a will:

Consider carefully whether or not you will consult an attorney. It isn't required, but a good attorney may be able to save a substantial sum of money for you. If you do consult an attorney, be prepared for an expense which will range from $25-300 or so, if your will is not complicated. If you decide to consult an attorney, shop around for one.

Name a qualified executor for your estate. The role of your executor is very important in proper settlement of the estate, and often becomes complicated. You will want someone in whom you have confidence. A bank can act as an executor, or you may want to consider co-executors.

Review your will frequently. It can be changed. Inflation, soaring property values, and other circumstances may make it outdated in just a few years.

Some other points to consider: How much are you worth? Probably more than you think. Your gross estate, for tax purposes, includes all assets, including jointly owned property. If your estate is large, you may want to consider tax-saving devices such as gifts or trusts.

How much do you owe? If you own property which is encumbered by a mortgage, consider insuring your debt so it is paid off if something happens to you. Such insurance is relatively inexpensive.

The most important point of all: plan your estate carefully, with qualified help. If you want to learn more about planning your estate, check in your library card catalog, or in the Reader's Guide to Periodical Literature, under "estate planning" before you see your banker or lawyer.

FFA'er advises

(Continued from Page 87)

about going into partnership with his father, who farms a total of 490 acres, 140 of which are owned. "I'd like to stay in Lancaster County," the young man admitted.

Rohrer's feelings about agriculture parallel his feelings about FFA and 4-H. He believes in working hard and striving to become a better producer. "Agriculture is good," the young man began, "sometimes prices might not seem quite fair, but you just have to keep working for it ... be a better producer. But something has do be done about rising farm costs. Also, something needs to be done to slow up the development of good, prime farmland."

Shelhamer praises Lancaster Co. court ruling

HARRISBURG – Pennsylvania Agriculture Secretary Kent D. Shelhamer on Monday praised the decision of Lancaster County Court Judge D. Richard Eckman, who ruled last week that the construction and operation of a poultry house in Providence Township does not constitute a nuisance.

As a result of that decision, Robert and Glenda Weaver may build and run a poultry operation on their 23.22 acre farm. Neighbors had sought an injunction to restrain the Weavers from completion of the project, claiming that the poultry house would cause a nuisance through noise, dust and odor.

Shelhamer called the ruling "a strong positive step. It proves that the public is recognizing the needs of the agricultural community."

Pennsylvania is the leading agricultural state in the Northeast, with 72,000 family farms which annually produce crops, livestock and poultry valued at over $2.1 billion. Lancaste County is the leading agricultural county in the Commonwealth.

"We cannot permit the loss of more farmland or farm operations. Preservation of the farm unit and family are just as important as the land itself," Shelhamer said. "Our farmers are a finite resource and deserve the same kinds of protection that we give our environment."

Environmental goals are admirable, but they must be balanced with concern for our agricultural production. When modern technology is designed to minimize problems such as noise, dust and odor, environmental and production goals can be compatible.

"It is not inconceivable that a factory or a housing tract be halted for farmland, but too often, a farm operation is torn apart for those same suburban developments or industrial parks," Shelhamer said. "Perhaps the ruling by Judge Eckman will bring the needs of the rural community into a better public focus."

The Agriculture Secretary noted that in the past decade, many urban residents have moved into the country to take advantage of the open space and the pastoral atmosphere – the "country life."

But while recognizing the benefits of the country life, these same residents often fail to see the many positive contributions of our farms to that standard of living.

When environmental concerns and the need for farm production are weighed in the minds of these residents, it seems that the farm operation always comes out short.

"Our farmers have taken on the burden of providing food and fiber for the consumers of the nation and a large part of the world," Shelhamer said. "And to do that job effectively calls on them to sacrifice much time, effort and investments in major capital improvements. To stand in the way of a continued prosperous agriculture would jeopardize our own future. This should not be permitted.

"It is gratifying that Judge Eckman has recognized the effectiveness of the modern technology which allows our farmers to maintain their tremendous production records while having a minimal effect on the environment. I am sure that this ruling will be seen throughout the Northeast as a wise decision which will work to the benefit of both the farmer and the consumer alike."

Holstein banquet slated

LANCASTER — The 28th annual Lancaster County Holstein Club banquet will be held November 14 at 6:45 p.m. at the Good'n Plenty Restaurant, Smoketown. Tickets are $6 per person and should be purchased by November 7.

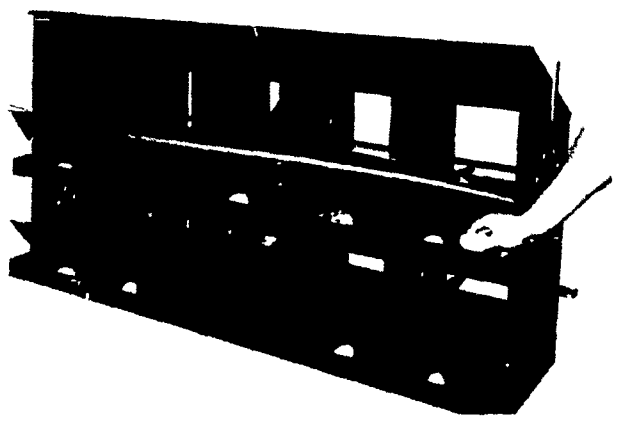
WHAT'S NEW



NEST SYSTEM

HUMBOLDT, Kans. - A new plastic nest system has been introduced to the poultry breeding industry by a new Kansas manufacturer. Cripps Automatic Rear Rollout Systems, built by Charles Cripps Company, are fabricated from ABS plastic, bringing the breeder several measureable advantages over conventional galvanized steel nests, according to Charles Cripps, president.

Durability, sanitation, convenience, and economy are the specific benefits the manufacturer claims for the new concept in nests. ABS plastic is impervious to acids such as chicken droppings; to alkalis which normally are applied by pressure hose for cleaning; and is highly resistant to deterioration from ultra-violet light. In addition, Cripps nest units are light in weight. A 10-nest, 2-story standard industry size unit weighs only 31 pounds.

Nest bottoms snap into place, tilted to the rear with a gentle slope that moves each newly laid egg directly into a covered egg tray to stay clean - a condition vital to promote hatchability, says the manufacturer. Egg holding trays are covered with a hinged lid that is fitted for automatic lock-open and quick-release, permitting one-hand egg gathering. Breeders who participated in testing the new system report a labor saving of up to 50 per cent overall, both gathering time and upkeep.

For breeders who want to salvage frames of their worn-out galvanized nests, Cripps also produces conversion kits and replacement nest bottoms.

Cripps Automatic Rear Rollout Nest Systems are sold only from the factory in Humboldt, Kans. For descriptive literature, prices, order form, or other information, write Charles Cripps Company, Box 212, Humboldt, Kans. 66748, or call (316) 473-2715.

Stauffer is top Deutz dealer

NEW HOLLAND — Stauffer Diesel, Inc., which is thought to be the oldest Deutz tractor dealership in the nation, was cited this week for having the highest dollar volume in sales during a recenly completed 6-month period. A 6-piece silver service set was presented to Mr. and Mrs. Amos Stauffer, founders of the company, by Joe Cox, district manager for the Deutz Corporation.

According to Cox, the Stauffer dealership is consistently at or near the top among Deutz's 382 dealers across the country. A year ago, he noted, the Stauffers were rewarded with a trip to Acapulco for their outstanding salesmanship.

Stauffer Diesel, Inc , one of 18 Deutz dealerships in Pennsylvania, serves Lancaster County and adjacent areas. Deutz tractors are imported from West Germany and feature air-cooled Diesel engines which are reputed to have high fuel efficiencies.

Stauffer began his association with Deutz engines before anyone in official trading circles knew the engines had arrived in the United States. He recollects having frequented scrap yards during the post World War II years and it was on one of those occasions that he came across a Deutz engine which had been brought to this country by one of the Liberty ships. "They used the scrap iron as ballast," the dealer explained. Stauffer took one of the engines home, and being mechanically-minded, studied it closely. Impressed by it, he wanted to know more. His association with the German-owned Deutz Corporation was formalized in 1955, seven years after he had founded Stauffer Diesel, Inc. Prior to that date the mechanically minded Stauffer was a full-time farmer. An accident caused the change in careers, he explained.

Mr. and Mrs. Amos Stauffer were honored this week by the Deutz Corporation for being their top dealer in the country. The Stauffers, of Stauffer Diesel, Inc., New Holland, were given a 6-piece silver service set by Joe Cox, right, regional Deutz manager.

National Grange meeting set

DENVER, Colo. - The National Grange will hold its 112th annual session, November 13-20 in Denver, Colo. Special activities and programs for Grange youth and young marrieds are scheduled for Wednesday, November 15 through Saturday, November 18.

The majority of the youth group attending the national convention are candidates for the ambassadorial titles of National Grange Young Couple of the Year and Youth of the Year. They have already won state titles and will be given written and oral exams by panels of national judges. The winners will be announced at a Coronation Pageant, Saturday, November 18 at the Regency Hotel. They will represent the National Grange at various meetings and conferences and conduct workshops and seminars for Grange youth throughout 1979.

National Grange Youth Director, William Steel, said many other youth will also be in attendance. They will attend portions of the daily business sessions and participate in leadership training workshops. On Friday, November 17, youth officers will open and conduct the morning business session.

The following are Lancaster Farming area National Grange contestants. Competing in the 1979 Young Couple of the Year contest are: Mr. and Mrs. Richard Mangel, Butler; Mr. and Mrs. Eugene Mills, Jr., Adamstown R1, Md.; and Mr. and Mrs. Edward Filipski, Pittstown, N.J.

Competing in the 1979 Youth of the Year contest are Meecee Baker, University Park; Paula Bobola, Dover R2, Del.; Cheryl Lynn Myers, Thurmont R2, Md.; Jimmy Roderuck, Walkersville, Md. and Laurie Woolbery, Salem R2, N.J.

Holiday gift ideas illustrated for ladies

By KENDACE BORRY

LANCASTER — Christmas in October was the theme last week when ladies from all over the Lancaster County area converged at the Farm and Home Center in Lancaster to gather ideas for the holidays ahead. There they were presented with gift, food, and decorating ideas to help them with their Christmas season approaching.

Virginia's Boutique was the first presentation on Tuesday's program, with Virginia M. Kloss showing and telling of gift ideas which can be made on the sewing machine.

She reccomended that the ladies look in pattern books for ideas, and told them that they can be econominal in their gift giving with the use of their sewing machine.

One of the items she showed was a casserole hot pad, which she related was made from ½ yard of quilted fabric. With that same piece of fabric she also made a hot pad and eyeglass cover, using all her material scraps.

Christmas is a time for children, she stated, and proceeded to show some "stuffies" that she had made on her machine, including stuffed dolls and stuffed animals, including a stuffed frog and rat. The rat, which was very realistic looking, was made from fake fur. She told that all her stuffies were filled with fiberfill.

For a new baby, she showed a gift idea of a gingham pin cushion with the baby's name embroidered on it.

For the younger children, there was what she called an education pillow. Made for tots, it featured different shapes and colors for them to relate to and learn.

Another idea for children, was a child's duffel bag, constructed of quilted fabric. She made hers waterproof by lining it.

A lot of the ideas from the sewing machine, she noted, are good for stocking stuffers.

She showed neckties and belts for the men, and showed the ladies how scarves could be easily made from big-squared fabrics with hand-rolled hems. She also illustrated different ways that scarves could be worn for a pleasing effect, stating that a scarf "gives life to an outfit".

Another gift idea was jar bonnets, which were simple circles of material, with rickrack sewed around the edges. Tied with a red bow and placed on top of the jar lid, they added a festive look to a gift of homemade canned goods.

For yourself for the Christmas season, she told the ladies to make themselves a blouse, something out of the ordinary, maybe of silver or gold.

Or make a vest, she told, using knit fabrics. Vests are very popular this year, she noted, and it is easy to make a reversible vest, putting the button holes on one side of the outfit and double buttons on the other side.

For an unusual gift idea, that is appreciated, she told of taking fake fir, and making a throw cover out of it, perhaps for over the back of a sofa. She said to get something rather loose and fluid looking, and line the inside of it with a lightweight curduroy or flannel. to dress it up, she reccomended putting trim around the edges, and then you have a very nice covering that looks nice draped over the back of a couch.

Something that the children could get involved in, she continued, was, the making Christmas ornaments from plastic foam balls. They can be decorated with fabric, ribbons, odds and ends which are fastened on with glue.

Lastly, she showed one of her favorite creations, a table cloth cover and eight cloth naplins which she made for about $10. The tablecloth was 60 x 72 inches long and she used 3½ yards of a light drip-dry fabric that was easy to handle along with 16 yards of lace.

First she washed the material and lace and then cut pieces of material 16 x 18 inches wide. The pieces were put together with the lace border sewn around the pieces. The napkins made were 12 inches square. She cautioned her audience to buy a firm lace, one without give.

Virginia Kloss holds up the tablecloth she made on her sewing machine, stating that the entire cost to make the items was about $10. She also made cloth napkins to match her tablecloth, telling that the gift idea was easy to make as well as inexpensive.

Schuylkill County honors 4-H Club leaders

FRIEDENSBURG - Schuylkill County 4-H Adult and Teen Leaders were recognized for their service this past year at a banquet in their honor held at St. John's United Church of Christ in Friedensburg.

Miss Chris Balmer, teen leader, of the Hegins Valley Trailriders Club, spoke to the group about her experiences this past July at 4-H Citizenship Short Course in Washington, D.C. This is an annual event held to educate older teens about their federal government and encourage good citizenship and local community involvement.

Mr. Thomas Terry, chief juvenile probation officer in Schuylkill County, spoke to the group about the juvenile justice system in Pennsylvania and how it is implemented in the County.

County leaders who attended and were recognized for service were: First year leaders - Mrs. Albert Brensinger and Ms. Doris Moyer of the Friedensburg Flying Fingers; Mrs. Nancy Thomas of Greenbriar Horse and Pony Club; and Carla Shadle of the Weishample Cloverettes.

Second year leaders - Mrs. Alice Hill of Saint Clair Eager Beavers; Mrs. Dolores Beibleheimer, Mr. Russell Miller, Ms. Judy Troxell, and Ms. Norma Troxell of West Penn Area Community Club; and Miss Sherry Miller of the West Penn Horse and Pony Club.

Fourth year leaders - Mrs. Faye Lehman of Friedensburg Flying Fingers; Mrs. Joan Adams and Mrs. Nancy Adams of the Greenbriar Horse and Pony Club; and Mrs. Darlene Lodato of the Mustangs.

Fifth year leaders - Mrs. Ardith Moyer of Friedensburg Flying Fingers; Mrs. Sue Biain of the Mustangs; Mrs. Trudy Hupka of Saint Clair Eager Beavers; and Mrs. Zita Harner of Weishample Cloverettes.

Sixth year leaders - Mr. Larry Lodato of the Mustangs. Seventh year leaders - Mrs. Wilma Klinger of Weishample Cloverettes; and Mrs. Kathryn Troxell of West Penn Kanine Masters. Eighth year leaders - Mrs. Arlene Felty of the Lewistown Valley 4-H Club. Ninth year leaders - Mrs. Sandy Balmer of Hegins Valley Trailriders; and Mrs. Sandy Trabosh of Saint Clair Eager Beavers.

Twelfth year leader - Mrs. Linda Roberts of the Lewistown Valley 4-H Club. Thirteenth year leader - Mrs. Rita Babyar of Mahanoy City 4-H Club. Fourteenth year leader - Mrs. George Maurer of Weishample Cloverettes. Sixteenth year leader - Mrs. Marion Miller of Nuremberg 4-H Club. Twenty-first year leader - Mrs. Lillie Kauffman of Auburn Cheerful Workers.

4-H Teen Leaders present and recognized were: Jack Kauffman of the Auburn Cheerful Workers; Chris Balmer of the Hegins Valley Trailriders; Elayne Hupka of Saint Clair Eager Beavers; and Gail Header of the Weishample Cloverettes.

Compensation sought for predatator losses

PARK RIDGE, Ill. - Farm Bureau legal counsel will explore the feasibility of securing compensation for livestock owners who sustain severe losses to predators.

This move followed a request by the American Farm Bureau Federation board of directors after it had studied and accepted a recommendation by its sheep advisory committee.

"The U.S. sheep industry is in trouble," says Al Keating, livestock specialist in AFBF's Commodity Division. "Sheep and lamb numbers have decreased 44 per cent in the last 10 years, primarily because of coyote predation."

Keating points out that many Western sheep ranchers have been forced out of business because of excessive lamb losses to coyotes. The problem has been compounded by government regulations prohibiting the use of the most effective coyote control measures.

NEED MORE BEDDING OR ROUGHAGE?

Bale your corn fodder! Sperry New Holland balers have a reputation of being able to bale tough crops.

The easy one to operate:

Sperry New Holland Model 845 AUTO-WRAP® Round Baler.

- Wraps each bale automatically
- Fast! You get up to 18 extra bales a day
- Steel chains, not belts, get you off to a fast, sure start on bale after bale
- Makes the "little" round bales weighing up to 850 pounds

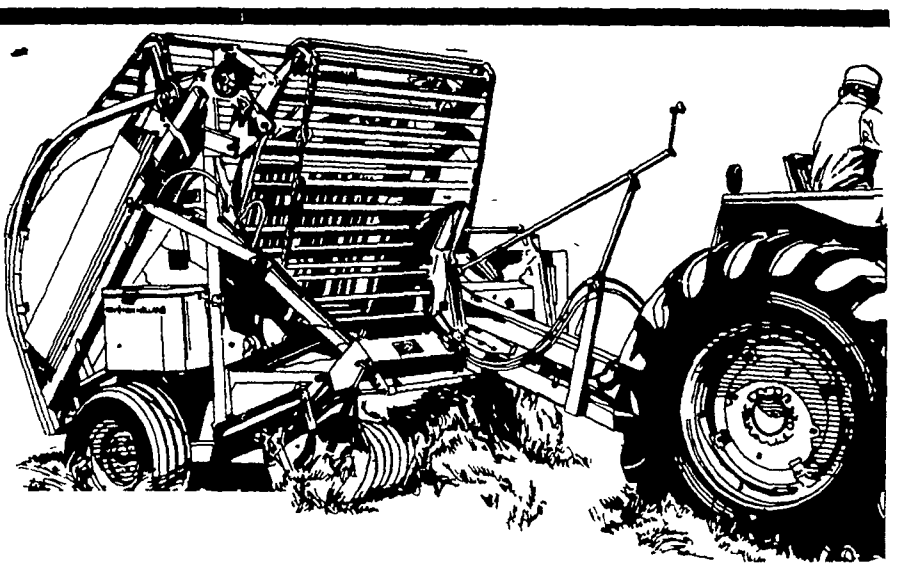
See the 845 AUTO-WRAP

Sperry New Holland Model 850 Round Baler.

You get off to a good fast start on bale after bale in a wide variety of crops even straw when these exclusive features work for you.

- Steel apron chains, not belts, produce a good, strong rolling action
- Super-Sweep pickup gets hay ordinary pickups miss
- Wedge-shaped core formation chamber starts hay rolling immediately for each new bale
- Tapered sides at entrance to bale chamber help fill in the ends of each bale for better bale shape

See how easy it is . . . ask for a demonstration



Here's advice from your nearby Sperry New Holland Dealer on how to improve the operation of your round baler when you bale corn fodder:

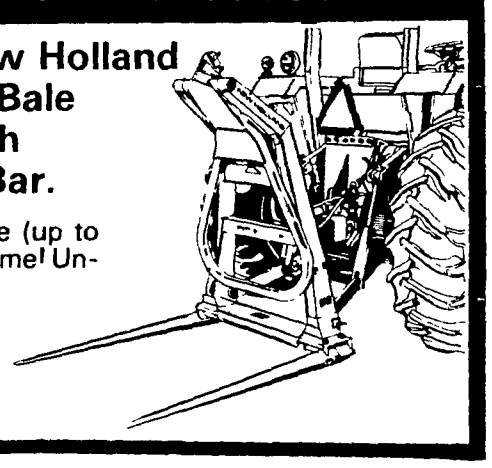
Preparation: *The material should be as long as possible, and not over-conditioned. For good bale-core formation, the material should have a tendency to cling together, or have sufficient length to help hold itself together. If a flail cutter or chopper is used, it is very important to rake two or three windrows together.*

Driving Technique: During core formation, reduce the PTO speed to approximately 300 RPM, maintaining the same ground speed or slightly higher, if tractor and ground conditions permit. Once the core formation is completed, the PTO speed can be increased back up to 540 RPM. If the material is extremely short, dry, and brittle, operate early in the morning or late evening when there is some dew or dampness. This will help the material to stick together.

The easy way to move big round bales!

Sperry New Holland Model 80 Bale Mover With Push-Off Bar.

Moves one bale (up to 1500 lbs.) at a time! Unloads at heights up to five feet, depending on tractor model



See your nearby Sperry New Holland Dealer listed on the facing page. He's an expert on all your baling needs, and stands ready to serve you.

FFA contests will include 20 Pa. teams

ALEXANDRIA, Va. – Eight contests of practical agricultural skill and knowledge involving nearly 1000 Future Farmers of America members on 305 teams (20 from Pennsylvania) will be held in conjunction with the 1978 National FFA Convnetion November 7-10 in Kansas City, Mo. The contests are an outgrowth of vocational agriculture classroom instruction and are designed for practical application of instruction in agricultural classes, shops, and laboratories.

Pennsylvania FFA chapters and their respective contest categories are:

Clearfield Area, Ephrata Area, Penn Manor – all in agricultural mechanics; Oley Valley – dairy cattle judging; Mifflinburg Area, Solanco Area, Derry Area – all in farm business management; Solanco, Penn Manor, Lakeview, Avella – all in livestock judging; Walter Briddle Saul, Penn Manor, State College Area – all in meats; Ephrata – milk quality and dairy foods; Red Lion, West Greene, Solanco, Penn Manor – all in poultry.

The contests are the culmination of FFA competition which begins at the chapter level and continues through contests at district and state levels. FFA members will compete in agricultural mechanics, dairy cattle judging, milk quality and dairy foods evaluation, poultry judging, livestock (beef, sheep and swine) judging, horticulture, farm business management, and meat evaluation and identification. Each participating team earns the trip to Kansas City by winning the top award in the state in their respective contest.

FFA livestock contests are held in conjunction with the American Royal Livestock and Horse Show which provides animals for contestants to evaluate. Other contests use facilities made available by Kansas City area schools and by the municipal government.

Vocational agriculture instructors consider the contests a valuable educational tool because they apply mechanical skills and knowledge of agricultural products. Participants see the practical application of classroom instruction. Competition also adds an element of incentive encouraging FFA members to further develop their knowledge and skills in the contest area. Top teams from all across the nation make for keen competition.

All of the National contests are sponsored by businesses and organizations through their investment in the National FFA Foundation, Inc. This year all eight of the contests are sponsored as special projects with designated sponsors whose sponsorship provides for travel expenses of contestants and awards recognizing winning teams and high individuals.

The Horticulture Contest involves FFA members in one of the most rapidly growing curriculum areas in vocational agriculture today. This year 41 four member teams will test their judging and identification skills in nursery and floriculture products. In addition, contestants take a written examination testing general knowledge of such subjects as plant anatomy, growing media and diagnosis of plant disorders. The contest will use plant materials donated and loaned by merchants in the Kansas City area and is being held at 9:00 a.m., Wednesday, November 8, at the Swope Park Municipal Greenhouse Complex in Kansas City, Missouri. The Horticulture Contest is sponsored by the American Association of Nurserymen, Inc., of Washington, D.C.; The Vitality Seed Co., of Ann Arbor, Michigan, and the Wholesale Nursery Growers of America, Inc., of Washington, D.C.

Nine classes of dairy cattle will be available for judging by 44 teams in the Dairy Cattle Contest sponsored by Associated Milk Producers, Inc. of San Antonio, Texas (AMPI). In each class team members can observe the animals from all angles for 12 minutes, but will not be allowed to touch them. After the allotted time, they will be given an additional 12 minutes to prepare reasons for their placement choices. Finally, after all judging is completed, they will have two minutes each to give their placement reasons orally.

Thirty-three teams are expected to participate in the Milk Quality & Dairy Foods Contest co-sponsored by Carnation Company – Genetics Division of Los Angeles, California, and by Mid-America Dairymen, Inc., of Springfield, Missouri, on Wednesday, November 8. Team members will be given ten samples of bulk milk which has been pasteurized and ten samples of cottage cheese. Each of the samples will be visual and taste tested to determine the flavor and odor. Each team's evaluation of the samples will be written on score sheets and compared to scores determined by the contest officials. Contestants will also be tested on their knowlege of milk production and milk marketing as well as cheese identification. The scoring is done following standards used by the U.S. Department of Agriculture.

Thirty-four teams will participate in the Farm Business Management Contest sponsored through the National FFA Foundation, Inc., as a special project by John Deere. This contest requires participants to apply principles agricultural economi business management, a accounting to the solution theoretical far management proble involving the use of lan labor, and capital. The Far Business Manageme Contest reflects the need f business knowlege requir in modern agricultur operations.

The Meats Contest c sponsored by Jones Dai Farm of Fort Atkinso Wisconsin; Oscar Mayer Co. of Madison, Wisconsi Wilson Foods Corporation, Oklahoma City, Oklahom and the Geo. A. Hormel Co. of Austin, Minnesota,

Forage Testing Is A Great Management Tool

(And We'll Help You Use It)

If you could be **sure** of the nutrient content of your forages, it would be worth the time to find out, wouldn't it? Forage testing has proved itself as a vital, cost-cutting, profit-producing management tool. That's why it's standard practice for top dairymen — and those who want to reach the top. We'll be glad to help you with these tests, then work out **precision balancing programs** that squeeze the most out of your home-grown forages. Try us. You'll see why those who use our services stick with us.

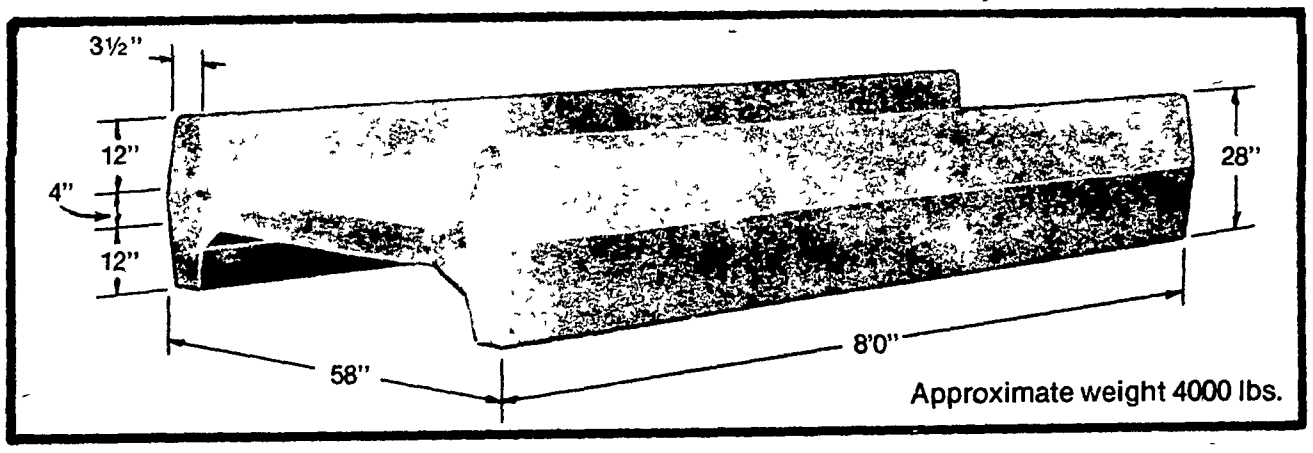
"H" TYPE FEED BUNKS



Approximate weight 4000 lbs.

Featuring

- Large Capacity
- Steel Reinforced
- Movable — for future expansion
- Strong enough to support a roof and feeder
- No corners to retain spoiled feed

INSTALLATION OF BUNKS

We have the necessary equipment to handle and install these heavy bunks. Customer shall make roadway to feed lot passable for our delivery truck.

FFA contests

(Continued from Page 122)

held in the Safeway, Inc., cold storage meat warehouse. The 33 teams that will compete in the Meats Contest will evaluate carcasses, and wholesale and retail cuts of beef, veal, pork and lamb. The teams will be scored on their ability to select the highest quality meats as well as their ability to identify the various retail cuts of meat.

The Poultry Contest is being sponsored by Victor F. Weaver, Inc., of New Holland, Pennsylvania, and the General Fund of the National FFA Foundation, Inc. Poultry Contest teams will evaluate two production classes of four production hens each and a class of production pullets. Members of 36 participating teams will be allowed to hold the birds and observe them for 12 minutes. In addition to evaluating live birds, the competition will include grading and evaluating a class of 10 ready to cook broiler-fryers, a class of ready to cook turkeys, and two classes of 24 white shell market eggs. Here again the teams will base their scores on U.S. Department of Agriculture standards.

Ralston Purina Company of St. Louis, Missouri, will sponsor the Livestock Contest in which 43 livestock judging teams will observe classes of breeding and market livestock (beef, swine, and sheep). Like the dairy cattle judges, they will have 12 minutes to observe each class of animals, 12 minutes to prepare reasons and no more than two minutes to give their oral evaluation of the livestock.

The Agricultural Mechanics Contest is sponsored by the Firestone Tire & Rubber Company of Akron, Ohio. Events in the contest will test 41 teams on both knowlege and skill of participants in solving mechanical problems and performing mechanical skills normally associated with agricultural mechanics such as trouble shooting, electrical wiring and welding. Participants will compete as individuals with team scores determined by adding individual scores. This year contestants are required to perform in the areas of carpentry and concrete skills, tractor power and soil conservation practices.

Winning teams and high individuals will be announced at recognition breakfasts on Friday morning. At that time the teams and individual participants are presented medals and trophies. The winners will be introduced to the convention audience during the Friday morning session of the convention.

Service citations to be given

KANSAS CITY, Mo. - Distinguished Service Citations will be presented by the Future Farmers of America to three organizations that have made significant contributions in service to agriculture and the FFA. The presentations are being made during the FFA's Golden Anniversary Celebration at the 1978 National Convention to be held in Kansas City, Missouri, November 7-10.

Citations will be presented to representatives of the organizations being honored during the Wednesday evening convention program. Organizations recognized at the 1978 convention are:

The American Association for Vocational-Instructional Materials has given outstanding service to the vocational agriculture program in many ways. AAVIM has produced, published and distributed several million copies of instructional materials for both pre-service and in-service classes in vocational agriculture. The AAVIM has assisted several states in organizing and operating curriculum development centers for vocational agriculture. AAVIM personnel have participated in numerous contests acting as judges and officials and have served on many committees and workshops for vocational agriculture and the FFA.

The American Red Cross Greater Kansas City Chapter for over 35 years has cooperated with the National FFA Staff and State Associations in setting up a "First Aid Station" on the first day of the National Convention and operating it with volunteers every day of the convention. The group has served scores of FFA members, taking care of accidents, illness and helping when medical needs existed.

The Midcontinental Farmers Association has sponsored numerous state and national FFA activities. The MFA has hosted National FFA Officers on tour, provided support to the National FFA Alumni Association, and has supplied many judges for National FFA Contests. The MFA has also sponsored special events promoting vocational agriculture and the FFA. The Midcontinental Farmers Association is a National FFA Foundation Sponsor.

VM Diesel

"THE DIESEL WITH A DIFFERENCE"

Cuts your power costs because it's way ahead of its time on all points.

AVCO-VM diesel engines are world-proven money-savers. They deliver maximum power efficiency immediately, under any sudden load or climate variation. Their higher power to weight ratios mean NO REDUCTION IN HORSEPOWER to qualify for pollution standards.

They're stingy on fuel, too. Many users report fuel consumption CUT IN HALF — and more — compared with gasoline engines. In some installations, our diesels are delivering more than TWICE the hours of operation per gallon of fuel.

Faultless performance is the norm, rather than the exception. A choice of 27 premium quality air-cooled Avco-VM's (5 to 670-hp) means there's one that's right for your application.

Modular, unitized construction means fewer specialized parts, lower weight per hp, lower maintenance costs, 70% parts interchangeability — and they'll fit the tightest space.

Growing dairy goat association holds convention

Editor's Note: The following story was submitted by Mrs. Barbara Watson, West Chester, who attended the American Dairy Goat Association's annual convention in Scottsdale, Arizona.

The American Dairy Goat Association annual convention was held Oct. 8-14 in Scottsdale. This 74th of the annual conventions was hosted by the dairy goat clubs of Arizona and the trade magazine **Dairy Goat Journal**.

There were members in attendance from Mexico, Canada, Puerto Rico, Hawaii, as far away as Carterton, New Zealand.

ADGA arbitrarily divides the U.S., Canada, and Mexico and Puerto Rico into eight districts, each represented by directors elected by the membership in the district. The number of directors from each district is determined by the member-population in each. New York, New Jersey and Penna. comprise District Two, and are represented by three directors; H. Gill Brown and R.H. Stoneback from Pa., and Mrs. Julien Green, from N.J.

Election of officers and executive committee for the year was the first order of business. Re-elected president was D. Lyman Stubblefield, Amarillo, Tx., first vice-president, Wes Nordfelt, Pipon, Ca., and second vice-President Helen C. Hunt, Washington, Ct. Executive Committee members at large were Audrey Evans, Norco, Calif. and Mrs. Julien Green, Flemington, N.J.

Six hundred and fifty-three officially sanctioned ADGA goat shows were held during 1978, an increase of 113. Seventy-three official milking competitions were held in '78. Two hundred and forty new goat herds went on official test in 1978, making a total of 1611 goat herds participating in the DHIR and official group testing programs.

Dr. Jess Ayers, Univ. of Az., spoke on the future of dairy goats and the problem of lymphadenitis. Dr. W. Darrell Foote, Univ. of Nev. Reno, spoke on the continuing and needed research in goat reproduction. Dr. George Trimberger, well known professor emeritus, department of Animal science at Cornell Univ., Ithaca, N.Y., author of definitive texts on both cattle and goat judging techniques; addressed the subject of Showing Dairy Goats - its value to you.

A 'wet lab', featuring Dr Don Bailey, Dr. Jess Ayers, Dr. Sam Guss, and Dr. Christine Williams, was shown to the audience on closed TV monitors, courtesy of Carnation-Albers Milling Co. This consisted of live operations, autopsies and demonstrations of dehorning and devocalising techniques, in vivid color.

Among the host of speakers was Dr. Sam B. Guss, Extension veterinarian emeritus, Penn. State, author of "Management and Diseases of Dairy Goats".

Outstanding also, especially for a practical, down-to-earth approach to disease and management; was Dr. Christine Williams, of Michigan State Univ., Ann Arbor. Her remarks were prolifically illustrated with color slides.

Economics was addressed by Roy Ferguson of Southern Agriculture Corp. Dick Newton, of Winrock International Livestock Research and Training Center, Ark.; attempted to answer the question, "Why Dairy Goats?".

Competition for and selection of the ADGA youth representatives was held. A young man and young lady are selected each year to represent the young 4-Hers, FFA'ers and junior ADGA members. This years representatives are Douglas Bradley of Arizona; and Miss K. Josephine Watson, of Chester Co., Pa. Miss Watson is a graduate of Bishop Shannahan High School, West Chester, and Chester Co. Vo-Tech., Coatesville. She is currently employed by Vosters Plant Nurseries of Secane, Pa., and is one-third owner of Talisman Dairy Goats of West Chester.

On October 14, ADGAs annual Spotlight sale was conducted by auctioneer Bill Frerichs of Phoenix, Az. The highest selling animal was Cadillac Danciet, a nubian doe from Texas. Her sale price was $8100! The buyer was Mrs. Helen Huber of Santa Ynez, Ca., owner of the Noel herd.

Beef barbecue slated

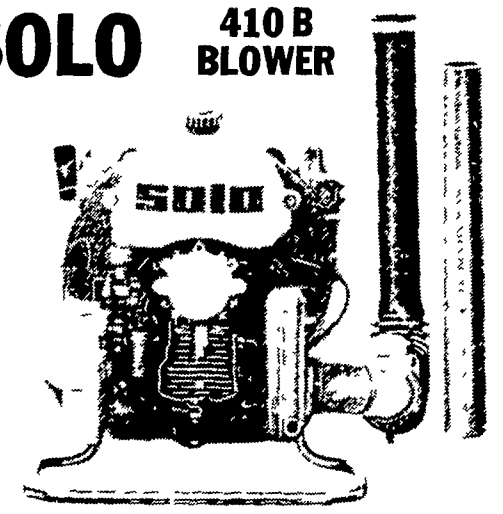
NEWARK, Del. - All the barbecued bottom round of beef you can eat, along with beans, potato salad and rolls - all the fresh pressed apple cider you can drink - plus your own ice cream sundae creation, will be served at the Alpha Zeta barbecue. This annual event takes place in Agricultural Hall on the University of Delaware campus Saturday, November 11, following the Delaware-Villanova football game. Dinner will be served from approximately 3:30 to 8 p.m.

Meat for the meal is cooked over a two-foot bed of wood coals in a large pit for about 12 hours. At serving time pieces are removed from the pit and brought into the hall for slicing.

Tickets may be purchased for $4.50 from AZ members or at Ag Hall any time prior to the 11th. They may be purchased at the door for $5. Children under six will be admitted free.

Additional meat and cider will also be on sale for those who wish to take some home.

SOLO 410 B BLOWER



For single-purpose use as air broom, the 410 blower is available in a special lightweight version without formula tank, formula hoses and nozzles. For cleaning lawns, flower beds, rock gardens, shrubbery. roofs, trucks, rolling stock, ship's holds, warehouses, grandstands, theaters, convention halls and other public areas. For cleaning damaged pavement before repaving. For quick snow-removal on car dealer lots. For beekeeping, seed-cleaning and other air-blasting operations.

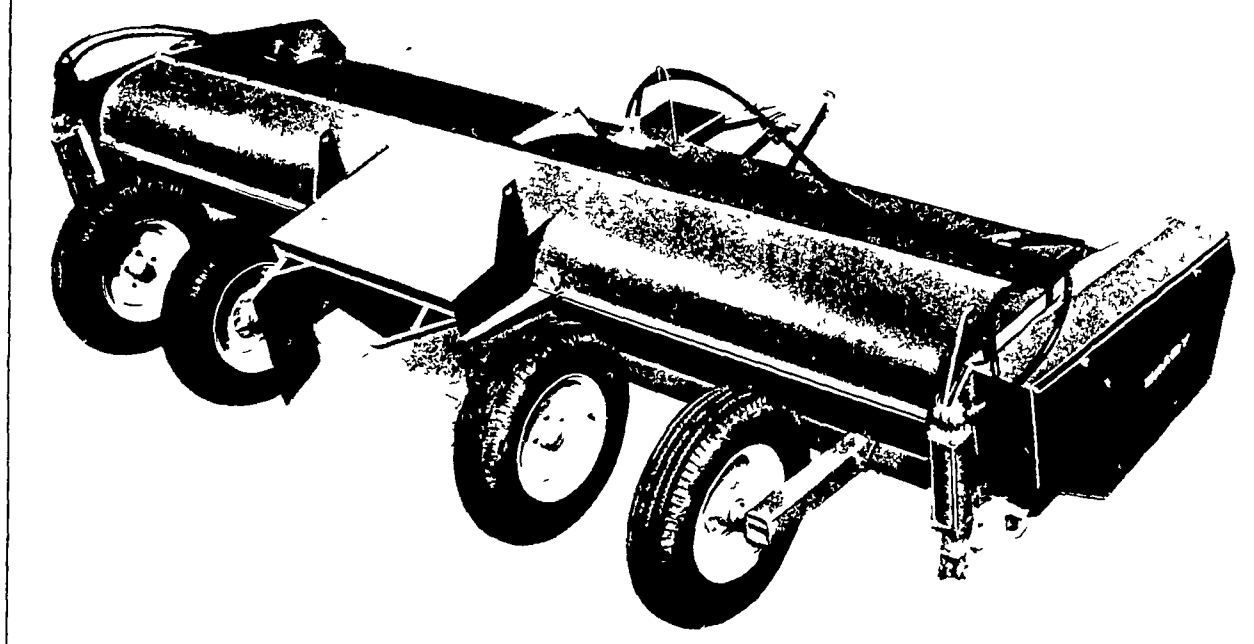
SEE THE NEW BRADY® 630 STOVER SAVER FLAIL WINDPOWER



THE BRADY 630 FLAIL WINDROWER — THE NEW LOW-COST WAY TO HARVEST STOVER, CORN OR MILO STALKS FOR VALUABLE CATTLE FEED OR BEDDING.

The Brady 630 Stover Saver Windrower cuts a 14 foot swath (six 30 inch rows or four 40 inch rows) and lays down a uniform windrow Use your forage harvester, conventional baler, large round baler or stack wagon to pick up windrow for fast, high capacity harvesting of corn or milo stalks

Follow right behind the combine or other grain harvesting operation to put four wide or six narrow rows into a windrow Pick it up with your forage harvester for a nutritious, ensilable feed for cows or a growing ration for young stock

For fast harvesting of low cost cattle feed or bedding windrow the dry stalks and bale with your conventional baler or big round baler—or make stacks over twice as fast with your stack wagon

The P T O driven flails cut and lift the crop into the 14 inch diameter cross auger The new improved forward pitch flight ing on the auger increases capacity, delivering the material to the center for discharge through the adjustable windrow forming doors The shape of the windrow can be controlled—a particularly important feature when using a large round baler

Use the Brady 630 as a stalk shredder by merely opening the two hinged covers over the auger The cut material is then discharged evenly onto the field from the rear of the machine rather than into a windrow Shredded material improves crop residue decomposition and subsequent tillage operations

Four wheels are standard equipment, adjustable for various row spacing, to float the unit over uneven ground Operating height may be controlled hydraulically

An End Transport Kit is available as extra equipment for easy transport down narrow roads

Cumberland County DHIA records summarized

CARLISLE — M. Thomas Sheaffer was singled out Thursday evening for again having Cumberland County's highest DHIA average. The occasion for the presentation of the award was the Cumberland County dairy banquet, held two days ago at the South Middleton Fire Hall

Sheaffer, Carlisle R5, has a herd of 50 registered Holsteins with an average of 18,532 pounds of milk and 681 of fat.

Cumberland County dairymen who are on DHIA had 5622 cows tested during the DHIA year, which ended Sept. 30. The average for the county now stands at 14,678 pounds of milk and 541 pounds of butterfat. That compares with a state average of 14,475 and 548 for milk and butterfat, respectively

In other statistics revealed at the banquet, the average Cumberland County dairy herd consists of 63 cows, compared with a statewide average of 55. The value of the milk produced by a Cumberland County cow on DHIA last year was pegged at $1532, compared with a statewide average of $1498 This came about despite higher feed costs, the statistics revealed. Total feed costs per head were calculated at $655 in Cumberland County, while the state average stands at $641. The average value of the milk after feed costs was $877. The state average for the 1977-78 DHIA testing year stands at $857.

Cumberland County's DHIA average has been moving up steadily over the years, records show. In 1928, for example, the average stood at 8935 pounds of milk with a 3.5 per cent test and 318 pounds of butterfat. By 1948 that average had increased to 9386, 3.8 per cent and 355. In 1968 the respective figures were 12,983, 3.9 and 506. A year ago the Cumberland County DHIA average stood at 14,525 pounds of milk with a 3.8 per cent test and 547 pounds of butterfat.

The high cow for milk in the 1977-78 DHIA summary is Chamberlin-Dale Rae, a 7-year old registered Holstein owned by Clifford Chamberlain of Shippensburg R1. She produced 24,382 pounds of milk with a 4.5 test and 1092 pounds of milk. Second high was Huntsdale Emma Imperial Chief, owned by M. Thomas Sheaffer, who pumped out a record of 26,649 pounds of milk with a 3 9 per cent butterfat content, amounting to 1036 pounds of actual butterfat. The same cow stood second in the list of high milk production records. Third in butterfat production was another Huntsdale cow. Huntsdale Janet Imperial Chief, with 24,659 pounds of milk, a 4.0 test and 987 pounds of butterfat to her credit.

Fourth was Marquis Eagle Jolly, also owned by Sheaffer, with 21,866 pounds of milk, a 4.4 test, and 970 pounds of butterfat. Chamberlain-Dale Elva was fifth highest with a lactation of 21,590 pounds of milk, a 4.5 test, and 964 pounds of butterfat.

In the milk production race, J. Shephard Wolf, Newville R1, had the first place cow. She is Lady Valley Acres Magnet Jo, a 4-year old with 27,098 pounds of the white fluid. She had a 2.4 per cent test and 650 pounds of butterfat. Huntsdale Emma was second. In third place was Stroc-Key Performer Diana, owned by J. Paul Strock of Mechanicsburg R9. She produced 25,752 pounds of milk, testing 3.6 per cent butterfat, and yielding 928 pounds of butterfat. Fourth was Weaver Dale Ideal Star Lu, owned by Chester Weaver of Carlisle R9. She produced 25,566 pounds of milk, with a 3.8 per cent test and 966 pounds of butterfat. Fifth was another Strock cow, Stroc-Key Ivan Star Karen, with a record of 25,277 pounds of milk, 3.7 test and 942 pounds of butterfat.

In lifetime production, Lady Osborndale Pabst Joe is credited with 12 lactations and 3941 days of milk for a total output of 188,446 pounds of milk and 8048 pounds of butterfat. She is in the Thrush Brothers herd at Shippensburg R1.

Chamberlin Dale Daisy, now deceased, is second in the lifetime production list with 197,607 and 7923 pounds of milk and butterfat, respectively. She was owned by Clifford Chamberlin and had completed 13 lactations.

Third in line is Frena Penstate Connie, owned by Fred Naugle of Carlisle R7, with 180,937 pounds of milk and 7719 pounds of butterfat in 10 lactations.

Other owners of top lifetime production cows are, in order, Chester and Galen Smith, Shippensburg R5; Fred Naugle; Robert Strock, Mechanicsburg; and John Lippert, Carlisle.

Following is a listing of yearly herd averages above 550 pounds of butterfat.

Messeth
OPEN PIT MANURE PUMPS
Slash Manure Storage Agitation Time

OUTPERFORMS ALL OTHERS:
Nesseth Open Pit Pumps are years ahead of competitive models. With pumping capacities of 3500 to 6000 gallons per minute, no single pump can break up thick crusted manure and turn it into pumpable slurry as fast as a Nesseth. You'll save time and you'll save fuel, but just as important — you'll save money because you don't need two units (one for agitation, one for pumping) when you buy Nesseth. A single unit does it all — and Nesseth offers a choice of six models so you can select the model best suited to your needs. Choose from either 3 point hitch or trailer mount, 20" or 24" impeller, 540 or 1000 rpm PTO operation.

Check these features
- Performs both agitation and pumping
- 300 degree rotation agitation spout
- Easy to transport, easy to operate
- No pier required in storage area
- Blasts a stream of manure up to 100 ft.
- Extra rugged construction for longer life, dependable trouble-free service.

Homemade goods seen at Lancaster Town Fair

By SALLY BAIR
Staff Writer

LANCASTER -- Homemade bread, egg cheese and hand-fashioned mints greeted visitors to the "Old Order of Cooking" demonstration by members of Lancaster County's Societies of Farm Women at First Presbyterian Church as part of the Lancaster Town Fair held Tuesday and Wednesday of this week.

The demonstration proved to be a popular visual and edible addition to the colorful fair which spread among five downtown buildings. The theme for this year's fair was "Our Living Heritage," and the foods demonstration clearly recalled our heritage of good cooking.

On Tuesday Mrs. Eugene Breneman, Conestoga R2, and a member of Farm Women Society 23, was happily demonstrating the art of making homemade bread, something she learned from her grandmother. She said, "I spent a day with my grandmother and she taught me I am using her recipe which she has been using to bake bread for 40 years. My grandmother is Hannah Smoker, and she is 88 years old and still bakes bread."

Mrs. Breneman made the work of bread baking look easy, and the loaves she producted were quickly sold to fairgoers who recognized (and smelled) a good thing immediately. Mrs. Breneman did her demonstrating dressed in the dress of her Amish Great Grandmother, Lizzie Kulp Buch. The dress featured the attached apron and cape, and she also wore a night cap worn by her grandmother.

She didn't admit to any secrets for a sure fire success, but Mrs. Breneman said that her grandmother used "occident flour" which she purchases from a mill, raw sugar and lard for her successful bread.

She added, "I used to make all of our bread, but since we have three children I only bake occasionally." She was obviously enjoying showing the visitors how to make bread. "There were so many people who were so eager to see and learn how you do it."

Mrs. Ruth Kauffman, Lancaster R2, also a member of Society 23, was busily demonstrating how to make egg cheese. She said, "We've had a lot of interest in the egg cheese. The recipe is something handed down from one generation to another, but is strictly Pennsylvania Dutch." Mrs. Kauffman said she makes egg cheese at home. She was very popular because she offered samples of her egg cheese on small tidbits of bread with molasses Large molds of cheese were available for sale.

Nearby County President Mrs. Carl Diller, Lancaster, worked industriously making lovely mints which were also offered for sale A display of antique cooking utensils drew a lot of attention The antiques were supplied by Mrs. Diller and Mrs. Cloyd Wenter.

Farm Women Society 22 had members on hand to sell copies of their cookbook which features many "Old Order of Cooking" recipes along with some which are more modern

Mrs. Diller said, "This is our first year here, and we didn't know what to expect. There are many people coming through who are really interested."

Participation by the Farm Women offered a small homey touch to the Fair which was a delightful mixture of arts, crafts and delicious goodies.

International activities featured

KANSAS CITY, Mo. - In view of agriculture's increasing international role, many members of the Future Farmers of America might be thinking "international" at their Golden Anniversary Celebration at the 1978 National Convention in Kansas City, Missouri, this November 7 to 10. The FFA International Program has been part of the FFA Convention since 1948 and the FFA's Work Experience Abroad program is celebrating its tenth anniversary, according to FFA Manager of International Programs, Lennie Gamage. Gamage expects at least 50 international guests at this year's Convention.

The past several years have brought a new awareness of international interdependence in agriculture During this time FFA international activities have steadily increased as more and more members show an interest in traveling abroad to gain firsthand knowledge of agriculture in other nations In 1978, 75 FFA members participated in the FFA Work Experience Abroad Program. Through the program students are placed for three to six months on farms in Europe South America or the South Pacific, where they live and work with farm families. Many of the participants in the 1977-78 WEA Program are expected to be in Kansas City to share their travel and learning experiences with other FFA members.

The FFA WEA Program also includes similar placement opportunities in the U S. for students from other nations. In 1978 the FFA Organization assisted some 130 agriculture students from other nations in locating placement experiences on U.S. farms Many of these students will be attending the National FFA Convention.

Spring gardening begins in Winter

WASHINGTON – If you're a backyard gardener, this is the time of year to prepare for next Spring's planting. U.S. Department of Agriculture horticulturist Robert Wearne offers these tips to help you.

– If you still have crops such as collards, kale or turnip greens growing, work around them. The cold and snow enhance their flavor and you can still get good meals from them.

– Clean up old plant material. It's best to destroy any plants badly diseased or infested by insects, such as white flies. While cold weather may prevent the insects from surviving the winter, old plants can give them protection.

-- Save healthy, undiseased plant material to dig back into your garden or to compost. Collect enough leaves to make a three-inch deep layer on the garden. Compost any extra leaves for use as mulch during the growing season. If asked, your city street department may even deliver some to your home from their fall leaf cleanup. Shredding leaves with your lawn mower helps them work into the soil faster or break down faster during composting. Leaves help sandy soil retain moisture and allow clay soil to drain moisture.

– If you haven't had a soil test for two or three years, do it now. Soils can became too acid from fertilizers and organic materials or too akaline from buildup of sodium, calcium or other salts. Your local county extension agent, listed in the telephone directory under the name of your county, can tell you how to prepare the soil sample, where to have it tested and what the test shows your soil needs. Discuss with him the need for a separate nitrogen test.

– Fall is the best time to add lime and organic matter. By Spring, it should be effective.

– Plow or spade the lime, leaves and other organic material roughly into the soil. Rain, snow and the freezing and thawing of winter will break down the dirt clods and help incorporate the lime. A garden Fall plowed generally requires only raking in preparation for Spring planting.

– Correct any drainage problems. One way is to establish raised beds about four feet wide, four inches high and the length of your garden. Leave enough space for you to walk between the beds.

– Finally, clean up your equipment to protect it for next year. Clean off tomato stakes and metal tomato cages. Dirt and old plant material causes cages to rust. After removing the dirt from your garden tools, oil a cloth and rub them down to retard rust. If you have a garden tractor, drain the fuel from it and run the engine until all the fuel in it is burned up. Otherwise the gas will evaporate over winter and leave a gum deposit in the engine. Also, remove the spark plug, put a little oil in the cylinder and turn the engine over to spread the oil over the walls. Then replace the plug.

Wearne gave these additional tips to remember next season. "Many gardens aren't as successful as they could be for lack of proper watering. Set some empty coffee cans under the sprinkler next year when watering. One to two inches of water in the cans means the water has probably seeped down about four to six inches. The soil should be moist down past the plants' root zone, at least 15 inches.

"Time your watering and dig down to see how far the water soaks throgh the soil in a given time. Then you'll know how many minutes to water your garden.

"Mulching keeps weeds down and reduces the amount of water required to keep the plants growing.

"Even though home gardens are usually small, it's good to rotate your crops. Don't always grow tomatoes, for instance, in the same place. This helps control plant insect and disease pests. It helps control weeds and improve your garden soil, too," said Wearne.

Wearne said home gardeners should start small, with two or three tomato plants, some radishes and a few other vegetables they like and work up to larger gardens. Part of the fun of gardening, he said, is knowing how to do it properly so he suggests home gardeners learn about soil preparation, and how to care for and fertilize the soil and become familiar with gardening techniques.

"People should learn to distinguish between beneficial and harmful insects," he said. "You don't need to spray a whole garden just to get rid of insects on a few plants. You can pick off by hand the cabbage loopers your garden will probably attract. And you can make little foil 'collars' placed an inch above and below the ground to keep cutworms from killing your transplants plants, cabbage, for instance."

Wearne also suggests gardeners watch catalogs to experiment with new varieties that may be more productive in their location or be more insect or disease resistant.

Two final tips: be careful not to bring insects into your home when you bring your house plants in for the Winter. Inspect them well first. Insects multiply in a warm home and can be difficult to control.

And for everyone now harvesting their green tomatoes, Wearne suggests pulling up the entire vine, knocking the dirt off and hanging it on a wire or nail in the basement or other cool, dark place, to allow the larger tomatoes to ripen.

For those who have already picked their tomatoes, Wearne suggest wrapping the larger ones individually in newspaper to help ripen them. The small green ones, he said, are good for making relishes and all green tomatoes are delicious when properly fried.

Dwight Houser earns American Farmer Degree

LAMPETER - Dwight Houser of Lampeter has been nominated to receive the American Farmer Degree, highest degree presented by the National FFA Organization. The Lancaster County youth was nominated for the degree by the Pennsylvania FFA Association. The nomination was approved at a recent meeting of the National FFA Board of Directors in Alexandria, Va. One of 807 FFA members nominated for the American Farmer Degree Dwight will receive the degree in a special ceremony on Thursday, November 9, pending a final vote of approval of 122 student delegates representing over half a million FFA members.

Travel awards will be presented to American Farmer Degree recipients to offset their travel expenses to the National FFA Convention in Kansas City. The cash awards are sponsored through the National FFA Foundation by J I Case Co. of Racine, Wisconsin; Pioneer Hi-Bred International, Inc , of Des Moines, Iowa; The Federal Land Bank Systems of the United States; Amoco Oil Co., of Chicago, Illinois, and The Chevrolet Motor Division, General Motors Corporation, of Detroit, Michigan At the convention each American Farmer Degree recipient will be presented a gold key and certificate by the National FFA Organization.

The American Farmer Degree is much sought after because it is presented to approximately one member in 700 of the 507,108 member organization. It is presented only by the National FFA Organization to members who have demonstrated exceptional agricultural and leadership achievements.

The son of Mr. and Mrs. J. Wilbur Houser, Lampeter, Dwight currently has swine breeding and feeder pig production units in operation. He earned the American Farmer Degree on the basis of his farming program, leadership, activities, and community involvement. His instructor at Lampeter-Strasburg High School was Gerald Phillips of Willow Street.

Dwight Houser

Trash sold for cash

PHILADELPHIA – In November, Pennsylvania residents can save energy, earn extra cash to help cover Fall and Winter heating costs and clean up the environment by recycling aluminum. The Reynolds Aluminum Recycling Company pays 17 cents per pound for all-aluminum beverage cans and other clean household aluminum at its recycling points in Pennsylvania.

"Recycling aluminum saves 95 per cent of the energy required to produce it from virgin materials," notes E.J. Kelly, district manager of the Reynolds Aluminum Recycling Company. "Energy savings of both electricity required to produce aluminum and fossil fuels needed to generate the electricity for the aluminum reduction process are accomplished by recycling."

Reynolds Aluminum Recycling Company pays 17 per pound for all-aluminum-beverage cans and other clean household aluminum such as pie plates, foil, frozen food and dinner trays and dip, pudding and meat containers. Certain other items, including aluminum siding, gutters, storm door and window frames, and lawn furniture tubing are also worth 17 cents per pound. This aluminum must be free of all foreign materials, cut to lengths not exceeding three feet and should not be mixed with cans.

Additional information is available by calling toll free 1-800-243-6000.

PATZ Manure Handlers

Simple, Easy and Conveniently Out-of-the Way!
The old strongarm method of Manure Handling gives way to new muscle from PATZ — namely the Slurry Manure Pump and compressed-air Liquid Manure Mover These modern methods of manure movement provide simplicity rugged construction operational ease dependability, plus convenience

Slurry Manure Pump
Slurry or free flowing manure is pumped from a 180 gallon hopper under ground through 12 in PVC pipe to the manure holding area (If bedding is used only fine cut is recommended) Stroke is adjustable and driven by tough roller chain drive/reduction unit Plunger sleeve and one-way valves all can be removed for servicing

Liquid Manure Mover
Big 1700 (US) gallon below-ground pressure vessel collects slurry that is moved simply and easily by as little as 10-12 lbs of air pressure through 12 in PVC pipe to manure storage area Simplicity in design turning swing away hatch cover one-way valve at bottom and flapper valve at the discharge end are the only moving parts

Spiders are natural pest control agents

NEWARK, Del. – A lot of people see the spider as little more than a sinister presence that lurks in dark, cobwebby corners waiting to jump out and grab you. This prejudice no doubt was fostered by the childhood fears of many of us, but it certainly doesn't do justice to the poor spider.

This much-maligned animal is actually one of Nature's best pest control agents, since his whole life is devoted to capturing and gobbling up insects. Because of his fondness for houseflies, small beetles, mosquitoes, thousand leggers, cockroaches and other troublesome insects, he's definitely on the beneficial list. For the most part, he's also quite safe to have around.

There are about 1000 species of spider in the U.S.With a couple of well-known exceptions – like the black widow, the tarantula, and the brown recluse – most are quite harmless to humans. In fact, says University of Delaware extension entomologist Frank Boys, the spider is a very timid creature who would be quite happy to avoid all contact with people.

Spiders are so familiar to most of us that we tend to take them for granted – unless they get in our way somehow, or unless we have a special phobia for them. But most of us know very little about them, points out Boys. They belong to a class of animals known as arachnids and are closely related to ticks, mites, and daddy longlegs – all of which have eight legs and two body sections. Insects, on the other hand, have six legs and three body sections.

Spiders are equipped with all sorts of specialized mechanisms for catching insects. Some swing from a long strand of silk onto their prey as it flies by. Jumping spiders can pounce on a bug from several inches away. Fishing spiders can walk on water and even dive below its surface in pursuit of the aquatic insects and small fish on which they feed. Crab spiders are so well camouflaged by their coloring that they can just sit inside a flower blossom and wait for unsuspecting insects to enter. Some members of this last family actually have the ability to change color so that they blend in better with their plant surroundings.

All spiders have spinerettes, but not all species make webs. The silk for the webs is secreted as a liquid which hardens when exposed to the air. For its size, spider silk is stronger than steel – in fact, during World War II the silk from some spiders was used for making gunsights. Spiders use their silk not only to make webs for trapping insects, but also to line their nests, construct egg sacs and to make "parachutes" on which some tropical species manage to travel great distances.

When it comes to webs, the orb weavers are the great builders among spiders. These boldly marked black and yellow arachnids grow to more than an inch in diameter and usually can be found hanging upside down in the middle of their large outdoor webs. If you've ever seen one of these webs etched with beads of water early on a dewy morning, you'll understand the orb weaver's reputation as a spinner.

It's unlikely that you'll ever get bitten by a spider, says Boys, unless you're working in a heavily infested area like a deserted building, an old well, or an abandoned pile of lumber. And in that case the spider's probably biting to protect itself. A little extra care on your part will usually avoid the problem.

Though spiders are basically beneficial, there are times when they can become a nuisance. If you're tired of dusty webs festooning the chandelier or decorating the corners of ceilings in otherwide tidy rooms, sanitation is the most practical method of control.

Clean away all webbing with a vacuum cleaner. Housecleaning with a cloth, dust mop or broom will do little to get rid of the source of webs. When removing them, take care to also get the small egg-sacs that may be with them. Be sure to remove the vacuum cleaner bag immediately after use and destroy its contents –

If vacuuming is impractical or difficult, a chemical spray can be used to control spiders instead. Aerosol sprays of DDVT (vapona) or pyrethrins are effective in spider knockdown treatments, says the entomologist. Dichlorvos strips (vapona) give good control for several months in rooms with minimal ventilation.

Extensive chemical treatment outdoors is not recommended. Spiders are an important part of the natural population, and their elimination may allow undesirable insects to multiply.

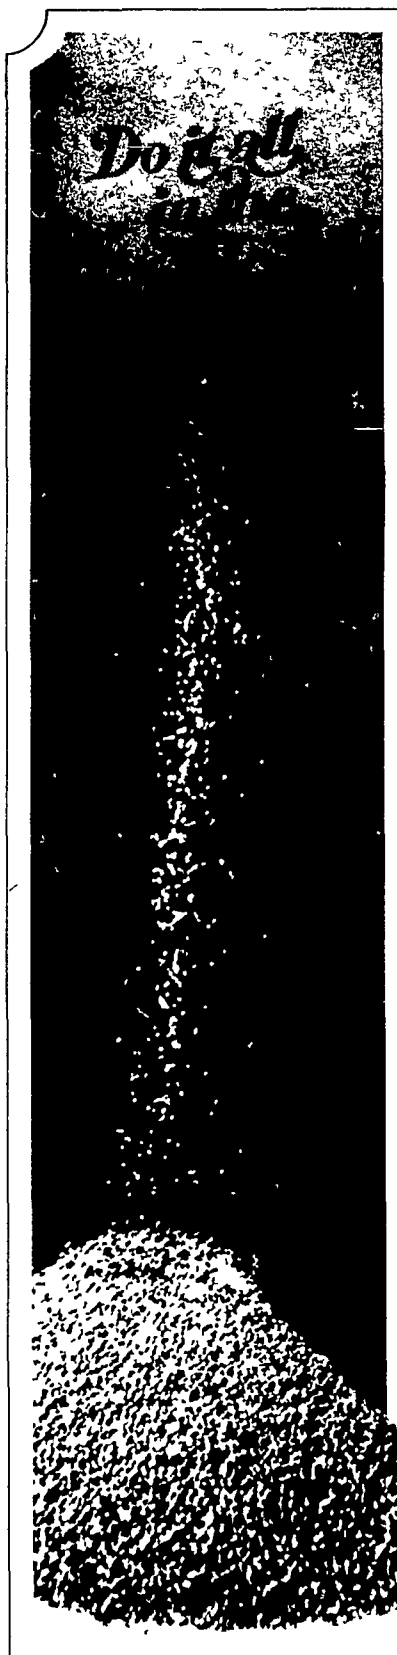
Duck season reopened

HARRISBURG - The Pennsylvania Game Commission reminds the state's waterfowl hunters that the second, or main, part of the 1978 duck season reopened on Wednesday, November 1.

The early part of the season had opened at noon on October 11 and then closed at sunset on October 12.

The second (or main) part of the season for ducks, sea ducks, coots and mergansers will close in the state at sunset on Saturday, December 9.



One good solution to the annual Spring crunch:

Use ORTHO UNIPEL® fertilizers this Fall!

Why take a chance on Spring rainouts, wet fields, and the crunch for field time and fertilizer application? Save Spring for planting Think "Fall application" with ORTHO UNIPEL complete pelleted fertilizers

When you team up Fall application and ORTHO UNIPEL fertilizers, you can "Do it All in the Fall " One quick pass over the field gives plants the basic fertility needed for fast and profitable growth next Spring Or as some say "one haul in the Fall does it all "

UNIPEL fertilizers are precise, pelleted chemical combinations of Nitrogen, Phosphorus and Potassium in ratios suited to varying Midwest soil and crop-fertility needs

Each UNIPEL pellet has two forms of Nitrogen and Phosphorus One form is quick-acting for a fast start in the Spring Another is long-lasting for continuous season-long grow-power And there's also readily-available Potassium

Spend your valuable Spring time planting corn instead of fertilizing See us soon about ORTHO UNIPEL fertilizers for Fall!

Carter may attend FFA's Golden Anniversary

KANSAS CITY, Mo. - Sources at the White House state that President Jimmy Carter, a former FFA member himself, is a "definite possibility" as a special speaker for the Thursday afternoon session of the FFA's Golden Anniversary celebration slated for Kansas City, Mo., November 7-11. Paul Harvey, America's most honored news commentator, is confirmed for a keynote address the morning of that same day.

Stars over America being honored for their agricultural expertise, the now-famous FFA Public Speaking Contest, the election of six new National FFA Officers - these activities will once again be prominent at the convention, and some new additions to the program have been made.

An expanded National Agricultural Career Show featuring exhibits from education, government and industry will be an attraction and a special time capsule ceremony serving posterity will be another. The unveiling of a large Commemorative Marker featuring a five foot high FFA emblem in downtown Kansas City will honor the founding of FFA - 50 years ago.

More activities are planned in and around Kansas City. In addition to FFA business sessions, convention participants will be involved in career-related contests, final interviews for ag-related proficiency awards, and educational tours of Kansas City agribusinesses. An expanded Agricultural Career Show will be held this year in H. Roe Bartle Hall and will give students an insight into careers open to students with training and experience in agriculture. Special exhibits in the "Hall of States" will depict the development of the 50-year-old organization.

Of the anticipated 20,000 in attendance about 6000 will be FFA advisors, parents, school administrators and others with special interest in the FFA. Convention business will be conducted by the organization's 122 student delegates who will vote on issues of business. The delegates, who represent 507,188 FFA members from the United States and Puerto Rico, will arrive a day early to participate in committee meetings and give reports. Six national officers elected at the 1977 National FFA Convention will preside over all sessions.

A Tuesday evening Vespers service presented by the National Officers and the National FFA Chorus marks the beginning of convention activities. The music and entertainment throughout the convention will be provided by the unique 113 piece FFA band and 123 member chorus. Additional entertainment will be provided by talented FFA members who perform onstage and at banquets throughout the week, demonstrating a variety of talents from group singing to string quartets.

This year FFA Leadership Workshops will be held in the H. Roe Bartle Hall. The Workshops are sponsored and conducted by the FFA Alumni Association.

National contests will get underway on Wednesday as outstanding FFA contest teams from almost every state in the nation will compete in one of the eight annual contests which include agricultural mechanics, dairy cattle, milk quality and dairy foods, livestock, poultry, horticulture, meats and farm business management.

The official opening of the Golden Anniversary National Convention will be on Wednesday morning, November 8, when National FFA President J. Ken Johnson gives the official call to order. Convention participants will be welcomed to Kansas City by Mayor Charles Wheeler. A special ceremony will be held where each state will add a container of materials to the Golden Anniversary Convention Time Capsule to be opened in 25 years at the 75th National FFA Convention.

A highlight of the convention will be held early Wednesday afternoon with the unveiling of a Commemorative Marker designating the site and date of the founding of the FFA. Streets will be blocked off for the 30-minute ceremony to be held on the corner of 11th and Baltimore Streets in Kansas City, the site where the old Baltimore Hotel once stood. It was in the hotel on November 20, 1928, that the first and founding convention of 33 delegates of 18 states gathered to start the Future Farmers of America.

Keynoting the Wednesday afternoon session will be Kyle Rote, Jr., North American Soccer League's "Rookie of the Year" and professional soccer player with the Dallas Tornadoes. At the afternoon business session 118 FFA chapters will be recognized for achievement in the National Safety Award program. The award recognizes FFA chapters for participation in safety projects in their local community.

The National FFA Public Speaking Contest on Wednesday evening's program will feature the speeches of four regional winners. A panel of judges will select the nation's top speaker, to be awarded $300 from the National FFA Foundation, Inc.

Distinguished Service Citations will be presented to three organizations during the Wednesday evening session: American Association for Vocational Instructional Materials, American Red Cross, and Midcontinent Farmers Association for their outstanding service to FFA.

Thursday morning's activities will begin with Building Our American Communities Award presentations to 150 FFA Chapters. Four chapters will be recognized as regional BOAC winners, and one will be named to receive the National Citation for the top community action program in the nation. The program will feature presentation of regional and national FFA Proficiency Awards for outstanding achievement in 22 areas of production agriculture and agribusiness. Sponsors of the awards will be recognized during the ceremony. Three hundred sixty-eight FFA chapters will be presented National Chapter Awards recognizing outstanding participation in a wide range of chapter activities.

Thursday morning's sessions will be keynoted by America's most honored news commentator, Paul Harvey. Six individuals will receive the FFA's VIP Citation for their continuing dedicated service to the National FFA Organization.

On Thursday afternoon the Honorary American Farmer Degree will be presented to 198 vocational agriculture teachers and individuals in education, government, business and industry who have made outstanding contributions to the FFA and agriculture. The afternoon session will be keynoted by Dr. Ernest Boyer, U.S. Commissioner of Education. The American Farmer Degree, the highest degree presented to members of the Future Farmers of America, will be awarded to 807 FFA members, the largest number ever to receive the degree.

The Thursday evening

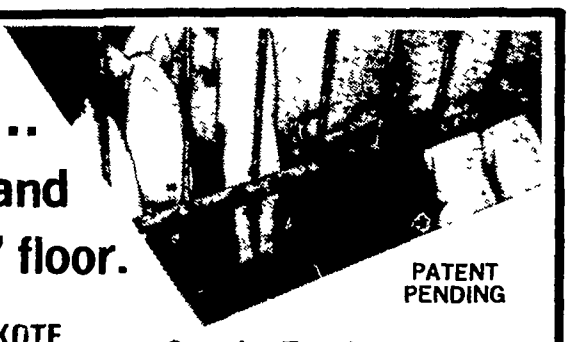
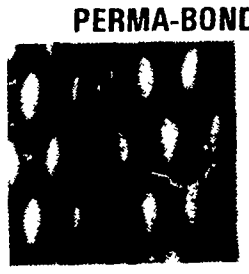
Tenderfoot...™
the Tough, Tested and Proven "pig-saver" floor.



PATENT PENDING

PERMA-BOND* KOMFY-KOTE CONSTRUCTION



A tough acid-resistant plastisol compound **permanently bonded** to a rugged steel mesh

* An exclusive bonding process developed by Tenderfoot

• Superior Traction prevents injuries and abrasions.
• Cushioned comfort reduces stress.
Self-cleaning. No holes or crevices to harbor bacteria.

HOW LONG WILL THEY LAST?

First produced in 1975 Tenderfoot was tested in farrowing pens for 1½ years before being marketed These original floors have been in constant use ever since WITH NO APPRECIABLE WEAR! Today s Tenderfoot floors have **6 advantages** over the original pieces

1. **3 times more coating**
2. **Tougher vinyl coating**
3. **Extra-strength steel.**
4. **Treated to resist bacteria & fungi growth**
5. **Improved Perma-Bond processing.**
6. **Strict quality control**

Constant research development and quality control continues at the Tenderfoot factory and at the nearby 650-sow operation where the original 1975 Tenderfoot floors are still going strong

How long will a Tenderfoot last? No one knows The very first ones produced have withstood heavy use since 1975 with **no appreciable wear** The floors produced today are **6 ways better** than the first ones **On the basis of these facts it seems safe to say that any concern over the durability of Tenderfoot flooring is unnecessary.**

Wood burners are urged to be careful

NEWARK, Del. - Energy-conscious, economy-minded Americans have revitalized an old industry long considered past history in the U.S.

Since the Arab oil embargo five years ago, the use of wood as an alternate heating fuel has created a growing demand for woodburning heaters, stoves, and furnaces, as well as wood splitters, chain saws, stack heat exchangers, and other auxiliary products.

The growth of the industry has been so phenomenal that building inspectors and insurance companies are having trouble keeping pace. In addition, consumers are buying and installing systems they know little or nothing about, sometimes with disastrous consequences.

Ron Jester, Delaware Extension safety specialist, says the overall problem has been compounded by manufacturers, distributors and dealers who may not fully understand the principles of woodburning. They may offer insufficient or improper instructions to consumers regarding the installation and operation of these systems, and may even go against recommended safety procedures and codes.

In their eagerness to jump on the wood-burning bandwagon, consumers often buy inadequate units, then install or operate them incorrectly. Fire safety experts believe this fact is related to the growing number of home fires.

Because property damage losses have increased $46 million in the past three years, some insurance companies have begun to lift coverage for homeowners who heat with wood, or penalize them through higher rates.

Building inspectors and fire safety officials are also becoming more cautious about codes and regulations regarding wood-burning systems in their communities.

Jester points out that heating with wood can be satisfactory and economical if the homeowner selects the right unit, installs and maintains it correctly, and operates it in accordance with recommended safety practices. Otherwise human lives and property are in jeopardy.

Buy from a reliable dealer, advises Jester, one who knows wood-burning systems and how to make them work efficiently and safely. Select the unit according to the percentage of the total heating load you want it to handle. Buy a product made by a reputable manufacturer with a good track record for performance, safety, and customer service.

The system must be installed correctly, for safety as well as efficiency. Apply either local codes, or standards set by the National Fire Protection Association, whichever are stricter. Check the manufacturer's and dealer's instructions against these standards. If they don't agree, take your business elsewhere, advises Jester.

Once installed, operate your system properly and keep it in top running order. Take time to learn its idiosyncrasies before you trust it. Burn only well-seasoned dry wood, without over-or under-firing. Inspect chimneys and stovepipes at least twice monthly, and clean them promptly when necessary.

Order 4 milk pooling rule is temporarily suspended

ALEXANDRIA, Va. – Two milk pooling requirements under the Middle Atlantic federal milk marketing order will be suspended through February, 1979, a U.S. Department of Agriculture official said recently.

Herbert L. Forest, dairy official with USDA's Agricultural Marketing Service, said one action, effective Nov. 1, suspends the requirement that a distributing plant sell at least 50 per cent of its milk for fluid use before it is eligible to have all its milk pooled and priced under the Order. This will continue an earlier suspension of this requirement that has been in effect since April.

The second action, which would apply to milk deliveries in Oct., suspends the limits on the amount of milk a cooperative or proprietary handler may move directly from farms to nonpool manufacturing plants and still have pooled and priced under the Order.

The suspension is based on testimony given at a public hearing on Oct. 3-4 in Philadelphia. The suspension was requested by Inter-State Milk Producers' Cooperaive, the largest cooperative in the market, and Michaels Dairies, Inc., a handler that operates a bottling plant pooled under the Order.

Evidence gathered at the hearing showed that a continuing downward trend in Class I – or fluid-use – milk sales means that some plants are not able to meet the order's pooling requirements. As a result, Forest said, some dairy farmers' milk might not be priced and pooled under the order.

Wood burning seminar slated

SCHUYLKILL HAVEN - There will be a wood burning seminar open to the general public on Wednesday, November 8, at 7:30 p.m. in Building C, Room 119, of the Schuylkill Campus of The Pennsylvania State University.

The program is sponsored by the Schuylkill County Cooperative Extension Service and will be concerned with the safe installation and maintenance of wood stoves and chimneys, as well as the selection and storage of wood.

Ralph Bzura of Stoves and Stuff, and Walter Johnson, forest resources specialist from The Pennsylvania State University, will be the speakers.

The seminar is free and there will be door prizes. Registration is desirable and to do this call the Extension Office at 717-385-3431, or write to the Extension Office at P.O. Box 404, Schuylkill Haven, Pa. 17972.

New England Order dairy farmers approve transport adjustments

NEW YORK – Dairy farmers operating under the New England Federal Milk Marketing Order have approved amendments to the Class I – or fluid-use – milk price structure of the order. The amended order goes into effect Dec. 1.

In a U.S. Department of Agriculture (USDA) poll of dairy cooperatives, the amended order was approved by more than 76 per cent of the farmers supplying the market, according to Herbert L. Forest, dairy official with USDA's Agricultural Marketing Service.

One major change, Forest said, increases the rate of plant location adjustments to reflect increased costs of transporting milk from the production area to city bottling plants. These adjustments are added to the "Class I" price which handlers pay and the "uniform" price which producers receive.

Another change divides a simple pricing zone into several zones. The division of the present zone, made up the Connecticut, Massachusetts, and Rhode Island, reduces prices in a westerly direction.

Forest said a third change reduces the order's Class I price by a limited amount. This change, he said, will provide a better coordination of Class I prices that are applied at southern New England plants and plants in nearby eastern New York, which are under the New York - New Jersey milk order. Handlers under the two orders have overlapping sales areas in New York.

Copies of the amended order may be obtained from Market Administrator Oscar Zucchi, 230 Congress St., Rm. 403, Boxton, Mass. 02110; or from the Dairy Division, AMS, USDA, Washington, D.C. 2050.

WHAT'S NEW

MANURE PIT AGITATOR

The new Hesston Model 1505 Slurry Agitator is the latest addition to the company's line of liquid manure handling equipment. It is designed to restore and maintain slurry quality in storage pits and lagoons.

The Model 1505 attaches to Category I, II or III Narrow tractors with a 3-point hitch. Minimum required PTO h.p. is 65. The agitating propeller is 22 inches in diameter and attached to the end of a 17-½ foot boom so it can reach far out into the pit. The operator backs his tractor up to the storage area and drops the propeller through the crust. When engaged, the rotating propeller sets up a subsurface flow that erodes the underside and edges of the crust to thoroughly break up the heavy masses of weeds, bedding and dried manure. Continuous flow and direct contact with the spinning propeller soon turns the crusty mass into useable, valuable slurry that is easily picked up by the spreader.

A heavy-duty "foot," attached to the propeller end of the arm, protects the blades from damage should the unit strike the bottom of the pit or lagoon.

State FFA convention delegates named

ALEXANDRIA, Va. - This November 7 to 10, 122 young men and women will meet in Kansas City, Missouri, to represent their states as official delegates at the Future Farmers of America's Golden Anniversary Celebration at the 1978 National Convention. The delegates will represent nearly 510,000 FFA members nationwide as they discuss and vote on issues of critical importance to the future of the National FFA Organization.

Representing Pennsylvania at the convention will be John Trapasso, New Wilmington, and Michael J. Beatty, Grove City R2. From Maryland, Donald Trimmer, Woodsboro; and Kelly Arnold, Union Bridge; will attend.

Margie Finezan, Vintnor; and Cynthia Hamlen, Stewartsville, will represent New Jersey. And travelling from Delaware to the convention will be William Brown, Wyoming R2; and Donald Bullock, Harrington R2.

For years FFA members have made the decisions that shaped their organization, now known as the largest and most imitated vocational student organization in the world. Delegates to the National FFA Convention are selected by each State FFA Association and are usually members of the state officer team. Each state is permitted to send two delegates from its active membership plus one additional delegate for each 10,000 members above the first 10,000 members. This year 15 states are represented by more than two delegates, the largest delegation being from Texas which has seven delegates.

During the National Convention the delegates are seated in a special section at the front of the auditorium. They initiate, debate, and vote on all convention business. At the 1978 convention, delegates will vote on several important items including constitutional changes, acceptance of individuals for honorary degrees and distinguished service citations and selection of the 1978-79 National FFA Officers.

In addition to their duties on the convention floor, the delegates carry out responsibilities on special committees. The committees of delegates and adult leaders review and make recommendations to the National Organization on many activities including: leadership programs, finance of the organization, the national program of activities, national public relations activities, and many other aspects of the operation of the National Organization. After meeting with committee members and adult leaders, each committee chairman reports on his committee's findings and makes recommendations on the convention floor.

The delegates will be in session for the first time November 6. All business meetings are conducted by one of the six national officers and are interspersed with other activities such as guest speakers, presentation of awards and music by the National FFA Band and Chorus.

Delegates will meet for the last time on November 10, when the new National Officers take the oath of office. After a final call for official business, the 1978-79 national president will close the FFA's Golden Anniversary National Convention and the delegates will return home to report their activities to other FFA members in their state.

Commonwealth National Bank is first in agricultural loans

HARRSIBURG - Statistics compiled and recently released by the American Bankers Association (ABA), places Commonwealth National Bank, as the leading bank in Pennsylvania for agricultural loans. In the ranking by size of total farm loans, the ABA ranked Commonwealth National Bank 31st among the top 100 nationwide banks. As of December 31, 1977, the total amount of agricultural loans at Commonwealth National Bank, listed as $43,263,000., compared to $33,263,000. on December 31, 1976. The total agricultural loans were made directly through the bank as well as through it's wholly-owned subsidiary, Agri-Loan Corp.

Mr. Robert P. Bucher, of Lancaster, manager and treasurer of the subsidiary, noted the subsidiary serves agricultural customers in 20 southcentral Pennsylvania counties.

Apply lime in the fall for a better crop next summer

Fall liming assures proper limestone distribution in the soil ready for spring planting The freezing and thawing of winter aid in the process of limestone dissemination So why wait correct your soil deficiency now by liming and reap a bigger harvest next summer

FREY FREE STALL

LIFETIME FREE STALL HOUSING

Cut bedding costs 75 per cent, reduce labor for barn cleaning and cow washing, reduce teat and udder injury to the minimum — house your milking herd in free stall housing. Each cow provided a stall for loafing. She won't be stepped on, the rear curb forces manure out into alley for mechanical cleaning or washing. A few minutes twice a day cleans the stalls and curbs, bedding lasts almost forever if your stalls fit the cows Popular sizes are 6'6", 7' and 7'6" Size 'em by breed.

Our free stall partition may be mounted on wooden head boards or we make a steel divider Set the legs in 8 to 10' concrete curbs to hold and retain bedding Stall floor can be soil, sand or gravel Bedding — straw, sawdust, peanut hulls, ground corn cobs etc Should be installed with paved alley surface 8 feet wide for mechanical cleaning or washing

- 8 Models all steel welded farm & feedlot gates
- 2 Models all steel welded head catch gate

Farm co-op council reviews Capitol situations

WASHINGTON, D.C. - The National Council of Farmer Cooperatives, an association of farm cooperatives with offices in the nation's capital, reports the following news from Washington, D.C.

CO-OP INVESTMENT TAX CREDIT PASSED

Congress has passed and sent to the President a tax reduction bill which includes a provision extending the investment tax credit to farmer cooperatives The provision will allow co-ops to take the full 10 per cent credit for capital improvements, or pass through part of all of the credit to members, if the cooperative is unable to use it. Effective date of the credit is November 1, 1978. National Council of Farmer Cooperatives president Kenneth D. Naden estimates that tax savings from the credit should average $50 million per year for farmers and their cooperatives. He said it is one of the most beneficial and positive pieces of legislation passed for family farmers in recent years.

NATURAL GAS DEREGULATION APPROVED

Hard-fought attempts to deregulate natural gas ended in victory on October 15, when the House passed the Natural Gas Act (H.R. 5289) The measure would allow gas prices to rise by about 10 per cent annually until deregulation is reached in 1985 Until then, price controls would be extended from the interstate to the intrastate market Two important provisions for agriculture would: provide a priority for agricultural uses of gas during periods of supply shortage, and exempt agricultural uses from incremental pricing. Charles D. Hartman, NCFC energy vice president, said the priority provision should help insure gas supply for nitrogen production during heavy Winter-use periods.

LOCK & DAM 26 AUTHORIZED

A compromise worked out by Senate Finance Chairman Russell Long (D-La) has led to congressional authorization for a new Lock & Dam 26 on the Mississippi River The badly-deteriorating Alton, Illinois facility has impeded shipping of farm products on the Mississippi for many years Included in the legislation is a fuel tax levy for barge operations on all inland waterways The tax, starting at 4 cents per gallon in 1980, will increase to 10 cents per gallon by 1985. Money collected from the tax will be placed in trust to help finance future waterways improvement projects Construction of the new $421 million lock and dam can begin as soon as an environmental impact statement is approved by the federal courts.

TRADE EXPANSION ACT CLEARS CONGRESS

New credit incentives for foreign buyers of U.S. farm products were included in The Trade Expansion Act (S.3444) passed near the end of the 95th Congress. The bill includes new "intermediate" credits for U S. trading partners, with repayment up to 10 years. In addition, it extends CCC credit for the first time to the Peoples Republic of China The legislation also includes diplomatic initiatives It directs the USDA to open between six and 25 agricultural trade promotion offices in major markets abroad. And it would raise the diplomatic status of U.S. agricultural attaches in not less than 10 major foreign markets to the rank of Counselor. This would permit the attaches to compete on more equal terms with trade representatives of other countries.

PRESIDENT SIGNS PESTICIDE AMENDMENTS

A two-year debate on revising federal pesticide laws ended September 30 with the President's signing of amendments to the Federal Insecticide, Fungicide & Rodenticide Act. The amendments authorize up to $70 million to fund federal pesticide regulation through September 30, 1979. They also 1) clarify groundrules for compensation on research data needed to register pesticide labels; 2) give the states primary enforcement responsibility for pesticides; 3) provide for conditional registration of pesticides) and 4) permit more flexibility in using pesticides on pests and crops not noted on the registered label. Hopefully, the amendments will result in more efficient registration of pesticides essential to agricultural production.

TRADE NEGOTIATIONS FACE NEW ROADBLOCKS

Several last-minute actions in the 95th Congress created new hurdles for the multilateral trade talks underway in Geneva. An amendment to exempt textiles from the talks passed Congress, and now faces a Presidential veto Attempts to extend a countervailing duty waiver failed, further endangering the talks. However, some progress was made on grain talks, even though critical issues on size and cost-sharing of world wheat reserves are still to be resolved. And the dairy industry continues skeptical about the shape of the export subsidy/countervailing duty code under discussion in Geneva. Net result could be a delay of efforts to have a grade agreement framework in place by the Administration's December 15 target date Farmers and their cooperatives are keeping negotiators informed of their views in hope of achieving an agreement that will help U S agriculture, and avoid serious threats to our major markets abroad

NCFC's 50th ANNIVERSARY MEETING AT LAS VEGAS

The National Council of Farmer Cooperatives will hold its 50th anniversary meeting at the Aladdin Hotel, Las Vegas, January 9-11, 1979 Cooperative directors and executives from around the country will review legislative policies of the NCFC, and hear presentations on issues affecting the economy, international trade, antitrust, energy, transportation, and political action President Jimmy Carter has been invited to headline the meeting Other speakers will include leaders from Congress, the executive branch, the business community, and the media The meeting will also preview a new NCFC film on family farmers and their cooperatives which will be shown to the general public in movie theaters and on TV next year

NCFC MOVING OFFICES IN DECEMBER

Offices of the National Council of Farmer Cooperatives will move to the new headquarters building of the National Rural Electric Cooperative Association on December 2, 1978. Effective that date, the NCFC's address will be· 1800 Massachusetts Avenue, N W , Suite 604, Washington, D C 20036 Phone 202/659-1525 Also moving to the new location in early December will be the American Institute of Cooperation, the national educational arm for farmer cooperatives

Snyder gets third term as Pa. Grange Master

BUTLER – J Luther Snyder, of Harrisburg was re-elected to his third consecutive term as Master of the Pennsylvania State Grange in the closing sessions of the Grange's 106th annual sessions in Butler on October 27

Snyder is the sixteenth master to serve the Pennsylvania State Grange since it was founded in 1873. He was elected to the position at the state convention in Washington, Pa., in October 1974, and re-elected at a second two-year-term at the convention at Sharon in October 1976

When he completes his new term, he will not be eligible for re-election since State Grange by-laws limits a master's period of service to six years

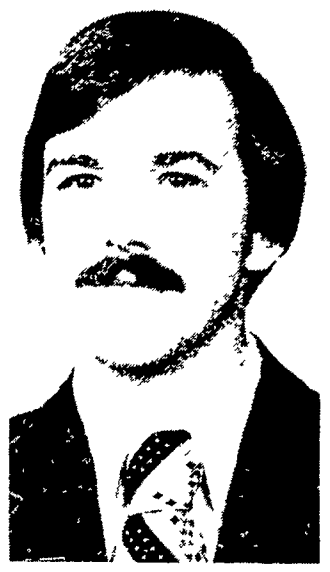
Before his election as master in 1974, Snyder had served eight years as secretary of the State Grange.

Snyder, who was born and raised on a farm in northern York County, has been active in the Grange for more than 30 years. He is a member of Valley Grange No. 1360 at Lewisberry, and the York-Adams Pomona Grange No. 40

Snyder's background also includes service in the U S Army from 1951 to 1953 He is 49 years old and married to the former Fae Ruth Vetter, of Mifflintown R2. They have five children, Anna May, Lou Ann, James L., Jr., Joyce, and Jennifer, all of whom are active in Grange work.

George Rodgers, was elected to the second highest post in the Grange, the State Secretary.

J. Luther Snyder



George Rodgers

Rodgers, who is 22 years old, has been active in the Grange since 1961 when he joined the Junior Grange at the age of five. He served as State Youth of the Year for 1974-75, and National Grange Youth of the Year for 1975-76.

In 1976 he was elected Assistant Steward of the State Grange at the convention in Sharon, and in January 1977 was appointed assistant to J. Luther Snyder, the State Grange Master, and has been handling legislative matters. A native of Lawrence County, he is residing at 5213 Terrace Road, Mechanicsburg.

Greenville, Lady Assistant Steward; John H Minor, Camp Hill, Treasurer; Robert Hollobaugh, Warren, Gatekeeper; Mrs. Elsie Springer, Towanda, Ceres; Mrs. Virginia Raisley, Butler, Pomona; and Mrs. Betty Master, Harrisville, Flora.

Other officers elected to State Grange posts include Robert E. Steese, Grove City, Overseer; Mrs. Mary Buffington, Chadds Ford, Lecturer; Kenneth Schlegel, Fleetwood, Steward; John Keith, Entriken, Assistant Steward; Gladys Fry,

Look to the Future with

ED ARNOLD

The People's Candidate for State Senate

Here are some issues Ed has talked about in this campaign

- Harrisburg desperately needs new leadership to clean up the corruption and mismanagement in state government.
- Specific highways in Lebanon, Berks and Lancaster Counties need improvement, now
- Property tax laws must be reformed to relieve the tax burden on the home owner and people on fixed incomes.
- The District needs a regional plan to preserve open spaces and prime farm land while improving its industrial base
- Good government begins with good people getting involved That means a full-time district office and regular visits to all parts of the district.

VOTE TO BRING STATE GOVERNMENT BACK TO THE PEOPLE VOTE FOR ED ARNOLD, NOVEMBER 7

Paid for by the Bi-Partisan Committee to Elect Ed Arnold to the State Senate

Alex Croce, Jr , treasurer Jackie Taylor, Manager

'Standing crops' signs available

FLEMINGTON, N.J. - Red cards, 9 by 10 inches in size, for posting fields with standing crops are available in the Extension Service Office, reports C.G. Wettstein, Hunterdon County Agricultural Agent. Printed and made available by the New Jersey Division of Fish, Game and Shellfisheries, these notices warn hunters against hunting in fields of unharvested crops. That will generally be soybeans and corn in Hunterdon this time of year, says the agent.

The notice refers to a State Fish and Game Law and indicates fines up to $500 and a loss of hunting license for two years.

Farmers are urged to pick up a supply of these notices to post their unharvested fields. And, hunters are urged to look carefully before crossing a field. Soybean plants are particularly brittle this time of year.

Harvest of beans is barely under way. Most field crop producers are still harvesting corn. Soybean harvest will follow.

Proper grain storage depends on temperature, moisture

NEWARK, Del. - This year grain yields are up and more grain will be going into storage following harvest. Many farmers added drying and storage facilities this year and they'll have a lot of concern about how well this grain holds up in storage.

Corn that is to be sold by Spring should be dried to 14.5 per cent before going into the bin. Corn that will be held into the Summer or longer should be dried to 13 per cent moisture. Since soybeans contain oil, they have to be stored at lower moistures - 14 per cent or below for short-term storage and 11 per cent for storage into Summer.

After grain is placed in storage, it should be kept cool with aearation. Aearation is a process of keeping dry grain at nearly the same temperature as the outside air to prevent moisture migration in the bin. During aeration a small amount of air - 1/10 to 1/5 cfm (cubic feet per minute) per bushel - is continuously pulled down through the grain and exhausted at the bottom of the storage bin to equalize temperatures in the grain mass.

Proper aeration reduces the risk of stored grain "going out of condition" from moisture migration, mold growth, and insect infestation. Aeration, however, will not protect grain that is not dried to a safe level before being stored, cautions Williams.

Dried grain placed in storage in the Fall should be cooled down to 40 degrees Fahrenheit by Winter. Begin cooling warm grain as soon as it goes into storage. Run the aeration fans continuously until the grain temperature is down to 70 degrees F. in September. The train temperature can be checked by holding a thermometer in the exhaust air stream. This is also a good place to smell the grain condition. Musty odors indicate spoilage.

An air flow of 1/10 cfm per bushel will take about a week of continuous running to change the grain temperature. One cfm per bushel will take 15 hours of continuous running to change the grain temperature.

Continue to cool the grain into winter. Cool to 60 degrees F. by the end of October 50 degrees F. by the end of November, and 40 degrees F. by the end of December. Then maintain the 40 degree F. temperature through March. Do not operate fans for extended periods when the outside temperature is below 30 degrees F. or the grain may freeze. Frozen grain can cause problems in the Spring.

After the grain is cooled down to the recommended average monthly temperature, check its condition once a week by running the fans for about 20 minutes. This permits you to check the temperature, smell for signs of spoilage, and bring fresh air into the bin. It is best to do this when the relative humidity is below 75 per cent.

To learn more about the design and operation of aeration equipment contact your county agent.

Cedar Crest FFA initiation held

LEBANON - The Cedar Crest FFA had a very active week recently. The week started with the initiation of the greenhands held at the Ammon Peiffer residence. The greenhands were required to go through a course specially designed to test their bravery. The initiation was concluded with food and fellowship in the Peiffer's home.

The members also had an opportunity to demonstrate their marksmanship at a trapshoot later in the week. The trapshoot was held at the Palmyra Sportsman's Club in Palmyra. Cedar Crest competed against the Annville FFA and won for the third year in a row in the annual event. Paul Miller was the high scorer with 16 hits and was followed closely by Lester Heinaman and Gary Reist with 15 hits each.

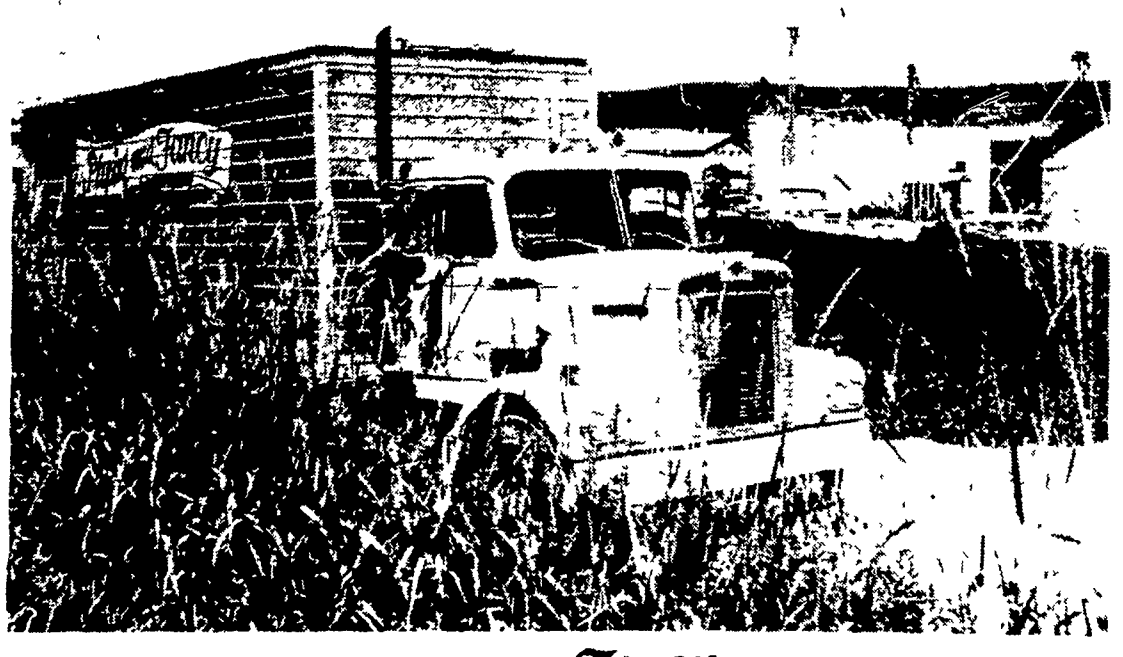
Good News Grain Farmers

Plain and Fancy Ag Enterprises Inc. has increased the size of its Tamaqua Grain Operation. This increase means greater ease of operation for you. Unload time is now 2,500 bu./hr., Storage Capacity is now 200,000 bu. and Trucking Services are also available.

If we can be of service to you, see us at RD 3, Tamaqua, PA 18252, or call us at 717/386-4597.



Plain and Fancy
AG. ENT. INC

WHAT'S NEW

CORN-CHOPPER

P.J. Zweegers en Zonen, a leading Dutch manufacturer of farm equipment sold worldwide, has announced the availability of its maizechopper (corn-chopper), the MH-80, throughout the U.S. Previously, the MH-80 was distributed on a test basis in selected American markets.

The design of the MH-80 incorporates a cutter and delivery system in one, with a high working speed providing the operator with a capacity of up to 35 tons an hour. In operation, the MH-80 is attached to the three-point linkage of a tractor, which supplies the main drive for the machine from its P.T.O. via four V-belts.

Specially shaped guides extending from the main body for 75 inches collect standing stalks and broken and lying stems and deliver them into the cutting and chopping unit. Cutting of stems is accomplished by the combined action of the feed drums and fixed knife. The knife is easily adjusted and quickly replaced when dull.

Chopping is accomplished by a high speed rotor fitted with 12 chopping knives which can be sharpened by the integral sharpening unit. The rotor spins at the rate of 1320 revolutions per minute. Cut silage is then blown through a delivery chute into a trailer either next to or behind the maizechopper. Chute adjustments are made from the tractor seat.

The P.T.O. input shaft is extended to the rear of the maizechopper to enable self-loading trailers to be operated and an adjustable hitch allows the use of tractors with P.T.O. above or below the draw bar.

"Our MH-80 can be fitted to any tractor with a three-point linkage," added Anton Zweegers. "For storage, the machine occupies very little space." The length of the machine is 7 feet, 6 inches, the width is also 7 feet, 6 inches and height with the chute is 11 feet. However, the delivery chute is detachable reducing the height to three feet.

The MH-80 and other agricultural machinery and implements by Zweegers, are available through local farm equipment dealers across the country or the company's U.S. distributors.

P.J. Zweegers en Zonen Landbouwmachinefabriek B.V., the company that invented the cyclomower in 1964, has been manufacturing and exporting high quality agricultural equipment for over 40 years. Its products, sold in over 66 countries and the U.S. since 1972, includes cyclomowers, haybobs, tedders, mechancial rakes, corn-choppers, crumblers, crop sprayers, fertilizer broadcasters and row sprayers.

For more information, please contact Harshe-Rotman & Druck, Inc. 300 East 44th Street, New York, N.Y. 10017.

York Farmers' Forum meets

AIRVILLE - Farmers' Forum of York County hosted a ladies' night at the Airville Fire Hall during their regular monthly meeting on October 27.

The evening program featured musical entertainment by country-gospel singers "The Happy Valley Boys and Delores."

Penn State Economist Lou Moore will be the speaker for the November meeting, set for Friday, November 17, at Rutter's Restaurant in Red Lion.

Over the years, one thing about Mol-Mix never changed.

Quality.

From the first day that Mol-Mix® was made, the people at National Molasses made it with quality ingredients because they knew a better-quality supplement would mean **more net profit** for the cattlemen who used it

Today, instead of decreasing or eliminating these quality ingredients because of shortages and higher costs, Mol-Mix has maintained the same level of quality that has made it the liquid leader

BUFFERED RELEASE IS JUST PART OF OUR QUALITY STORY

Occasionally, somebody finds out about one of our unique features and gets really excited about it For example, our **buffered release of urea ammonia,** heralded by other supplements as a brand-new innovation, **has been in Mol-Mix for years** to improve its protein-building efficiency And our performance-proven ingredients, like corn distillers solubles, condensed fermented corn extractives, phosphoric acid, and ammonium polyphosphate, have yet to be included in most other supplements!

Stop in soon We would like to demonstrate the dramatic results that Mol-Mix can bring to your herd in terms of performance and profits. We're not talking about something that will only add to your supplement costs we're talking about the bottom line

session will begin with "Reach Out Here Comes Tomorrow," a slide show and song that was developed for the FFA's Golden Anniversary and designed to stimulate additional interest in agricultural careers. Sponsors of the National FFA Foundation, Inc., will be recognized and Mr. Clarke A. Nelson, 1978 Foundation Sponsoring Committee Chairman, will give remarks on this year's drive for funds.

Always a highlight of the National FFA Convention, the naming of the Star Farmer and Agribusinessman of America will be Thursday evening. The Star Farmer and Star Agribusinessman of America awards recognize American Farmer Degree recipients who have developed the most outstanding farming or agribusiness program. A $1000 cash award is presented to the Star Farmer and the Star Agribusinessman of America at the conclusion of the "Stars Over America" pageant.

A busy morning session is scheduled for Friday as the convention draws to a close. At breakfasts in their honor, individual and team winners will be announced in the eight National FFA contests. On the convention floor, FFA Work Experience Abroad program participants who have travelled internationally will be introduced to explain how FFA members have gained work experience on farms and agribusinesses throughout the world. An address from Jerry Clower, a comedian from Yazoo City, Mississippi, will then be featured. Later in the session delegates will elect six national officers to represent FFA during the 1978-79 year.

Following an afternoon of participation in FFA Day at the American Royal Livestock and Horse Show, convention participants will return to the Municipal Auditorium for the final convention session. After the annual variety show featuring professional entertainment by The Firestone Tire & Rubber Company, National FFA President J. Ken Johnson of Nacogdoches, Texas, will deliver his closing address and a new slate of officers will be installed. The final adjournment of the convention, always an emotional moment, will follow.

On Saturday morning the National FFA Band will maintain a long-standing tradition by leading the American Royal Livestock and Horse Show Parade through the streets of Kansas City. It will be the final performance of the 1978 National FFA Band, signaling the conclusion of the Golden Anniversary National FFA Convention and the beginning of the American Royal Livestock and Horse Show.

York-Adams Grange to meet

RED LION - York-Adams Pomona Grange. 40 will meet Saturday, November 11, in the Red Lion Grange Hall, beginning at 2:00 p.m.

The afternoon program will be on "Thanksgiving" and "Americanism."

A covered dish supper will be served prior to the evening session. The evening program, under direction of Gladys Sheffer, lecturer, will begin at 7:45 p.m., with the "Happy Valley Boys and Delores" as featured entertainment.

The evening program is open to Grangers and guest non-Grangers.

"Test Cow is Purina's Super Energy, Super Value Milking Ration"...

Dr. J. F. Everett
Purina's Director
Dairy Research

"There are lots of so-called 'high energy' milking rations around that claim to have a high energy, high TDN content and at a low cost," says Dr. Everett. "The real measurement of a milking ration's value is the income it produces over feed cost, not the price.

"At the Purina Dairy Research Center, we are proud of Purina Test Cow . . . proud that it is available for America's dairymen. It is truly a "super" high energy ration. In fact, it contains the highest energy and lowest fiber of all Purina milking rations.

"I don't know of any milking ration I would recommend more highly."

Certainly all milking rations are not alike. So don't settle for less than the best. Ask us about Test Cow today.

Is your home ready for Winter?

NEWARK, Del. - Is your home ready to stand up against Old Man Winter?

To find out, start by checking around windows, doors, and frames for holes and cracks that may let cold air in, says Delaware Extension family living agent Pat Wilson.

Many small holes and cracks let as much heat escape as a large window would, so it's important to seal these up.

Caulking is an inexpensive method of sealing up cracks around windows, door frames, and chimneys. To caulk, first clean away any grease, dirt, or old caulking. Do this work early in the season or on a warm day, as the temperature must be above 45 degrees F., Ms. Wilson cautions.

The best caulking is the latex type. It isn't too expensive, and the seal will last five years or more. Small cracks can be filled with cord caulking.

Caulking is usually applied with a caulking gun, which works best on larger cracks. It makes the whole job very easy. Just apply the caulk by pushing the gun along in the direction of the crack. This makes the best seal.

Large or deep holes can first be filled with oakum - a rope-like material sold in hardware stores.

Weather stripping is another inexpensive method of winterizing your home. Check to see if your doors or windows need weather stripping by placing your hand near them on a windy day. If you feel air, you need weather stripping.

On windows, most of the air will come through the cracks at the top, bottom, and center where the windows meets the casing. You can place folded cloth or newspapers in these areas and close the window to make a tight seal.

If cold air still comes through the sides of the window, buy some felt hair weather stripping and take it along the edge where the window slides up and down. Felt hair is inexpensive, and it really stops air leaks.

Also check the casing all around the window. If there are open seams between the casing and the wall, tighten the casing with nails or screws, and caulk if you need to.

Cold air can also find its way into your home through the door. Keep it out by adding molding at the top and sides. Once this is in place, tack some felt hair weather stripping to the molding so the door will seal tightly when closed. The crack at the floor can be sealed with a throw rug or weather stripping made especially for doors.

For added protection against cold air, you may want to cover the outside of your windows with heavy gauge plastic. You can put the plastic on the inside of the window in hard-to-reach areas such as upper floor or apartment windows.

If you have a screened-in porch, it may also be wise to cover the screened area with heavy gauge plastic.

If your budget allows it, installing storm windows and doors is a wise investment which serves as a good alternative to weather stripping.

Keep in mind that your fuel bill could be decreased greatly if you winterize your home to keep the heat in and the cold air out.

Farm Credit to hold meeting

YORK - The Zembo String Band of Harrisburg, under the direction of Ronald W. Desenberg will provide the entertainment for the Annual Stockholders' Meeting of the Federal Land Bank and Production Credit Associations of York. This year's meeting will be held on Thursday, November 9, at the Embers Restaurant on Route 11, North of Carlisle. Registration begins at 6:15 P.M. and dinner will be served promptly at 7 P.M.

The election of four directors and 1979 Nominating Committee will take place with reports of association operations during the year presented.

The farmer-owned institutions make and serve farm and rural home loans in Adams, Cumberland, Franklin, Fulton, Perry, and York Counties.

These members are using their own institutions to obtain the long-term and operating credit required for modern day farm operations. The associations currently have 1800 loans outstanding in excess of $71,000,000.

Reservations must be made by Tuesday, November 7.

ALL SCALES STATE APPROVED

In trials... Seven veal feeding programs were compared... and you've got the winner!

In total gains, rate of gain and conversion rate, one program stood out above all others. That's the one on which Agway Veal Pre-Starter, Starter and Finisher are based.

The group on the winning program started at an initial average weight of 111.1 lbs. And finished at 349.00 lbs. An average gain of 237.9 lbs. With a feed conversion rate of 1.66 pounds of feed per pound of gain.

Agway Veal Pre-Starter, Starter and Finisher are made from top quality products. From top quality protein, 100% derived from milk products. From 100% animal fat. Because Agway knows that protein quality and fat source are where performance is. As the trials showed... quality pays off.

Every veal grower knows that prime veal depends on the quality and vigor of the calves, on proper housing, feeding management and sanitation. Do all of them right, and the line-up of Agway Veal Feeds can do a superior job for you.

For more information on a most profitable way to get into a most profitable market, call your local Agway.

Two Pa. FFA chapters win Gold Emblem awards

KANSAS CITY, Mo., — Superior performance in activities involving leadership, scholarship and community service have qualified 112 of the nation's most active chapters of the Future Farmers of America to receive that organization's National Gold Emblem Award.

Ceremonies conferring the award on those select few, chosen from the 8,148 FFA chapters in the nation, will be held in Kansas City at the National FFA Convention.

Chapters in Pennsylvania that will receive the gold emblem include Cloister Chapter, Ephrata; and the Northern Lebanon Chapter, Fredericksburg. Silver emblems will be awarded to the Grassland Chapter, New Holland, Headwaters Chapter Ulysses; Lehigh County Chapter, Schnecksville; Middleburg Chapter, Middleburg; Mifflinburg Chapter, Mifflinburg; and the H. G. Parkinson Chapter, McDonald.

Those qualifying for a bronze emblem include Grove City Chapter, Grove City; Little Dutchmen Chapter, Annville; and Twin Valley Chapter, Elverson.

The FFA's National Chapter Award encourages FFA chapters and members to actively participate in a wide variety of educational activities in vocational agriculture/FFA. In addition to the "Gold Emblem" presentations, a total of 112 chapters will receive the "Silver Emblem" award and another 144 will be honored with "Bronze Emblem" award.

Chapters earn the award for their activities in 11 areas of chapter involvement prescribed by the National FFA Organization. To be eligible for the National Chapter Award, FFA chapters submit an application listing their chapter's performance in the following 11 areas: supervised agricultural experience programs; cooperative buying, selling and assistance to members; community service; leadership development; sound programs of earnings, savings, and investments; proper conduct of meetings; scholarship; recreation; public relations; State and National activities; and Alumni relations.

The application form is judged first by the State FFA Association. Top State applications are then submitted for National evaluation. Each of the 50 State FFA Associations is permitted to enter two applications or 10 percent of the applications of chapters earning a superior rating in state competition. Judging of the award applications in national competition was conducted in Alexandria, Virginia, under the supervision of the National FFA Organization.

Chapters named for the National Chapter Award receive a special plaque or, in the case of those who have previously received a plaque, a spur for attachment to the plaque. The awards are provided by the National FFA Foundation, Inc.

WHAT'S NEW

GRAIN HANDLING EQUIPMENT

A manufacturer of portable grain augers for 30 years has introduced a line of grain handling equipment for loading and unloading grain bins.

Speed King Manufacturing Co., Inc., has announced introduction of six bin loading/unloading components: roof augers, vertical unloading augers, bin sweeps, incline unloading augers, horizontal and cross augers, and hoppers.

Accessories include center well hoppers, through well hoppers, tail spout hoppers, and 90 degrees through spouts.

Descriptive literature complete with specifications on the new line of grain handling equipment for bin loading and unloading is available by writing Speed King Manufacturing Co., Inc., P. O. Box 1438, Doge City, Kansas 67801.

Washington's farm 'experts' try to forecast prices

WASHINGTON, D.C. – The experts are planning to do some pretty important forecasting in Washington, D.C., starting November 13.

The forum will be the U.S. Department of Agriculture's (USDA) annual Food and Agricultural Outlook Conference. Since agriculture plays such a vital role in the U.S. economy, the experts will look at more than just food prices and the general economy. They'll also zero in on the outlook for individual agricultural commodities and food products.

The Department of Agriculture has been sponsoring an agricultural outlook conference for the past 55 years, but both character and content of the conference have changed greatly over time. The evolution of the annual conference into the high-profile, packed house it is today was a long and deliberate process.

The first conference took place in April 1923 when 20 men gathered behind locked doors in a USDA conference room. The locked doors were a caution against the effect their results would have on commodity markets. The men were attempting to decide whether the amount of acreage farmers claimed they were going to plant was in line with prospective demand in the upcoming year.

The need for a conference was confirmed at that very first meeting. In at least one case, they spotted a possible trouble spot. It looked like a prospective increase in tobacco acreage was out of line with probable demand. That would mean an oversupply of tobacco and resultant lower returns to tobacco farmers.

Almost from the beginning, pressure grew to provide more localized outlook information to supplement the national conference report. The early outlook researchers were aware that farmers were interested not only in the total national outlook, but also in how it applied to their individual localities and their individual farms.

"We can pass the buck on down to the individual farmers and tell them they'll have to figure that all out for themselves," said one of these early outlookers." "Or we can develop the outlook program to the point where we can answer those questions."

No one wanted to pass the buck. So shortly after they established the national conference, USDA outlook experts began seeking ways to increase the input from agricultural economists working throughout the country.

A group of nationally known economists and statisticians from outside the USDA drew up the first conference report. The second year, the outlook conference continued as a department affair, with no outside experts sitting on the committee. But the Washington agriculture department staff brought in USDA economists from its field offices, who could bring their knowlege of local conditions to bear on the final revision of the national reports. These economists were also responsible for adapting the outlook information to fit local needs. This led, in turn, to a series of analytical reports by commodity and thence to newsletters and other publications.

The desire at USDA to develop its outlook program to the point where it would be truly beneficial to farmers led to formation in the 1920's of year-round outlook services.

These services greatly changed the character of the national Agricultural Outlook Conference since an even flow of outlook material became available throughout the entire year instead of being bunched into one annual effort.

The scope of the annual conference was broadened further in the 1930's when the participants decided to take a good look at the significance and impact of economic and other factors on rural living. Year by year this family living component of the conference has grown in importance as the target audience has been broadened to include families in urban as well as rural residential areas.

In 1977, the conference's name was changed to the Food and Agricultural Outlook Conference in recognition of the current outlook's critical implications for U.S. families' diets, energy use, credit and housing needs, and other related subjects. And today's conference includes sessions on our natural resources, the environment, and the weather outlook.

But despite all these changes in scope and content, the conference's basic goal has remained the same down through the years. President Coolidge, keynoting the 1925 Agricultural Outlook Conference report, summed up the purpose rather well:

"Inasmuch as orderly production is a necessary preliminary to orderly marketing, the well-informed farmer must keep himself posted, months in advance, concerning the probable production of various (commodities) during the coming season, as well as the probable requirements of the market."

In keeping with this basic conference goal, "OUTLOOK '79" will be geared toward providing information needed by those who produce, process, and market our food and fiber products. The conference will include sessions on the outlook for major farm commodities, inputs, food prices, transportation and storage for agriculture, and inflation. There will also be a look at world developments affecting U.S. agriculture.

USDA experts feel both these topics and the consumer-oriented sessions reveal important trends people will want to know about, both as consumers and as concerned citizens.

In recent years, conference attendance has swelled to over 1,000 people, representing groups interested in or involved with U.S. food and fiber. The conference is open to the public (no more locked doors) and there is no charge to attend.

For an early guide to times and topics, send for a free copy of the preliminary program. Copies of the Conference Proceedings containing all the papers presented will be available (while supplies last) soon after the close of the conference. To receive either publication, send separate postcard requests to: Donnell Royster, USDA-ESCS, Room 0054, South Building, Washington, D.C. 20250.

Lancaster Co. Grange 71 meets

OAKRYN - Lancaster County Pomona Grange 71 met October 20 at the Fulton Grange Hall, Oakryn. Master Jesse Wood conducted the meeting.

Mr. and Mrs. Clifford Holloway, Jr. will be representing the Pomona for the "Shrine in 79" project for the National Grange when it comes to Lancaster, Pa. in 1979.

Pomona youth committee will be making a pennant for the National Grange.

Edward Zug was elected to the Executive committee for three years. Shirley Galebreath was elected to the Finance committee for one year, and Clifford Holloway, Jr. was elected to the finance committee for three years.

Peggy and Sandy Galebreath won first prize in the regional talent contest. They went on to the State Grange competition. Mildred Tindall had an art entry at State Grange, and Elaine Knight represented the Pomona at the State Youth Day.

The next meeting will be a dinner meeting on January 20, 1979, at 7:30 p.m. The place is to be announced.

Farmers' future clouded by excess production

ATLANTA, Ga. – U.S Sen. Herman E. Talmadge (D-Ga.) warned last week that the economic outlook for American farmers remains uncertain and urged the Carter Administration to put the brakes on excess production.

The chairman of the Senate Committee on Agriculture, Nutrition, and Forestry said the net farm income is expected to rise about $5 billion this year over last, to about $25 billion But he noted that the 1978 figure will be well below the $30 billion farm income peak of 1973.

"Much of this year's income growth is occurring in the livestock sector – a sector that has suffered for several years from extremely low prices and income," Talmadge said. "The crop sector will be receiving a lower income this year on average, so the aggregate income situation is not as bright as some would suggest"

Talmadge spoke at the concluding session of the National Conference of Farm Credit Directors meeting in Atlanta His remarks came about one year after the start of last Fall and Winter's nationwide farmer protest against a severe cost-price squeeze that resulted in economic hardship for many producers.

Talmadge said that in response to last year's agriculture crisis, Congress had broadened the new 1977 farm act to provide the Administration with ample authority to deal with farm income problems.

"Unfortunately, the Administration has shown great reluctance to use the authorities we gave it," Talmadge said. "What has been done has tended to be too little and too late. It was only the combined weight of American farmers and Congress that ultimately got any action."

Talmadge served notice that his Committee will 'maintain close scrutiny in the months to come over the agriculture situation." He also announced that Agriculture Secretary Bob Bergland would be asked to present "a full-scale assessment of the state of American agriculture" to the Committee as the first order of business in the new session of Congress in January.

"We will be prepared thereafter to take wheatever action may be needed to maintain a viable agriculture and to assure American farmers of a fair deal in the national economy," he said

Talmadge said excess production continues to plague the nation's agricultural economy. Fears of a possible world food shortage has made the Administration reluctant "to use existing authority to meet our most persistent agriculture problem – excess production." Talmadge stated

Herman Talmadge

Stocks still are building to unacceptable high levels," Talmadge said. "We must bring production into line with demand. We must do this not only to bolster farm income, but to prevent the waste of national resources that accompanies excessive production.

"I acknowledge that this may be a somewhat novel view But excess agriculture production is indeed a wasteful misallocation of resources It is a waste of soil and water resources It is a waste of energy to produce more products than we need It is a waste of taxpayers money when we have government programs to support unneeded production."

Talmadge noted that the nation's corn and feedgrain farmers currently are harvesting a record crop. He predicted corn carryover stocks will increase as much as a half billion bushels – to around 1 5 billion

"This is a price depressing surplus," Talmadge said. "I think it is imperative that the Secretary take this into account in formulating next year's program.

"I urge Secretary of Agriculture Bergland and President Carter to exercise the authority that Congress has given them to achieve a sound balance between production and need. Otherwise farmers will continue to suffer financial hardship without any corresponding benefits to consumers"

Fulton Grange holds meeting

OAKRYN – Fulton Grange No. 66 held their semi-monthly meeting October 23rd, at the Grange Hall, Oakryn. Overseer, Thomas Chas. Galbreath, presided.

Among the thirteen members of Fulton Grange attending the State Grange meeting were Peggy and Sandra Galbreath who participated in the talent contest. They placed first in vocal competition and were accompanied by Douglas Bonsall. Their selection was "Bless This House." They had previously taken part in the regional and district eliminations at Kutztown.

Mrs. David Knight acted as Flora when State Grange youth filled the State Grange offices for the Wednesday morning session of the Pa. State Grange.

Mrs. Charles Tindall Sr. took part in the State Grange art contest.

Fulton Grange is sponsoring Miss Allison Appleget, Peach Bottom, in the Miss Solanco contest. Charles McSparran and Mrs. William Rhoades were selected to represent Fulton Grange at the annual board meeting of the Southern Lancaster Company Family Health Center November 21.

Mrs. J. Stanley Stauffer presented the program for the Lecturer, Mrs. Thomas Galbreath, who was attending State Grange Program theme was "October." Mrs. Tommy Galbreath, Mrs. Dewitt Bacorn, C G McSparran, Irene Zug and Kristen Stauffer participated in the program.

Ceres, Mrs. Gerald Kreider, and Pomona, Mrs. William Taylor, will be in charge of Corn and Pie Night at the next meeting on November 13. Farmers are asked to bring corn exhibits which will be judged in best single ear and best ten ear classes. The Grange ladies are to bring pies in apple, plain or spiced pumpkin classes. Earl Mull, Quarryville, will be the speaker. He will tell of his experiences combining wheat from Texas to Canada and show some pictures he took

Oley FFA dairy cattle team will try for national title

OLEY – Three members of the Oley Valley FFA Chapter will travel to Kansas City, Mo. next week to participate in the National FFA Dairy Cattle Judging Contest The contest, which is held in conjunction with the 51st National FFA Convention is being sponsored as a special project of the National FFA Foundation by the Associated Milk Producers, Inc

Members of the team are Wendy Shaw, Steve Shaw, and Scott Hauseman, all students at Oley Valley High School in Oley. Carl W Blank, vocational agriculture instructor and chapter advisor is the team coach.

The Dairy Cattle Contest is one of eight national agricultural contests conducted annually by the National FFA Organization as part of the National FFA Convention. The Oley Valley team will be one of 43 dairy teams which will judge nine classes of dairy cattle provided by the American Royal Livestock and Horse Show of Kansas City, Missouri They will give oral reasons on several classes of dairy cattle. The contest is one of many educational activities at the National FFA Convention in which FFA members put into practice the lessons taught in the vocational agriculture classroom.

Each of the teams competing in the Dairy Cattle Contest participated in contests at the local, area, and state levels, and won at each level in order to earn the trip to Kansas City As teams progress to area, state and national contests, the competition becomes more difficult. The Oley Valley team spent many hours preparing for the national contest.

Travel expenses for the trip to Kansas City will be paid in part by the Associated Milk Producer, Inc., which is sponsoring the National FFA Dairy Cattle Contest as a special project of the National FFA Foundation, Inc. The sponsor also is providing money for administration of the contest and awards breakfast, as well as for trophies and medals awarded to winning teams and high scoring individuals

Awards will be presented to winning teams and high scoring individuals at an awards breakfast to be held on Friday morning, November 10. The contest winners will be introduced to the convention audience at the Friday morning business session.

Oley Valley FFA members who will represent Pennsylvania at the National FFA Dairy Cattle Judging Contest are, left to right, Scott Hauseman, Wendy Shaw and Steve Shaw.

Trapping season opens

HARRSIBURG - Pennsylvanians are reminded by the Game Commission that the trapping season for skunks, oppossums, raccoons, foxes and weasels will begin on November 5.

Trapping begins on the first day of the season at 7 a.m.

The opening date for trapping mink and muskrat will be on Thanksgiving Day, Thursday, November 23.

Supplies of most furbearers are believed to be good generally, despite somewhat depressed muskrat populations, and prices paid for pelts have been at an all-time high in recent years.

Upwards of 700,000 furbearers are expected to be trapped during the upcoming seasons During the 1976-77 marketing year a record $6.1 million went to Pennsylvania trappers for skins purchased by dealers in the state

Pelts of furbearers are usually prime by early November, and with populations and prices being as high as they are, there should be plenty of trapping activity prior to the end of the season for skunks, opossums, raccoons, foxes and weasels on January 31.

Six to receive VIP citations

KANSAS CITY, Mo.-Six persons have been named to receive "VIP Citations" for service to the Future Farmers of America. The awards will be presented at the Thursday morning session of the FFA's Golden Anniversary Celebration at the 1978 National Convention in Kansas City, Missouri. The six named by the National FFA Board of Directors and National Officers to receive the award are: Dr. Ralph E. . Bender of Canal Winchester, Ohio; L C. "Hap" Dalton of Las Cruces, New Mexico; Donald N. McDowell of Madison, Wisconsin; Virginia Nicholson of Arlington, Virginia, and Mr. and Mrs. Marvin Myers of West Lafayette, Indiana.

The VIP Citation was created in 1970 to recognize individuals who have received the Honorary American Farmer Degree yet have continually and faithfully served the FFA.

This year's citation recipients have worked tirelessly, often at their own expense, to see that young men and women have the opportunity to participate in FFA activities.

The presentations will be made during a special ceremony and each of the individuals being honored will receive a specially engraved plaque. Those to be honored are:

Dr. Ralph E. Bender - former professor and chairman of the Department of Agricultural Education at The Ohio State University in Columbus, Ohio.

L.C. "Hap" Dalton, who retired in 1975, devoted his entire professional life of 45 years to public education. Mr. Dalton taught vocational agriculture for 15 years and was New Mexico's State Supervisor of Vocational Agriculture for 25 years, and 1970-75 was Assistant Professor of Agricultural Engineering at New Mexico State University.

Donald N. McDowell is Executive Director of the FFA Foundation Sponsoring Committee. As Executive Director of the Sponsoring Committee since 1969, he has increased funds for administering FFA incentive and awards programs from $250,000 to $900,000.

Mr. and Mrs. Marvin Myers have gone far beyond the call of duty in seeing that young people are appropriately selected and prepared for the National FFA Chorus since 1968. Marvin Myers with the help of his wife, Grace, has coordinated and directed the National FFA Chorus for 10 years.

Virginia Nicholson was Administrative Assistant to the National FFA Advisor and served over 30 years as a faithful government employee and was greatly dedicated to Vocational Agriculture and the FFA.

WHAT'S NEW

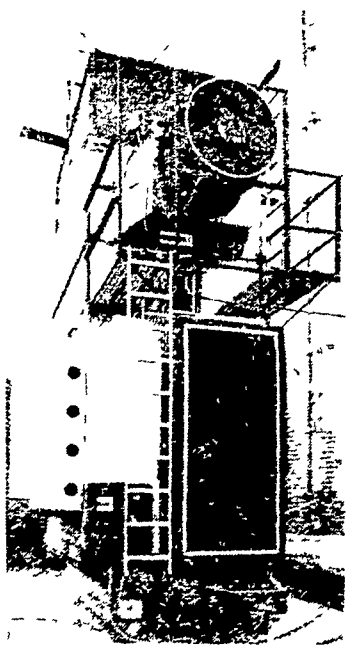
MIXER-FEEDER

B.J. Manufacturing Co., Inc., of Dodge City, Kansas announces the introduction of their new model 1910 trailer-mounted mixer feeder.

Designed for the farmer-feeder and dairyman, the new model 1910 has a mixing capacity of 190 cubic feet and a low profile to facilitate loading. Utilizing the basic three auger system used in the BJM line of mixer feeders, the model 1910 mixer feeder body reflects a clean, stylized design, says the manufacturer.

Standard equipment on the BJM 1910 includes a twin auger 32 inch wide discharge conveyor, 3/16 inch high strength bottom, a hydraulically operated discharge door and conveyor spout, an enclosed oil bath drive and a 3 point electronic scale system.

B.J. Manufacturing has been building livestock mixing and feeding equipment since 1961. They are the originators of and own the patents on the three auger mixing systems. Other BJ models in the line of mixer feeders and feeders include the 3312, 3914, 4416, and 5018, each offered for truck, trailer, or stationary applications. For more information on the 1910 and other models of mixer feeders and feeders, contact: B.J. Manufacturing Co., Inc., P.O. Box 370, Dodge City, Kansas 67801, (316) 227-8173.



PRE-HEAT MODULE

A Pre-Heat Module has been introduced by Behlen Manufacturing Company as an add-on for Behlen model 700 and 350 continuous dryers to increase drying capacity and reduce per bushel operating expenses

In-field testing has shown that the Pre-Heat Module will increase drying capacity up to 33 per cent while reducing fuel cost by as much as 10 per cent, says the Behlen Company

The seven-foot high unit can be used with new or already existing four-column Behlen continuous dryers Equipped with a 15 hp heat blower the Pre-Head Module incorporates a drying chamber and a steeping chamber where grain is permitted to "sweat" without air movement. This process allows the grain to condition itself to higher drying temperatures and to expel moisture at an even rate, thus resulting in increased grain quality and lower energy drying.

For more information on the Behlen "Pre-Heat Module" write: Behlen Manufacturing Company, Columbus, NE 68601

IRRIGATION SYSTEM

Ag-Rain, Incorporated announces the newest addition to their traveling sprinkler irrigation line, the WW-3000M. The new mid-sized Water-Winch is designed to irrigate areas up to 50 acres. The WW-3000M travels up to one-quarter mile, and at a typical travel lane spacing of 250 feet it will irrigate 7½ acres at one setting. Water is supplied to this traveler through up to 660 feet of 3-inch irrigation hose giving the unit a capacity of 150 to 250 gallons per minute. Travel speed range is 12 to 60 inches per minute making it possible to apply from about one-quarter inch to more than two inches of irrigation water per pass. The WW-3000M has most of the proven features of the larger Ag-Rain travelers including the exclusive Ag-Rain patented quiet running dependable radial inflow turbine drive, says the manufacturer.

For more information, please contact Ag-Rain, Inc., 600 S. Schrader Ave., Havana, Illinois 62644.

New Jersey 4-H doings posted

EASY RIDERS CLUB

A trip to the National Horse Show in NYC on Nov. 2 highlighted the future plans of the Easy Riders 4-H Horse Club, reports Nancy Haver, the club reporter. They held their monthly meeting at the Town & Country Bank in Clinton on October 23.

During the business meeting they discussed the teen leader programs, barn inspection, and speakers for the coming year. Robyn Stoner was named chairman of the scrapbook committee, and Tissy Dahan, chairman of the refreshment committee.

THE CHERRYVILLE HOMEMAKERS

Cherryville Homemakers 4-H Club held their first meeting of the year at the Lefebvres of Flemington. Their new leaders for this year are Heidi Zipfel and Doris Lefebvre.

The members of the club were very pleased with the results of 4-H Carnival Night and the 4-H Scrapbook Contest. The booth received a prize for being the most attractive while the scrapbook won the second place award in the contest.

The officers for the coming year are: President, Karen Soltys, secretary, Dawn Ponzio, treasurer , Shirley Lefebvre, and club reporter Ericka Zipful.

One new member, Julianne Radnai, joined the club.

A new 4-H Club with primary project interest of pigs has been organized in Hunterdon County. Still without a name the group has been berought together by Leo DeRonde of Lebanon, to raise pigs for fun and profit. The members have already planned to travel to Harrisburg, Pa. on November 4 to attend the major auction sale of pigs. Any boy or girl between the ages of 9 and 19, who is interested in joining this group to learn more about pigs, is invited to attend their next meeting on November 8 at 7:30 pm at the Hunterdon County Extension Center. For additional information, please call Leo DeRonde at 609-236-2314. Adults with an interest in pigs or livestock in general will also be welcomed to help this club get organized and develop activities.

WHAT'S NEW

BOOKS ON CONCRETE FLOORS

Two publications which together provide complete information on concrete floors for single- and multi-story construction are available from the Portland Cement Association.

"Concrete Floors on Ground" is a 12-page how-to book covering the design, construction, and maintenance of concrete floors. Among the topics covered are: concrete quality, adequate structural capacity, type and spacing of joints, workmanship special surface finishes, and future maintenance and repairs. This new publication sells for $3.00.

The recently revised "Concrete Floor and Roof Systems, Materials and Cost Estimating Guide" provides material quantities, average U.S. construction costs, and other information to help the reader choose the most economical floor and roof systems for specific multi-story buildings. This 14-page book contains charts, U.S. cost indexes, and price trends to help predict future unit prices. The cost is $2.50.

To order these publications contact: Order Processing Portland Cement Association, 5420 Old Orchard Road, Skokie, Illinois 60077.

Moscow's Subways

While Moscow's subway system is less than half the size of New York's, it carries more passengers The Russian system includes marble-columned stations lit by chandeliers and handles five million riders daily

Farming then and now - it's still a way of life

By JERRY WEBB
University of Delaware

NEWARK, Del. – When did farming become strictly business and cease to be a way of life? I'm not real sure that this has happened but everyone who is not a farmer and knows anything about farming says that's the way it has to be. That farming can no longer be a way of life in the hard-nosed business environment where it now must operate.

The farm as I knew it as a small boy no longer exits. I'm sure of that. The pre-war machines are rusting in junk piles. The men who ran them are old or have passed on and the horses I loved are no more. Farming to me then was strong, honest men, sweating horses, rattling farm wagons and creaking harness, the smell of new hay, iron-wheeled tractors that started with cranks and Model A trucks. All of those things are gone except for the honest men. And there are a lot fewer of them now.

It's easy to romanticize about farming - to think how wonderful and good it was then and how bad it is now. To some extent, however, it's true. There was a lot of good back then. Things like hard work for men and boys toiling side by side bucking hay bales or shocking wheat. Drinking cold water out of a wooden keg kept under a wet tow sack, listening to men talk about horses and fast cars and Saturday night in town and how to fix a flat tire and how many bushels of wheat they could lift.

There were other good things that made farming a way of life. Things like hearty meals around a huge round table, washing up at a backyard pump, attending a one-room school and riding a horse instead of a fancy school bus.

The good old days included some bad things like very little hard money, hand-me-down clothes, tramping loose hay in a burning hot loft, picking corn by hand in December, milking cows without a machine, shocking barley, sacking grain at the thresher with the wind in the wrong direction, hoeing weeds.

Time and progress have changed a lot of the things I remember about farming – both good and bad. But I'm not sure that many farms have crossed over into the cold world of business. The farmers I meet talk about their independence, the right to choose, being their own boss, making things grow, raising a family on the land, keeping the soil. They gripe about low prices and tell you they work for less than the legal minimum wage. Yet they wouldn't trade it for a corporation desk and a good salary.

Talk to a farmer about what he likes about farming and he tells you about everything but the business side of things. He hates office work, does it only when he has to – would rather plow than figure profit and loss and feels better in denim than in flannel.

Farming is strictly business to a few farmers. I've visited some of those places and found them lacking. The operators live in towns and commute to the fields. There are few, if any, buildings, machinery is left in the field or under a tree, weeds grow everywhere – taller than the crops, white paint is nowhere to be seen. These farmers may make more money but they seem to enjoy it less.

Compare that to the farmer who has the education to do other things but likes to farm. To him it's more than a business. He greets each day with enough enthusiasm to milk cows at 6:30, do a full day's work in the field or orchard and then attend a farm gathering that night.

He's not rich but he does eat choice meat every day with little concern over rising food costs. He goes hunting on his own farm, looks out of his barn door at open space and doesn't worry about his kids becoming juvenile bums. There's honest work for them as soon as they are big enough. He has enough machinery to take the drudgery out of farming and enough hard work to keep him on the farm.

Would he give it up for the security of a job? Not likely as long as he can make a living. Nor will he scramble so hard to make a buck that he forgets why he's a farmer. Sure, it's a business and he has an office. He also has a suit. He wears the suit when he goes somewhere special and he uses the office when he has to or when everything else is done.

He and others like him to stay with farming because it's what they want to do. They know it's a business but they aren't forgetting that it's also a way of life.

PUBLIC SALE

Grant says Carter's inflation program fails to tackle real inflation cause

WASHINGTON, D.C. - President Carter's anti-inflation program is "good as far as it goes but fails to come to grips with the real cause of inflation - massive deficit spending by government," says Allan Grant.

Grant is president of the American Farm Bureau Federation, the nation's largest general farm organization.

"As major victims," Grant says, "farmers and ranchers understand the causes of inflation. The Carter program, when fully developed, should treat those causes, of federal deficit spending and regulatory excesses, rather than the wage and price symptoms."

Allan Grant

He points out that the cost of simply conforming to government regulations now costs American businessmen in excess of $100 billion a year.

"Relaxing these obviously inflationary pressures will be a great step toward easing the load on all Americans...businessmen, consumers and farmers alike," he adds.

As an immediate step, Grant proposes disbanding the Occupational Safety and Health Administration completely.

"OSHA is a prime example of a tremendously costly federal operation that has done little or nothing to meet the real needs of the people," Grant says. "Those millions of dollars, now being misspent on bureaucracy, should be working in the economy, and there are thousands of other excuses that must be halted to get us back on the proper economic track."

Auto Service Tips

Some car owners always believe the carburetor is at fault any time there is indication of poor engine performance Surveys indicate 80 per cent of the time the fault lies with other problems — a plugged PCV system, leaky manifold or bad valve Check all problem sources before dismantling carburetor

It's time to put the bird feeders out again

Here is information that is for the birds

By LYNN HERSHEY
University of Delaware

NEWARK, Del. – "Can roadrunners fly?" I asked, flipping through the latest issue of **Arizona Highways** magazine.

"Certainly – from road to road," said my husband from the depths of his newspaper "That reminds me," he added, "it's about time to put the bird feeders out for the winter."

We live out of town in a wooded area, so birds are part of our life and we love them. Bird books and field glasses lie beside the salt and pepper on the breakfast table When migrating Canada geese fly over our house, we drop everything to run outside and listen to their raucous gabbling as they travel overhead in wing formation. About 15 varieties of birds are our steady customers, while many other varieties drop by for an occasional snack. One year two dozen evening grossbeaks settled in for the entire Winter – a rare treat.

As our fascination with birds has grown, so has our collection of feeders. What we really operate is a bird cafeteria. My husband often gets involved in long conversations with the owner of a shop specializing in birdy things He will spend a large sum on a new feeder, then redesign it so the birds will like it better You might say he is a bird-brain in the truest sense – he thinks like a bird.

As Winter approaches many people will be putting up feeders in their yards John Linehan, U.S. Department of the Interior ornithologist stationed at the University of Delaware, says you can attract a variety of birds by placing feeders at different locations and levels. For example, ground-level feeders attract birds such as sparrows and even pheasants. Chickadees and woodpeckers like higher feeders. However, you don't really need feeders at all Just spreading food on the ground will lure many varieties

The best foods for attracting birds include a variety of seeds and grains – sunflower seed, peanut hearts, cracked corn, wheat, millet, canary seed, black (Niger) thistle. (We don't use corn because it attracts too many voracious nuisance birds such as grackles) An occasional addition of suet, peanut butter, dried bread crumbs, and fruit peelings will provide a well-balanced diet for wintering birds. Many also enjoy fruit – berries, raisins, apple sections, cranberries. Mockingbirds are especially fond of orange sections. Some bird-lovers collect wild Summer fruits, freeze them, and put them out for a wintertime treat.

Grit, such as sand or fine gravel, should also be provided. And don't forget water. Birds may have trouble finding it during the Winter when ponds and streams freeze A pan or bucket will do, but be sure the water level is high enough so that the birds can perch on the edge and drink To keep the water from freezing, you might want to invest in a small thermostatically controlled bird bath heater. They're available for under $15.

If you start feeding the birds this Winter, Linehan says it's important to continue until Spring because wild birds become dependent on feeders. Some may even stay over the Winter because of the feeder. So if feeding is suddenly stopped, they may not be able to find enough food and could starve Keep this in mind if you go on a Winter vacation. Ask a neighbor to keep your feeders filled.

A good field guide to birds will help identify your Winter visitors and greatly add to your enjoyment of them You'll be surprised at the different species that will show up over a period of several months. Many excellent guides are available. Linehan particularly likes **Birds of North America** by Robbins, Bruun, Zim and Singer, an inexpensive, nicely illustrated paperback,

Bird-watching is one of the fastest-growing hobbies in America. Why not find out why? The best place to start is right in your own yard.

Carter fails as inflation fighter

By ROBERT WALKER
Pa. Congressman, 19th District

Many of you heard President Carter deliver his address to the American people last week in which he outlined his plan for dealing with the economy and inflation. The President should be praised for the attitude he displayed when he spoke about the pressing need to cut the cost of government and move toward reductions of the federal deficit.

However, in my opinion, the President's plan does not go far enough even though it is on the right track. He spoke of reducing the federal budget deficit to 30 billion dollars. What he should be attempting to do is balance the federal budget immediately in order to effectively fight inflation.

At the very least, federal spending must be cut back to the point that it is growing no faster than the rate of inflation. Under no circumstances should government be permitted to grow faster than our economy which will be the case when we are faced with a 30 billion dollar budget deficit despite the fact that this figure is a reduction from the current deficit levels. Until the Carter Administration agrees to limit the growth of government to a level compatible with the rest of the economy, government will remain as a major part of the inflation problem.

The wage and price guidelines proposed by the President will be very bad for the average working American. It is important to note that " guidelines with sanctions" really equal controls. While working Americans face wage controls of this nature, which I totally oppose, there will be no controls on rent, interest rates, food or foreign oil because, and I agree, controls in these areas are impossible to implement and enforce. But it means that while workers' wages are frozen, the cost of living will go up. The result will be that the artificial wage level proposed by the President will be in unfair competition with inflation. Working people already carrying the inflation burden will be hit even harder.

While the President's proposals may have sounded good on the surface, in fact they will amount to increased government economic regulation and an increased role for government in our economic future.

In order to squeeze compliance to the guidelines out of a business community, new regulations and government oversight will have to be a part of the President's program.

In other words, the President's proposals amount to big government solutions to a problem caused by big government. It is time we look instead to solutions which promise and deliver less government.

Red Lion Grange news

RED LION – The Red Lion Grange. 1781 will hold a Bake, Soup, and Indoor Sale at the Grange Hall, Saturday, November 18, beginning at 10:00 a.m: Carry-outs will be available, but you should bring your own container. A selection of Christmas articles will be on sale indoors.

Franklin County MCMP members to vote on capital retain program

CHAMBERSBURG - A special meeting of the Franklin County members of the Maryland Cooperative Milk Producers, Inc. will be held Monday, November 6, at the Lighthouse Restaurant, Chambersburg, to consider the possibility of amending the by-laws. The meeting will begin with a 7:00 o'clock dinner.

The special membership meeting will be held in conjunction with the normal annual district membership meeting. During the special meeting the members will consider the adoption of a proposed amendment to the by-laws. The amendment will come before the membership with the approval of the board of directors and if passed would allow for the creation of a capital per unit retain program to help finance special needs of the cooperative. After the adjournment of the special meeting the regular meeting will be convened.

The program for the regular business meeting will include reports by the Cooperative's President, Herbert Wessel; the Business Manager, Ralph Strock; Assistant Manager, Boyd Cook; District Director, M. Dice Statler; and local field representative, Jay Waybright.

The reports will relate to national and local production, sales and price trends, coordination of efforts among cooperatives to better serve the market and milk producers, and the current status of the Holly Milk Plant. Additionally, the Cooperative's financial condition will be reviewed including its operating divisions.

The MCMP District No. 8 includes all of Franklin County and has about 50 member-producers. The representative on the MCMP Board of Directors for District No. 8 is Mr. Dice Statler, Chambersburg, R.D.6. The field representative is Jay Waybright, Littlestown, Pa.

The Maryland Cooperative Milk Producers, Inc. is the largest Maryland based dairy cooperative representing over 1,000 dairy farmers in Maryland, Virginia, Pennsylvania, and West Virginia.

The Annual District Membership Meetings are extremely important as an information source for member-producers and all are urged to attend.

Top FFA community projects selected

KANSAS CITY, Mo. - Outstanding community action efforts by chapters of the Future Farmers of America (FFA) will be recognized when the Building Our American Communities (BOAC) Awards are presented at the 1978 National FFA Convention next week.

BOAC Awards will be presented to 150 of America's 8148 chapters during the Thursday morning session of the FFA's Golden Anniversary Celebration at the 1978 National Convention to be held in Kansas City, Mo. November 7-10. The BOAC program is sponsored by Lilly Endowment, Inc., Indianapolis, Ind as a special project of the National FFA Foundation, and honors chapter efforts to make their communities better places to live and work.

Twenty-eight chapters with the most comprehensive community action programs will be presented National Gold Emblem Awards, the top award in the BOAC program. One hundred and twenty-two other FFA chapters will receive National Silver and Bronze Awards for their efforts in community development. During the Convention one of the twenty-eight National Gold Emblem chapters will be selected to receive the National Citation for the best community improvement program in the nation.

Pennsylvania FFA chapters selected to receive recognition are Clearfield, Penn Manor and Northern Lebanon - all bronze emblem awards.

In New Jersey, The Camdem Tech and Hunterdon Hills Chapters earned bronze emblems. Maryland chapters to be recognized were Boonesboro and Hereford, both of which will be awarded the bronze emblem. Delaware's Saddle and Grate Chapter will be presented with the gold emblem award.

Christian counseling class to begin

BROWNSTOWN – The Brownstown Christian Counseling Center is beginning the Basic Institute of Christian Counseling. This course is designed to give a basic working knowledge of the fundamental principles of Christian counseling. This course will discuss the difference between biblical and secular counseling. The institute will also provide a basic knowledge and insight in dealing with people that have counseling needs.

The first class of the Institute of Christian Counseling will begin November 13, 1978. A certificate will be issued upon successful completion of this course.

For more information please contact the Brownstown Christian Counseling Center at 859-3056.
